Instruction: Lectures and practical exercises in the functional operation to block diagram level of a fleet ballistic missile fire control system on the 598 or 608 class SSBN submarine. Topics include meters, oscilloscope and hand tools to perform routine preventive maintenance, equipment alignment and repair, safety procedures, troubleshooting techniques to recognize and interpret malfunctions, basic corrective maintenance to the subsystem level following documented procedures for systematic fault isolation, and the removal and replacement of faulty modules.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics laboratory (9/77).

NV-1715-0212

FIRE CONTROL TECHNICIAN CLASS C, TARGET DESIGNATION SYSTEM (TDS) MK 5

Course Number: A-121-0095; A-121-095.

Location: *Version 1:* Service Schools Command, Great Lakes, IL. Service Schools Command, Bainbridge, MD.

Length: *Version 1:* 9–10 weeks (255–300 hours). *Version 2:* 12 weeks (360 hours).

Exhibit Dates: *Version 1:* 4/67–12/73. *Version 2:* 2/65–3/67.

Objectives: To train fire control technicians to operate and maintain the Mk 5 target designation system at an advanced level.

Instruction: Lectures and practical exercises in the maintenance of the Mk 5 designation indicator, including instruction in electronics and circuitry used in radar and television, mathematical analysis of circuits; theory, construction, and operation of the designation indicator and associated equipment; testing and calibration; alignment data computation; and adjustment and repair.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in basic communications laboratory (6/75). *Version 2:* In the vocational certificate category, 2 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, credit in electricity or electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0213

FIRE CONTROL TECHNICIAN CLASS C, TARGET DESIGNATION SYSTEM MK 6

Course Number: Not available.

Location: Service Schools Command, Great Lakes, IL.

Length: 6 weeks (180 hours).

Exhibit Dates: 2/68–1/88.

Objectives: To train fire control technicians to operate, maintain, and repair the Mk 6 target designation system.

Instruction: Lectures and practical exercises in the maintenance of a specific target designation system, including instruction in electronics and circuitry used in radar and television, mathematical analysis of circuits; theory, construction, and operation of the designation indicator and associated equipment; testing and calibration, alignment data computation, and adjustment and repair.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0214

F-8 AN/APQ-83B RADAR INTERMEDIATE MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 10/70–1/88.

Objectives: To train enlisted personnel with a knowledge of transistors to maintain and repair the AN/APQ-83B radar system at an intermediate level.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/APQ-83B radar set group, including theory of operation of the power supply circuit; receiver and transmitter circuits; use of oscilloscope, range tracker, antenna, and various computers; and alignment and troubleshooting of the radar and associated equipment using pertinent test equipment. Course is specialized.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0215

Advanced Airborne ELINT Evaluator

Course Number: E-2D-074.

Location: Fleet Airborne Electronics Training Unit, Pacific, San Diego, CA.

Length: 2 weeks (70 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train officers to evaluate, locate, and analyze threat and non-threat radar emitters and to apply the concepts of electronic surveillance measures (ESM).

Instruction: Lectures and practical exercises in concepts, intercept procedures, and applications of electronic surveillance systems, including review of electronic warfare principles, review of radar and ESM equipment fundamentals, aircraft and equipment capabilities and limitations, methods and procedures of data collection, and the evaluation of mission results.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0216

Fire Control Technician Class C, Gun Fire Control System (GFCS) Mk 56 and Target Designation System Mk 5

Course Number: Not available.

Location: Service Schools Command, Great Lakes, IL; Service Schools Command, Bainbridge, MD.

Length: 20 weeks (600 hours).

Exhibit Dates: 2/68-1/88.

Objectives: To train fire control technicians to operate, maintain, and repair the Mk 56 gun fire control system and the Mk 5 target designation system.

Instruction: Lectures and practical exercises in the operation and maintenance of the integrated Mk 56 gun fire control system and the Mk 5 target designation system, including theory, components, and operation of the specific equipment; operation of gyroscopes; operation of analog computers; computation of alignment data; and mathematical analysis of electronic circuits for power supplies, radar, and antennas.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, credit in electrical/electronics laboratory on the basis of institutional evaluation (12/68).

NV-1715-0217

Ground Controlled Approach Electronics Maintenance (Radar Set AN/FPN-36), Class C

Course Number: C-103-2016.

Location: *Version 1:* Air Technical Training Center, Millington, TN; Air Techical Training Center, Memphis, TN. *Version 2:* Air Technical Training Center, Glynco, GA.

Length: *Version 1:* 2-3 weeks (100-120 hours). *Version 2:* 4 weeks (160 hours).

Exhibit Dates: *Version 1:* 3/74-12/83. *Version 2:* 6/71-2/74.

Objectives: To train electronics technicians to operate and maintain an AN/FPN-36 radar installation.

Instruction: Lectures and practical exercises in the operation and maintenance of a complete AN/FPN-36 radar installation, including the antenna system, transmitter and receiver group, remoting equipment, indicator group and quadradar siting, control systems, amplifiers, power requirements, generators, radar positioning and runway survey, and testing and adjustment.

Credit Recommendation: *Version 1:* Credit is not recommended because of the military-specific nature of the course (2/81). *Version 2:* In the vocational certificate category, 3 semester hours in circuit analysis and troubleshooting (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in circuit analysis and troubleshooting (3/74).

NV-1715-0218

1. Mk 56 Gun Fire Control System (GFCS) Maintenance, Class C1
2. Fire Control Technician Class C, Gun Fire Control System (GFCS) Mk 56

Course Number: *All Versions:* A-113-0014. *Version 2:* A-113-0025.

Location: Service School Command, Bainbridge, MD; Service School Command, Great Lakes, IL.

Length: *Version 1:* 18 weeks (540 hours). *Version 2:* 12 weeks (236-360 hours).

Exhibit Dates: *Version 1:* 5/77-1/88. *Version 2:* 2/68-4/77.

Objectives: To train fire control technicians to operate, maintain, and repair the Mk 56 gun fire control systems equipment.

Instruction: *All Versions:* Lectures and practical exercises in the maintenance of the Mk 56 gun fire control system and associated equipment, including components, gyroscopes; testing, calibration, adjustment, and repair of systems equipment; and mechanical, electrical, electronic, and electromechanical computing devices and circuitry for associated system computers. *Version 2:* Topics include mathematical analysis of circuitry.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electronic systems maintenance (9/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (9/77). *Version 2:* In the vocational certificate category, 6 semester hours in electronic systems maintenance (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in circuitry and 1 in electrical laboratory (6/75).

NV-1715-0219

Fire Control Technician Class C, Gun Fire Control System (GFCS) Mk 68

Course Number: A-113-0016.

Location: Service Schools Command, Great Lakes, IL.

Length: 21-23 weeks (690-725 hours).

Exhibit Dates: 1/65-1/88.

Objectives: To train fire control technicians to operate, maintain, and repair the Mk 68 gun fire control system.

Instruction: Lectures and practical exercises in the maintenance of the Mk 68 gun fire control system and associated equipment, including mathematical analysis of electronic circuits for power supplies; radars; antennas; gyroscopic principles; calibration; casualty analysis and repair; and components.

Credit Recommendation: In the vocational certificate category, 3 semester hours in analog computers and 3 in radar (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in analog computers and 1 in radar (6/75).

NV-1715-0220

Gun Fire Control System (GFCS) Mk 68 Maintenance

Course Number: J-113-0105; J-113-1052.

Location: Fleet Combat Direction Systems Training Center, Atlantic, Dam Neck, VA.

Length: 4 weeks (140 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train fire control technicians to operate and maintain the Mk 68 gun fire control system.

Instruction: Lectures and practical exercises in the maintenance of the Mk 68 gun fire control system, including components, preventive maintenance, test equipment, adjustments, use of the system dynamic tester and error recorder, and operation of specific subsystems and associated equipment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0221

Gun Fire Control System (GFCS) Mk 37/TDS Mk 5 Maintenance, Class C1

(Fire Control Technician Class C, Gun Fire Control System (GFCS) Mk 37 and Target Designation System (TDS) Mk 5)

Course Number: A-113-0024; A-113-024; A-113-0036; A-113-036.

Location: Service School Command, Great Lakes, IL; Service School Command, Bainbridge, MD.

Length: 23-25 weeks (690-781 hours).

Exhibit Dates: 2/68-1/88.

Objectives: To train fire control technicians to operate, maintain, and repair the integrated Mk 37 gun fire control system and the Mk 5 target designation system.

Instruction: Lectures and practical exercises in the operation and maintenance of the Mk 37 gun fire control system and the Mk 5 target designation system, including components, testing and repair procedures, and theory of operation of director, radar, and computer equipment.

Credit Recommendation: In the vocational certificate category, 3 semester hours in radar systems maintenance (9/77).

NV-1715-0222

RA-5C AN/AAS-21 Infrared Detecting Set Intermediate Maintenance

Course Number: C-102-3747.

Location: Air Maintenance Training Detachment, Albany, GA.

Length: 6 weeks (240 hours).

Exhibit Dates: 11/69-1/88.

Objectives: To train enlisted personnel to operate and maintain the AN/AAS-21 infrared detecting set.

Instruction: Lectures and practical exercises in infrared fundamentals, Stefan-Boltzman law, IR receiver and recorder theory and design; video-synchronizer-spike detector circuits operation and purpose; recorder data flow, filters and optics circuits, self-test and power control circuits; receiver video-synchronization-filter circuits; recorder section design and theory of video and film speed circuits; and laboratory techniques for alignment and troubleshooting.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory (3/74); in the upper-division baccalaureate category, credit in electricity or electronics on the institutional evaluation (3/74).

NV-1715-0223

RF-4B AN/APN-159 Radar Altimeter
Maintenance

Course Number: C-102-3837; C-102-199.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/70–1/88.

Objectives: To train maintenance personnel to service, maintain, and troubleshoot the AN/APN-159 radar altimeter system.

Instruction: Lectures and practical exercises in AN/APN-159 radar altimeter system theory of operation; frequency-generating circuits; receiving, computing, and special circuits; and maintenance, troubleshooting, bench check-out, trouble analysis, alignment, and safety precautions.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electricity or electronics on the basis of institutional evaluation (3/74).

NV-1715-0224

RA-5C Electronic Reconnaissance
Organizational Maintenance

Course Number: C-102-3743; C-102-294.

Location: Air Maintenance Training Detachment, Albany, GA.

Length: 2–3 weeks (80–120 hours).

Exhibit Dates: 4/69–1/88.

Objectives: To train naval fleet maintenance personnel to analyze, maintain, and troubleshoot the AN/AAS-21 infrared detecting set, AN/APD-7 side-looking radar (SLR), and AN/AYA-1 signal data converter group systems.

Instruction: Lectures and practical exercises in infrared detecting set, side-looking radar, and signal data converter group systems analysis, maintenance, and troubleshooting, including signal data converter group, data converter, and data translator systems introduction; accessories and test equipment, video amplifiers, and optics system description; infrared detecting set, including infrared principles, major components, and operation and testing procedures; and side-looking radar set block-diagram analysis, antenna system, cooling and pressurization, fuel circuitry, and operation and testing procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0225

RF-4B AN/AAS-18 Infrared
Reconnaissance Mapping System
Intermediate Maintenance

Course Number: C-100-3834.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 4/71–1/88.

Objectives: To train maintenance personnel to maintain, service, and troubleshoot the AN/AAS-18 infrared reconnaissance mapping system.

Instruction: Lectures in infrared systems introduction; system functional block diagram; optical and cooler systems; self-test and correction circuits, and circuit analysis of video, sweep, and servo, and film drive circuits; and bench checks, alignment, and trouble analysis of infrared reconnaissance mapping system.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory (3/74).

NV-1715-0226

AN/ASB-1A Radar Sub-System
Intermediate Maintenance

Course Number: C-111-3702.

Location: Air Maintenance Training Detachment, Alameda, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 3/73–1/88.

Objectives: To train naval fleet maintenance personnel to maintain, troubleshoot, and repair the AN/ASB-1A radar subsystem.

Instruction: Lectures in radar system components, symbols, and specifications; radar presentations; gyroscope assembly; antenna; block analysis of tunable radar; transmitter timing, modulation, RF, and tuning; receiver section RF and AFC networks; IF and video circuits; servo control amplifiers and display circuits; power supply, antenna, and synchronizer circuits maintenance; and radar system preventive and corrective maintenance procedures.

Credit Recommendation: In the upper-division baccalaureate category, credit in electricity or electronics on the basis of institutional evaluation (3/74).

NV-1715-0227

1. AN/AYK-2 Navigation Computer Group and OA-1768A Plotter Board Group Intermediate Maintenance
2. SH-3A/D Automatic Navigation System (AN/AYK-2) Intermediate Maintenance
(SH-3 AN/AYK-2 Navigation System Intermediate Maintenance)

Course Number: C-102-3397.

Location: *Version 1:* Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, North Island CA. *Version 2:* Air Maintenance Training Detachment, Imperial Beach, CA; Air Maintenance Training Detachment, Quonset Point, RI; Air Maintenance Training Detachment, Key West, FL; Air Maintenance Training Detachment, Ream Field, CA.

Length: 4 weeks (152–160 hours).

Exhibit Dates: *Version 1:* 1/80–Present. *Version 2:* 9/67–12/79.

Objectives: To train naval maintenance personnel with backgrounds in electronics to operate, calibrate, test, align, and maintain the SH-3 (SH-3A/D) helicopter's automatic navigation system at the intermediate level.

Instruction: *All Versions:* Lectures and practical exercises in automatic navigation system introduction; AN/AYK-2 computer group theory and maintenance; DA-1768A display plotting board group, theory of operation and maintenance; and operation and maintenance procedures for memory and indicator groups. Instruction includes synchro fundamentals review and computer inputs. *Version 1:* Instruction includes aerial navigation, synchro fundamentals review and computer inputs relating to plotter operation.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in synchro and differential generators, 1 in aircraft electrical navigation equipment (3/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical control systems (3/82). *Version 2:* Credit is not recommended because of the military specific nature of the course (3/74).

NV-1715-0228

RF-4B AN/ASN-46/56 Navigational
Computer and Inertial
Navigation System Intermediate
Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel to troubleshoot, maintain, and repair AN/ASN-46/56 navigational computer and inertial navigation systems.

Instruction: Lectures and laboratories in ASN-46 systems and operating procedures; introduction to trigonometry and resolver theory; test bench procedures, system hookup, and component test procedures; theory of operation and purpose of navigational computers; platform test sets, gyro tests, and bias procedures; and theory of operation and purpose of inertial navigation systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electricity and electronics on the basis of institutional evaluation (3/74).

NV-1715-0229

Transceiver AN/URC-32 Maintenance
(Enlisted)

Course Number: F-101-013.

Location: Submarine School, Groton, CT.

Length: 3 weeks (90 hours).

Exhibit Dates: 8/67–12/68.

Objectives: To train enlisted personnel to operate, maintain, and repair AN/URC-32 transceiver sets.

Instruction: Lectures and laboratories in an introduction to single-sideband theory; power supplies and distribution; functional block diagram of SSB transmit circuits, audio and control units, sideband generators, and power amplifiers; tuning and AM transmitting circuit analysis; CW transmit-and-receive mode of operation; FSK transmit-and-receive mode analysis; and transceiver malfunctions.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0230

Carrier Air Traffic Control Center
Equipment Maintenance
AN/SPN-41, Class C1

Course Number: C-103-2023.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN; Air Technical Training Center, Glynco, GA.

Length: 7–9 weeks (280 hours).

Exhibit Dates: 6/72–6/83.

Objectives: To train electronics technicians to operate and maintain the AN/SPN-41 radar transmitting set.

Instruction: Lectures and practical exercises in AN/SPN-41 radar transmitting set operation and maintenance, including system block analysis; power distribution; elevation stabilization; azimuth stabilization; solid-state devices; integrated circuits and logic symbols and circuits; elevation drive, coding, and transmitting; fault circuitry; azimuth drive, coding, and transmitting; RF and test set monitors; and system alignment and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronic systems repair (2/81).

NV-1715-0231

SH-3A AN/AQS-10 Sonar Intermediate Maintenance
(SH-3A AN/AQS-10 Sonar Maintenance)

Course Number: Not available.

Location: Air Maintenance Training Detachment, Ream Field, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to service and maintain the AN/AQS-10 sonar and to understand its function and operation.

Instruction: Lectures and practical exercises in sonar fundamentals; AN/AQS-10 introduction; bench and line test equipment, including counters, oscilloscopes, and transducers; block-diagram and circuit analysis of transmitter, projector, converter, and AGE systems; power supply and distribution system operation; transmitting and receiving sections, including sweep generator, timing circuits, special-purpose cable, transducer, converter, IF and AGC amplifiers, and phase comparators; display section, including video and audio circuits, synchros and resolvers; electrostatic cathode ray tube operation; and cable control, calibration, and troubleshooting procedures.

Credit Recommendation: In the upper-division baccalaureate category, credit in electricity or electronics on the basis of institutional evaluation (3/74).

NV-1715-0232

Ship's Inertial Navigation System (SINS) Mk 2 Mod 6 Theory and Maintenance I
(Ship's Inertial Navigation System (SINS) Mk 2 Mod 6 Control Theory)

Course Number: A-193-0296; A-193-0262; F-193-086.

Location: *All Versions:* Submarine Training Center, Charleston, SC. *Version 1:* Naval Submarine School Groton, New London, CT.

Length: 2 weeks (60-80 hours).

Exhibit Dates: *Version 1:* 2/78-Present. *Version 2:* 11/72-1/78.

Objectives: To train navigation electronics technicians to operate and maintain the Mk 2 Mod 6 ships inertial navigation system (SINS).

Instruction: Lectures in the sequencing, development, and distribution of the Mk 2 Mod 6 SINS equipment power, and in the functional operation and detailed circuit analysis of data transmission loops, binnacle circuitry, temperature controls, mode selection circuitry, PAD/PAP mode control circuitry, diagnostic electronics, tape reader, gyro torquing electronics, and system alarm circuitry.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in electromechanical maintenance and repair laboratory (3/81). *Version 2:* In the vocational certificate category, 1 semester hour in electricity and electronics (3/74); in the upper-division baccalaureate category, credit in electricity or electronics on the basis of institutional evaluation (3/74).

NV-1715-0233

1. 3D Radar Search AN/SPG-39A
2. AN/SPS-39A Radar Operation and Maintenance (AN/SPS-39 Radar Maintenance)
3. AN/SPS-39 Radar Set (AN/SPS-39A Radar Set)

Course Number: A-104-0103; A-104-098.

Location: Guided Missiles School, Dam Neck, VA; Fleet Anti-Air Warfare Training Center, San Diego, CA.

Length: *Version 1:* 21 weeks (786 hours). *Version 2:* 15-20 weeks (600-622 hours). *Version 3:* 20 weeks (600 hours).

Exhibit Dates: *Version 1:* 11/83-6/88. *Version 2:* 3/69-10/83. *Version 3:* 1/68-2/69.

Objectives: To train enlisted personnel to operate and maintain the AN/SPS-39A radar system.

Instruction: For this course after 6/88 see NV-1715-1390. *All Versions:* Lectures and practical exercises in AN/SPS-39A radar system operation and detailed functional description, including power distribution, synchronization function, transmitter, receiver, antenna and antenna positioning, slant range converter, plan position indicator, range height indicator, and stabilization converter. *Version 1:* Includes troubleshooting of equipment using analog and digital circuitry, discrete semiconductor, programmable operational amplifier, TTL circuitry and bipolar memories (256 bit).

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in digital troubleshooting laboratory, 3 in microwave troubleshooting laboratory, 3 in electronic troubleshooting laboratory (11/83). *Version 2:* In the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 3:* In the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0234

Carrier Air Traffic Control Center Equipment Maintenance AN/SPN-44, Class C1

Course Number: C-103-2024.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN; Air Technical Training Center, Glynco, GA.

Length: 3 weeks (120 hours).

Exhibit Dates: 6/72-1/84.

Objectives: To train electronics technicians to maintain and operate AN/SPN-44 radar sets.

Instruction: For this course after 1/84 see NV-1715-1431. Lectures and practical exercises in introduction to radar sets, safety precautions, receivers/transmitters, power supplies and distribution, Doppler processors, servo systems, communications and indicators, recorders, performance monitors, and maintenance and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (2/81).

NV-1715-0235

Surface Sonar AN/SQS-56 Operations

Course Number: K-130-0214.

Location: Fleet Anti-Submarine Warfare Training Center, San Diego, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 9/85-Present.

Objectives: To train personnel in the operation of a sonar detecting and ranging set.

Instruction: Course includes a study of the controls, indicators, and functional description of the sonar system. Includes power up and power down procedures, use of displays, system operation under emergency conditions, and operator maintenance.

Credit Recommendation: Credit is not recommended because of the miltary specific nature of the course (7/86).

NV-1715-0236

Carrier Air Traffic Control Center Equipment Maintenance, Radar Set AN/SPN-43, Class C

Course Number: C-103-2014.

Location: *Version 1:* Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN. *Version 2:* Air Technical Training Center, Glynco, GA.

Length: 6-8 weeks (200-240 hours).

Exhibit Dates: *Version 1:* 9/74-1/87. *Version 2:* 2/69-8/74.

Objectives: To train electronics technicians to operate and maintain AN/SPN-43 radar sets.

Instruction: For this course after 1/87 see NV-1715-1430. Lectures and laboratories in transmitters/modulators, including control circuits, power supplies, timing generators, trigger shapers and modulators, sensor and AFC circuits, wave-guide systems, cooling systems; receiver circuits, including mixer and local oscillators, parametric amplifiers, AFC circuits, high-frequency amplifiers, IF filters, video amplifiers, and power supplies; antenna stabilization and train systems; and maintenance and troubleshooting procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in troubleshooting communications circuits (2/81). *Version 2:* in the upper-division baccalaureate category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0237

SH-3A AN/APN-130 Doppler Radar Navigation Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Ream Field, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train enlisted personnel to operate and maintain the APN-130 Doppler navigation radar as used in SH-3A helicopters.

Instruction: Lectures and practical exercises in familiarization with the APN-130 radar, including receiver-transmitter units, power supply, data converters, and maintenance and troubleshooting procedures.

Credit Recommendation: In the upper-division baccalaureate category, credit in electricity or electronics on the basis of institutional evaluation (3/74).

NV-1715-0238

RA-5C Semi-Automatic Test Equipment, Programmer and System Analyzer Intermediate Maintenance

Course Number: C-100-3741.

Location: Air Maintenance Training Detachment, Sanford, FL.

Length: 6 weeks (240 hours).

Exhibit Dates: 9/67–12/68.

Objectives: To train maintenance personnel to repair semiautomatic test equipment.

Instruction: Lectures and laboratories in operation of system analyzers; familiarization with control panels, power distribution and air conditioning, test procedures, signal relay assembly, test number readout, comparators, ADC comparison, counter timers, printer electronics, and test point monitors; and line maintenance, field repairs, tests, and adjustments on semiautomatic test equipment.

Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0239

Radar Set AN/SPG-53F With AN/SPG-53A Differences Maintenance C1
(Mk 68 Gun Director and AN/SPG-53F Radar Maintenance)

Course Number: A-113-0072.

Location: Service School Command, Great Lakes, IL.

Length: 16–20 weeks (450 hours).

Exhibit Dates: 3/75–Present.

Objectives: To train students with prior electronics training to perform fault isolation and maintenance on specific radar equipment, using appropriate test sets.

Instruction: Instruction in the operation, troubleshooting, maintenance and alignment of the AN/SPG-53F radar system.

Credit Recommendation: In the vocational certificate category, 3 semester hours in radar systems laboratory (1/82).

NV-1715-0240

RF-4B AN/ASQ-90 Airborne Data Annotation System Maintenance

Course Number: C-102-3835.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To train maintenance personnel to maintain and repair the AN/ASQ-90 airborne data annotation system.

Instruction: Lectures and practical exercises in a review of binary and logic symbols; operating procedures, block-diagram analysis, power supplies, multivibrators, servo systems, shaft position encoders, latch generators, D/A converters, electronic counters, data display indicators, parity generators, and retrace control as applied to the airborne data annotation system; and troubleshooting and maintenance procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0241

SH-3 AN/ASA-13A Navigation System Intermediate Maintenance
(SH-3A AN/ASA-13A Navigation System Mantenance)

Course Number: Not available.

Location: Air Maintenance Training Detachment, Key West, FL; Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/69–1/88.

Objectives: To train maintenance personnel to maintain, repair, and functionally test AN/ASA-13A navigation systems at the intermediate maintenance level.

Instruction: Lectures and practical exercises in SH-3 navigation systems; functional block diagrams; functional operation and maintenance of computer groups, plotter groups, and memory and indicator groups; and system test and adjustment.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/74).

NV-1715-0242

SSBN Navigation Data Assimilation Computer Mk 2 Mod 4, Stabilization Data Computer Mk 2 Mod 1
(SSBN Naval Data Assimilation Computer (NAVDAC) Mk 2 Mod 4, SDC Mk 2 Mod 1)

Course Number: A-193-016.

Location: Guided Missiles School, Dam Neck, VA.

Length: 23 weeks (805 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To train electronics technicians to operate, maintain, and repair navigation data assimilation computers, navigation control consoles, stabilization data computers, and optical star tracker periscopes.

Instruction: Lectures and practical exercises in celestial navigation; pneumatic, oil, and hydraulic systems; periscope optical systems; complex servomechanism theory; relay-controlled sequencing systems; optical monitoring and error determination techniques; general computer principles and techniques; circuit block-diagram analysis; fault isolation techniques; series, parallel, and analog input techniques; special-purpose, digital-to-analog output theory; serial digital output theory; and serial input/output and display devices.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0243

S-2D/E AN/AKT-19A Multi-Channel Jezebel Relay Intermediate Maintenance

Course Number: C-102-3611.

Location: Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 12/70–1/88.

Objectives: To train maintenance personnel to operate, maintain, troubleshoot, and align AN/AKT-19A multichannel Jezebel relay systems.

Instruction: Lectures and laboratories in multichannel Jezebel relay systems; circuit analysis of subassemblies, antenna couplers, control indicators, and multiplexer-transmitters; test and alignment procedures; and fault isolation.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/74).

NV-1715-0244

S-2E AN/ARC-94 HF Receiver-Transmitter System Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To provide maintenance personnel with an overall knowledge of AN/ARC-94 high-frequency transceivers.

Instruction: Lectures and laboratories in theory of operation and troubleshooting of AM/audio amplifier modules, IF and RF translator modules, auto-tune systems, power amplifier modules, electronic control amplifiers, RF oscillators, frequency divider modules, frequency stabilizer modules, power supply, mode selectors, and chassis circuitry as applied to the AN/ARC-94 high-frequency transceiver.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0245

Guidance System, Mk 3 Mod 0, Operation and Maintenance

Course Number: F-121-061.

Location: Submarine Training Center, Charleston, SC.

Length: 4 weeks (160 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To train enlisted personnel to operate and maintain the Mk 3 Mod 0 guidance system.

Instruction: Lectures and practical exercises in organization, content, and use of Mk 3 Mod 0 guidance system technical documentation; signal interface between seven tactical subsystems; detailed functional description of each subsystem, including circuit analysis and logic flow; special tools and test equipment functional operation; and system maintenance procedures.

Credit Recommendation: In the vocational certificate category, credit in electricity or electronics on the basis of institutional evaluation (3/74).

NV-1715-0246

Sonar AN/SQS-23 D-L Series Maintenance

Course Number: K-130-0139.

Location: Fleet Anti-Submarine Warfare Training Center, San Diego, CA.

Length: 18 weeks (428 hours).

Exhibit Dates: 9/85–11/87.

Objectives: To train personnel as maintenance technicians to perform preventive and corrective maintenance on a sonar set.

Instruction: General instruction in principles of DC and AC circuits, uses of capacitors, inductors and semiconductor diodes and transistors, associated circuits and servo systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and 3 in basic electronics (7/86).

NV-1715-0247

Introduction to the Airborne Loran AN/ARN-81 Maintenance
(AN/ARN-81 Loran Intermediate Maintenance)
(C-2A AN/ARN-81 Loran Intermediate Maintenance)

Course Number: C-102-3043.

Location: Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, Patuxent River, MD.

Length: 3-4 weeks (120-160 hours).

Exhibit Dates: 1/68-Present.

Objectives: To train maintenance personnel to maintain and service the AN/ARN-81 long-range (Loran) navigation system.

Instruction: Lectures and laboratories in Loran system theory, timing circuits, display circuits, troubleshooting, and alignment of a military Loran receiver.

Credit Recommendation: In the vocational certificate category, 3 semester hours in avionics or marine electronics (7/81).

NV-1715-0248

AN/APD-7 Side Looking Radar Intermediate Maintenance
(RA-5C AN/APD-7 Side Looking Radar (SLR) Intermediate Maintenance)
(RA-5C Side Looking Radar (SLR) AN/APD-7 (XN-1) Shop Maintenance)

Course Number: C-100-3747.

Location: Air Maintenance Training Detachment, Albany, GA; Air Maintenance Training Detachment, Sanford, FL.

Length: 5-6 weeks (200-240 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train fleet maintenance personnel to troubleshoot, repair, and maintain AN/APD-7 side-looking radar systems.

Instruction: Lectures and practical exercises in operation and maintenance of transmitters, receivers, recorder systems, and associated systems and circuitry of the side-looking radar system; and use of dual-trace oscilloscopes, multimeters, and associated test equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0249

AN/VRC-46 and RT-46 Transceiver System Maintenance
(AN/VCC-2, AN/VRC-46 and AN/SRA-60 Telephone-Telegraph Communication System)

Course Number: A-101-0063.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: *Version 1:* 2 weeks (80 hours). *Version 2:* 3 weeks (90 hours).

Exhibit Dates: *Version 1:* 8/80-Present. *Version 2:* 2/74-7/80.

Objectives: To train enlisted personnel to maintain AN/VCC-2, AN/VRC-46 telephone equipment.

Instruction: *Version 1:* Lectures and laboratory exercises in a radio transceiver system including operation, maintenance, alignment and troubleshooting. *Version 2:* Lectures and laboratories in maintenance and material management, and in AN/VCC-2, AN/VRC-46, and AN/SRA-60 telephone-telegraph communication system familiarization, operation, functional analysis, and maintenance.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic troubleshooting (5/82). *Version 2:* In the vocational certificate category, 3 semester hours in electronics laboratory (11/77).

NV-1715-0250

Transmitter AN/WRT-4 Combined Maintenance
(Special Communications Equipment AN/WRT-4 Maintenance)

Course Number: A-101-0106; L-101-028; F-101-0021.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Ballistic Missile Submarine Training Center, Charleston, SC.

Length: 4-5 weeks (120-150 hours).

Exhibit Dates: 5/67-1/88.

Objectives: To train enlisted personnel to operate and maintain AN/WRT-4 communications equipment.

Instruction: Lectures and practical exercises in AN/WRT-4 communications equipment maintenance, including principles of operation; descriptive treatment of components, including block-diagram analysis, power supply operation, circuits, oscillator, generator, and output divider; and equipment troubleshooting and maintenance techniques. Troubleshooting of vacuum tube and transistor subsystems is taken to the component level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic engineering technology laboratory (9/77).

NV-1715-0251

AN/WRA-3 Combined Maintenance
(Special Communications Equipment AN/WRA-3 Maintenance)

Course Number: A-101-0105; L-101-029.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 4-5 weeks (120-150 hours).

Exhibit Dates: 5/67-1/88.

Objectives: To train maintenance personnel to operate and maintain AN/WRA-3 communications equipment.

Instruction: Lectures and practical exercises in AN/WRA-3 operation and maintenance, including descriptive treatment of components, block-diagram analysis, and maintenance and troubleshooting procedures. Equipment serviced is vacuum tube or tube/transistor hybrid. Extensive troubleshooting techniques are taught using noise generators, oscilloscopes, VTVM, frequency counters and frequency generators to repair the equipment to the component level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic engineering technology laboratory (9/77).

NV-1715-0252

CONALOG Maintenance Norden (Enlisted)

Course Number: A-623-0032; F-623-025.

Location: Submarine School, Groton, CT.

Length: 6 weeks (180 hours).

Exhibit Dates: 4/68-1/88.

Objectives: To train enlisted personnel to maintain and calibrate the CONALOG system and associated test and auxiliary equipment.

Instruction: Lectures and practical exercises in the maintenance of the CONALOG system and associated test and auxiliary equipment, including block diagram of closed-circuit television systems, introduction to AN/USM-105A oscilloscopes, primary power distribution and low-voltage power supply, circuit analysis of display generation systems and circuits, system overhaul, video processor circuits, and course-computing and control circuits; roll, trim, and servo data flow; depth computation and control circuits; and alarm circuits data flow.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics or electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics or electronics laboratory (3/74); in the upper-division baccalaureate category, credit in electronics or electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0253

CONALOG (Norden) Refresher Maintenance and Troubleshooting

Course Number: L-191-011.

Location: Fleet Submarine Training Facility, Pearl Harbor, HI.

Length: 3 weeks (105 hours).

Exhibit Dates: 7/68-1/88.

Objectives: To train interior communications electricians to operate and repair the Norden CONALOG system on FBM submarines.

Instruction: Lectures and practical exercises in the operation and repair of the Norden CONALOG system on FBM submarines, including use of the Tektronic 545 B oscilloscope, function of the John Fluke meter, circuit tracing, operation and alignment of the CONALOG system equipment, and troubleshooting procedures. Course designed to update previous training and skills.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory, and additional credit in electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0254

AN/ACQ-2/2A Data Communications Systems and Associated Test Set Equipment Intermediate Maintenance
(E-2A AN/ACQ-2 and AN/ACQ-2A Data Terminal Sets Intermediate Maintenance)

Course Number: C-150-3478.

Location: Air Maintenance Training Detachment, Air Maintenance Training Detachment, Miramar, CA. North Island, CA.

Length: 9 weeks (360 hours).

Exhibit Dates: *Version 1:* 6/80-Present. *Version 2:* 1/68-5/80.

Objectives: To train maintenance personnel to operate and troubleshoot the AN/ACQ-2 data terminal set and the AN/ASM-228 and AN/USM-145 test benches.

Instruction: Lectures and practical exercises in the maintenance of the AN/ACQ-2 data terminal set and the AN/ASM-228 and AN/USM-145 test benches, including data terminal system familiarization, logic circuits, code generation, Doppler and synchronization circuits, code recognition circuits, control circuits, oscilloscope, counter, signal generator, wave analyzer, distortion analyzer, and operation of specialized test benches.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in digital communications, 1 in digital communications laboratory (5/85). *Version 2:* In the vocational certificate category, 3 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics, and credit in electronics laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0255

F-4B COMMUNICATION, NAVIGATION, IDENTIFICATION (CNI) ORGANIZATIONAL MAINTENANCE

Course Number: C-102-3814.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 4 weeks (160 hours).

Exhibit Dates: 2/73–1/88.

Objectives: To train maintenance personnel to operate and maintain the F-4B CNI systems at the organizational maintenance level.

Instruction: Lectures and practical exercises in the maintenance of the F-4B CNI systems, including naval aviation maintenance program, compact wire bundle identification, safety, communications system, intercom, power supply, UHF transceiver, navigation system, TACAN system, navigational computer, identification of unknown aircraft, IFF system, transponder set, radar beacon, armament interface system, and data link and instrument landing systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (3/74); in the upper-division baccalaureate category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0256

P-3C SENSOR STATION ONE AND TWO (ACOUSTIC SYSTEMS TECHNICIAN) ORGANIZATIONAL MAINTENANCE

Course Number: C-102-3590.

Location: *All Versions:* Air Maintenance Training Detachment, Moffett Field, CA. *Version 1:* Air Maintenance Training Detachment, Jacksonville, FL. *Version 2:* Air Maintenance Training Detachment, Patuxent River, MD.

Length: 4–5 weeks (160–200 hours).

Exhibit Dates: *Version 1:* 3/76–Present. *Version 2:* 6/71–2/76.

Objectives: To train enlisted personnel to maintain the acoustic systems of the P-3C aircraft to the module level.

Instruction: Lectures and practical exercises in the maintenance and troubleshooting of the acoustic systems of the P-3C aircraft, including operation and components of the sonobuoy receiver system, the bathythermograph recorder, the TD-900/AS time code generator-decoder, the AN/AQH-4 sound recorder-reproducer system, the sonar computer recorder group, and procedures of organizational-level maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in marine electronics (7/81). *Version 2:* In the vocational certificate category, 3 semester hours in electrical laboratory on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0257

F-4B AN/APA-157 RADAR SET GROUP INTERMEDIATE MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, El Toro, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel to maintain, repair, and test the AN/APA-157 radar set group at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of the AN/APA-157 radar set group, including illumination and missile-tuning circuits, functional analysis equipment operation, missile-firing group, various component functions, and troubleshooting procedures.

Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0258

S-2G AN/AQA-7(V)3 SONAR COMPUTER RECORDER GROUP ORGANIZATIONAL MAINTENANCE

Course Number: C-102-3623.

Location: Air Maintenance Training Detachment, Quonset Point, RI.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To train fleet maintenance personnel to maintain and repair the S-2G AN/AQA-7(V)3 sonar computer-recorder group system.

Instruction: Lectures and practical exercises in the maintenance of the S-2G AN/AQA-7(V)3 sonar computer-recorder group system, including history of sonobuoy system, principles of operation, Lofar and Difar operation, signal data recorder, bearing frequency controls, digital memory unit function, various operational modes, range search and analysis of frequency bands, test modes, and alignment and adjustment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electrical or electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0259

TALOS WEAPON DIRECTION SYSTEM MK 6 (WDE MK 2) CLASS C

Course Number: A-121-0036.

Location: Guided Missiles School, Dam Neck, VA; Schools Command, Mare Island, CA.

Length: 24 weeks (720 hours).

Exhibit Dates: 1/68–12/78.

Objectives: To train enlisted personnel to maintain and repair the Talos weapon director system.

Instruction: Lectures and practical exercises in the maintenance of the Talos weapon director system, including radar signal generator; basic digital computer concepts, programming techniques, number systems, and binary functions; Mk 128 computer function, input functions, and buffer unit; power distribution and display equipment; special radar circuits, power supplies, multivibrators, differential amplifiers; radar signal simulator; symbol generator; tracking, elevation, and target director consoles; Talos and Tartar launcher and assignment consoles; and auxiliary equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics, and additional credit in electrical laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0260

AN/APQ-126 (V) RADAR SET INTERMEDIATE MAINTENANCE

(A-7E AN/APQ-126 Radar Set Intermediate Maintenance)

Course Number: *Version 1:* C-102-3785. *Version 2:* C-102-3789. *Version 3:* Not available.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: *Version 1:* 5-6 weeks (207–240 hours). *Version 2:* 6 weeks (180 hours). *Version 3:* 8 weeks (240 hours).

Exhibit Dates: *Version 1:* 3/77–Present. *Version 2:* 12/72–2/77. *Version 3:* 1/71–11/72.

Objectives: To train aviation fire control technicians to maintain, operate, troubleshoot, and align AN/APQ-126 radar sets, utilizing test sets.

Instruction: *All Versions:* Lectures and practical exercises in the operation, troubleshooting and alignment of the AN/APQ-126 radar set, including power supply programmers, transmitter/modulators, antenna/receivers, air navigation computers, sweep generators, fault locators, indicator-multiple displays and test sets. *Version 2:* Includes assembly test and troubleshooting and the operation of antenna boresight test sets. *Version 3:* Includes the operation of antenna boresight test sets.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electronic maintenance, 1 in electronic maintenance laboratory (3/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronic troubleshooting laboratory (3/82). *Version 2:* In the vocational certificate category, 3 semester hours in electricity or electronics, and additional credit in electricity or electronics on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electricity or electronics on the basis of institutional evaluation (3/74). *Version 3:* In the vocational certificate category, 2 semester hours in electricity or electronics, and additional credit in electricity or electronics on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electricity or electronics on the basis of institutional evaluation (3/74).

NV-1715-0261

SONAR RECEIVING SET AN/BQG PUFS MAINTENANCE

(Sonar Receiving Set AN/BQG-4/4A (PUFS) Combined Maintenance)

Course Number: A-130-0026; K-130-1008

Location: Fleet Anti-Submarine Warfare School, San Diego, CA.
Length: 18 weeks (655-665 hours).
Exhibit Dates: 6/69-1/88.
Objectives: To train sonar (submarine) technicians to operate, adjust, and maintain the AN/BQG-4 sonar receiver.
Instruction: Lectures and practical exercises in the troubleshooting and maintenance of AN/BQG-4 sonar receiver equipment, including generation and synchronization of system timing, hydrophone amplifier subsystem, delay line time compressors, relock amplifiers, high-speed counters, input buffer and shift register, post integrator and timing circuits, information display units, pulse generators, range and bearing computers, and power distribution.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic troubleshooting (8/77).

NV-1715-0262

P-3 AN/ARN-52 TACAN Maintenance, No. 30

Course Number: Not available.
Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.
Length: 3 weeks (136 hours).
Exhibit Dates: 1/68-1/88.
Objectives: To train enlisted personnel with knowledge of basic transistors to operate and maintain the AN/ARN-52 (V) TACAN system at the intermediate level.
Instruction: Lectures and practical exercises in the maintenance and troubleshooting of the AN/ARN-52 (V) TACAN system, including power supply and distribution network, channel servo operation, generation of RF, frequency multipliers and RF amplifiers, decoders, AGC circuits, video circuits, bearing circuitry, range circuits, and the antenna system.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics or electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics or electronics laboratory (3/74); in the upper-division baccalaureate category, credit in electronics or electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0263

A-3 Bombing Data Computer CP-66A/ASB-1 Maintenance

Course Number: Not available.
Location: Air Maintenance Training Detachment, Whidbey Island, WA.
Length: 6 weeks (240 hours).
Exhibit Dates: 1/68-1/88.
Objectives: To train maintenance personnel to maintain and repair CP-66A/ASB-1 bombing data computers.
Instruction: Lectures and practical exercises in the maintenance of the CP-66A/ASB-1 bombing data computer, including bombing problems, mechanical and electrical computing devices and systems, shafts and gears, mathematics, trigonometry, synchros, servomotors, tracking computer subsystems, gearshifts, heading-range-azimuth systems, wind resolvers and true-air-speed systems, bomb release computing systems altitude, time-of-fall and ground speed systems, test equipment, alignment, and mechanical and electrical maintenance of the ASB-1 system.
Credit Recommendation: In the vocational certificate category, 5 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (3/74); in the upper-division baccalaureate category, 2 semester hours in electronics, and credit in electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0264

Target Designation System Mk 5 Maintenance

Course Number: K-113-2073.
Location: Fleet Training Center, San Diego, CA.
Length: 3 weeks (90 hours).
Exhibit Dates: 10/72-1/88.
Objectives: To train fire control technicians to maintain a shipboard target designation system Mk 5.
Instruction: Lectures and practical exercises in the maintenance of the Mk 5 shipboard target designation system using associated test equipment, including instruction in video generator, designation indicator, coordinate converter and remote indicators, power distribution within system, sweep generation circuits, timing circuits, external circuitry, casualty analysis, and alignment of equipment.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/74).

NV-1715-0265

Sonar Receiving Set AN/WLR-9A/12 Combined Maintenance

Course Number: A-130-0160.
Location: Fleet Antisubmarine Warfare Training Center, Pacific, San Diego, CA; Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 2 weeks (60 hours).
Exhibit Dates: 11/72-12/77.
Objectives: to provide the theory and skills required to operate and maintain a sonar receiving set.
Instruction: A basic course on operational characteristics, safety and security, and signal flow, all on the block-diagram level. Instruction includes maintenance, adjustment, and troubleshooting of the receiver.
Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics technology (9/77).

NV-1715-0266

Integrated Avionics Weapons System Specialist

Course Number: Not available.
Location: Air Maintenance Training Detachment, Lemoore, CA.
Length: 12 weeks (482 hours).
Exhibit Dates: 7/71-1/88.
Objectives: To train electronics maintenance personnel to operate and maintain the complex integrated avionics weapons and navigation systems.
Instruction: Lectures and practical exercises in the maintenance of the complex integrated avionics weapons and navigation systems, including system and radar theory, tactical computers, weapons and electrical systems, circuit analysis, block diagrams, navigation and weapons control systems, computer mathematics, power supply and distribution systems, antenna operation, testing, associated equipment, weapon delivery, video display, applicable computer instruction, and test equipment.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electrical laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0267

Integrated Avionics Weapons System Technician

Course Number: Not available.
Location: Air Maintenance Training Detachment, Lemoore, CA.
Length: 8 weeks (320 hours).
Exhibit Dates: 1/71-1/88.
Objectives: To train electronics maintenance personnel to operate and maintain integrated avionics weapon delivery and navigation systems.
Instruction: Lectures and practical exercises in maintenance of the complex integrated avionics weapon delivery and navigation system, including radar theory, digital and analog computers, optics, refraction of light, fiber optics applications, weapons control systems, navigation systems, data links, descriptive mathematics, tactical computers, inertial measurement, detailed circuit analysis, block diagrams, altimeters, Doppler radar theory, weapons release systems, malfunction isolation and associated test equipment.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics (3/74); in the upper-division baccalaureate category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0268

Mk 116 MOD 4 Underwater Fire Control System (FCS) Maintenance

Course Number: K-130-0247.
Location: Fleet Anti-Submarine Warfare Training Center, San Diego, CA.
Length: 31 weeks (1240 hours).
Exhibit Dates: 5/85-Present.
Objectives: To provide personnel with the skills and knowledge necessary to perform maintenance and repair on a specific underwater fire control system.
Instruction: Lectures and practical exercises on numbering systems, digital logic, torpedo maintenance, general computer architecture and theory, and the AN/UYK-7 computer set and peripherals. In computer architecture topics covered include functional operation of digital computers, processors, memories, input/output, microprocessors, machine and assembly language programming and mapping. A detailed study of the AN/UYK-7 computer including CPU, main memory, power supply and peripheral tape units are included, as well as troubleshooting procedures, circuit measurements, diagnostic software and systems level maintenance procedures.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital fundamentals, 3 in computer architecture and 6 in computer system maintenance and repair (7/86).

NV-1715-0269

RA-5C Shoehorn Organizational Maintenance

Course Number: C-102-3744.
Location: Air Maintenance Training Detachment, Albany, GA.

Length: 4–5 weeks (160–200 hours).
Exhibit Dates: 9/70–1/88.
Objectives: To train maintenance personnel to operate and maintain the RA-5C electronic warfare systems.
Instruction: Lectures and practical exercises in the maintenance of the RA-5C electronic warfare systems, including various countermeasures systems, warning systems, system locations, and test, maintenance, and operation of countermeasure and self-destruct systems.
Credit Recommendation: Insufficient data for evaluation (3/74).

NV-1715-0270

Aviation Antisubmarine Warfare (AASW) for First Tour Pilots P3A/B/(D)

Course Number: E-2D-0064; E-2D-064.
Location: Fleet Aviation Specialized Operational Training Group, Moffett Field, CA.
Length: 3-4 weeks (107–126 hours).
Exhibit Dates: 10/72–1/88.
Objectives: To train aviators for an initial aviation antisubmarine warfare (AASW) tour.
Instruction: Lectures and practical exercises in the operation of aviation antisubmarine warfare, including oceanography and underwater acoustics, the P3A/B(D) aircraft AASW sensors, current AASW tactics, use of radar in antisubmarine warfare, location tactics, submarine targets, and current submarine operations and tactics.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/74).

NV-1715-0271

Mk 68 Director and Computer Mk 47 Mods 8 and 11 Difference Maintenance

Course Number: A-113-0073.
Location: Service School Command, Great Lakes, IL.
Length: 15 weeks (450 hours).
Exhibit Dates: 11/75–1/88.
Objectives: To train students in the operation, preventive maintenance, and repair of a gun fire control system.
Instruction: Instruction in the safe operation of the Director and the Director drive system, and in troubleshooting the Director control, computers, stable element, and system interface.
Credit Recommendation: In the vocational certificate category, 3 semester hours in computer maintenance and 6 in electromechanical drive systems (9/77).

NV-1715-0272

Surface Sonar Set AN/SQS-56 Maintenance

Course Number: K-130-0202.
Location: Fleet Ant-Submarine Warfare Training Center, San Diego, CA.
Length: 13 weeks (440 hours).
Exhibit Dates: 12/79–Present.
Objectives: To train technicians to perform preventive and corrective maintenance on a sonar system under limited supervision.
Instruction: Lectures and practical exercises in computer number systems, schematics of units and subassemblies, computer logic, input/output systems, and laboratory practice in computer logic flow diagrams.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer logic and 2 in computer maintenance laboratory (7/86).

NV-1715-0273

Naval Tactical Data Systems (NTDS) Data Transmission Group Maintenance

Course Number: Not available.
Location: Tactical Data Systems Maintenance Class C School, Mare Island, CA.
Length: 20 weeks (600 hours).
Exhibit Dates: 5/64–12/68.
Objectives: To train enlisted personnel with training in Boolean algebra, logic, number systems, electronics, transistors, semiconductors, and vacuum tube theory to operate and maintain NTDS data transmission equipment.
Instruction: Lectures and practical exercises in the maintenance of NTDS data transmission equipment, including control and channeling equipment, modes of operation, control timing generator, transmit sequence control and generator, transmit program control, control code generator and recognition, computer control, frequency synthesizer, Doppler correction unit, frequency and phase demultiplexing, synchronization, fundamentals of single sideband, communications patching switchboard and converter indicator, R.F. amplifiers, multicouplers, and the audio patching adapter unit.
Credit Recommendation: In the vocational certificate category, 6 semester hours in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical laboratory, and additional credit in electrical laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0274

Naval Tactical Data Systems Maintenance (NTDS)

Course Number: Not available.
Location: Tactical Data Systems Maintenance School, Mare Island, CA.
Length: 20 weeks (588 hours).
Exhibit Dates: 1/65–12/68.
Objectives: To train enlisted personnel to maintain the USQ-20 Naval Tactical Data System (NTDS).
Instruction: Lectures and practical exercises in the maintenance of the USQ-20 Naval Tactical Data System (NTDS), including digital computer functions, AN/SYA data display group, specific channeling equipment, high-capacity communication system, introduction to keyset complex, USQ-20 components and input/output timing chain, various console operations, and introduction to NTDS A link.
Credit Recommendation: Insufficient data for evaluation (3/74).

NV-1715-0275

Fundamental Analysis Techniques (P-3)

Course Number: E-210-55.
Location: Fleet Airborne Electronics Training Unit, Pacific, Moffett Field, CA.
Length: 2 weeks (70 hours).
Exhibit Dates: 10/72–1/88.
Objectives: To train transitioning VP antisubmarine warfare operators to analyze Jezebel equipment at a basic level.
Instruction: Lectures and practical exercises in the analysis of Jezebel equipment, including basic procedures, intelligence, and interpretation.
Credit Recommendation: Insufficient data for evaluation (3/74).

NV-1715-0276

Bright Radar Indicator Tower Equipment Maintenance, Class C

Course Number: Not available.
Location: Air Technical Training Center, Glynco, GA.
Length: 4 weeks (160 hours).
Exhibit Dates: 7/71–1/88.
Objectives: To train electronics technicians to operate and maintain television indicator equipment.
Instruction: Lectures and practical exercises in a descriptive treatment of television principles, cameras, and display units; plan-position indicators; and review of solid-state devices.
Credit Recommendation: In the vocational certificate category, 3 semester hours in television technology (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in television technology, and credit in electronics laboratory on the basis of institutional evaluation (4/74).

NV-1715-0277

AN/SQS-23, 23A, 23B, 23C Maintenance and ASPECT

Course Number: Not available.
Location: Fleet Sonar School, Key West, FL; Fleet Sonar School, San Diego, CA.
Length: 12 weeks (480 hours).
Exhibit Dates: 1/68–1/88.
Objectives: To train enlisted personnel to maintain and repair the AN/SQS-23 series sonar set.
Instruction: Lectures and practical exercises in the maintenance of the AN/SQS-23 series sonar set, including systems components and power supply, circuitry, generator operation, introductory transistor principles, extensive treatment of applicable electronic circuits (vacuum tube), and beam receiver and control circuits.
Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity or electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics laboratory (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0278

Talos Radar AN/SPW-2B, Class C

Course Number: Not available.
Location: Naval Schools Command, Mare Island, CA.
Length: 16 weeks (480 hours).
Exhibit Dates: 1/68–12/78.
Objectives: To train fire control technicians and engineers to maintain and operate the Talos radar system.
Instruction: Lectures and practical exercises in the maintenance of the Talos radar system, including system components, data flow and maintenance procedures, range data and pulse transmitter output instruction, and power distribution and mode switching circuits for specific equipment.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in advanced circuits laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate

category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0279

A-3 Related Avionics System (AT/AQ)
Organizational Maintenance
(A-3 Related Avionics System (AT/AQ) Organizational Level Maintenance)

Course Number: C-102-3706.

Location: Air Maintenance Training Detachment, Alameda, CA.

Length: 2-3 weeks (80-120 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train maintenance personnel to maintain specific aircraft electronic systems.

Instruction: Lectures, demonstrations, and practical exercises in A-3 (AT/AQ) aircraft familiarization; avionics system organizational maintenance; general-purpose line test equipment, operating procedures and safety precautions; radar systems components maintenance and troubleshooting; and various radio sets and navigation systems components, operation, and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0280

A-4C/E/F AN/APG-53A Radar
Intermediate Maintenance
(A-4C/E AN/APG-53A Radar Maintenance)

Course Number: Not available.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Beaufort, SC; Air Maintenance Training Detachment, Cecil Field, FL.

Length: 3-4 weeks (120-160 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to maintain and service the AN/APG-53A radar.

Instruction: Lectures and practical exercises in AN/APG-53A radar maintenance, including system familiarization; components operation; power supply, transmitter, RF plumbing and duplexer theory of operation; and receiver, transmitter, indicator, power supply, and altitude computer alignment and troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0281

A-3B AN/ASB-1A System Maintenance
(Less Computer CP-66A)

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 3 weeks (240 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to maintain the AN/ASB-1A bomb director set on an intermediate level.

Instruction: Lectures and practical exercises in the maintenance of AN/ASB-1A director sets, including operating procedures, stabilization subsystem assembly and functions, optical subsystems analysis, tunable radar system function and circuits, emergency and SLAM system, and malfunction and error analysis.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0282

Talos Radar AN/SPG-49B, Class C

Course Number: A-104-0086.

Location: Naval Schools Command, Mare Island, CA.

Length: 24 weeks (720 hours).

Exhibit Dates: 1/68-12/78.

Objectives: To train fire control technicians to maintain a specific radar set.

Instruction: Lectures and practical exercises in the maintenance of the Talos radar AN/SPG-49B, including operation, data flow, circuit information, test methods and equipment, and various component maintenance procedures.

Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0283

AN/SPG-53A Radar Maintenance

Course Number: K-113-2027.

Location: Fleet Training Center, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train fire control technicians and designated strikers to maintain the AN/SPG-53A radar.

Instruction: Lectures and practical exercises in the maintenance of the AN/SPG-53A radar, including power distribution, synchronizing system, transmitting system, acquisition system, ranging and angle error systems, and adjustment and troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0284

AUTODIN/DSTE/DSSCS/Mode V
Maintenance, Class C1

Course Number: A-101-0056.

Location: Service School Command, Great Lakes, IL.

Length: 11 weeks (420 hours).

Exhibit Dates: 5/75-5/80.

Objectives: To train selected personnel to maintain the AUTODIN system.

Instruction: Instruction covers the operation and maintenance of the AUTODIN system including peripheral equipment, logic elements, memory control, input-output, paper tape readers and punches, card readers, data terminals, and line printers.

Credit Recommendation: In the vocational certificate category, 3 semester hours in computer systems and 5 in computer equipment laboratory (9/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer hardware (9/77).

NV-1715-0285

AN/ALQ-108 Countermeasure Set
Intermediate Maintenance

Course Number: C-102-3076.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 2/73-1/88.

Objectives: To train fleet maintenance personnel to maintain and repair the AN/ALQ-108 countermeasures set at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of the AN/ALQ-108 countermeasures set, including basic system concepts, system component functions and description, synchronization and code generation, timing, various subsystems, control indicator and power supplies, and testing and repair procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0286

1. Automatic Carrier Landing
System Equipment Maintenance
AN/SPN-4 A, Class C1
(Carrier Air Traffic Control Center
Maintenance ACLS AN/SPN-42A)
2. All Weather Carrier Landing
System Equipment Maintenance,
AN/SPN-42, Class C
(Automatic Carrier Landing System
Equipment Maintenance AN/SPN-42
(ET), Class C)

Course Number: C-103-2013.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN. *Version 2:* Air Technical Training Center, Glynco, GA.

Length: *Version 1:* 22 weeks (800 hours). *Version 2:* 11-15 weeks (440-600 hours).

Exhibit Dates: *Version 1:* 11/78-12/82. *Version 2:* 8/68-10/78.

Objectives: To train electronic technicians to operate and maintain the AN/SPN-42 all-weather carrier-landing system, including Univac 1219 computers.

Instruction: For this course after 12/82 see NV-1715-1429. *All Versions:* Lectures and laboratories in basic concepts, and power control of the all-weather carrier-landing systems; radar subsystems; data stabilization subsystems, control and monitoring equipment; input and output buffers; Naval Tactical Data System (NTDS) buffers, data link monitors, and system analysis; and maintenance procedures. *Version 1:* Instruction includes digital computer logic and programming. *Version 2:* Instruction includes a review of computer technology.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 4 semester hours in digital computer organization, 4 in assembler language programming and 4 in hardware laboratory (2/81). *Version 2:* in the lower-division baccalaureate/associate degree category, credit in computer technology and electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0287

AN/APS-82 Radar System
Intermediate Maintenance
(E-1B AN/APS-82 Radar System Maintenance)

Course Number: C-102-3460; C-102-19.

Location: Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Norfolk, VA.

Length: 8 weeks (320 hours).

Exhibit Dates: 6/66-1/88.

Objectives: To train maintenance personnel to operate and maintain AN/APS-82 radar systems.

Instruction: Lectures and practical exercises in the maintenance of the AN/APS-82 radar system, including analysis of control circuits, power supply and RF circuits, block-diagram analysis, receiver and video distribution circuits, auxiliary equipment (antenna and PPI indicator circuits; computer, height indicator, and synchronizer circuits), and system troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0288

A-4 Tactical Air Navigation (TACAN) AN/ARN-52(V)

Course Number: Not available.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel to maintain and operate the AN/ARN-52 navigational TACAN radio system at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of the AN/ARN-52 navigational TACAN radio system, including theory of operation, bearing-measuring circuitry, power supply and distribution, and components; range-measuring circuitry, antenna selector circuits, and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0289

Aviation Electronics Technician, Class A

Course Number: Not available.

Location: Air Technical Training Center, Memphis, TN.

Length: 9 weeks (352 hours).

Exhibit Dates: 7/67–12/68.

Objectives: To train enlisted personnel with a knowledge of avionics fundamentals to operate and maintain aircraft electronics systems.

Instruction: Lectures and practical exercises in the maintenance of a wide variety of aircraft electronics systems, including theory of operation; block-diagram analysis; tube and solid-state electronic circuit fundamentals; electronic concepts required for the maintenance of airborne search radar and identification, navigation, and communication equipments; TACAN theory and application; navigational computer fundamentals; and auxiliary systems.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics systems (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics laboratory (4/74).

NV-1715-0290

AN/SQQ-14 Maintenance Enlisted

Course Number: A-130-0014.

Location: Fleet and Mine Warfare Training Center, Charleston, SC.

Length: *Version 1:* 8 weeks (217 hours). *Version 2:* 5 weeks (150 hours).

Exhibit Dates: *Version 1:* 7/79–Present. *Version 2:* 3/73–6/79.

Objectives: To train enlisted personnel with knowledge of solid-state electronics theory to employ troubleshooting procedures and to perform corrective and/or preventive maintenance on the AN/SQQ-14 sonar system.

Instruction: Lectures and practical exercises in the maintenance of the AN/SQQ-14 sonar system, including primary power distribution, test equipment, hoist assembly and function, servo systems, master timing, transmitters and receivers, various timing systems; and preventive and/or corrective maintenance of systems and subsystems.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours of technical elective credit in electrical or electronic associate degree programs(11/81). *Version 2:* Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0291

Terrier Radar AN/SPQ-5A

Course Number: Not available.

Location: Service Schools Command, Great Lakes, IL.

Length: 24 weeks (720 hours).

Exhibit Dates: 1/68–12/75.

Objectives: To train enlisted personnel to maintain a specific radar system.

Instruction: Lectures and practical exercises in the maintenance of the Terrier weapon system and associated radar equipment, including system components, operation, data flow of track radar, capture and guidance radar, and primary and low-voltage power; special test equipment, receiver and transmitter circuits, analysis and operation of various circuits, operation of beacon receivers and missile loops, and tests and maintenance.

Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0292

Air Traffic Control Equipment Maintenance Management

Course Number: C-103-2025.

Location: Air Technical Training Center, Glynco, GA.

Length: 2 weeks (80 hours).

Exhibit Dates: 9/72–1/88.

Objectives: To train officers and senior enlisted personnel to perform as ground electronic maintenance managers and to supervise the maintenance and installation of air traffic control systems.

Instruction: Lectures in the management of air traffic control systems associated with air traffic control facilities, including equipment operation; radar, radio, and navigational principles; records, supply, and safety; maintenance policies; and system siting and flight inspections.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in aerospace technology (4/74).

NV-1715-0293

Carrier Air Traffic Control Center Equipment Maintenance (AN/SPN-6), Class C

Course Number: Not available.

Location: Air Technical Training Center, Glynco, GA.

Length: 3 weeks (104 hours).

Exhibit Dates: 6/69–1/88.

Objectives: To train electronics technicians to operate the AN/SPN-6 radar system.

Instruction: Lectures and practical exercises in the maintenance of the AN/SPN-6 radar system, including operation, components, transmitter and receiver circuits, antenna stabilization, system standards and troubleshooting, and alignment and adjustment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0294

A-4 AN/AJB-3/3A Organizational Maintenance

Course Number: C-602-3723.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Beaufort, SC.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/73–1/88.

Objectives: To train maintenance personnel to maintain and operate the AN/AJB-3/3A and the remote standby attitude-indicating systems.

Instruction: Lectures and practical exercises in the maintenance of the AN/AJB-3/3A and the remote standby attitude-indicating systems, including theory of operation, internal computer systems, components, power supply, system analysis, testing procedures and troubleshooting, and the attitude indicator system components, operation, and testing.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0295

Aviation Electronics Technician R (Radar), Class A

Course Number: Not available.

Location: Air Technical Training Center, Memphis, TN.

Length: *Version 1:* 8–11 weeks (320–440 hours). *Version 2:* 21 weeks (840 hours).

Exhibit Dates: *Version 1:* 12/58–7/67. *Version 2:* 5/56–11/58.

Objectives: To train enlisted Navy and Marine Corps personnel to qualify as aviation electronics technicians.

Instruction: *All Versions:* Lectures and laboratory exercises in electronic systems theory and operation, including radar search, identification, navigation, and EMC systems; communications and control systems; extensive text study and equipment maintenance and troubleshooting. *Version 1:* Instruction includes reduced hours but strong coverage of electronic systems. *Version 2:* Instruction includes more extensive training in electronic systems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 10 semester hours in aviation electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in advanced electronics, 3 in electronics laboratory (3/74). *Version 2:* In the vocational certificate category, 10 semester hours in aviation electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics, 3 in electronic circuits (12/68); in the upper-division baccalaureate category, 4 semester hours in radar systems (3/74).

NV-1715-0296

Electronic Warfare Technician, Class C, Radar Data Recorder-Reproducer AN/SPH-2 and Video Recorder-Reproducer 15-E-27 Maintenance

Course Number: A-102-0101.

Location: Naval Schools Command, San Francisco, CA.
Length: 8 weeks (240 hours).
Exhibit Dates: 1/72–1/88.
Objectives: To train electronic warfare technicians to maintain and repair the AN/SPH-2 radar data recorder-reproducer and associated equipment, and the 15-E-27 video recorder-reproducer.
Instruction: Lectures and practical exercises in the maintenance of the AN/SPH-2 radar data recorder-reproducer and associated attachments, and the 15-E-27 video recorder-reproducer, including digital logic review, search radar, displays, and distribution systems, operation procedures, video and data channel recording and reproduction, power distribution, and magnetic tape recorder operation.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0297

A-6 Pilots Horizontal Display, Direct View Radar Indicator and Associated Test Set Intermediate Maintenance

Course Number: C-102-3774.
Location: Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Whidbey Island, WA.
Length: 2 weeks (80 hours).
Exhibit Dates: 9/71–1/88.
Objectives: To train maintenance personnel to maintain the AN/APQ-92 search radar system.
Instruction: Lectures and practical exercises in AN/APQ-92 search radar system maintenance, including azimuth/elevation range indicator, azimuth/range indicator, and PHD/DVRI test set theory of operation, including functions, circuit analysis, block-diagram analysis, purpose, and equipment breakdown; detailed test, maintenance, shop, and check-out procedures; and equipment safety and repair procedures.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0298

Electronics Technician, Class C, AN/SPS-37, 37A Radar Sets and AN/SPA-63 Countermeasures Receiving Group
(Electronics Technician, Class C, AN/SPS-37/A Radar Set and AN/SPA-63 Countermeasures Receiving Group)

Course Number: A-104-0051.
Location: Service Schools Command, San Diego, CA; Fleet Training Center, Norfolk, VA.
Length: 9 weeks (270 hours).
Exhibit Dates: 6/71–1/88.
Objectives: To train electronics technicians who have some knowledge of radar to maintain the AN/SPS-37, 37A radar systems and the AN/SPA-63 countermeasures receiving group.
Instruction: Lectures and practical exercises in the maintenance of the AN/SPS-37, 37A radar systems and the AN/SPA-63 countermeasures receiving group, including components, transmitter and receiver channel circuits, ancillary equipment (antennas, range indicator, oscilloscopes), and systems operation, troubleshooting, technical maintenance, and repair.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0299

AN/APN-187 DVARS Intermediate Maintenance

Course Number: C-102-3574.
Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.
Length: 5 weeks (200 hours).
Exhibit Dates: 1/73–Present.
Objectives: To train fleet maintenance personnel to maintain the AN/APN-187 DVARS radar system.
Instruction: Lectures and practical exercises in the maintenance of the AN/APN-187 DVARS radar system (consisting of a specific receiver-transmitter-antenna, a computer frequency tracker, and a control indicator), including operation, circuit analysis, alignment, and test procedures, and use of special test equipment and repair techniques.
Credit Recommendation: In the vocational certificate category, 3 semester hours in basic radar theory and operation (7/81).

NV-1715-0300

AN/SQS-26 AXR Electronic Maintenance

Course Number: J-130-0835.
Location: Fleet Sonar School, Key West, FL.
Length: 24 weeks (960 hours).
Exhibit Dates: 1/70–1/88.
Objectives: To train enlisted personnel to test and maintain the AN/SQS-26 sonar system.
Instruction: Lectures and practical exercises in maintenance and testing procedures for the AN/SQS-26 sonar system and subsystems, including system operation, auxiliary equipment, components, signal processing, range and bearing, and set maintenance. Includes brief presentation of underwater sound principles and brief introduction to binary arithmetic and logic symbols.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0301

60/400 Hz Power Converter Maintenance, Class C1

Course Number: A-652-0077.
Location: Service School Command, Great Lakes, IL.
Length: 2 weeks (80 hours).
Exhibit Dates: 3/77–1/88.
Objectives: To train personnel in the operation and maintenance of the 60/400 Hz power converter.
Instruction: Lectures and practical exercises in troubleshooting and repair of faulty electrical circuits and the cooling system.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (9/77).

NV-1715-0302

A-6 AN/APQ-112 Track Radar and Associated Test Equipment Intermediate Maintenance

Course Number: C-104-3761.
Location: Air Maintenance Training Detachment, Oceana, VA.
Length: 10 weeks (400 hours).
Exhibit Dates: 2/68–1/88.
Objectives: To train enlisted personnel to repair and maintain specific radar equipment.
Instruction: Lectures and practical exercises in the maintenance and repair of specific radar equipment, including track radar theory and components.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0303

AN/BQS-4 Sonar Maintenance

Course Number: F-130-010.
Location: Submarine School, Groton, CT.
Length: 4 weeks (120 hours).
Exhibit Dates: 6/69–1/88.
Objectives: To train sonar technicians to maintain AN/BQS-4 series sonar systems.
Instruction: Lectures and laboratories in review of mathematics oriented toward decibel calculations, system function and description, and test and maintenance procedures.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0304

AN/SPS-48 Radar Set

Course Number: None.
Location: Guided Missiles School, Dam Neck, VA; Naval Schools Command, Mare Island, CA.
Length: 31 weeks (930 hours).
Exhibit Dates: 1/68–6/78.
Objectives: To provide enlisted personnel with advanced training in the operation and maintenance of AN/SPS-48 radar sets.
Instruction: Lectures and laboratories in review of mathematics, including trigonometry, multiple unit functions, numbering systems, radix conversions, Boolean algebra, and logic symbol expression conversion; semiconductor theory; application and use of test equipment, including oscilloscopes, pulse generators, and electronic counters, and description and maintenance of AN/SPS-48 radar sets.
Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in advanced electronics laboratory (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0305

Electronics Technician, Class C, AN/SPS-8 Radar Maintenance

Course Number: Not available.
Location: Electronic Technician, Class C School, Treasure Island, CA.
Length: 5 weeks (150 hours).
Exhibit Dates: 10/64–12/68.
Objectives: To train electronics personnel to operate and maintain AN/SPS-8 radar equipment and associated test equipment.
Instruction: Lectures and laboratories in introduction and familiarization with radar systems; transmitting systems and magnetron care and handling; power distribution; receiving systems; antenna control systems; VL-1 repeaters; video indicators; preventive maintenance; and troubleshooting procedures.

Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0306

AN/SPG-50 Maintenance

Course Number: K-113-2026.

Location: Fleet Training Center, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train fire control technicians and strikers to maintain and repair AN/SPG-50 radar sets.

Instruction: Lectures and practical exercises in radar set familiarization; power distribution; synchronizing, transmitting, receiving, presentation, ranging, and angle error systems; radar set adjustments; and radar set maintenance.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0307

AN/BQQ-3A Sonar Maintenance

Course Number: F-130-016.

Location: Submarine School, Groton, CT.

Length: 2 weeks (60 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train enlisted personnel with a background in transistor theory to test and maintain AN/BQQ-3A sonar systems.

Instruction: Lectures and practical exercises in basic theory of operation, and routine preventive and technical corrective maintenance procedures for sonar systems.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0308

F-4J Weapon System Specialist
Organizational Maintenance

Course Number: C-112-3810.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 9 weeks (360 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train fleet maintenance personnel to maintain the AN/AWG-10 missile control system.

Instruction: Lectures and practical exercises in the maintenance of the AN/AWG-10 missile system, including system description and function, system components, check-out, troubleshooting and repair of system and components, power distribution, missile control, pulse radar and display systems.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0309

F-4B/J KY-532A/ASQ IFF Transponder
Intermediate Maintenance

Course Number: C-112-23.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/70-1/88.

Objectives: To train enlisted personnel to maintain and repair the KY-532A/ASQ IFF transponder at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance and repair of the KY-532A/ASQ IFF transponder, including theory of operation, block-diagram analysis, component description and function, and testing and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0310

Electronics Technician, AN/SPA-34
Indicator Group, Class C

Course Number: A-104-0016; A-104-0018.

Location: Naval School, San Diego, CA; Naval School, Norfolk, VA.

Length: 2 weeks (60 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train enlisted personnel who have completed training in basic radar to maintain the AN/SPA-34 indicator group.

Instruction: Lectures and practical exercises in the maintenance of the AN/SPA-34 indicator group, including operation of the maintenance and material management system, operation and functional block-diagram analysis of equipment, sweep gate and cursor gate generators, sweep generator and amplifier, off-centering, range ring and strobe generators, servoamplifiers, and testing procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0311

EA-6B Communications, Navigation
and Radar System
Organizational Maintenance

Course Number: C-102-3943.

Location: Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 6 weeks (240 hours).

Exhibit Dates: 3/73-1/88.

Objectives: To train fleet maintenance personnel who have backgrounds in electronics to maintain communications, navigation, and radar equipment.

Instruction: Lectures and practical exercises in the maintenance of communications, navigation, and radar equipment, including communication and navigation equipment components and functions, integrated electronic central equipment, the TACAN system, search radar components and function, vertical display indicator group analysis, and systems troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0312

1. Radar AN/BPS-12, 13, 14 Combined Maintenance
2. AN/BPS-13 Radar Maintenance (AN/BPS-12, 13, 14 Radar System Maintenance)

Course Number: *All Versions:* A-104-0165. *Version 2:* L-104-0010.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine School, New London, CT; Fleet Ballistic Missile Submarine Training Center, Charleston, SC.

Length: 3 weeks (90 hours).

Exhibit Dates: *Version 1:* 5/73-1/89. *Version 2:* 1/70-4/73.

Objectives: To provide the theory and skills to perform operational and maintenance procedures on Naval radar systems.

Instruction: For this course after 1/89 see NV-1715-1459. *Version 1:* Topics cover basic radar principles at the quantitative and block diagram levels including sweep generators, PPI amplifiers, video marker strobes, CRTs, and synchros; and fault isolation and maintenance procedures. *Version 2:* Lectures and practical exercises in AN/BPS-12, -13, and -14 radar systems operation and preventive and corrective maintenance, including system theory of operation; echo box, frequency power meter, and range calibrator operation; and maneuvering board operation for computations.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electronic technician training (9/77); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics engineering technician training (9/77). *Version 2:* Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0313

Underwater Fire Control Systems
Technician (Mk 113 Mod 9)
(Underwater Fire Control Systems(FCS)
Technician (Target Motion Analysis
Subsystem))

Course Number: A-113-0047.

Location: Guided Missiles School, Dam Neck, VA.

Length: 6 weeks (163 hours).

Exhibit Dates: 1/72-1/88.

Objectives: To train experienced fire control technicians to maintain analyzer fire control systems.

Instruction: Lectures and laboratories in analyzer fire control system maintenance, including digital computer, D/A and A/D converters, data storage, interfacing, and cathode ray tube operation and maintenance.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics (4/74).

NV-1715-0314

490T-1/1A Antenna Coupler
Intermediate Maintenance

Course Number: C-102-3012.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Santa Ana, CA; Air Maintenance Training Detachment, Cp. Pendleton, CA; Air Maintenance Training Detachment, Quonset Point, RI; Air Maintenance Training Detachment, North Island, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/72-Present.

Objectives: To train fleet maintenance personnel to maintain the 490T-1/1A antenna coupler.

Instruction: Lectures and practical exercises in 490T-1/1A antenna coupler maintenance, including circuit analysis, test equipment usage, publications usage, and couplers and modules testing and repairing procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in radio communications systems (7/81).

NV-1715-0315

Target Designation System Mk 5 Shipboard Maintenance

Course Number: J-113-0129; J-113-1291; J-113-1292.

Location: Fleet Anti-Air Warfare Training Center, Dam Neck, VA.

Length: 2 weeks (70 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train fire control technicians to test, adjust, and maintain the Mk 5 target designation system.

Instruction: Lectures and practical exercises in Mk 5 target designation system maintenance, including system power distribution and power supplies, multivibrators, servo loops, timing and deflection circuits, pulse generators, and amplifiers.

Credit Recommendation: In the vocational certificate category, 1 semester hour in computer science (4/74).

NV-1715-0316

Submarine Radioman Electricity and Electronics

Course Number: A-101-0053.

Location: Submarine School, Groton, CT.

Length: 16 weeks (480 hours).

Exhibit Dates: 11/70-1/88.

Objectives: To train enlisted personnel to become submarine radiomen.

Instruction: Lectures and laboratories in electrical and electronic theory; basic and advanced transistor theory; basic arithmetic and algebra; physics; elementary computer principles; various instruments and testers operation; biasing procedures; and elementary circuits, resonance, vacuum tubes, amplifiers, and transistors operation.

Credit Recommendation: In the vocational certificate category, 9 semester hours in electronics (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronics (4/74); in the upper-division baccalaureate category, 1 semester hour in electronics for electrical engineering majors, 3 for nonmajors (4/74).

NV-1715-0317

1. Radioman, Class C7
2. Radioman, Class C7
   (Radioman, Class B)
3. Radioman, Class B
   (Class B, Radiomen)

Course Number: A-202-0033; A-201-0019.

Location: Service Schools Command, San Diego, CA; Service Schools Command, Bainbridge, MD.

Length: *Version 1:* 12 weeks (480 hours). *Version 2:* 18 weeks (540 hours). *Version 3:* 30-37 weeks (900-1110 hours).

Exhibit Dates: *Version 1:* 11/78-Present. *Version 2:* 5/72-10/78. *Version 3:* 1/55-4/72.

Objectives: To train radiomen in electricity and electronics and in management skills.

Instruction: *Version 1:* Lectures and practical exercises in management theory and techniques including: self development, goal setting, management by objectives, accountability, control, evaluation and other management tools and various applications as they apply to Navy security, organization and maintenance management systems. The course also covers basic electricity and circuits, AM, FM, SSB radio systems, antenna transmitter/receivers, modulation/demodulation, digital logic and devices and transmission lines. The student does functional analysis of, and has laboratory experience with test equipment, teletype equipment and other communication equipment. *Version 2:* Lectures and practical exercises in basic electricity and electronics, basic transistor theory and applications, troubleshooting a practical communications superheterodyne receiver, test equipment operation and special circuits, various transmitters and receivers equipment operation and troubleshooting, radio teletype terminal set and frequency shift keyer and converter equipment operation and troubleshooting, and electronics administration. *Version 3:* Lectures and practical exercises in basic electricity, and electronics, basic transistor theory and applications, troubeshooting a practical communications superheterodyne receiver, test equipment operation and special circuits, various transmitters and receivers equipment operation and troubleshooting, radio teletype terminal set and frequency shift keyer and converter equipment operation and troubleshooting, and electronics administration.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in management, 3 in electronic communications and 1 in radio operations laboratory for non-electronics majors (5/82). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics laboratory (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (3/74). *Version 3:* In the vocational certificate category, 12 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 6 semester hours in electricity and electronics for non-engineering students, 2 in electronic laboratory for engineering students (3/74).

NV-1715-0318

OA-3732/ASM-76 Computer Indicator Intermediate Maintenance

(E-2A Computer Indicator (CI) Semi-Automatic Check-Out Equipment (SACE) Operation and Maintenance)

Course Number: C-150-3479;; C-150-15.

Location: Air Maintenance Training Detachment, Air Maintenance Training Detachment, Miramar, CA North Island, CA.

Length: *Version 1:* 11 weeks (440 hours) *Version 2:* 11 weeks (440 hours). *Version 3:* 6 weeks (240 hours).

Exhibit Dates: *Version 1:* 4/84-Present. *Version 2:* 6/70-3/84. *Version 3:* 7/66-5/70.

Objectives: To train enlisted personnel who have backgrounds in digital and transistor fundamentals to operate and troubleshoot the computer indicator test console.

Instruction: *All Versions:* Lectures and practical exercises in computer indicator test console operation and maintenance, including logic circuits, interconnection of logic elements and flip-flops; programming console operation, components, and maintenance; and logic testing procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in digital computer systems, 1 in digital computer systems laboratory, 1 semester hour in analog systems, 1 in analog systems laboratory (5/85). *Version 2:* In the vocational certificate category, 5 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (4/74); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory on the basis of institutional evaluation (4/74). *Version 3:* In the vocational certificate category, 2 semester hours in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (3/74); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory (3/74).

NV-1715-0319

System AN/WIC-2(V) Combined Maintenance

(Integrated Announcing System AN/WIC-2 Combined Maintenance)

Course Number: A-623-0051; F-623-014.

Location: Submarine School Groton, New London, CT; Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2-3 weeks (60-90 hours).

Exhibit Dates: *Version 1:* 12/79-9/83. *Version 2:* 4/68-11/79.

Objectives: To train maintenance personnel to operate, troubleshoot, and repair shipboard interior communication equipment.

Instruction: For this course after 9/83 see NV-1715-1472. *All Versions:* Lectures in shipboard interior communications equipment operation, troubleshooting, and repair, including block-diagram analysis; circuit theory; components description; alarm generator circuitry and test panel; maintenance and material management system; electrical safety precautions; power supply, generation, and distribution systems; color code and circuit tree construction. *Version 1:* Emphasis is placed on fault isolation and repair to the component level.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in public address and electronic talkback system maintenance and repair (6/81). *Version 2:* In the vocational certificate category, 1 semester hour in electronics laboratory (9/77).

NV-1715-0320

Sonar AN/SQS-54B/SKR-4 Maintenance

(Sonar AN/SQS-54B Organizational Maintenance)

(AN/SQS-54B and AN/SKR-4 (LAVA) Maintenance)

(LAVA SQS-54 Maintenance)

Course Number: A-130-0109; K-130-1060.

Location: Fleet Anti-Submarine Warfare Training Center, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 2-3 weeks (70-94 hours).

Exhibit Dates: 7/72-1/88.

Objectives: To train technicians to maintain data links, telemetric receiving sets, and SQS-54 equipment.

Instruction: Lectures and practical exercises in systems operation and maintenance, modular makeup of telemetric equipment, calibration and troubleshooting procedures and the operation and maintenance of spectrum analyzers.

Credit Recommendation: In the vocational certificate category, 1 semester hour in advanced instrumentation (8/77).

NV-1715-0321

Special Technology (Enlisted)

Course Number: F-000-014.

Location: Submarine School, Groton, CT.

Length: 6 weeks (180 hours).

Exhibit Dates: 12/69-1/88.

Objectives: To provide submarine radiomen and sonarmen with training in electronic fundamentals.

Instruction: Lectures and laboratories in DC and AC electrical networks, vacuum tubes, amplifiers, transmitters and receivers, and transmitter electronics.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electricity or electronics for non-engineering majors (3/74).

NV-1715-0322

P-3 Synchrophaser/True Airspeed Computer/Signal Lights Control Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/71–1/88.

Objectives: To train fleet maintenance personnel to maintain P-3 synchrophasers, true airspeed computers, and signal lights controls at the intermediate maintenance level.

Instruction: Lectures and practical exercises in normal operation of systems components, operation of general and special test equipment, operation of synchroscopes, and waveform analysis.

Credit Recommendation: In the vocational certificate category, 1 semester hour in computer maintenance (3/74).

NV-1715-0323

E-2A Inertial Navigation System Semi-Automatic Check-Out Equipment (SACE) and Encoder Test Console Operation and Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To provide avionics personnel with training in the operation, circuitry, and maintenance of inertial navigation systems adapters and encoder test consoles.

Instruction: Lectures and laboratories in test console familiarization, inertial navigation hardware, encoders and servos, and programming and maintenance procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (3/74).

NV-1715-0324

P-3 AN/ASN-42 Navigational Computer Set Organizational Level Maintenance, No. 15

Course Number: Not available.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel to diagnose, troubleshoot, maintain, and service P-3 navigational computer sets.

Instruction: Lectures and laboratories in gyroscope theory and assembly, basic block-diagram analysis and signal flow, electronic circuitry analysis, navigational computers and related components, signal data converters and related components, power supplies, and maintenance and troubleshooting procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (3/74).

NV-1715-0325

AN/FRT-83, 84 and 85 Radio Transmitters Maintenance, Class C1

Course Number: A-101-0052.

Location: Service School Command, Great Lakes, IL.

Length: *Version 1:* 13 weeks (390 hours). *Version 2:* 10 weeks (300 hours).

Exhibit Dates: *Version 1:* 1/82–Present. *Version 2:* 3/74–12/81.

Objectives: To train personnel to maintain, operate, troubleshoot, and adjust the AN/FRT-83 and AN/FSQ-98 radio transmitter series.

Instruction: *All Versions:* Areas of instruction include the use of the oscilloscope, harmonic analyzer, RF generators, and other equipment to troubleshoot radio transmitting equipment, servo-amplifiers and associated relay systems. *Version 1:* Includes the use of schematics, timing diagrams, flow charts and digital remote controlled radio transmitting equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in radio electronics circuit maintenance (1/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in radio electronics laboratory and 1 in radio electronics circuits (1/82). *Version 2:* In the vocational certificate category, 5 semester hours in radio electronics and 2 in radio laboratory (9/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in radio electronics (9/77).

NV-1715-0326

AN/ASA-13A Navigational Computer Group Intermediate Maintenance

(UH-2A/B AN/ASA-13A Navigational Computer Group Intermediate Maintenance)

Course Number: C-602-3379.

Location: Air Maintenance Training Detachment, Lakehurst, NJ; Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 8/68–1/88.

Objectives: To train maintenance personnel to maintain, repair, and functionally test AN/ASA-13A navigational computer groups at the intermediate maintenance level.

Instruction: Lectures and practical exercises in operation, circuitry, calibration and adjustment, troubleshooting, and bench testing of navigational computer groups.

Credit Recommendation: In the vocational certificate category, 1 semester hour in computer maintenance (3/74).

NV-1715-0327

1. P-3 AN/ASN-42 Navigational Computer Set Intermediate Maintenance
2. P-3 AN/ASN-42 Navigational Computer Set Intermediate Level Maintenance, No. 16

Course Number: *Version 1:* C-602-3533. *Version 2:* Not available.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: *Version 1:* 10-14 weeks (400-560 hours). *Version 2:* 16 weeks (640 hours).

Exhibit Dates: *Version 1:* 10/68–1/88. *Version 2:* 1/68–9/68.

Objectives: To train maintenance personnel to diagnose, troubleshoot, maintain, and service P-3 navigational computer sets.

Instruction: Lectures and laboratories in system components and operation, gyros, Doppler tie-in and Doppler decoupler, power supplies, electronics of navigation computers, servos, calibration and alignment, and maintenance procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (3/74). *Version 2:* In the vocational certificate category, 7 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (3/74).

NV-1715-0328

Terrier Fire Control and Missile Officer

Course Number: A-2F-0014.

Location: Guided Missiles School, Dam Neck, VA.

Length: 13 weeks (420 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To provide officers with instruction in the duties of the Terrier weapons, fire control, and missile battery officers.

Instruction: Lectures and laboratories in operation, capabilities, and characteristics of weapon system components; system alignment; telemetering flight analysis and logistics; and familiarization with missile search radar systems and fire control systems. Emphasis is on weapons system employment, electromagnetic compatability, tactical firing considerations, and weapons system management techniques.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0329

P-3C Integrated Avionics System Technician

Course Number: C-102-3575.

Location: *All Versions:* Air Maintenance Training Detachment, Moffett Field, CA. *Version 1:* Air Maintenance Training Detachment, Jacksonville, FL. *Version 2:* Air Maintenance Training Detachment, Patuxent River, MD.

Length: *Version 1:* 16-17 weeks (632 hours). *Version 2:* 12 weeks (480 hours).

Exhibit Dates: *Version 1:* 9/79–Present. *Version 2:* 4/73–8/79.

Objectives: To train experienced fleet personnel to maintain in-flight P-C3 integrated avionics systems.

Instruction: *Version 1:* Lectures and laboratory exercises at the block diagram level in data handling systems, magnetic tape transport and data processing, display systems, a radar system and navigation/communication systems. Approximately half of the student's time is devoted to practical laboratory exercises. *Version 2:* Lectures and laboratories in logic, data displays, radar scan systems, television, pulse generators, and radio.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in computer organization and function and 3 in electronics laboratory (7/81); in the lower-division baccalaureate/associate degree category, 3 semester hours in avionics technology, 3 in micro/miniature computer functions and organization and 2 in computer laboratory (7/81). *Version 2:* In the vocational certificate category, 8 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (3/74).

NV-1715-0330

P-3C DIGITAL DATA HANDLING ORGANIZATIONAL MAINTENANCE

Course Number: C-102-3599.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 13 weeks (520 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To train avionics personnel to maintain P-3C data-handling systems.

Instruction: Lectures and laboratories in basic computer components, data flow in computers, diagnostics, addressing and instruction codes, input/output operations, and system maintenance.

Credit Recommendation: In the vocational certificate category, 7 semester hours in electronics or computers (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics or computers (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics or computers laboratory (3/74).

NV-1715-0331

S-2D/E AN/ASN-30 NAVIGATIONAL COMPUTER DISPLAY UNIT AND AN/ASQ-80 COORDINATE DATA SET SYSTEM MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel to operate and maintain the AN/ASN-30 navigational computer display unit and the AN/ASQ-80 coordinate data set system.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/ASN-30 navigational computer display unit and the AN/ASQ-80 coordinate data set system, including power distribution, synchronization, linear transformers, servo test sets, system operations and components, review of rotary concepts, block-diagram and circuit analysis, and system alignment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (3/74); in the upper-division baccalaureate category, 1 semester hour in industrial technology (3/74).

NV-1715-0332

INTELLIGENCE/ELECTRONIC WARFARE OFFICER

Course Number: F-4B-011.

Location: Submarine School, Groton, CT.

Length: 2 weeks (68 hours).

Exhibit Dates: 4/72–1/88.

Objectives: To train submarine intelligence/electronic warfare officers to supervise intelligence collection, reporting, and assessment, and to operate submarine electronics sensors.

Instruction: Lectures and practical exercises in the collection, reporting, and assessment of intelligence and in the operation of submarine electronics sensors, including principles of receivers, transmitters, and radar; physics of electromagnetic radiation; Soviet missile systems; radio wave propagation; periscope electronics; signal analysis; ASW equipment, watchstanding procedures; and mission planning.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0333

SH-3A AN/ASA-13A NAVIGATIONAL COMPUTER MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Ream Field, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: 3/68–1/88.

Objectives: To train enlisted personnel with knowledge of Doppler radar navigation maintenance to operate and maintain the ASA-13A navigational computer, the specialized plotting board, and the memory and indicator groups used in automatic navigation systems.

Instruction: Lectures and practical exercises in the operation and maintenance of the ASA-13A navigational computer, specialized plotting board, and memory and indicator groups, including theory of operation, circuit analysis, systems tests, and alignment and adjustment.

Credit Recommendation: Insufficient data for evaluation (3/74).

NV-1715-0334

1. TERRIER COMPUTER MK 119 MOD 5 (FLEET INPUTS)
2. TERRIER COMPUTER MK 119 MOD 5 (Terrier Computer Mk 119 Mods 3 and 4)

Course Number: A-150-0031; A-150-0032.

Location: *All Versions:* Guided Missiles School, Dam Neck, VA. *Version 2:* Naval Schools Command, Mare Island, CA.

Length: *Version 1:* 10 weeks (295 hours). *Version 2:* 20 weeks (600–603 hours).

Exhibit Dates: *Version 1:* 10/72–12/75. *Version 2:* 2/68–9/72.

Objectives: To teach maintenance personnel the circuitry, signal flow, and characteristics of missile fire control computer groups.

Instruction: *All Versions:* Lectures and laboratories in Terrier weapons system familiarization; missile fire control problems; maintenance and material management systems; maintenance turn-on, power distribution, and power supplies; and block diagram, circuitry, and signal flows. *Version 2:* Additional time is spent on modified systems and their differences.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in electronics or missile systems (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics or missile systems (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics or missile systems (3/74). *Version 2:* In the vocational certificate category, 5 semester hours in electronics or missile systems (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics or missile systems (3/74); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory for non-engineering majors (3/74).

NV-1715-0335

A-6 RIGHT HAND UNIT ALIGNMENT TEST SET, AND ENCODER TAPE DIAL TEST SET INTERMEDIATE MAINTENANCE

Course Number: C-102-3765.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 2/70–1/88.

Objectives: To train maintenance personnel who have had training in digital fundamentals to operate and maintain the right-hand unit alignment test set and the encoder tape dial test set associated with the ballistics computer set.

Instruction: Lectures and practical exercises in the maintenance and operation of the right-hand unit alignment test set and the encoder tape dial test set, including logic circuits, servo amplifiers, pulse generators, power supplies, block-diagram and circuit analysis, and testing procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (3/74); in the upper-division baccalaureate category, 1 semester hour in industrial technology (3/74).

NV-1715-0336

A-6 CARD MODULE ANALYZER TEST CONSOLE, AN/ASM-118, INTERMEDIATE MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 2/68–1/88.

Objectives: To train maintenance personnel to operate and maintain card module analyzer test consoles and to test, maintain, and repair modules and cards associated with ballistics computer sets.

Instruction: Lectures and practical exercises in digital numbering systems, logic circuits, counters, power supplies, and maintenance procedures for module analyzers.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (3/74); in the upper-division baccalaureate category, 1 semester hour in industrial technology (3/74).

NV-1715-0337

Carrier Air Traffic Control Center Equipment Maintenance AN/SPN-10, Class C

Course Number: Not available.

Location: Air Technical Training Center, Glynco, GA.

Length: 15 weeks (600 hours).

Exhibit Dates: *Version 1:* 11/69–1/88. *Version 2:* 4/65–10/69.

Objectives: To train electronic technicians to operate and maintain automatic carrier landing systems and auxiliary equipment.

Instruction: Lectures and practical exercises in analog and digital computer basics, servo systems, power supplies, operational amplifiers, resolvers, transducers, and systems maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 10 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (3/74); in the upper-division baccalaureate category, 2 semester hours in electronics for non-electrical-engineering majors (3/74). *Version 2:* In the vocational certificate category, 10 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0338

Loran Maintenance Enlisted

Course Number: J-102-600.

Location: Fleet Training Center, Norfolk, VA.

Length: 2 weeks (60 hours).

Exhibit Dates: 9/72–1/88.

Objectives: To train enlisted personnel with backgrounds in basic electronics theory to maintain the AN/UPN-12 and AN/UPN-15 Loran receivers, utilizing the Forecast concept of troubleshooting.

Instruction: Lectures and practical exercises in the maintenance of the AN/UPN-12 and AN/UPN-15 Loran receivers, including block-diagram analysis, waveform comparison problems, component troubleshooting, operating theory, and alignment and calibration.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0339

Mk 3 Mod 6 Ship's Inertial Navigation System (SINS) Operations (Enlisted)

Course Number: F-193-082.

Location: Submarine School, Groton, CT.

Length: 4 weeks (120 hours).

Exhibit Dates: 8/69–1/88.

Objectives: To train enlisted personnel to operate and monitor the Mk 3 Mod 6 Ships Inertial Navigation System (SINS).

Instruction: Lectures and practical exercises in the operation and monitoring of automated navigation equipment (SINS Mk 3 Mod 6), including gyro principles, digital filtering, circuit analysis, basic inertial navigation, components, MINDAC Micrologic and characteristics, computer layout and initialization, data interpretation and monitoring, and operation modes.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics or navigation (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics or navigation laboratory (3/74).

NV-1715-0340

E-2A Computer Detector (CP-413/ASA-27) and Computer Detector Test Console (OA-3731/ASM-76) Intermediate Maintenance

Course Number: C-150-3480; C-150-36.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 12 weeks (480 hours).

Exhibit Dates: 2/68–6/74.

Objectives: To train enlisted personnel who have backgrounds or aptitude in avionics and digital fundamentals to operate and maintain computers used in conjunction with target detection systems.

Instruction: Lectures and practical exercises in the maintenance of computer detectors and computer detector test consoles, including system fundamentals and timing, digital circuits, IFF detection, target computation, confidence testing, and data acquisition.

Credit Recommendation: In the vocational certificate category, 5 semester hours in electronics or computers (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics or computers (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics or computer laboratory (3/74).

NV-1715-0341

Fire Control System (FCS) Technician Mk 88 Mod 1 Replacement (Fire Control Technician Mk 88 Replacement)

Course Number: A-121-0245; A-121-0136.

Location: Naval Guided Missiles School, Dam Neck, VA.

Length: *Version 1:* 25 weeks (900 hours). *Version 2:* 18 weeks (398 hours).

Exhibit Dates: *Version 1:* 10/74–2/88. *Version 2:* 10/72–9/74.

Objectives: To train enlisted personnel to operate and maintain a fire control system and associated nontactical equipment.

Instruction: For this course after 2/88 see NV-1715-1385. *All Versions:* Lectures and practical exercises in the operation and maintenance of fleet ballistic missile weapons system, Mk 88 fire control system, digital geoballistic computer, digital transmitter-receiver, magnetic disk, taper, reader, including theory of operation, inertial guidance components, digital-to-analog/analog-to-digital conversion, component analysis, and data flow.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electro-mechanical maintenance (11/83); in the lower-division baccalaureate/associate degree category, 2 semester hours in digital systems, 3 in digital equipment troubleshooting and 3 in data processing equipment maintenance (11/83). *Version 2:* In the vocational certificate category, 7 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (3/74).

NV-1715-0342

A-6 Ballistics Computer Test Console Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 7 weeks (280 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel to maintain ballistics computer test consoles at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of ballistics computer test consoles, including electronic circuitry, block-diagram analysis and signal flow, digital logic circuitry, coding, check-out equipment, timing controls, order and information registers, practical applications, and aircraft replaceable assembly check-out.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory for non-electronics majors (3/74).

NV-1715-0343

Tartar Computer Mk 118 Mod 0 (Tartar Computer Mk 118)

Course Number: A-150-0028.

Location: Guided Missiles School, Dam Neck, VA.

Length: 14–15 weeks (399–420 hours).

Exhibit Dates: 1/68–12/77.

Objectives: To train technicians to maintain, align, adjust, and preserve Tartar Mk 118 computers.

Instruction: Lectures and laboratories in computer operation, analog and digital devices, electromechanical devices, voltage regulators, power supplies, computer interface, and systems testing and maintenance.

Credit Recommendation: In the vocational certificate category, 5 semester hours in electronics and controls (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics and controls (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics and controls (3/74).

NV-1715-0344

Mk 9 Mod 4 Dead Reckoning Analyzer Indicator (DRAI) and Mk 6 Mod 4B Dead Reckoning Tracer (DRT) Maintenance, Class C1

Course Number: A-623-0028; A-623-0029.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: 3–4 weeks (90–114 hours).

Exhibit Dates: 9/71–Present.

Objectives: To train maintenance personnel to operate and repair dead-reckoning analyzer-indicators and tracers.

Instruction: Lectures and practical exercises in the operation and repair of the Mk 9 Mod 4 dead-reckoning analyzer-indicator and the Mk 6 Mod 4B dead-reckoning tracer, including review of the 3-M system, digital fundamentals, electronics, synchros, control transformers, resolvers, servo loops, and test equipment, operation of the specified equipment, components and functional analysis of circuits, block-diagram analysis, and troubleshooting and preventive maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electromechanical systems, 1 in electronic troubleshooting (5/82).

NV-1715-0345

Electronics Technical Officer, Class O

Course Number: None.
Location: Air Technical Training Center, Memphis, TN.
Length: 52 weeks (2,080 hours).
Exhibit Dates: 9/57–12/68.
Objectives: To provide a basic engineering education to career Naval officers with extensive high-level Technician backgrounds.
Instruction: Course covers the basic mathematics, physics, and electricity required for an understanding of electrical or mechanical engineering.
Credit Recommendation: In the vocational certificate category, 9 semester hours in mathematics, and 3 in basic science; in the lower-division baccalaureate/associate degree category, 9 semester hours in electronic circuit theory, 6 in mathematics, 6 in physics, 6 in basic electrical theory, and 3 in electricity and electronics laboratory (7/74); in the upper-division baccalaureate category, 4 semester hours in mathematics, 4 in physics, 2 in technical writing, and 15 as an elective in engineering (12/68).

NV-1715-0346

P-3 AN/ARC-52 UHF Communications Systems Maintenance, No. 21

Course Number: Not available.
Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.
Length: 2 weeks (96 hours).
Exhibit Dates: 1/68–1/88.
Objectives: To train maintenance personnel who have completed a course in transistor fundamentals to maintain the AN/ARC-52 UHF communicatons system of the P-3 aircraft.
Instruction: Lectures and practical exercises in the maintenance of the AN/ARC-52 UHF communication system of the P-3 aircraft, including power circuits, control system, components and operation, and troubleshooting procedures.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0347

E-2A Digital Data Communications System (AN/ASW-14A) Intermediate Maintenance

Course Number: C-150-3473.
Location: Air Maintenance Training Detachment, Air Maintenance Training Detachment, Miramar, CA; North Island, CA.
Length: 3-4 weeks (120-160 hours).
Exhibit Dates: *Version 1:* 1/81–Present. *Version 2:* 1/68–12/80.
Objectives: To train maintenance personnel who have had previous training in basic avionics and digital fundamentals to maintain the E-2A digital data communication system (AN/ASW-14A).
Instruction: Lectures and practical exercises in the latest maintenance procedures for the AN/ASW-14A digital data communication system, including special equipment; theory of operation; circuit analysis; programming, power supply; reply input, data storage, and output; radio receiver and transmitter components; and troubleshooting procedures.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic laboratory (5/85). *Version 2:* Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0348

E-2A Semi-Automatic Check-Out Equipment (SACE) (OA-3738/ASA-48) Programmer Maintenance

Course Number: C-150-3474.
Location: Air Maintenance Training Detachment, North Island, CA.
Length: 9 weeks (360 hours).
Exhibit Dates: 1/68–1/88.
Objectives: To train enlisted personnel who have backgrounds in digital fundamentals to maintain the programming test console.
Instruction: Lectures and practical exercises in the maintenance and operation of the programming test console, including theory of operation, block diagrams of components, programming routines, programming test group theory, power distribution, analysis of specialized equipment components, various logic systems, timers, programmer-analyzer components and function, and module test sets.
Credit Recommendation: In the vocational certificate category, credit in computers on the basis of institutional evaluation (3/74).

NV-1715-0349

E-2A Computer Detector Semi-Automatic Check-Out Equipment (SACE) (OA-3731/ASM-76) Operation and Maintenance

Course Number: Not available.
Location: Air Maintenance Training Detachment, North Island, CA.
Length: 3 weeks (120 hours).
Exhibit Dates: 1/68–1/88.
Objectives: To train enlisted personnel who have had previous training or experience in avionics, computer detector maintenance, and digital fundamentals to operate computer detector semiautomatic check-out equipment.
Instruction: Lectures and practical exercises in the operation and theory of the computer detector semiautomatic check-out equipment, including equipment functions, basic components, power supply, timing and message registers, confidence tests and switching, and troubleshooting procedures.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0350

AN/AWG-10 Receiver, Intermediate Maintenance
(F-4J AN/AWG-10 Receiver Intermediate Maintenance)

Course Number: C-102-3812.
Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, El Toro, CA.
Length: 5-6 weeks (200-240 hours).
Exhibit Dates: 7/68–1/88.
Objectives: To train maintenance personnel to maintain the receiver portion of AN/AWG-10 missile control systems.
Instruction: Lectures and practical exercises in receiver circuitry, receiver waveguides, IF amplifiers, clearance trackers, signal computers, test sets, and maintenance procedures.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0351

AN/ARC-27 UHF Radio Set Intermediate Maintenance

Course Number: Not available.
Location: Air Maintenance Training Detachment, Whidbey Island, WA.
Length: 2 weeks (64 hours).
Exhibit Dates: 6/70–1/88.
Objectives: To train maintenance personnel to operate and maintain the AN/ARC-27 UHF radio set.
Instruction: Lectures and practical exercises in the operation and maintenance of the AN/ARC-27 UHF radio set, including theory of operation, various circuits, power distribution, alignment, and troubleshooting.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0352

Electrical/Electronics Fundamentals, Class P

Course Number: None.
Location: Class P Aviation Fundamentals School, Norman, OK; Class P Aviation Fundamentals School, Jacksonville, FL.
Length: 4-6 weeks (162-240 hours).
Exhibit Dates: 6/56–6/59.
Objectives: To teach nonrated naval aviation personnel and some fleet personnel the fundamentals of electricity and electronics.
Instruction: Lectures and practical exercises in the fundamentals of electricity and electronics, including basic mathematics to elementary trigonometry, basic physics, AC and DC electrical theory, basic magnetism, and instruments.
Credit Recommendation: In the vocational certificate category, 12 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electricity or electronics (3/74).

NV-1715-0353

Fire Control System (FCS) Mk 88 Mod 1 Digital Control Computer

Course Number: A-121-0288; F-121-083.
Location: FBM Submarine Training Center, Charleston, SC; Naval Submarine School Groton, New London, CT.
Length: 3-4 weeks (117-120 hours).
Exhibit Dates: *Version 1:* 9/79–Present. *Version 2:* 1/70–8/79.
Objectives: To train enlisted personnel to operate the Mk 88 digital control computer.
Instruction: *Version 1:* The course covers the functional description of a mini-computer. Topics covered include the instruction set, word format and control sequences, the functional description of subsystems such as the master clock, registers, core memory, arithmetic unit, memory logic, buffers and interrupt operations. *Version 2:* Lectures and practical exercises in the operation and maintenance of the Mk 88 digital control computer, including memory, arithmetic, control, and input/output sections (covered at a detailed logic level); and machine lan-

guage, programs, subroutines, and preventive maintenance.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in minicomputers (3/81). *Version 2:* In the vocational certificate category, 2 semester hours in computer laboratory (3/74); in the upper-division baccalaureate category, credit in computer laboratory on the basis of institutional evaluation (3/74).

NV-1715-0354

1. Photographic Electronics Systems, Class C
2. Photographic Electronics Systems, Class C (Camera Repair, Class C)

Course Number: *All Versions:* C-670-2011.

Location: Air Technical Training Center, Pensacola, FL.

Length: *Version 1:* 9-12 weeks (376-476 hours). *Version 2:* 15-19 weeks (600-760 hours).

Exhibit Dates: *Version 1:* 11/68-1/88. *Version 2:* 6/57-10/68.

Objectives: To train photographer's mates to operate, test, and maintain electronically operated photographic equipment.

Instruction: Lectures and practical exercises in analysis of circuits and systems in photographic equipment, including basic mathematics, DC and AC circuits, electromechanical equipment, vacuum tubes, transistors, test equipment, photographic laboratory equipment, basic camera control equipment, and aerial camera control equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 12 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (3/74); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics (3/74). *Version 2:* In the vocational certificate category, 12 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics (3/74).

NV-1715-0356

Communications Receiver Site Systems Maintenance, Class C1

Course Number: A-101-0070.

Location: Service School Command, Great Lakes, IL.

Length: 8 weeks (240 hours).

Exhibit Dates: 4/74-7/81.

Objectives: To train personnel to operate, maintain, troubleshoot and repair specific communications equipment.

Instruction: Areas of instruction include the use of special test equipment (spectrum analyzer, RF and AF generators and other equipment) to test, align and repair multiplexed communications hardware including telephone, radio and microwave channels.

Credit Recommendation: In the vocational certificate category, 2 semester hours in radio electronics laboratory (9/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in radio electronics (9/77).

NV-1715-0357

RF-4B AN/ASQ-88 and AN/ASQ-108 Communication, Navigation, Identification (CNI) Line Troubleshooting Maintenance

Course Number: C-102-3841.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 3/71-1/88.

Objectives: To train maintenance personnel to maintain specific electronic/radio equipment in the RF-4B aircraft.

Instruction: Lectures and practical exercises in the maintenance of electronic and radio equipment in the RF-4B aircraft system, including analysis of operation; communications systems components; navigation and identification equipment; integration of aircraft, CNI, and electronic systems; and practical applications of line maintenance.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0358

P-3C AN/AXR-13 Low Light Level Television Camera Intermediate Maintenance

Course Number: C-102-3597.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 2/73-1/88.

Objectives: To train maintenance personnel to operate, calibrate, and maintain the AN/AXR-13 low-light-level television camera.

Instruction: Lectures and practical exercises in the operation, calibration, and maintenance of the AN/AXR-13 low-light-level television camera, including block-diagram analysis, test equipment, system circuit analysis, components, power supply, and assembly.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0359

AN/APN-171 (V) Radar Altimeter (High Level) Intermediate Maintenance

Course Number: C-102-3036.

Location: Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Santa Ana, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train maintenance personnel to service and maintain the AN/APN radar altimeters.

Instruction: Lectures and practical exercises in pulse radar maintenance procedures, including theory and analysis of various circuits and working components of the AN/APN radar altimeter.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0360

AN/APM 341 (V) Doppler Test Set Intermediate Maintenance

Course Number: C-104-3786; C-102-3800.

Location: Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, Lemoore, CA.

Length: *Version 1:* 4 weeks (160 hours). *Version 2:* 5 weeks (200 hours).

Exhibit Dates: *Version 1:* 10/80-Present. *Version 2:* 12/72-9/80.

Objectives: To train selected personnel to operate, maintain, and troubleshoot the AN/APM 341 (V) Doppler test set.

Instruction: Lecture and practical exercises in maintenance procedures for the AN/APM 341 (V) Doppler test set, including instruction on logic concepts, radar signal simulator and spectrum analyzer, microwave converter and digital readout monitor, standing-wave ratio meter, and quick-replaceable assemblies.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation electronics/electronic circuit analysis and 1 semester hour in electronic circuits laboratory for non-electrical engineering students (3/82). *Version 2:* Credit is not recommended because of the limited, specialized nature of the course (4/74).

NV-1715-0361

EKA-3B AN/ALQ-92 Countermeasures Set Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 6 weeks (240 hours).

Exhibit Dates: 12/69-1/88.

Objectives: To train electronics maintenance personnel to maintain and operate the AN/ALQ-92 electronic countermeasures set.

Instruction: Lectures and laboratories in AN/ALQ-92 countermeasures set operation, including transmitter, receiver modulator, relay assembly, and display unit; and laboratory procedures, including performance test, trouble analysis, functional checkout and alignment procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0362

F-4B Airborne Missile Control System AERO 1-A Organizational Maintenance

Course Number: C-112-3611; C-112-3809; C-112-12.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, El Toro, CA.

Length: 5-9 weeks (200-360 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to maintain and service Aero 1-A airborne control systems.

Instruction: Lectures and practical exercises in systems familiarization, test equipment, and maintenance procedures, including instruction on AN/APQ-72 low-voltage power supplies, transmitters, electrical frequency controls, receiver and automatic gain controls, range tracking system, transmitter and synchronizer harmonization, vertical reference system, antenna, power supply, indicators, and guns; AN/APM-32 and AN/UPM-32 radar test sets; and AN/APA-157 block-diagram analysis, transmitter, modulator, steering functions, and launch functions.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0363

A-3B ASB-7 Radar Stabilization and Auxiliary Subsystems Maintenance (Less CP-209 and AN/APN-122)

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train enlisted personnel to maintain ASB-7 radar, stabilization, and auxiliary systems.

Instruction: Lectures and practical exercises in operational procedures; bombing and navigational problems; stabilization subsystems and associated servo loops; optics, periscopes, and photography; radar theory and application; and maintenance and systematic troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0364

Electronics Technician, Class C, AN/SPN-38 Loran Receiving Set Maintenance

Course Number: A-102-0083.

Location: Electronics Technician, Class C School, Norfolk, VA.

Length: 5 weeks (150 hours).

Exhibit Dates: 8/71-1/88.

Objectives: To train enlisted personnel to operate and maintain the AN/SPN-38 Loran receiver.

Instruction: Lectures and laboratories in Loran receiver principles, controls, operation, and maintenance, including AC and DC power distribution and control circuits; circuit and block-diagram analysis; slave trigger, strobe-pulse, and gross-delay generators operation; logic control section and logic analysis; and alarm, indicator, and self-check sections operation and maintenance.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0365

F-8 AN/APQ-94 Radar Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Jacksonville, FL.

Length: 5 weeks (200 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel who have completed a course in transistor fundamentals to maintain the AN/APQ-94 radar system and associated equipment.

Instruction: Lectures and practical exercises in the maintenance of the AN/APQ-94 radar system and associated equipment, including power supplies, block diagrams of systems, theory of operation, test set operation, component analysis, various computer subsystems, antenna and antenna control and instrumentation, and system alignment, hazards, and troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0366

RA-5C AN/ALQ-61 Passive Electronics Countermeasures Organizational Maintenance

Course Number: C-102-3746.

Location: Air Maintenance Training Detachment, Albany, GA.

Length: 4 weeks (160 hours).

Exhibit Dates: 7/69-1/88.

Objectives: To train maintenance personnel to operate and maintain the AN/ALQ-61 passive electronics countermeasures set.

Instruction: Lectures and practical exercises in the maintenance and operation of the AN/ALQ-61 passive electronics countermeasures set, including antennas and receivers at various bands, frequency and direction encoders, pulse measurement, programmer, power distribution, circuits, and associated test sets.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (3/74).

NV-1715-0367

RA-5C AN/ALQ-61 Countermeasure Set Shop Maintenance

Course Number: C-102-3745.

Location: Air Maintenance Training Detachment, Sanford, FL.

Length: 11 weeks (440 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to operate, maintain, and service AN/ALQ-61 passive electronic countermeasures sets and to perform shop maintenance.

Instruction: Lectures and laboratories in the operation and maintenance of receivers, frequency encoders, direction encoders, programmers, coded-pulse detectors, and signal data recorders.

Credit Recommendation: In the vocational certificate category, 8 semester hours in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics laboratory (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (3/74).

NV-1715-0368

RF-4B AN/ARC-105 High Frequency Communication System and RO-254/ASQ Sound Recorder Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 3/68-1/88.

Objectives: To train maintenance personnel to maintain, troubleshoot, and repair AN/ARC-105 high-frequency communications systems and RO-254/ASQ sound recorders.

Instruction: Lectures and laboratories in theory of operation and maintenance procedures for receivers and transmitters, antenna coupler systems, and sound recorders; circuit analysis; block diagrams; and signal flow.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (3/74).

NV-1715-0369

RT-648/ARC-94 and RT-698/ARC-102 HF Transceiver Intermediate Maintenance

Course Number: C-102-3026.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Santa Ana, CA; Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Cp. Pendleton, CA; Air Maintenance Training Detachment, Key West, FL; Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Jacksonville, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: 7/71-Present.

Objectives: To train maintenance personnel to maintain and repair a single side band transceiver (RT-648/698) to the component level.

Instruction: Lectures and laboratories in single-sideband characteristics, power supply, system block-diagram analysis, circuit analysis, operating procedures, performance testing, system alignment, system troubleshooting, and component repair.

Credit Recommendation: In the vocational certificate category, 3 semester hours in HF electronics (7/81); in the lower-division baccalaureate/associate degree category, 2 semester hours in HF communications (7/81).

NV-1715-0370

A-6A AN/ASQ-57 Communication, Navigation, Identification (CNI) System and AN/AIC-14 Intercommunications System Intermediate Maintenance

(A-6 AN/ASQ-57 Communication, Navigation, Identification (CNI) System, AN/AIC-14 Intercommunication System Intermediate Maintenance)

Course Number: C-102-3766; C-102-228.

Location: Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 7 weeks (280-320 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to operate, maintain, and test AN/ASQ-57 integrated electronic central and AN/AIC-14 intercommunications systems.

Instruction: Lectures and practical exercises in system familiarization, power supplies, amplifiers, transceiver electronics, alignment procedures, shop testing, and troubleshooting.

Credit Recommendation: In the vocational certificate category, 5 semester hours in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics laboratory (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (3/74).

NV-1715-0371

F-4J AN/AWG-10 and Electronic Counter Countermeasure Circuitry Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 3 weeks (120 hours).

Exhibit Dates: 3/71-1/88.

Objectives: To train maintenance personnel to operate and maintain the electronic counter-countermeasures circuitry of AN/AWG-10 missile control systems.

Instruction: Lectures and laboratories in pulse Doppler circuitry, radar circuitry, antenna control, waveform and voltage analysis, system familiarization, and maintenance and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics (3/74).

NV-1715-0372

RADIO AIDS UNIT (DEVICE 1-D-5), CLASS C

Course Number: Not available.

Location: Air Technical Training Center, Memphis, TN.

Length: 5 weeks (200 hours).

Exhibit Dates: 12/55–12/68.

Objectives: To train enlisted personnel to operate, maintain, and instruct other personnel on radio aids units.

Instruction: Lectures and practical exercises in theory, operation, maintenance, and troubleshooting of radio aids units.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0373

RT 648/698 (AN/ARC-94/102/105/119/120) HF TRANSCEIVER INTERMEDIATE MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Santa Ana, CA; Air Maintenance Training Detachment, Cp. Pendleton, CA; Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Key West, FL; Air Maintenance Training Detachment, New River, NC.

Length: 4 weeks (120 hours).

Exhibit Dates: 5/70–1/88.

Objectives: To train maintenance personnel to maintain RT 648/698 HF transceivers at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of RT 648/698 HF transceivers, including principles of single-sideband communications, system and subsystem components, test equipment, various translator modules, circuit analysis, and system alignment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in circuit analysis or electronics (3/74).

NV-1715-0374

P-3 AN/ARC-94 COMMUNICATIONS SYSTEM MAINTENANCE, NO. 19

Course Number: Not available.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel to maintain the AN/ARC-94 transceiver in the P-3 aircraft.

Instruction: Lectures and practical exercises in the maintenance of the AN/ARC-94 transceiver in the P-3 aircraft, including block-diagram and circuit analysis, various translator modules within the system, stabilizers, power supplies, antenna operation, and associated test sets.

Credit Recommendation: In the vocational certificate category, 2 semester hours in circuit analysis or electronics (3/74).

NV-1715-0375

E-2A AN/ASQ-58 INTEGRATED ELECTRONIC CENTRAL TACAN—RT-541/ASQ AND KY-309/ASQ POWER SUPPLY—AM-2310/ASQ INTERMEDIATE MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 4/68–1/88.

Objectives: To train maintenance personnel to maintain and troubleshoot the E-2A integrated electronic central TACAN and related power supply equipment at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of the E-2A integrated electronic central TACAN and related power supply equipment, including theory of operation, circuit analysis, system components, and instruction in amplifiers, receivers, three-phase bridge rectifier circuits, AC power distribution, modulation, and transmitter circuits.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics (3/74).

NV-1715-0376

E-2A INTEGRATED ELECTRONIC CENTRAL (AN/ASQ-58) INTERMEDIATE MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel to maintain E-2A integrated electronic controls (AN/ASQ-58).

Instruction: Lectures and practical exercises in the maintenance of E-2A integrated electronic controls (AN/ASQ-58), including system components, theory of operation; receiver, transmitter, power distribution, coder, and relay module circuit analysis; TACAN principles of operation and circuit analysis, specific IFF interrogator equipment analysis, and relations between systems equipment.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (3/74).

NV-1715-0377

E-2A AN/ASQ-58 INTEGRATED ELECTRONIC CENTRAL IFF—KY-308/ASQ AND POWER SUPPLY—AM-2310/ASQ INTERMEDIATE MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 4/68–1/88.

Objectives: To train maintenance personnel to maintain the E-2A IFF KY-308/ASQ integrated electronic central and the AM-2310/ASQ power supply at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of E-2A IFF KY-308/ASQ integrated electronic central and AM-2310/ASQ power supply, including theory of operation, system components, power supply, receiver, power distribution, transmitter, and decoder circuits, and alignment and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics (3/74).

NV-1715-0378

RADIO TRANSMITTING SET AN/URT-23 (V) MAINTENANCE (ENLISTED)

Course Number: F-101-025.

Location: Submarine School, Groton, CT.

Length: 3 weeks (90 hours).

Exhibit Dates: 2/68–1/88.

Objectives: To train maintenance personnel to operate and maintain the AN/URT-23 (V) radio transmitting set and the AN/URA-38 antenna coupler group.

Instruction: Lectures and practical exercises in the maintenance and operation of the AN/URT-23 (V) radio transmitting set and the AN/URA-38 antenna coupler group, including circuit analysis, block diagram and signal flow, amplifiers, oscillators, keying circuits, power supplies, theory of operation, power distribution, review of specific radio equipment, and transmitting set alignment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (3/74).

NV-1715-0379

E-2A MULTI-PURPOSE COMMUNICATIONS SYSTEM (AN/ASQ-52) INTERMEDIATE MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 10 weeks (400 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel with knowledge of or aptitude in avionics to operate and maintain the AN/ASQ-52 multipurpose communications system.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/ASQ-52 multipurpose communications system, including instruction in electronic controls in the transceiver, power supply, electronic radio frequency circuits, control section, Doppler and synchronization circuits, IFPM circuits, servo controls, and associated test sets.

Credit Recommendation: In the vocational certificate category, 7 semester hours in electronics or radio (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics or radio (3/74).

NV-1715-0380

1. AVIONICS TECHNICIAN CLASS A1, MODULES 1–9
2. AVIONICS TECHNICIAN (AV), CLASS A
3. AVIONICS TECHNICIAN, CLASS A
4. AVIONICS FUNDAMENTALS, CLASS A
5. AVIONICS FUNDAMENTALS, CLASS A
6. AVIATION ELECTRONICS FUNDAMENTALS, CLASS A

Course Number: C-100-2013.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: *Version 1:* Self-paced 10–16 weeks (485 hours). *Version 2:* 10–20 weeks (800 hours). *Version 3:* 20 weeks (800 hours). *Version 4:* 14–16 weeks (560–640 hours).

Version 5: 19 weeks (760 hours). *Version 6:* 15 weeks (600 hours).

Exhibit Dates: *Version 1:* 1/78–9/86. *Version 2:* 6/72–12/77. *Version 3:* 7/69–5/72. *Version 4:* 6/65–6/69. *Version 5:* 3/60–5/65. *Version 6:* 5/58–2/60.

Objectives: To provide enlisted Navy and Marine Corps personnel with training in electronic communications fundamentals.

Instruction: For this corse after 9/86 see NV-1715-1439. *All Versions:* Lectures and laboratories in analog and digital computer fundamentals, and maintenance publications and procedures. *Version 1:* Lectures and laboratories in fundamentals of amplitude and frequency modulated communications systems; study of AM receiver circuits, use of test equipment, isolating malfunctioning modules and troubleshooting to the circuit and component level. Topics covered include RF, IF and audio amplifiers, mixers, oscillators, detectors, modulations and power supplies. Introduction to basic digital logic, principles and circuits as well as to the organization, programming and troubleshooting of basic digital computers. *Version 2:* Primarily transistor electronics, including block-diagram and circuit analysis, DC and AC electrical fundamentals, semiconductor theory and circuit applications. There was a 'Rapid Learner Section' (fast track) offered as an accelerated program. Course content was condensed into 10 weeks. *Version 3:* Instruction also includes AC and DC electrical fundamentals, semiconductor theory and circuit applications as well as shifts from vacuum tube to solid-state circuitry. *Version 4:* Instruction includes AC and DC electrical fundamentals, semiconductor theory and circuit applications with a primary emphasis on vacuum tube electronics. *Version 5:* Instruction includes AC and DC electrical fundamentals, semiconductor theory and circuit applications with a primary emphasis on vacuum tube electronics. *Version 6:* Instruction includes AC and DC electrical fundamentals, semiconductor theory and circuit applications with a primary emphasis on vacuum tube electronics.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in communications fundamentals and 4 in digital and computer fundamentals for those students holding the AT, AQ, or AX rating and completing the 16 week version of this course. 4 semester hours in communications fundamentals, 4 in digital and computer fundamentals for those students holding a TD rating and completing the 10–11 week version of this course. *Version 2:* In the vocational certificate category, 12 semester hours in electronics and electronic circuits (3/74); in the lower-division baccalaureate/associate degree category, 9 semester hours in electronics and electronic circuits (3/74). *Version 3:* In the vocational certificate category, 12 semester hours in electronics and electronic circuits (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electronics, 4 in electronic circuits (12/68); in the upper-division baccalaureate category, 3 semester hours in electronics and electronic circuits (3/74). *Version 4:* In the vocational certificate category, 12 semester hours in electronics and electronic circuits (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics, 3 in electronic circuits (12/68); in the upper-division baccalaureate category, 3 semester hours in electronics and electronic circuits (3/74). *Version 5:* In the vocational certificate category, 12 semester hours in electronics and electronic circuits (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electronics, 4 in electronic circuits (12/68); in the upper-division baccalaureate category, 3 semester hours in electronics and electronic circuits (3/74). *Version 6:* In the vocational certificate category, 12 semester hours in electronics and electronic circuits (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics, 3 in electronic circuits (12/68); in the upper-division baccalaureate category, 3 semester hours in electronics and electronic circuits (3/74).

NV-1715-0381

CONTROL PANEL MK 309 MOD 0
OPERATION AND MAINTENANCE

Course Number: A-130-0099.

Location: Fleet Antisubmarine Warfare Training Center, Pacific, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 5/77–Present.

Objectives: To train selected personnel to operate and maintain the control panel aboard Coast Guard and Naval units.

Instruction: Lectures and laboratories in introduction to the Mk 309 Mod 0 control panel, its operation, functional and detailed description, preventive and corrective maintenance, and alignment and adjustment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics laboratory (6/78).

NV-1715-0382

E-2A AN/ASQ-52 DATA COMMUNICATION
SYSTEM SPECIAL SUPPORT
EQUIPMENT INTERMEDIATE

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 4/68–1/88.

Objectives: To provide maintenance personnel who have completed an intermediate data communications maintenance course with training in data communications system special support equipment, including theory of operation, alignment, and operational procedures.

Instruction: Lectures and practical exercises in functions, block diagrams, modes of operation, power supplies, and preventive maintenance of signal data convertors; functions, block diagrams, radio transmitters and receivers block diagram and circuits, logic elements, message generation, data modulation, tone level and audio adjustments, frequency synthesizers, response and analysis modules, RC correlation, and comparison and control modules of line test sets; and maintenance and testing procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0383

A-4F/L/TA-4F COMMUNICATION,
NAVIGATION, IDENTIFICATION
(CNI)/WEAPONS SYSTEMS
ORGANIZATIONAL MAINTENANCE

Course Number: C-102-3718.

Location: Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Beaufort, SC.

Length: 2 weeks (80 hours).

Exhibit Dates: 4/73–1/88.

Objectives: To train maintenance personnel to troubleshoot and maintain Communication Navigation Identification (CNI)/weapons systems.

Instruction: Lectures and practical exercises in CNI systems used on A-4F aircraft; intercom systems and UHF communication system hardware; navigation systems, radar altimeters, and Doppler radar; high-altitude radar identification (IFF) systems; and troubleshooting, calibration, and testing procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0384

ADVANCED FIRE CONTROL SYSTEM (FCS)
MK 106 MOD 5

Course Number: A-113-0037.

Location: Submarine School, Groton, CT.

Length: 5 weeks (165 hours).

Exhibit Dates: 9/70–1/88.

Objectives: To train fire control technicians to maintain Mk 106 Mod 5 fire control systems and associated equipment.

Instruction: Lectures and practical exercises in troubleshooting and maintenance techniques for torpedo data computer, sound bearing computers, target designation systems, and depth, enabling, and station control circuits.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0385

DATA SYSTEMS TECHNICIAN, CLASS C,
WEAPON DIRECTION SYSTEM MK XI
MOD 0/1 MAINTENANCE TRAINING

Course Number: A-150-0059.

Location: Naval Schools Command, Mare Island, CA.

Length: *Version 1:* 10 weeks (300 hours). *Version 2:* 4 weeks (120 hours).

Exhibit Dates: *Version 1:* 7/71–1/79. *Version 2:* 11/70–6/71.

Objectives: To train enlisted personnel to operate and maintain weapon direction systems.

Instruction: Lectures and laboratories in system familiarization, isolation and repair of malfunctions, and utilization of tools and test equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in troubleshooting and hand skills (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in troubleshooting and hand skills (4/74). *Version 2:* In the vocational certificate category, 2 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics (3/74).

NV-1715-0387

COMMUNICATIONS TRANSMITTER SITE
SYSTEMS MAINTENANCE, CLASS C1

Course Number: A-101-0069.

Location: Service School Command, Great Lakes, IL.

Length: 8 weeks (240 hours).

Exhibit Dates: 10/73–1/88.

Objectives: To train personnel to operate and maintain specific communications systems.

Instruction: Lectures and practical exercises in the operation and maintenance of equipment including microwave radio assemblies, transmitter fundamentals, microwave multiplexing, telephone terminals, telegraph terminals, and multichannel telegraph.

Credit Recommendation: In the vocational certificate category, 2 semester hours in communications equipment troubleshooting (9/77).

NV-1715-0388

AN/ASN-90 Inertial Measurement Set Intermediate Maintenance
(A-7 AN/ASN-90 Inertial Measurement Set Intermediate Maintenance)

Course Number: C-102-3788.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: *Version 1:* 3 weeks (120-136 hours). *Version 2:* 4 weeks (152-160 hours).

Exhibit Dates: *Version 1:* 11/76-Present. *Version 2:* 9/71-10/76.

Objectives: To train enlisted personnel who have had previous training in digital fundamentals and electronics to maintain, assemble, and troubleshoot inertial measurement equipment, using semiautomatic and automatic testing procedures.

Instruction: *All Versions:* Lectures and practical exercises in functional operation of AN/ASN-90 inertial measurement sets, controllers, adapter/power assemblies, and inertial measurement units; test and calibration procedures; and fault isolation techniques.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electronics system maintenance (3/82). *Version 2:* Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0389

Relay Transmitter Mk 60 Maintenance
(Relay Transmitter Mk 60 Mod 0 Maintenance—UFCG Mk 114 Mods 9-12)

Course Number: K-130-0060; A-130-0060.

Location: Fleet Antisubmarine Warfare Training Center, San Diego, CA; Fleet Sonar School, Key West, FL.

Length: 2-3 weeks (80-105 hours).

Exhibit Dates: 4/68-Present.

Objectives: To train enlisted personnel to operate and maintain Mk 60 Mod 0 relay transmitters.

Instruction: Lectures and laboratories in block-diagram and circuit analysis and system operation and maintenance procedures, with emphasis on system test functions. This is a highly specialized equipment course.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/86).

NV-1715-0390

AN/WPN-4 Maintenance

Course Number: F-102-014.

Location: Submarine School, Groton, CT.

Length: 4 weeks (120 hours).

Exhibit Dates: 10/67-1/88.

Objectives: To train enlisted personnel to operate and maintain the AN/WPN-4 Loran C receiving set.

Instruction: Lectures and laboratories in AN/WPN-4 Loran C receiver fundamentals; system components and operation, including data flow, indicator subassembly, delay switches and network pulse delay, pulse generator, and cycle, envelope and amplitude, and guard and signal-monitoring channels; use of schematics and technical manuals; and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics (4/74).

NV-1715-0391

Terrier Mk 152 Computer Complex

Course Number: A-150-0085.

Location: Naval Guided Missiles School, Dam Neck, VA.

Length: *Version 1:* 19-20 weeks (760-800 hours). *Version 2:* 9 weeks (360 hours).

Exhibit Dates: *Version 1:* 5/75-10/88. *Version 2:* 11/72-4/75.

Objectives: To train enlisted personnel to operate and maintain missile fire control equipment and electronic test equipment.

Instruction: For this course after 10/88 see NV-1715-1382. *Version 1:* Lectures and practical exercises in the operation and maintenance of the Mk 152 computer system including its power supplies, memories, clock, I/O instructions and operations and complete machine on/gauge instruction set; computer turn ON/OFF, computer programming, data conversion, data terminal, motor generator set, and loading programs via magnetic or paper tapes. *Version 2:* Lectures in fire control system functions and characteristics; fire control computer turn-on, load, and turn-off procedures; interface requirements and word formats; digital data recorder, master clock, and digital control; logic flow of writing operations and data flow of read operations; input/output control and operation; signal data conversion; A/D and D/A converters; dual-trace oscilloscopes operation; magnetic tape storage elements; and operation and use of digital clocks, digital voltmeters, AC/DC differential voltmeters, VOMs, VTMs, and electronic counters.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in electronic troubleshooting, 3 in machine language programming (11/83). *Version 2:* In the vocational certificate category, 4 semester hours in electronics, digital logic, and electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics, digital logic, and electronics laboratory (4/74); in the upper-division baccalaureate category, credit in electronics, digital logic, and electronics laboratory on the basis of institutional evaluation (4/74).

NV-1715-0392

Read Only Memory (ROM) Encoder Elevator Control Maintenance, Class C1

Course Number: A-690-0018.

Location: Service School Command, Great Lakes, IL.

Length: 2 weeks (67 hours).

Exhibit Dates: 7/77-1/88.

Objectives: To familiarize trained personnel in the operation and troubleshooting techniques needed for a computer controlled elevator system.

Instruction: Instruction includes the operation of the elevator control system, troubleshooting techniques in a digital PDP-14 computer and component replacement in the computer.

Credit Recommendation: In the vocational certificate category, 1 semester hour in computer servicing (9/77).

NV-1715-0393

F-4B/J-RF-4B AN/ALQ-88 Countermeasures Set Intermediate Maintenance

Course Number: C-102-3071.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train fleet maintenance personnel to operate, troubleshoot, and repair the F-4B/J-RF-4B AN/ALQ-88 countermeasures set.

Instruction: Lectures and practical exercises in AN/ALQ-88 countermeasures set operation, troubleshooting, and repair, including logic review, DECM principles and techniques, theory of operation, block diagram, power control and power supply, various components assembly procedures, hydraulic cooling unit operation, and test equipment usage.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0394

F-4B AN/ASQ-19 TACAN System (RT-547 and KY-312) Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, El Toro, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/71-1/88.

Objectives: To train enlisted personnel who have backgrounds in electronics to troubleshoot, maintain, and repair TACAN aircraft navigation equipment.

Instruction: Lectures and practical exercises in TACAN system introduction, principles of operation, block-diagram analysis, and frequency selector control system operation; pulse decoder operation, decoding procedures, and circuits; and TACAN maintenance, circuit troubleshooting, and bench check-out procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0395

F-4J Shoehorn Organizational Maintenance

Course Number: C-102-3819.

Location: Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, El Toro, CA.

Length: 3-5 weeks (120-200 hours).

Exhibit Dates: 8/70-1/88.

Objectives: To train fleet maintenance personnel to install, remove, and service aircraft electronic countermeasures equipment.

Instruction: Lectures and practical exercises in F-4J Shoehorn electronic countermeasures equipment installation, removal, and servicing, including radar homing and warning equipment and power sources, ALQ-51/100 and ALQ-91A countermeasures sets and associated circuits, aircraft ECM systems locations and operational checks, and system maintenance procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0396

Tartar Radar Test Set Mk 474 Mod 2

Course Number: A-104-0112; A-104-0113.
Location: Guided Missiles School, Dam Neck, VA; Guided Missiles School, Mare Island, CA.
Length: 3 weeks (74 hours).
Exhibit Dates: 11/72-12/77.
Objectives: To train enlisted personnel to operate the Mk 474 test set.
Instruction: Lectures and practical exercises in Mk 474 test set operation, including functional block diagram; systems dynamic tester introduction; angle error circuits, pulse delay network, target modulator, and countermeasures signal simulator operation; and system flow diagram review, tuning, and adjustment procedures.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0397

Cable Tester Alfred Model 9500
Intermediate Maintenance

Course Number: C-102-3058.
Location: Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Miramar, CA.
Length: 4 weeks (120 hours).
Exhibit Dates: 10/72-1/88.
Objectives: To train fleet maintenance personnel to maintain and repair the Alfred Model 9500 cable tester.
Instruction: Lectures and practical exercises in basic transmission principles: cable tester circuit analysis; and system maintenance procedures, including testing, alignment and troubleshooting.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0398

Terrier Computer Mk 100 Mod 2

Course Number: Not available.
Location: Service Schools Command, Great Lakes, IL.
Length: 20 weeks (600 hours).
Exhibit Dates: 2/68-12/75.
Objectives: To train enlisted personnel to maintain the Mk 100 Mod 2 Terrier missile weapon system.
Instruction: Lectures and practical exercises in the maintenance of the Mk 100 Mod 2 Terrier missile system, including fire control system function, operational sequence of launching system, control computer, power distribution circuits, computer amplifiers, controls and indicators, test equipment use, basics of analog computers, servomechanisms, summing operation in analog computer, associated equipment in deck-tilt and radar position modes, shipboard and shore fire control, and troubleshooting of computer and weapons director circuits.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0399

RF-4B AN/APQ-102 Side Looking
Radar Intermediate
Maintenance

Course Number: C-100-3831.
Location: Air Maintenance Training Detachment, El Toro, CA.
Length: *Version 1:* 9 weeks (360 hours). *Version 2:* 6 weeks (240 hours).
Exhibit Dates: *Version 1:* 8/70-1/88. *Version 2:* 1/68-7/70.
Objectives: To train maintenance personnel to maintain, service, and troubleshoot AN/APQ-102 (A) side-looking radar.
Instruction: *All Versions:* Lectures and practical exercises in side-looking radar system introduction; subsystems operation; synchronizer block-diagram analysis, receiver block-diagram analysis, and RF and IF circuits theory; video and AGC circuits; antenna system theory of operation; practical applications, maintenance, and troubleshooting procedures. *Version 1:* Instruction includes recorder operation and built-in test and power supply theory and analysis.
Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electrical laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 2:* In the vocational certificate category, 3 semester hours in electrical laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0400

Cryptologic Technician A
(Administration)—Class A
(Communications Technician Administration Branch Class A)

Course Number: A-510-0015.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: *Version 1:* 11 weeks (417 hours). *Version 2:* Self-paced 8 weeks (Average 259 hours).
Exhibit Dates: *Version 1:* 9/79-Present. *Version 2:* 4/75-8/79
Objectives: To provide the basic knowledge of job skills and professional qualifications required for performance in the administrative and personnel fields.
Learning Outcomes: @1 Upon completion of the course, the student will be able to: (1) type 30 wpm with no more than 4 errors; (2) understand and complete standard naval control forms; (3) understand procedures and formats involved in the communications process and; (4) exhibit competency in handling classified information. *Version 2:* This is a self-paced individualized learning system course which includes the following: knowledge of security for classified matter, safeguards and procedures; understanding of the Organization for National Security, Naval Establishment, Naval Communications, Naval Security Group Command; instruction in typing to a speed of at least 30 net words per minute, general clerical duties, operation of office machines and related functions necessary to perform in an administration, personnel, facilities, operation, and communications environment.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in beginning typing (7/87). *Version 2:* In the vocational certificate category, 3 semester hours in office practice and 2 in typewriting (9/78); In the lower-division baccalaureate/associate degree category, 1 semester hour in written communication (9/78).

NV-1715-0401

Radarman, Class A, Basic Preventive
Maintenance and Operators

Course Number: Not available.
Location: Class A Radarman School, Great Lakes, IL; Class A Radarman School, Norfolk, VA.
Length: 24 weeks (960 hours).
Exhibit Dates: 9/56-12/68.
Objectives: To train enlisted personnel to maintain and determine the operational readiness of, radar equipment.
Instruction: Lectures and practical exercises in the maintenance of radar equipment, including combat information center functions, surface search radar and associated remote repeaters, air search and altitude-determining radars and associated remote repeaters, operational procedures of information friend-or-foe (IFF) equipment, shipboard radar countermeasures equipment, airborne early warning radar equipment, internal communications, air plotting, relative motion and the maneuvering board, formation plotting and tactics, radar navigation and remote repeater operation and plotting.
Credit Recommendation: In the vocational certificate category, credit in electricity or electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0402

Radar Signal Processing Equipment
(RSPE) Maintenance

Course Number: K-113-2033.
Location: Fleet Training Center, San Diego, CA.
Length: 4 weeks (114-120 hours).
Exhibit Dates: 10/72-1/88.
Objectives: To train fire control technicians to maintain the radar signal-processing equipment associated with specific radar systems.
Instruction: Lectures and practical exercises in the maintenance of radar signal-processing equipment, including operating modes of the equipment, IF detection and amplification, video processing, jamming detection, automatic range acquisition and tracking, logic circuits, systems readiness checks, adjustments and fault isolation.
Credit Recommendation: In the vocational certificate category, credit in electricity or electronics on the basis of institutional evaluation (3/74).

NV-1715-0403

Radar Signal Processing Equipment
(RSPE) Maintenance Mk 1 and
Mods 1-5

Course Number: J-113-0111; J-113-1112.
Location: Fleet Combat Training Center, Dam Neck, VA.
Length: *Version 1:* 5 weeks (175 hours). *Version 2:* 7 weeks (245 hours).
Exhibit Dates: *Version 1:* 10/80-Present. *Version 2:* 10/72-9/80.
Objectives: To train fire control technicians to operate and maintain specific radar signal processing equipment (RSPE).
Instruction: *Version 1:* Lectures and practical exercises in the principles of operation and the development of knowledge and skills necessary to perform shipboard maintenance of video, display and radar signal processing equipment including the practical application of identification of the inter-

relationship and function of the system components, casualty analysis, troubleshooting and the performance of tests and adjustments. *Version 2:* Lectures and practical exercises in the operation and maintenance of radar signal processing equipment Mk-I and Mods, including fundamentals of solid-state diodes, transistors, and logic theory; RSPE operating modes; IF detection and amplification; jamming detection, automatic range and angle acquisition and tracking, electronic counter-countermeasures, system interfacing, system readiness, and troubleshooting procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic equipment maintenance (9/84). *Version 2:* In the vocational certificate category, 1 semester hour in electricity or electronics, and credit in electricity or electronics laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electricity or electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0404

SONAR AN/SQS-38 MAINTENANCE
(USCG)

Course Number: A-130-0071.

Location: Fleet Anti-submarine Warfare Training Center, San Diego, CA; Fleet Sonar School, Key West, FL.

Length: 10 weeks (388-400 hours).

Exhibit Dates: 1/73-1/88.

Objectives: To train Coast Guard sonarmen to maintain, calibrate, and operate the AN/SQS-38 sonar, the WQC2 underwater telephone, and associated equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/SQS-38 sonar set, WQC2 underwater telephone, and built-in test equipment, including special circuits, power supplies and distribution, transmission signal development; transmitter modules, transducers, and transducer switching; and receiving subsystem, including classification, position-indicator system timing and deflection circuitry, primary cursor generation, and servos.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic troubleshooting (8/77).

NV-1715-0405

SONAR AN/SQS-26CX AND AN/SQS-53
MAINTENANCE
(Sonar AN/SQS-26CX Maintenance)
(Sonar Detecting-Ranging Set AN/SQS-26CX)

Course Number: A-130-0102; A-130-0047; A-130-0048; J-130-0865.

Location: Fleet Sonar School, Key West, FL; Fleet Anti-Submarine Warfare School, San Diego, CA.

Length: 24-30 weeks (798-900 hours).

Exhibit Dates: 1/69-1/88.

Objectives: To train enlisted personnel to operate, maintain, troubleshoot, and repair the specified sonar detecting-ranging equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/SQS-26CX and, beginning February 1977, the AN/SQS-53 sonar detecting-ranging set, including binary mathematics and logic, test equipment, modes of operation, sound propagation, primary power distribution, sonar monitor, block diagrams, fault-locating monitor, mode selection and generation, simulated targets and target control, surface duct programmer and transmitter, B-scan receiver and display, various circuits, variable depression components, range measuring and servos.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronic troubleshooting (8/77).

NV-1715-0406

A-6 ASSOCIATED RADAR TEST EQUIPMENT
INTERMEDIATE LEVEL
MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 8 weeks (320 hours).

Exhibit Dates: 5/70-1/88.

Objectives: To train maintenance personnel to operate, troubleshoot, and maintain search radars and associated test equipment.

Instruction: Lectures and laboratories in theory of operation and system functions of radar set controls, azimuth/elevation/range indicators, search radar antenna/receivers, and data processing units.

Credit Recommendation: In the upper-division baccalaureate category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0407

CLOSED CIRCUIT TELEVISION
MAINTENANCE, CLASS C1

Course Number: A-198-0025.

Location: Service School Command, Great Lakes, IL.

Length: 4 weeks (120 hours).

Exhibit Dates: 1/74-1/88.

Objectives: To provide detailed instruction in the components of closed circuit television and to train personnel in operation and corrective maintenance.

Instruction: Demonstrations in parts identification and operation of the closed circuit television system utilizing a small amount of test procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in closed circuit television (9/77).

NV-1715-0408

A-7 AN/APQ-116 RADAR SET
INTERMEDIATE MAINTENANCE

Course Number: C-104-3782.

Location: Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, Lemoore, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: *Version 1:* 6/79-Present. *Version 2:* 9/68-5/79.

Objectives: To train maintenance personnel to operate, maintain, service, and repair AN/APQ-116 radar sets.

Instruction: *All Versions:* Lectures and laboratories in AN/APQ-116 radar set familiarization, security, radiation hazards, and special circuits; transmitter circuit analysis, power supplies, antenna systems, and transmitter modules; general component theory; receiver circuit analysis, antenna receivers, command computers, and alarm monitors; display analysis, sweep generators, and indicator systems; and system maintenance, troubleshooting procedures, and performance testing.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in basic high frequency circuits, 1 in high frequency circuits laboratory for non-electrical engineering majors (3/82). *Version 2:* In the lower-division baccalaureate/associate degree category, credit in electricity and electronics on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (12/68).

NV-1715-0409

F-4J AN/ARN-86 TACAN INTERMEDIATE
MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 3 weeks (120 hours).

Exhibit Dates: 5/69-1/88.

Objectives: To train fleet maintenance personnel to operate, troubleshoot, maintain, repair, and modify AN/ARN-86 TACAN navigation systems.

Instruction: Lectures and laboratories in introduction to AN/ARN-86 systems, including power supplies and distribution, block-diagram analysis, transmit-receive RF operations, IF amplifiers, and channel servo operations; video decoders, AGC and ID tone circuits, and 15-cycle and 135-cycle bearing circuits; interrogation, reference, and reply circuitry; and intermediate maintenance, range and antenna circuitry, and troubleshooting procedures.

Credit Recommendation: In the upper-division baccalaureate category, credit in electricity and electronics on the basis of institutional evaluation (3/74).

NV-1715-0410

WEAPON SYSTEM SPECIALIST (CREW
LEADER) MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 7 weeks (280 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train crew members to maintain aircraft weapon control systems.

Instruction: Lectures and practical exercises in weapon control systems functional analysis, including data transmission, power subsystems, radar and infrared systems, and computer controls and display systems; weapons and avionics functional analysis; modes analysis, including tactical programs, navigation, air-to-air and air-to-ground modes analysis, data links, and in-flight training; and radar, IP computer, and display maintenance, armament controlling maintenance, and calendar inspection.

Credit Recommendation: In the upper-division baccalaureate category, credit in electricity and electronics on the basis of institutional evaluation (3/74).

NV-1715-0411

WEAPONS SYSTEMS TECHNICIAN (CREW
MEMBER) ORGANIZATIONAL
MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 10 weeks (380 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train fleet maintenance personnel to test, troubleshoot, and maintain F-14 weapons systems.

Instruction: Lectures and laboratories in operating modes and functional design of *the F-14 system: power, radar, and infrared* operation, control displays, and description; computer controls and displays; weapons control system maintenance and calendar inspection and procedures; and aircraft maintenance, weapons systems, and weapon checklists.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electricity and electronics on the basis of institutional evaluation (3/74).

NV-1715-0412

Fire Control System (FCS) Mk 113 Mod 9 (Torpedoes and Target Motion Analysis)

Course Number: A-113-0060.

Location: Guided Missiles School, Dam Neck, VA.

Length: 23 weeks (758 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train enlisted personnel to operate, maintain, and test underwater fire control systems.

Instruction: Lectures and laboratories in introduction to Mk 113 Mod 7 underwater fire control systems, terminology, data flow, and power distribution; analog computational devices, synchros, and resolvers; attack directors; attack control consoles; target motion analysis; torpedo control consoles and tone signal generators; weapons simulators and monitor panels; firing and monitoring systems; systems maintenance and operational procedures, target motion subsystems; target motion computers and signal data convertors, and digital interconnecting boxes.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electricity and electronics on the basis of institutional evaluation (3/74).

NV-1715-0413

Weapons Direction System (WDS) Mk 7 Mod 3 (Career)

Course Number: A-121-0032.

Location: Guided Missiles School, Dam Neck, VA.

Length: 15 weeks (553 hours).

Exhibit Dates: 11/72-12/78.

Objectives: To train fire control technicians in the maintenance and repair of Mk 7 Mod 3 weapons direction systems.

Instruction: Lectures and practical exercises in weapons direction equipment and related power, simulating, sweep generation, video, display, tracking, symbol, data converting, and automatic height-tracking systems; utilization of dual-trace scope, AC/DC differential voltmeters, and digital voltmeters; and system maintenance.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics, and credit in electronics laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0414

Weapons Direction System (WDS) Mk 7 Mod 3 (6-Year Obligator)

Course Number: A-121-0032.

Location: Guided Missiles School, Dam Neck, VA.

Length: 20 weeks (759 hours).

Exhibit Dates: 11/70-12/78.

Objectives: To train fire control technicians to maintain and repair Mk 7 Mod 3 weapons direction systems.

Instruction: Lectures and practical exercises in weapons direction equipment and related power, simulating, sweep, video, display, tracking, symbol, and data converting systems; introduction to Terrier weapon systems, computer, radar sets, launching systems, and maintenance procedures; and utilization of dual-trace scope, AC/DC differential voltmeter, and digital voltmeter.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics (3/74); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0415

RF-4B AN/APQ-99 Forward Looking Radar Intermediate Maintenance

Course Number: C-112-126; C-100-3832.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 6-8 weeks (240-320 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel who have had previous training in transistor and digital computer fundamentals to maintain AN/APQ-99 forward looking radar (FLR) through the intermediate level of maintenance.

Instruction: Lectures and practical exercises in theory of operation and bench procedures for AN/APQ-99 systems; block-diagram analysis of transmitter, receiver, and antenna systems; power supply programmers; radar set control, indicators; and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, credit in electricity or electronics on the basis of institutional evaluation (3/74).

NV-1715-0416

SSN/CVA Special Technology (Enlisted)

Course Number: F-193-072.

Location: Submarine School, Groton, CT.

Length: 5 weeks (150 hours).

Exhibit Dates: 10/68-4/71.

Objectives: To provide electronics technicians with initial training in the theory and operation of basic components of inertial navigation systems, and to prepare them for advanced studies in digital computer and navigation systems repair.

Instruction: Lectures and laboratories in testing and repair, test equipment, transistor fundamentals, and basic module repair; digital mathematics, numbering systems, arithmetic operations, and coding systems; digital circuits, symbology, switching circuits, gating circuits, computer components, digital counters, timing-shelf registers, adders and subtractors, storage devices, and input/output devices; programming, scaling, coding and addressing, and flow charts; and navigation theory, physics of motion, and inertial navigation system components and synchros.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics laboratory (3/74); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics laboratory (3/74).

NV-1715-0417

QH-50D Target Control System AN/SRW-4B Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Dam Neck, VA; Air Maintenance Training Detachment, Mare Island, CA.

Length: 3-4 weeks (120-160 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to maintain and service AN/SRW-4B target control systems at the intermediate maintenance level.

Instruction: Lectures and practical exercises in target control system familiarization, rotary wing components, and radio transmitting set operation and functional analysis; organizational maintenance utilizing test sets, frequency counters, oscilloscopes, and frequency analyzers; and intermediate maintenance of target control systems.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0418

QH-50C Target Control System AN/SRW-4B Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Dam Neck, VA; Air Maintenance Training Detachment, North Island, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to maintain AN/SRW-4B target control system support equipment.

Instruction: Lectures and practical exercises in target control system familiarization; description, location, and operation of transmitter controls; demonstration of radio transmitting sets; functional analysis of amplifier modulators, amplifier frequency multipliers, coders, and power supplies; and intermediate maintenance of target control system test sets, transmitter controllers, and transmitting sets.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics (3/74).

NV-1715-0419

Talos Computer Mk 111 Mod 1, Class C

Course Number: Not available.

Location: Guided Missiles School, Dam Neck, VA; Naval Schools Command, Mare Island, CA.

Length: 16 weeks (465 hours).

Exhibit Dates: 1/68-12/78.

Objectives: To train enlisted personnel to maintain Talos computers.

Instruction: Lectures and practical exercises in Talos weapon systems familiarization; basics of analog computers; and Mk 111 Mod 1 computer components and circuitry, system functioning, physical description, data flow maintenance, intercept display, and evaluation displays.

Credit Recommendation: Insufficient data for evaluation (3/74).

NV-1715-0420

Sonar AN/SQS-26 Series Sonar
Operator Basic
(Sonar AN/SQS-26 AX(R) and CX Operations Basic)
(AN/SQS-26 AXR & CX Operator)

Course Number: A-130-0086; J-130-0875.

Location: Fleet Anti-submarine Warfare Training Center, San Diego, CA; Fleet Sonar School, Key West, FL.

Length: 3 weeks (91-94 hours).

Exhibit Dates: 7/69-1/88.

Objectives: To train sonar technicians to operate AN/SQS-26AX(R) & CX sonars.

Instruction: Lectures and practical exercises in system description, modes of operation, performance prediction, and search procedures, and deep-water sound transmission, including physical properties of sea water, acoustic ray theory, reverberations, measurement of sound, and propagation losses.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (8/77).

NV-1715-0421

Tartar Radar AN/SPG-51B or Radar
AN/SPG-51C, Class C

Course Number: A-104-0127.

Location: Guided Missiles School, Dam Neck, VA; Naval Schools Command, Mare Island, CA.

Length: 24 weeks (720 hours).

Exhibit Dates: 2/68-12/79.

Objectives: To train fire control technicians to maintain AN/SPG-51B/C radars.

Instruction: Lectures and practical exercises in Tartar weapons system familiarization, fire control systems, search radar, launching systems, and countermeasures; equipment safety and radar test sets; track radar, block diagrams, Doppler effect, track radar transmitters, power supplies, modulators, power amplifiers, and klystron theory; receiver circuits, spectrum analyzers, and tuning and adjustment of transmitter and receivers; data converters; radar set consoles; casualty analysis specialized test set operation; and Tartar missile guidance systems.

Credit Recommendation: Insufficient data for evaluation (3/74).

NV-1715-0422

S-2D/E AN/APN-122 Doppler Radar
Navigation System Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to maintain, troubleshoot, and repair AN/APN-122 Doppler radar navigation systems.

Instruction: Lectures and practical exercises in Doppler radar theory; power distribution; signal data converters; conversion of beam coordinates to ground speed and drift angles; ground speed computers; vertical reference systems; signal loops; drift angles; location and replacement of malfunctioning components; special test equipment; and system troubleshooting.

Credit Recommendation: In the upper-division baccalaureate category, credit in electricity or electronics on the basis of institutional evaluation (3/74).

NV-1715-0423

1. Sonar Surface Technican Class A
2. Basic Surface Sonar Technician,
Class A Core Phase
(Sonar Technician Class A-1 (Surface))
(Surface Sonar Technician, Class A)

Course Number: *Version 1:* K-130-0037. *Version 2:* A-130-0037; A-130-0038; J-130-0505.

Location: *Version 1:* Fleet Anti-Submarine Warfare Training Center, San Diego, CA. *Version 2:* Fleet Antisubmarine Warfare School, San Diego, CA; Fleet Sonar School, Key West, FL.

Length: *Version 1:* 11-12 weeks (357 hours). *Version 2:* 6-12 weeks (141-228 hours).

Exhibit Dates: *Version 1:* 6/86-Present. *Version 2:* 7/72-5/86.

Objectives: To give enlisted personnel an introduction to sonar principles, fire control systems, underwater sound equipment, general purpose electronic test equipment, and aural classification techniques.

Instruction: *Version 1:* Lectures and practical exercises in the physics of underwater sound propagation, the components of active and passive sonar systems, operation of fire control systems, operation of auxiliary underwater equipment, aural familiarization and classification of underwater sounds, use of voltmeters, multimeters, oscillators, counters and oscilloscopes. *Version 2:* Lectures and practical exercises in operation and maintenance of underwater fire control systems, including dials and operating controls, input data sources, attack director outputs, functional switches, control panels, stabilization computers, firing panels, relay transmitters, remote repeaters, and underwater fire control systems ancillary equipment.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in the physics of underwater acoustics and 1 in basic electronic test equipment (7/86). *Version 2:* In the vocational certificate category, 1 semester hour in basic electronic test equipment (8/77).

NV-1715-0424

RA-5C AN/AYA-1 Signal Data
Converter Group Intermediate
Maintenance

Course Number: C-100-3746.

Location: Air Maintenance Training Detachment, Sanford, FL.

Length: 5 weeks (200 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to operate, maintain, and service RA-5C signal data converter groups at the intermediate maintenance level and to utilize naval air maintenance training units and appropriate general and special support equipment.

Instruction: Lectures and practical exercises in theory of operation and maintenance of signal data converters, data translators, photo channel data processing, translator tape channels, recording head amplifiers, and optical viewfinders.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0425

AN/UQN-4 Sonar Sounding Set
Maintenance
(AN/UQN-4 Echo Sounder Maintenance)
(Sonar Sounding Set AN/UQN-4)

Course Number: A-130-0074; F-130-018.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA; Submarine School, Groton, CT.

Length: 2-3 weeks (60-90 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train enlisted personnel with knowledge of sonar and solid-state theory to operate and maintain the AN/UQN-4 sonar sounding set.

Instruction: Lectures and practical exercises in the maintenance of the AN/UQN-4 sonar sounding set, including the 3-M system; computer mathematics and logic; solid-state devices; power supplies; frequency generation and selection circuits; recorder panel assembly and drive motor control; keying and transmitter circuits; pulse generator; remote indicator; keel reference counter, decoder, and clearing control; digital readout, countdown, and storage control circuits; receiver circuits; and troubleshooting and alignment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics laboratory (11/77).

NV-1715-0426

SSN Mk 3 Mod 6 Ship's Inertial
Navigation System (SINS)
Maintenance
(Mk 3 Mod 6 Ship's Inertial Navigation System (SINS) Maintenance)
(Mk 3 Mod 6 Ship's Inertial Navigation System (SINS) Maintenance (Enlisted))

Course Number: A-193-0032; F-193-032; F-193-080.

Location: Submarine School, Groton, CT.

Length: 19-25 weeks (570-750 hours).

Exhibit Dates: *Version 1:* 1/77-Present. *Version 2:* 4/69-12/76.

Objectives: To train electronics technicians to operate, evaluate, and maintain the Mk 3 Mod 6 ship's inertial navigation system.

Instruction: *Version 1:* This is a pipeline course that is composed of the following courses: A-102-0131 (does not meet our minimum length for evaluation); A-102-0168 (NV-1715-0492) and A-193-0357 (NV-1715-0985). *Version 2:* Lectures and practical exercises in tracing electrical and mechanical loops, performing specified checks and tests, Mk 3 Mod 6 systems malfunctions isolation and repair, MINDAC computer familiarization; transistor theory review, analog system components, oscilloscope operation, and computer mathematics.

Credit Recommendation: *Version 1:* Please refer to the exhibits cited in the instruction section of this exhibit for the credit recommendations. *Version 2:* In the vocational certificate category, credit in electricity or electronics on the basis of institutional evaluation (3/74).

NV-1715-0427

SSBN Navigation Data Assimilation
Computer Mk 2 Mod 4,
Stabilization Data Computer Mk
3 Mod 1

Course Number: A-193-017.

Location: Guided Missiles School, Dam Neck, VA.

Length: 23 weeks (805 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train electronics technicians to operate and maintain type 11 periscope systems, Mk 3 Mod 1 stabilization data computer (SDC), and specific navigation data assimilation computers and control consoles.

Instruction: Lectures and practical exercises in the maintenance of specific periscope systems, stabilization data computers, navigation data assimilation computers and control consoles, including celestial navigation, hydraulic systems, periscope optical system, relay controlled sequencing, complex servomechanism theory, optical monitoring and error determination, general computer principles and programming, circuit analysis, various input and output theories and techniques, and fault isolation.
Credit Recommendation: Insufficient data for evaluation (3/74).

NV-1715-0428

AN/APQ-124A Radar Set
Intermediate Maintenance
(F-8 AN/APQ-124 Radar Intermediate Maintenance)

Course Number: C-102-3855.
Location: Air Maintenance Training Detachment, Miramar, CA.
Length: 5-6 weeks (200-240 hours).
Exhibit Dates: 9/69-1/88.
Objectives: To train fleet maintenance personnel who have had previous training in electronics to maintain the AN/APQ-124A radar set.
Instruction: Lectures and practical exercises in the maintenance of the AN/APQ-124A radar set, including review of basic electronics and circuit analysis and troubleshooting of components; power systems; transmitter; receiver; tracker system; display system; antenna system; and computer system.
Credit Recommendation: In the upper-division baccalaureate category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0429

A-6A Track Radar and Module
Analyzer Test Console
Intermediate Maintenance
(A-6 Track Radar Module Analyzer Test Console and Detailed Module Theory (Intermediate Level Maintenance))

Course Number: C-150-31.
Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.
Length: 10-12 weeks (400-480 hours).
Exhibit Dates: 2/68-1/88.
Objectives: To train maintenance personnel to maintain, troubleshoot, and repair modules of the AN/APQ-112 track radar, the AN/APM-225 module analyzer test bench, and the OA-3735/ASM-77 track radar test consoles.
Instruction: Lectures and laboratories in APQ-112 track radar, control and power circuits, receiving and video processing, servo amplifiers and antenna control, module analyzer test console (MATC) circuits, critical-signal generators, data processors, module maintenance, SACE module theory and maintenance, and gyro control and stabilization.
Credit Recommendation: In the upper-division baccalaureate category, credit in electronics and electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0430

F-4B AN/APQ-72 Radar Set
Intermediate Maintenance

Course Number: Not available.
Location: Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Miramar, CA.
Length: 5 weeks (200 hours).
Exhibit Dates: 1/68-1/88.
Objectives: To train maintenance personnel who have knowledge of airborne missile control systems to maintain the AN/APQ-72 radar set at the intermediate level.
Instruction: Lectures and practical exercises in the maintenance of the AN/APQ-72 radar set, including circuit analysis of low-voltage power supply, transmitter, and electrical frequency control; operational analysis of the equipment; circuit analysis of the receiver; automatic gain control, range track, and relay functions; and troubleshooting of the synchronizer, antenna, and indicating systems control.
Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0431

A-6A AN/APQ-92 Search Radar and
Module Analyzer Test Bench
Intermediate Maintenance

Course Number: Not available.
Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.
Length: 13 weeks (520 hours).
Exhibit Dates: 1/70-1/88.
Objectives: To train maintenance personnel who have had previous training in basic electronics, transistor fundamentals, and subminiature repair to operate and maintain the AN/APQ-92 search radar and associated search radar and module analyzer test consoles.
Instruction: Lectures and practical exercises in the maintenance and operation of the AN/APQ-92 search radar and associated test consoles, including search radar displays, systems operation; analysis of the control, electrical synchronizer, video processor, azimuth/range/elevation indicator, azimuth/range indicator, and data processor unit; servo electronics unit; transmit circuit; antenna/receiver; terrain clearance processor; and module theory of operation.
Credit Recommendation: In the vocational certificate category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0433

Clutter Suppressor and Automatic
Alarm for the AN/SPS-10

Course Number: A-104-0132.
Location: Naval Schools Command, San Francisco, CA.
Length: 4 weeks (120 hours).
Exhibit Dates: 6/72-1/88.
Objectives: To train electronics technicians who have had previous training or experience in AN/SPS-10 radars, transistor theory, integrated circuit theory, and circuit board repair to maintain the clutter suppressor and automatic alarm units and associated equipment of the AN/SPS-10 radar system.
Instruction: Lectures and practical exercises in the maintenance of the clutter suppressor and automatic alarm units of the AN/SPS-10 radar system and associated equipment, including basic operation, signal flow; functional, module and circuit analysis of the equipment; and functional troubleshooting.
Credit Recommendation: In the vocational certificate category, credit in electricity or electronics on the basis of institutional evaluation (3/74).

NV-1715-0434

AN/APX-76A Air/Air IFF
Interrogator Set Intermediate
Maintenance

Course Number: C-102-3066.
Location: *All Versions:* Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry Point, NC. *Version 1:* Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.
Length: 3-4 weeks (120-144 hours).
Exhibit Dates: *Version 1:* 9/73-Present. *Version 2:* 8/70-8/73.
Objectives: To train fleet maintenance personnel who have backgrounds in IFF systems and digital fundamentals to operate and maintain the AN/APX-76A interrogator set at the intermediate level.
Instruction: *All Versions:* Lectures and practical exercises in the operation and maintenance of the AN/APX-76A interrogator set, including block-diagram analysis of the transmit and receiver section and performance monitor, and analysis of various circuits. *Version 1:* Includes troubleshooting of various circuits such as transceivers/receivers video display and controls.
Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electronics laboratory (7/81). *Version 2:* In the vocational certificate category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0435

A-6A AN/APQ-112 Track Radar Test
Console and Detailed Radar
Intermediate Maintenance

Course Number: Not available.
Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.
Length: 11 weeks (440 hours).
Exhibit Dates: 1/70-1/88.
Objectives: To train maintenance personnel who have had previous training in basic electronics and transistor fundamentals to operate and maintain AN/APQ-112 track radars and associated test consoles.
Instruction: Lectures and practical exercises in the operation and maintenance of AN/APQ-112 track radars and associated test consoles, including block-diagram analysis, control and power circuits, receiving and video processing, servo amplifier, antenna control, test console analysis, and repair procedures.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0436

Tartar Weapon Direction System
(WDS) Mk 4, Class C

Course Number: A-121-0029; A-121-0030.
Location: Guided Missile School, Dam Neck, VA; Naval Schools Command, Mare Island, CA.

Length: 14 weeks (420 hours).
Exhibit Dates: 1/68-8/73.
Objectives: To train fire control technicians to maintain the weapon direction system.
Instruction: Lectures and practical exercises in the maintenance of the weapon direction system, including an introduction to the Tartar weapon control system, power system, simulation, sweep generation, sweep deflection, display system, tracking and target evaluation, WDE MK 1 adjustments, designation data converting system, and weapon assignment system.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0437

Tartar Weapon Direction Systems (WDS) Mk 4 Mod 0, Class C

Course Number: A-121-0029; A-121-0030.
Location: Guided Missiles School, Dam Neck, VA; Naval Schools Command, Mare Island, CA.
Length: 20 weeks (549 hours).
Exhibit Dates: 1/68-8/73.
Objectives: To train enlisted personnel to maintain the Mk 4 Mod 0 weapons direction system.
Instruction: Lectures and practical exercises in the maintenance of the Mk 4 Mod 0 weapons direction system, including equipment operation, target selection and tracking console CRT, director and weapon assignment display and switching circuits, power circuits, and ancillary equipment use.
Credit Recommendation: In the upper-division baccalaureate category, credit in electricity or electronics on the basis of institutional evaluation (3/74).

NV-1715-0438

S-2D/E AN/APS-88/88A Radar Set Maintenance

Course Number: Not available.
Location: Air Maintenance Training Detachment, Key West, FL; Air Maintenance Training Detachment, North Island, CA.
Length: 4 weeks (160 hours).
Exhibit Dates: 1/68-1/88.
Objectives: To train enlisted personnel to maintain the APS-88/88A radar systems at the intermediate level.
Instruction: Lectures and practical exercises in the maintenance of the APS-88/88A radar systems, including system operation, synchronizer (trigger generator, gate, sweep generator, and sweep amplifier), receiver-transmitter assembly (modulator transmitter, microwave assembly, and automatic frequency control), azimuth range indicator, power system, antenna reflector, azimuth drive system, vertical stabilization system, and practical maintenance.
Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0439

RA-5C Still Picture Camera Shop Maintenance

Course Number: Not available.
Location: Air Maintenance Training Detachment, Sanford, FL.
Length: 5 weeks (200 hours).
Exhibit Dates: 1/68-1/88.
Objectives: To train maintenance personnel who have had previous training in electronic circuits and transistor fundamentals to operate and maintain the RA-5C still-picture, aerial reconnaissance camera system.
Instruction: Lectures and practical exercises in the operation and maintenance of the RA-5C still-picture, aerial reconnaissance camera system, including photographic control panels and associated circuits, IMC and shutter control assembly, various modules, still-picture camera mounts, operation and assembly of specific camera equipment, and flasher system components and operation.
Credit Recommendation: In the vocational certificate category, 2 semester hours in physics, 4 in electronics (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in physics, 2 in electronics (3/74).

NV-1715-0440

SSBN Ship's Inertial Navigation System (SINS) Mk 2 Mod 4 Technician

Course Number: A-193-014.
Location: Guided Missiles School, Dam Neck, VA.
Length: 25 weeks (840 hours).
Exhibit Dates: 11/72-1/88.
Objectives: To train electronics technicians who have backgrounds in Polaris or fleet ballistic missile electronics to operate and maintain specific ship's inertial navigation systems, multispeed repeaters, sonar sounding sets, and interconnecting boxes.
Instruction: Lectures and practical exercises in the operation and maintenance of the Mk 2 Mod 4 ship's inertial navigation system, the Mk 3 Mod 3 multispeed repeater, the AN/BQN-3 sonar sounding set, and the Mk 6 Mod 1 interconnecting box, including subsystem tie-in and associated test equipment operation, fleet ballistic missile weapons system operation, analysis of the sonar sounding set, and repair procedures.
Credit Recommendation: In the vocational certificate category, 5 semester hours in electronics and electronics laboratory (4/74).

NV-1715-0441

AN/SRN-9A, Radio Navigation Set, Operation and Maintenance

Course Number: F-193-0072.
Location: Submarine School, Groton, CT.
Length: 3 weeks (90 hours).
Exhibit Dates: 5/71-1/88.
Objectives: To train submarine electronics technicians to operate the navigation satellite system and to operate and maintain the AN/SRN-9A radio navigation set.
Instruction: Lectures and practical exercises in the operation and maintenance of the navigation satellite system and the AN/SRN-9A radio navigation set, including specialized treatment of equipment and systems, modulation, logic circuits, test signal generator, symbolic integrated maintenance, receiver and message demodulator, digital processing unit, power supply, electrothermal teleprinter, and software.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0442

Terrier Weapons System Missile Fire Control System (MFCS) Mk 73

Course Number: Not available.
Location: Service Schools Command, Great Lakes, IL.
Length: 6 weeks (180 hours).
Exhibit Dates: 2/68-12/75.
Objectives: To train senior petty officers to supervise Terrier missile weapons system technical operations.
Instruction: Lectures and practical exercises in the operation of Terrier weapons systems, including system data flow, specific system description, target detection, selection, and tracking, director assignment, target designation and control system, acquisition and tracking using special equipment, circuit analysis of equipment components, and computation of missile and launcher orders using computers, signals and weapon assignment, and testing and maintenance procedures.
Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0443

Terrier Weapons System Mk 76 Mod 9 (Terrier Weapons System Missile Fire Control System (MFCS) Mk 76)

Course Number: A-121-0473.
Location: Naval Guided Missiles School, Dam Neck, VA; Naval Schools Command, Mare Island, CA.
Length: 10-11 weeks (300-440 hours).
Exhibit Dates: 2/68-Present.
Objectives: To train senior petty officers to supervise Terrier missile weapons systems technical operations.
Instruction: Lectures and practical exercises in the operation of Terrier missile weapons systems, including basic systems operation and equipment, target detection, missile selection and WDE tracking, FCS assignment and target tracking, and fire control problem computation using computers, missile firing and guidance, data reduction, and test and alignment procedures.
Credit Recommendation: Credit is not recommended because of the military specific nature of the course (11/83).

NV-1715-0444

Talos Weapons System Mk 77 Mod 2 (Class C)

Course Number: Not available.
Location: Guided Missiles School, Dam Neck, VA; Naval Schools Command, Mare Island, CA.
Length: 10 weeks (300 hours).
Exhibit Dates: 2/68-12/78.
Objectives: To train fire control technicians to lead Talos missile weapons systems technical operations.
Instruction: Lectures and practical exercises in the operation of Talos missile weapons systems, including cruiser weapons systems, search radar sets, test equipment, target detection, identification, entry and tracking, evaluation, and acquisition; associated missile operation and servicing, weapon control and data system, the 3M system, and system testing and alignment procedures.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74).

NV-1715-0445

AN/BRQ-1, AN/WYQ-1 Operator (AN/BRD-7, AN/WYQ-1, AN/BRQ-1 Basic Operator, Class C1)

Course Number: A-233-0029.
Location: Submarine School, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 3 weeks (90-118 hours).

Exhibit Dates: 1/72–Present.

Objectives: To train an individual to operate a surveillance receiver and digital display unit.

Instruction: Course trains the individual to operate three pieces of equipment (two receivers and a display unit) and includes basic theory, physical description, and function of all controls, indicators, displays, and interface connections.

Credit Recommendation: Credit is not recommended because of military-specific nature of the course (10/89).

NV-1715-0446

AN/DSM-32 Sparrow III Guided Missile Test Equipment Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, Miramar, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 9/67–1/88.

Objectives: To train enlisted personnel to maintain and operate the Sparrow III missile and associated test equipment at the intermediate level.

Instruction: Lectures and practical exercises in the operation and maintenance of the Sparrow III and associated test equipment, including check-out procedures, test set analysis and components, calibration and testing, and troubleshooting and repair procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics, 1 in electronics laboratory (4/74).

NV-1715-0447

Mardan Computer Theory and Maintenance I

Course Number: A-193-0285.

Location: Trident Training Facility, Bangor, Bremerton, WA; Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Naval Submarine School, New London, CT; Naval Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2–3 weeks (60–128 hours).

Exhibit Dates: 10/75–Present.

Objectives: To provide theory of operation of specific military equipment and to train in fault isolation and repair of the equipment.

Instruction: Lectures and laboratories in the theory of equipment operation, including power supply sequencing, relay logic, and alarm systems and in fault isolation and repair of the equipment to the component level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer systems troubleshooting and maintenance (10/89).

NV-1715-0448

Mardan Computer Theory and Maintenance II

Course Number: A-193-0289.

Location: Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Trident Training Facility, Bangor, WA; Naval Submarine School, New London, CT; Naval Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 1–2 weeks (60–64 hours).

Exhibit Dates: 10/75–Present.

Objectives: To provide theory of operation of specific equipment and to train to perform fault isolation and repairs on the equipment.

Instruction: Lectures and laboratories on monitoring circuits, relay logic synchro loops, digital motor-control closed loops; the use of diagnostics to determine fault isolation and to make repairs on specific equipment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electromechanical repair (10/89).

NV-1715-0449

AN/BRD-7 Radio Direction Finder Set Combined Operator/Maintenance
(AN/BRD-7 Combined Maintenance, Class C1)

Course Number: A-102-0127.

Location: Submarine School, Groton, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 12 weeks (360 hours).

Exhibit Dates: 1/70–1/88.

Objectives: To train the technician to operate and maintain a digitally controlled communication receiver that automatically processes the received information.

Instruction: This course covers a multiband receiver system that digitizes the input signal information and processes this data to optimize the antenna configuration and directional finder receivers to determine bearing information. This information is recorded in a digital memory system and on a mechanical printer. Subsystems studied include power supplies; operational amplifiers; passive filters; audio, video, and logrithmic amplifiers; several superheterodyne receivers in the low-to-high-communication bands; limiters; logic controlled amplifiers; random access memory units; comparitor circuitry; and TTL and ECL logic subsystems. The student covers the physical description of the equipment, all operating modes, block-diagram description of the signal flow, and data control information; schematic diagrams of each circuit board identifying test points and correct signal levels; preventive maintenance; troubleshooting to isolate fault to the IC board and in most cases to the actual component, using 4-trace oscilloscopes, AM-FM signal generators, frequency counters, spectrum analyzer, time domain reflectometer, digital voltmeters, differential voltmeters, and special test equipment for this system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in electronic engineering technology (9/77).

NV-1715-0450

A-7A/B Integrated Avionics Weapons System Technician Organizational Maintenance

Course Number: C-102-3794.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: *Version 1:* 3 weeks (104 hours). *Version 2:* 6 weeks (224 hours).

Exhibit Dates: *Version 1:* 6/74–Present. *Version 2:* 10/72–5/74.

Objectives: To train fleet maintenance personnel to troubleshoot and perform operational checks on the A-7A/B aircraft weapons system.

Instruction: Lectures and practical exercises in troubleshooting and operational checks on the A-7A/B aircraft weapons system including ordnance familiarization, associated equipment and weaponry, integrated flight instruments system components and circuitry, gyroscopic principles, air data equipment, delivery and release systems, weapons release computer, and associated radar set components and operation.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (3/82).

NV-1715-0451

A-6 Electronic Module Test Console Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 4/68–1/88.

Objectives: To train enlisted personnel who have backgrounds in avionics and transistor fundamentals to operate and maintain the AN/ASM-175 (XN-1) electronic module test console.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/ASM-175 (XN-1) electronic module test console, including transistor theory, AC and DC power distribution, logic circuits, test equipment, oscilloscope, and programming and testing of various components and modules.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (4/74).

NV-1715-0452

A-4E Communication, Navigation, Identification (CNI)/Weapons Systems Organizational Maintenance

Course Number: C-102-3724.

Location: Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Beaufort, SC.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train fleet maintenance personnel to maintain the communications, navigation, identification, and weapons systems of the A-4E Douglas Skyhawk aircraft.

Instruction: Lectures and practical exercises in flight-line maintenance of the A-4E Douglas Skyhawk aircraft communications, navigation, identification, and weapons systems, including system analysis, transmitters, radar fundamentals, digital computer principles, specific UHF equipment, Shrike improved display system, and system operation and analysis.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (4/74).

NV-1715-0453

RA-5C Flight Control Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Sanford, FL.

Length: 5 weeks (200 hours).

Exhibit Dates: 4/68–1/88.

Objectives: To train maintenance personnel with knowledge of basic hydraulics and electricity to operate and maintain flight control systems at an intermediate level.

Instruction: Lectures and practical exercises in the maintenance of flight control systems, including directional, lateral, latitudinal, and flight control system components and operation.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0454

RA-5C Air Data and Flight Reference Systems Organizational Maintenance
(RA-5C Air Data and Flight Reference Systems)

Course Number: C-602-3749.

Location: Air Maintenance Training Detachment, Albany, GA; Air Maintenance Training Detachment, Sanford, FL.

Length: 2-3 weeks (80-120 hours).

Exhibit Dates: 4/68-3/73.

Objectives: To train maintenance personnel to maintain and service air data and flight reference systems.

Instruction: Lectures and practical exercises in RA-5C air data and flight reference systems operation and maintenance procedures, circuit analysis, troubleshooting, and utilization of test equipment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0455

RA-5C Flight Control System Organizational Maintenance

Course Number: C-602-3744.

Location: Air Maintenance Training Detachment, Albany, GA.

Length: 4-5 weeks (160-200 hours).

Exhibit Dates: 3/69-1/88.

Objectives: To train maintenance personnel to operate and maintain the RA-5C flight control system.

Instruction: Lectures and practical exercises in the operation and maintenance of the RA-5C flight control system, including hydraulic systems, primary and secondary airflow systems, and directional control, lateral control, longitudinal control, and automatic flight control systems.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0456

Fleet Ballistic Missile (FBM) Navigation Officer

Course Number: Not available.

Location: Guided Missiles School, Dam Neck, VA.

Length: 13 weeks (630 hours).

Exhibit Dates: 3/65-12/68.

Objectives: To train officers as fleet ballistic missile navigation officers.

Instruction: Lectures and practical exercises in the functions of fleet ballistic missile navigation officers, including inertial navigation, transmission systems, electronics and transistors, computers, ship's inertial navigation system and hardware description, marine differential analyzer computer, system calibration techniques, navigational aids, administrative aspects of the F.B.M. program and Navsubsystem operational laboratory.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics, 2 in data processing (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (4/74); in the upper-division baccalaureate category, 2 semester hours in data processing (4/74).

NV-1715-0457

F-4B Shoehorn Organizational Maintenance

Course Number: C-102-3809.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/71-1/88.

Objectives: To provide fleet maintenance personnel with training on Shoehorn systems, including equipment, location, installation and removal, power distribution, interface, and use of line-test equipment.

Instruction: Lectures and laboratories in Shoehorn systems, components, locations, and maintenance procedures; preflight, postflight, and periodic inspections; and system line maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (4/74).

NV-1715-0458

A-6A Shoehorn Organizational Maintenance

Course Number: C-102-3761.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 7/69-1/88.

Objectives: To train fleet organizational maintenance personnel to maintain A-6A/E Shoehorn electronic countermeasures systems.

Instruction: Lectures and laboratories in A-6 electronic countermeasures systems operation, interface, and RF-cable and system line maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (4/74).

NV-1715-0459

E-2A Weapon System Specialist
(E-2A Weapon System Special, No. 5)

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 8-10 weeks (320-400 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train avionics technicians to maintain complete E-2A avionics systems and to use line-test equipment.

Instruction: Lectures and laboratories in introduction to E-2A aircraft, ground equipment, in-flight performance monitor test sets, airborne tactical data systems, and allied electronics.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (4/74).

NV-1715-0460

E-2A Automatic Flight Control System (AN/ASW-15) and Air Data Computer (A/A24G-13)

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 2-3 weeks (80-120 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train enlisted personnel who have had previous training in transistor fundamentals to operate and maintain automatic flight control systems and air data computers.

Instruction: Lectures and practical exercises in automatic flight control system operation, calibration, and maintenance; air data computer operation and maintenance; servo systems; utilization of test equipment; and maximum rudder and pitch feel system operation.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (4/74).

NV-1715-0461

C-2A Automatic Flight Control System (AN/ASW-15) and Air Data Computer (A/A24G-13) Intermediate Maintenance

Course Number: C-602-3492.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: *Version 1:* 2 weeks (80 hours). *Version 2:* 3 weeks (120 hours).

Exhibit Dates: *Version 1:* 9/69-1/88. *Version 2:* 3/68-8/69.

Objectives: To train enlisted personnel who have backgrounds in transistors to operate and maintain automatic flight control systems and air data computers.

Instruction: Lectures and practical exercises in the operation, circuitry, and maintenance of automatic flight control systems and air data computers; utilization of trainer panels and associated test equipment; maximum rudder and pitch feel systems; and servo systems and amplifiers.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electronics (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics (6/75). *Version 2:* In the vocational certificate category, 4 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (4/74).

NV-1715-0462

P-3 PB-20N Autopilot System Intermediate Maintenance

Course Number: C-602-3532.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: *Version 1:* 2 weeks (80 hours). *Version 2:* 3 weeks (120 hours).

Exhibit Dates: *Version 1:* 8/81-Present. *Version 2:* 3/71-7/81.

Objectives: To provide electrical maintenance personnel with training in intermediate-level maintenance, circuit analysis, operation, and test procedures for a specific flight control system.

Instruction: *Version 1:* Lectures and practical exercises providing the student with sufficient knowledge/theory to operate and troubleshoot an automatic flight control system including power supplies, amplifiers, bench testing and troubleshooting techniques. *Version 2:* Lectures and practical exercises in theory of operation of autopilot systems, power supplies, amplifiers, test equipment, bench testing, and troubleshooting procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in avionics laboratory (7/81). *Version 2:* In the vocational certificate category, 2 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (4/74).

NV-1715-0463

P-3 AN/ASA-16 DISPLAY SYSTEM INTERMEDIATE MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 12/70–1/88.

Objectives: To train enlisted personnel to maintain and align ASA-16 display groups at the intermediate-maintenance level.

Instruction: Lectures and practical exercises in display system operation and maintenance, amplifiers, servo systems, and basic digital computers.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (4/74).

NV-1715-0464

UH-2A/B AUTOMATIC STABILIZATION EQUIPMENT ORGANIZATIONAL MAINTENANCE
(UH-2A/B Automatic Stabilization Equipment Intermediate Maintenance)
(UH-2A/B Automatic Stabilization Equipment Maintenance)

Course Number: Not available.

Location: Air Maintenance Training Detachment, Lakehurst, NJ; Air Maintenance Training Detachment, Ream Field, CA.

Length: 3-5 weeks (112-200 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel to operate, service, and maintain the UH-2A/B's automatic stabilization equipment.

Instruction: Lectures and practical exercises in automatic stabilization equipment familiarization, troubleshooting procedures, and maintenance.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0465

RF-4B AN/ASN-46/74 NAVIGATION COMPUTER AND INERTIAL NAVIGATION SYSTEM INTERMEDIATE MAINTENANCE
(RF-4B Inertial Navigation System Intermediate Maintenance)

Course Number: C-102-3839.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 6-9 weeks (240-360 hours).

Exhibit Dates: 1/71–1/88.

Objectives: To train maintenance personnel to test and repair AN/ASN-46A and AN/ASN-74 inertial navigation system components.

Instruction: Lectures and practical exercises in inertial navigation system circuit analysis, troubleshooting, and component repair, and utilization of applicable test equipment, publications, and procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (4/74).

NV-1715-0466

TARTAR WEAPONS CONTROL SYSTEM

Course Number: Not available.

Location: Guided Missiles School, Dam Neck, VA; Naval Schools Command, Mare Island, CA.

Length: 10 weeks (300 hours).

Exhibit Dates: 2/68–12/83.

Objectives: To train officers, warrant officers, and enlisted personnel to operate, maintain, test, adjust, align, and preserve Tartar weapon systems.

Instruction: Lectures and practical exercises in Tartar weapon control systems, missile, and launcher, data flow block diagrams, missile fire control systems, weapon direction equipment, and maintenance procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0467

TERRIER/TARTAR GUIDED MISSILE AND GUIDED MISSILE TEST SET MAINTENANCE

Course Number: Not available.

Location: Guided Missiles School, Dam Neck, VA; Naval Schools Command, Mare Island, CA.

Length: 23 weeks (690 hours).

Exhibit Dates: 2/68–12/78.

Objectives: To train enlisted personnel to test and maintain Terrier and Tartar guided missiles, and to operate and maintain Terrier and Tartar guided missile test sets and associated test equipment.

Instruction: Lectures and laboratories in physical description and capabilities of Terrier and Tartar missile control systems, guidance radar, signal comparators, guided missile test sets, and radar test sets; casualty analysis and repair; and operation and maintenance of ground stations.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0468

RF-4B AN/ASN-55 ATTITUDE HEADING REFERENCE SYSTEM MAINTENANCE

Course Number: C-102-3834.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train maintenance personnel to maintain and service AN/ASN-55 back-up and attitude reference systems.

Instruction: Lectures and laboratories in theory of operation and maintenance procedures for attitude-heading reference systems.

Credit Recommendation. Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0469

ELECTRONIC SURVEILLANCE MEASURES (ESM) AN/WLR-8(V)2 COMBINED OPERATOR MAINTENANCE

Course Number: A-233-0040.

Location: Submarine School, Groton, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 10–12 weeks (304–420 hours).

Exhibit Dates: *Version 1:* 6/77–Present. *Version 2:* 12/76–5/77.

Objectives: To train technicians with a basic computer background in the theory of operation and actual maintenance of a complex multichannel digital controlled receiver and digital data processor computer system.

Instruction: *All Versions:* Course includes analog-to-digital and digital-to-analog conversion, multiplexing, demultiplexing, ALU units, RF digital tuner control circuits, and displays. The student learns to perform fault isolation, alignment, adjustment, and calibration and to make repairs at the component level. *Version 1:* Includes diagnostic and maintenance procedures for small computers.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in digital computer maintenance and repair practices and laboratory, 1 in electronics maintenance and repair laboratory (3/81); in the upper-division baccalaureate category, 1 semester hour in computer organization (3/81). *Version 2:* In the lower-division baccalaureate/associate degree category, 5 semester hours in electronics or computer technology (9/77).

NV-1715-0470

MISSILE TECHNICIAN POSEIDON LOGISTICS

Course Number: A-121-0140.

Location: Guided Missiles School, Dam Neck, VA.

Length: 26 weeks (836 hours).

Exhibit Dates: 10/72–7/78.

Objectives: To train enlisted personnel to perform as missile technicians on board Poseidon FBM submarine tenders.

Instruction: Lectures and laboratories in Poseidon missiles, missile guidance, missile test and readiness equipment, guidance system test sets, associated test equipment, basic electronics, digital techniques, and operational amplifiers.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (4/74).

NV-1715-0471

E-2A AN/ASM-33A IN-FLIGHT PERFORMANCE MONITOR MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 10/67–1/88.

Objectives: To train enlisted personnel to maintain the E-2A AN/ASM-33A In-Flight

Performance Monitor at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of the E-2A inflight performance monitor AN/ASM-33A, including component analysis, oscilloscope components and operation, multimeter usage and associated circuits and power supply, and analysis of associated equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (4/74).

NV-1715-0472

S-2D/E MH-67 Auto Pilot System Maintenance, No. 7

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train maintenance personnel to maintain the MH-67 A.F.C.S. autopilot system.

Instruction: Lectures and practical exercises in the maintenance of the MH-67 A.F.C.S. autopilot system, including basic gyroscopes, transistors, amplifiers and flight principles; equipment components and circuitry; synchronization and stabilization; and testing and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (4/74).

NV-1715-0473

Terrier Weapon Direction System Mk 7 (WDE Mk 8)

Course Number: Not available.

Location: Guided Missiles School, Dam Neck, VA; Naval Schools Command, Mare Island, CA.

Length: 20 weeks (600 hours).

Exhibit Dates: 2/68-12/78.

Objectives: To train enlisted personnel to inspect and maintain the Mk 7 weapons direction system.

Instruction: Lectures and practical exercises in the maintenance of the Mk 7 weapons direction system, including Terrier weapons system theory and fundamentals, power supplies, radar fundamentals, simulation, sweep generation, video systems, target selection and assignment, symbol systems, data conversion, weapons systems differences, and associated test equipment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0474

A-6 Avionics Systems Organizational Level Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 8-9 weeks (320-360 hours).

Exhibit Dates: 2/68-1/88.

Objectives: To train avionics maintenance personnel to maintain and service the A-6 aircraft's avionics systems.

Instruction: Lectures and practical exercises in aircraft familiarization, search radar, track radar, inertial navigation systems, digital fundamentals, computer familiarization, computer line maintenance, system operation and troubleshooting, and organizational test equipment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0475

A-6 AN/ASN-31 Inertial Navigation System and Test Console Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 7-8 weeks (280-320 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train enlisted personnel to maintain inertial navigation systems and to service inertial navigation test consoles.

Instruction: Lectures and practical exercises in basic physics, analog and digital signal flows, power supplies and distribution, inertial test equipment, and system operation and maintenance.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics, 4 in physics (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics, 2 in physics (4/74).

NV-1715-0476

A-6A AN/ASN-31 Inertial Navigation Organizational Level Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to test and maintain the AN/ASN-31 inertial navigation system of the A-6 aircraft.

Instruction: Lectures and practical exercises in the maintenance of the AN/ASN-31 inertial navigation system of the A-6 aircraft, including general aircraft systems, theory and components of inertial navigation systems, air navigation, gyroscopes, accelerometers, analog computers, velocity information, test equipment, and line maintenance.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0477

P-3 ASA-16 System Maintenance, No. 50

Course Number: Not available.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel who have completed courses in transistor fundamentals and P-3 aircraft familiarization to maintain the ASA-16 display group of the P-3 aircraft.

Instruction: Lectures and practical exercises in the maintenance of the ASA-16 display group of the P-3 aircraft, including block-diagram analysis, components, circuit analysis, servomechanisms, radar set adapter, electronic gate generator, various subassemblies, range and bearing functions, power distribution, alignment procedures, and basic computer elements of the system.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (4/74).

NV-1715-0478

E-2A Automatic Flight Control System and Air Data Computer Semi-Automatic Check-out Equipment Operation and Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 4 weeks (120 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train enlisted personnel who have background in avionics, automatic flight control systems, and air data computers to operate and maintain the programming test console and check-out equipment of the E-2A aircraft's automatic flight control system.

Instruction: Lectures and practical exercises in the operation and maintenance of the programming test console and check-out equipment of the E-2A aircraft's automatic flight control system, including operation of various adapters; power supplies; amplifiers; block-diagram and component analysis; and associated test sets.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (4/74).

NV-1715-0479

RA-5C AN/APN-120 Electronic Altimeter Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Albany, GA.

Length: 3 weeks (120 hours).

Exhibit Dates: 4/68-1/88.

Objectives: To train electronics maintenance personnel to operate and maintain the AN/APN-120 electronic altimeter and associated semiautomatic test equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/APN electronic altimeter and associated semiautomatic test equipment, including transmitters and receivers, amplifiers, radar fundamentals, power supplies, FM and AM review, low- and high-altitude systems components and circuit analysis, and test equipment function and components.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (4/74).

NV-1715-0480

Basic Electronics Orientation

Course Number: D-100-015.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA; Fleet Airborne Electronic Training Unit Detachment, Jacksonville, FL.

Length: 6 weeks (180 hours).

Exhibit Dates: 7/66-12/68.

Objectives: To train maintenance personnel in basic electronics.

Instruction: Lectures in AC and DC circuit theory; mathematics review; physics of atomic structure; vacuum tube and transistor theory; and special test equipment usage, including meters, signal generators, and oscilloscopes.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electricity and electronics (12/68).

NV-1715-0481

1. BASIC AIRBORNE RADIO COMMUNICATIONS OPERATOR
2. AIRBORNE RADIO COMMUNICATIONS OPERATOR (ARCO)

Course Number: *Version 1:* D-201-0010. *Version 2:* D-201-010.

Location: Fleet Airborne Electronics Training Unit, Jacksonville, FL; Fleet Airborne Electronics Training Unit, Brunswick, ME.

Length: *Version 1:* 5 weeks (175 hours). *Version 2:* 12 weeks (320 hours).

Exhibit Dates: *Version 1:* 1/70-1/88. *Version 2:* 1/66-12/69.

Objectives: To train enlisted personnel to be airborne radio communications operators.

Instruction: Lectures and laboratories in international Morse code, communications publications, naval communications procedures, electronic equipment safety precautions, naval patrol aircraft power supply and communications systems operation and in-flight maintenance procedures, and teletypewriter and radiotelephone operating procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in radio operation or two-way communications (6/75). *Version 2:* In the upper-division baccalaureate category, credit in electronics on the basis of institutional evaluation (4/74).

NV-1715-0482

AN/SPN-10 OPERATOR

Course Number: D-2G-010; D-222-010.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA; Naval Air Station, Patuxent River, MD.

Length: 4 weeks (120 hours).

Exhibit Dates: 1/66-12/68.

Objectives: To train enlisted personnel to operate automatic carrier landing system equipment.

Instruction: Lectures and practical exercises in AN/SPN-10 automatic, carrier landing system equipment operational capabilities and limitations, aircraft equipment requirements, subsystems and associated support equipment introduction, preoperative procedures and subsystem checks, operator maintenance, emergency procedures and safety precautions, and operational training on the AN/MPN-T1 console and subsystems.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0483

AN/APN-122 MAINTENANCE TRAINING
(AN/APN-122 Doppler Navigation System Maintenance)

Course Number: D-102-014.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA.

Length: 3 weeks (105 hours).

Exhibit Dates: 11/63-12/68.

Objectives: To train maintenance personnel to conduct preventive and corrective maintenance on AN/APN-122 Doppler radar navigation equipment.

Instruction: Lectures in AN/APN-122 Doppler radar navigational equipment, including theory of operation; block diagram and circuit analysis; troubleshooting and maintenance techniques; test equipment usage; pre-amp, signal data converter, and ground speed computer alignment; and trouble analysis, isolation and repair.

Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (12/68).

NV-1715-0484

AN/APS-20E MAINTENANCE TRAINING
(AN/APS-20E Radar System Maintenance)

Course Number: D-102-015.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA.

Length: 6 weeks (180 hours).

Exhibit Dates: 11/63-12/68.

Objectives: To train electronics maintenance personnel to maintain the AN/APS-20E radar.

Instruction: Lectures on AN/APS-20E radar, including theory of operation, system description, low-voltage power supply, synchronizer, modulator, transmitter, duplexer, radar receiver, antenna, and operator indicators; and practical applications, including equipment operation, alignment, and troubleshooting.

Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (12/68).

NV-1715-0485

AN/APS-38B MAINTENANCE TRAINING
(AN/APS-38B Radar System Maintenance)

Course Number: D-102-016.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA.

Length: 3 weeks (90 hours).

Exhibit Dates: 11/63-12/68.

Objectives: To train electronics maintenance personnel to maintain the AN/APS-38B radar.

Instruction: Lectures and practical exercises in AN/APS-38B radar system operation, including description and function of equipment, circuit analysis, and operating procedures and techniques; and practical applications, including equipment operation, alignment, component location, associated test equipment usage, and trouble location.

Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (12/68).

NV-1715-0486

AN/ARC-38A MAINTENANCE TRAINING
(AN/ARC-38A SSB Transceiver Maintenance)

Course Number: D-102-021.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA.

Length: 4 weeks (120 hours).

Exhibit Dates: 6/64-12/68.

Objectives: To train electronics maintenance personnel to maintain AN/ARC-38A radio navigation equipment.

Instruction: Lectures and practical exercises in AN/ARC-38A radio navigation equipment operation, including receiver-transmitter, antenna coupler, teletype, and signal data converter; and practical applications, including equipment operation, component location, test equipment usage, alignment procedures, and troubleshooting.

Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (12/68).

NV-1715-0487

AN/ARN-21D TACAN NAVIGATION SET MAINTENANCE
(AN/ARN-21D Maintenance Training)
(AN/ARN-21D TACAN Receiver Maintenance)

Course Number: D-102-024.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA.

Length: 4 weeks (120 hours).

Exhibit Dates: 1/66-12/68.

Objectives: To train maintenance personnel to operate, adjust, and troubleshoot AN/ARN-21D navigational radio equipment.

Instruction: Lectures and practical experience in AN/ARN-21D navigational radio equipment operation, basic electronics and circuit theory, component failure, system analysis, and system adjustment and alignment procedures.

Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (12/68).

NV-1715-0488

AN/ASA-16 DATA DISPLAY GROUP MAINTENANCE TRAINING

Course Number: D-102-026.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA.

Length: 4 weeks (120 hours).

Exhibit Dates: 3/64-12/68.

Objectives: To train electronics maintenance personnel to maintain the AN/ASA-16 data display group.

Instruction: Lectures and practical exercises in AN/ASA-16 data display group theory of operation, including block-diagram and circuit analysis; equipment operation, calibration, and component location; special test equipment usage; and trouble location.

Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0489

AN/ARC-94 SINGLE SIDE BAND TRANSCEIVER MAINTENANCE

Course Number: D-102-030.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA.

Length: 3 weeks (90 hours).

Exhibit Dates: 1/66-12/68.

Objectives: To train electronics maintenance personnel to maintain the AN/ARC-94 system.

Instruction: Lectures in AN/ARC-94 operation, associated test equipment usage, and alignment and troubleshooting procedures.

Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (12/68).

NV-1715-0490

Alternating Current Power Systems

Course Number: D-602-011.

Location: Fleet Airborne Electronics Training Unit Detachment, Jacksonville, FL.

Length: 4 weeks (120 hours).

Exhibit Dates: 1/66-12/68.

Objectives: To train aviation electricians to maintain, analyze, and isolate malfunctions in aircraft electrical systems.

Instruction: Lectures and practical exercises in alternating current theory, power systems, components, electron and magnetic principles review, DC current theory review, various types of reactance, transformers, and description, components, and troubleshooting procedures for brush, brushless, and emergency generator systems.

Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (12/68).

NV-1715-0491

AN/BPS-15 Radar Combined Maintenance

Course Number: A-102-0199.

Location: Submarine Training Facility, Charleston, SC; Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine School Groton, New London, CT.

Length: 3-4 weeks (90-120 hours).

Exhibit Dates: *Version 1:* 1/77-Present. *Version 2:* 3/72-12/76.

Objectives: To provide instruction on the operation and maintenance of an installed submarine radar system.

Instruction: *Version 1:* Lectures and laboratory exercises in the operation of a radar system including the antenna hydraulic system, radar receiver and the signal display unit from a block diagram and signal flow approach. Preventive and corrective maintenance, alignment adjustments and calibration procedures are covered as well as test procedures for microwave cubes and their replacement. *Version 2:* Course includes lecture on basic radar theory, including AC/DC power distribution, transmitter/receiver theory, video and control circuits. Course also covers troubleshooting and performance checking. Student learns principles of radar, technical theory of operation, routine preventive and corrective maintenance.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic systems troubleshooting and maintenance (10/89). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics engineering technology (9/77).

NV-1715-0492

Satellite Receiver AN/SRN-9A Combined Maintenance

(Satellite Receiver AN/SRN-9A, BRN-6 Combined Maintenance, Class F1)

Course Number: A-102-0168.

Location: Submarine School Groton, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60-80 hours).

Exhibit Dates: 12/70-11/84.

Objectives: To provide the necessary theory and skills to operate and maintain a navigation satellite receiver.

Instruction: For this course after 11/84 see NV-1715-1476. This is a block-diagram-level course emphasizing physical, functional, and interface description as well as the basic maintenance of a radio receiver. Course provides introduction to digital mathematics and digital circuits, and basic operation of integrated circuits.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics technology (3/81).

NV-1715-0493

AN/APN-171(V) Radar Altimeter (Low Level) and AN/APQ-107 Radar Altimeter Warning Set Intermediate Maintenance

(AN/APN-171(V) Radar Altimeter (Low Level) Intermediate Maintenance)

Course Number: C-102-3050.

Location: Air Maintenance Training Detachment, North Island, San Diego, CA; Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, Quonset Point, RI; Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 3 weeks (96-104 hours).

Exhibit Dates: *Version 1:* 7/73-Present. *Version 2:* 3/71-6/73.

Objectives: To train maintenance personnel to operate and maintain the AN/APN-171(V) radar altimeter system.

Instruction: *Version 1:* Upon completion of the course, the student will be able to operate, test, maintain and troubleshoot an aircraft radar altimeter and altimeter warning system to the circuit board level; the student uses a differential voltmeter, power meter, standing wave indicator, RF signal generator and phase angle meter. *Version 2:* Lectures and practical exercises in the maintenance and operation of the AN/APN-171(V) radar altimeter system, including block-diagram analysis; transmitter, receiver, and range detection; output circuits; and testing and alignment.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic instrumentation and 1 in electronics troubleshooting laboratory (4/85). *Version 2:* In the vocational certificate category, credit in electronics laboratory on the basis of institutional evaluation (4/74).

NV-1715-0494

Electronic Surveillance Measures (ESM) AN/WYQ-1, AN-BRQ-1 Combined Maintenance

(AN/WYQ-1 and AN/BRQ-1 Combined Maintenance Class C-1)

Course Number: A-102-0128.

Location: Submarine School, Groton, New London, CT; Submarine Training Center Pacific Pearl Harbor, HI.

Length: 5 weeks (150 hours).

Exhibit Dates: 5/68-1/88.

Objectives: To teach the maintenance of a digital display unit and a specialized surveillance receiver.

Instruction: Course covers the maintenance of a data display unit and a surveillance receiver. This equipment is made with transistors and IC logic boards. The course includes physical and functional characteristics and the operation, alignment, adjustment, calibration, preventive maintenance, and troubleshooting to isolate faults to the IC board and component level and to make repairs. Subsystems maintained are control display unit, printer recorder, magnetic tape transport, digital processor, power supply, superheterodyne receiver, timing module, and interfacing module.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics technology (9/77).

NV-1715-0495

Tradevman R (Repairman) Class A

Course Number: None.

Location: Air Technical Training Center, Memphis, TN.

Length: 17 weeks (680 hours).

Exhibit Dates: 6/56-7/65.

Objectives: To train enlisted personnel to install, operate, maintain and repair training devices used in gunnery, aviation, and electronics instruction.

Instruction: Lectures and practical exercises in training devices operation, maintenance, and repair, including AC fundamentals, resonance circuits, vacuum tubes, audio amplifiers, rectifiers, regulators, radio receiver theory, time constants, pulse and wave-shaping circuits, audio transducers, optical and electromechanical devices, synchros fundamentals, servomechanisms, vacuum and mechanical systems (Link trainer 1-CA-1), and troubleshooting and alignment procedures.

Credit Recommendation: In the vocational certificate category, 9 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and credit in electronics laboratory on the basis of institutional evaluation (4/74).

NV-1715-0496

Atmosphere Analyzer Central Atmosphere Monitoring System (CAMS) Mk 1

Course Number: A-623-0048.

Location: Submarine School, Groton, New London, CT; Fleet Ballistic Submarine Training Center, Charleston, SC; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 3 weeks (90-99 hours).

Exhibit Dates: *Version 1:* 5/85-Present. *Version 2:* 9/77-4/85.

Objectives: To provide theory and skills necessary to perform normal/casualty operational tasks and preventative/corrective maintenance on an atmosphere analyzer.

Instruction: Course is largely descriptive, involving operation and maintenance of the above-mentioned equipment. Includes readout module, diagnostic module, coanalyzer module, MS analyzer model, low voltage power supply module, ion pump power supply module, and an AC control module.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in environmental laboratory techniques (11/85). *Version 2:* Credit is not recommended because of the limited, specialized nature of the course (6/81).

NV-1715-0497

1. Tradevman, Class A
2. Tradevman, Class A
3. Tradevman School, Class A
4. Class A Tradevman School

Course Number: C-191-2010; C-191-10.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: *Version 1:* 4-6 weeks (165 hours). *Version 2:* 6 weeks (274 hours). *Version 3:* 7 weeks (312 hours). *Version 4:* 20 weeks (800 hours).

Exhibit Dates: *Version 1:* 10/75-3/84. *Version 2:* 6/72-9/75. *Version 3:* 8/65-5/72. *Version 4:* 1/55-7/65.

Objectives: To train enlisted personnel to install, operate, maintain, and repair training devices used in gunnery, aviation, and electronics instruction.

Instruction: *All Versions:* Lectures and practical exercises in training devices fundamentals, including applied physics introduction, analog computer basics, flight theory and performance introduction, basic jet instrument training, basic navigation principles, radio aids to navigation, and flight simulator maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in test equipment familiarization, vacuum tube amplifiers and power supplies and an introduction to synchos and servos (2/81). *Version 2:* In the vocational certificate category, 2 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, credit in electricity or electronics on the basis of institutional evaluation (4/74). *Version 3:* In the vocational certificate category, 2 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 4:* In the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (12/68).

NV-1715-0498

E-1B Electronic Systems Organizational Maintenance
(E-1B Integrated Electrical System Organizational Maintenance)

Course Number: C-600-3457; C-602-3457.

Location: Air Maintenance Training Detachment, Norfolk, VA; Air Maintenance Training Detachment, North Island, CA.

Length: 3-4 weeks (120-160 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train fleet maintenance personnel to maintain and operate the E-1B radar, communication, and navigation electronic systems.

Instruction: Lectures and practical exercises in the maintenance and operation of the E-1B radar, communication, and navigation electronic systems, including theory of radar principles; block-diagram analysis of transmitters, RF circuits, and computer and control circuits; radar system associated equipment; and IFF systems operation.

Credit Recommendation: In the vocational certificate category, 3 semester hours in radar or HF circuits (4/74).

NV-1715-0499

F-4J Data Link System Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 6 weeks (240 hours).

Exhibit Dates: 2/70-1/88.

Objectives: To train maintenance personnel who have completed courses in transistor and digital fundamentals to maintain and operate the F-4J data link system.

Instruction: Lectures and practical exercises in the operation and maintenance of the F-4J data link system, including review of digital mathematics, logic circuits and functions; system evaluation by functional block description; descriptive theory of system components; message generator and display; discrete indicators; and radar indicator.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory, and additional credit in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0500

AN/WLR-6(V)4 Tactical Operator
(Electronic Surveillance Measures (ESM) AN/WLR-6 Basic Operator)

Course Number: A-233-0042.

Location: Submarine School, Groton, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 3 weeks (90 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To present the tasks required for four of the five operator positions required to handle a complex submarine surveillance receiver.

Instruction: Course offers general physical description, equipment interface, basic theory, and function of a complex receiver systems and signal processor. Major emphasis is on learning to operate this equipment at four of the five operator positions of this equipment. These tasks include knowing the function of all controls and connector terminals; the RF receivers; audio, video, and auxiliary equipment and correct patch plug interconnections.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (9/77).

NV-1715-0501

Electronic Surveillance Measures (ESM) AN/WLR-6 Combined Maintenance

Course Number: A-233-0041.

Location: Submarine School Groton, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: *Version 1:* 16-21 weeks (480-800 hours). *Version 2:* 16 weeks (480 hours).

Exhibit Dates: *Version 1:* 10/76-Present. *Version 2:* 9/69-9/76.

Objectives: Course is designed to train technicians to operate and maintain a complex manually operated multichannel signal reception and processor radio receiver that can handle any type of transmitted signal.

Instruction: *All Versions:* Through lectures and laboratories, the student learns the functional description, block-diagram signal flow and operating modes of the ESM system. Subjects covered are a multiple antenna system and its coupling and antenna switching circuits, a VHF panoramic manual receiver and its subsystems, basic digital concepts using resistor diode logic and transistor flip-flops, knowledge and application of db and noise figure, video and audio amplifiers, video and audio tape recorders, video and audio distribution panels, power supplies, power distribution system, characteristics and operation of traveling wave tubes and klystrons, UHF preamplifiers, relay switching circuits, signal spectrum display unit, FM multiplexers and demultiplexers. Student learns to calibrate, align, adjust, and do performance tests on all this equipment. *Version 1:* Includes basic digital concepts including number systems, codes and flip-flop operation using discrete logic circuits.

Credit Recommendation: *Version 1:* In the vocational certificate category, 10 semester hours in electronics (3/81); in the lower-division baccalaureate/associate degree category, 3 semester hours in general technical elective for non-electronic technology students, 2 in electronic maintenance and repair laboratory (3/81). *Version 2:* In the vocational certificate category, 10 semester hours in electronics (9/77).

NV-1715-0502

AN/BQH-5(V) Series Combined Maintenance
(Data Gathering Set AN/BQH-5(V)2 Basic Maintenance)

Course Number: A-130-0176.

Location: Submarine School Groton, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2-3 weeks (60-84 hours).

Exhibit Dates: 8/75-Present.

Objectives: Course provide system-level approach to maintenance of data-gathering equipment.

Instruction: Course includes familiarization with the FR 1300 tape recorder and console as well as other highly specialized pieces of equipment. Most of the course is laboratory oriented.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (10/89).

NV-1715-0503

Sonar Classification Set AN/BQH-2D/E Combined Maintenance

Course Number: A-130-0161.

Location: Submarine School, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: 8/74-11/85.

Objectives: To provide the necessary theory and skills required to operate and maintain a sonar classification set.

Instruction: Course offers basic training of a highly specialized nature. Course presents field effect transistors, integrated circuits, and logic circuits; also teaches specifics of this equipment and includes operation of DC power supplies, a signal data recorder, a hydrophone amplifier, and a spectrum analysis.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics technician (9/77).

NV-1715-0504

AVIATION ELECTRONICS INTELLIGENCE, CLASS O/C

Course Number: Not available.

Location: Air Technical Training Center, Glynco, GA.

Length: 7 weeks (280 hours).

Exhibit Dates: 12/65–12/68.

Objectives: To train flight officers and enlisted personnel qualified as aircrewmen to operate electronics countermeasures and electronic counter-countermeasures systems.

Instruction: Lectures and practical exercises in the operational functions associated with electronic countermeasures and electronic counter-countermeasures and associated systems, including general electronic warfare information, ECM equipment, radar processing procedures, in-flight training, basic receiver and oscilloscope principles, and operation of associated equipment.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74).

NV-1715-0505

EKA-3B AN/ASN-66B NAVIGATIONAL COMPUTER SET INTERMEDIATE MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 3 weeks (120 hours).

Exhibit Dates: 8/68–1/88.

Objectives: To train maintenance personnel to operate and maintain the AN/ASN-66B navigational computer set.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/ASN-66B navigational computer set, including introduction to dead-reckoning navigation; operational analysis; autosyn theory; great-circle solutions using spherical trigonometry; introductory solid-state circuitry; amplifiers; logic and compensation circuits; air speed analysis; synchro theory; use of multimeters, phase angle voltmeter, oscilloscope, and digital voltmeter; and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in physics and electrical laboratory (4/74); in the upper-division baccalaureate category, credit in physics and electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0507

AN/APN-153(V) DOPPLER RADAR NAVIGATION SYSTEM INTERMEDIATE MAINTENANCE

Course Number: C-102-3041.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Kingsville, TX; Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Key West, FL; Air Maintenance Training Detachment, Beaufort, SC; Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, Quonset Point, RI.

Length: 5–6 weeks (200–240 hours).

Exhibit Dates: 8/69–Present.

Objectives: To train fleet maintenance personnel who have backgrounds in electronics and digital fundamentals to maintain the AN/APN-153(V) Doppler radar system.

Instruction: Lectures and practical exercises in the maintenance of the AN/APN-153(V) Doppler radar system, including circuit analysis of microwave transmitters, logic systems, modulator assemblies, high-voltage power supplies, automatic frequency control assembly, antenna indicators; use of oscilloscopes, frequency counters, VTVM, sweep generator, audio oscillator, and RF signal generator; and repair techniques for system subassemblies.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in microwave circuits and electronic technology (7/80).

NV-1715-0508

E-2B OA-8206/ASA-27A DIFFERENCE ORGANIZATIONAL MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 3–4 weeks (120–176 hours).

Exhibit Dates: 9/70–1/88.

Objectives: To train E-2A weapons system specialists to operate and maintain OA-8206/ASA-27A computers.

Instruction: Lectures and practical exercises in general-purpose computers, system elements, power distribution, processor and input/output operations, timing circuits, control units, displays, navigation interfaces, maintenance procedures, magnetic tape handling procedures, logic circuits and mechanization.

Credit Recommendation: Insufficient data for evaluation (4/74).

NV-1715-0509

INACTIVE DUTY RESERVE COMBAT INFORMATION CENTER (CIC) CLASS—BASIC, SUPERVISORY AND OFFICER TEAM TRAINING

Course Number: Not available.

Location: Air Technical Training Center, Glynco, GA.

Length: 2 weeks (112 hours).

Exhibit Dates: 1/73–1/88.

Objectives: To train reserve personnel to operate shipboard combat information centers.

Instruction: Lectures and practical exercises in the operation of shipboard combat information centers, including introductory electronics, electronic warfare, search and rescue, communications, ASW operations, surface tactics, anti-air warfare, relative and geographic plots, and naval combat operations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74).

NV-1715-0510

ELECTRONICS TECHNICIAN AN/SPA-25 INDICATOR GROUP CLASS C MAINTENANCE

Course Number: A-104-014; A-104-015.

Location: Electronics Technician, Class C School, San Diego, CA; Electronics Technician, Class C School, Norfolk, VA.

Length: 2 weeks (60 hours).

Exhibit Dates: 1/70–1/88.

Objectives: To train enlisted personnel to operate and maintain the AN/SPA-25 indicator group and to use associated test equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/SPA-25 indicator group and the use of associated test equipment, including location and identification of units, assemblies, and subassemblies; timing system, sweep circuit, servo system, gear train, power supply, and intensity modulator circuit analyses; and planned maintenance and maintenance data collection systems.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical maintenance laboratory (4/74); in the lower-division baccalaureate/associate degree category, credit in electrical maintenance laboratory on the basis of institutional evaluation (4/74).

NV-1715-0511

AN/APX-7 RADAR RECOGNITION SYSTEM INTERMEDIATE MAINTENANCE
(P-3 AN/APX-7 Radar Recognition System Intermediate Maintenance)

Course Number: C-102-3538.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 12/70–Present.

Objectives: To train maintenance personnel to operate and maintain the AN/APX-7 radar recognition system.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/APX-7 radar recognition system, including functional block diagrams, circuit analysis, transmitting system, subassemblies, video systems power monitor and supplies, set control, and troubleshooting and alignment procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics laboratory (7/81).

NV-1715-0512

1. TARTAR RADAR AN/SPG-51C DIGITAL
2. TARTAR RADAR SET AN/SPG-51C AND DIRECTOR MK 73 MOD 1

Course Number: A-104-0136; A-104-0119.

Location: Naval Guided Missiles School, Dam Neck, VA.

Length: *Version 1:* 23–25 weeks (800–920 hours). *Version 2:* 26 weeks (763 hours).

Exhibit Dates: *Version 1:* 1/80–Present. *Version 2:* 1/70–12/79.

Objectives: To train fire control technicians to operate and maintain the AN/SPG-51C radar set and associated equipment.

Instruction: *All Versions:* Lectures and practical exercises in the maintenance and operation of the AN/SPG-51C radar set, including use of specialized test equipment, AC and DC power supplies, digital theory, block diagrams of track radar components, various circuits, data flow, missile guidance, signal comparator, and alignment, calibration, troubleshooting, and repair techniques. *Version 1:* The course is heavily weighted toward troubleshooting and repair techniques.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in electronic troubleshooting techniques (6/89). *Version 2:* In the vocational certificate category, 6 semester hours in basic electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electrical laboratory

(4/74); in the upper-division baccalaureate category, 1 semester hour in basic electrical laboratory (4/74).

NV-1715-0513

AN/APQ-126(V) Radar Set Special Support Equipment Intermediate Maintenance

(AN/APQ-126 Radar Set Special Support Equipment Intermediate Maintenance)

Course Number: C-102-3797.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: 7 weeks (280 hours).

Exhibit Dates: *Version 1:* 6/78–Present. *Version 2:* 4/73–5/78.

Objectives: To train radar maintenance personnel to operate and maintain the AN/APQ-126 radar set special support equipment at the intermediate level.

Instruction: *All Versions:* Lectures and practical exercises in the operation and maintenance of the AN/APQ-126 radar set special support equipment, including introduction to, and circuit analysis of, the interconnecting power supply; control indicator; relay; assembly and adapter boxes; circuit analysis of various generators; circuit analysis of module, antenna/receiver, and antenna boresight test sets; and alignment, troubleshooting, and check-out procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electronic maintenance theory and 2 in electronics maintenance laboratory (3/82). *Version 2:* In the vocational certificate category, 3 semester hours in electronic test equipment maintenance (4/74); in the lower-division baccalaureate/associate degree category, credit in electronic test equipment maintenance on the basis of institutional evaluation (4/74).

NV-1715-0514

A-6 AN/APQ-92 Radar Antenna/Receiver and Associated Test Set Intermediate Maintenance

Course Number: C-102-3773.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/71–1/88.

Objectives: To train maintenance personnel who have backgrounds in general electronics and maintenance of specific search radar systems to maintain and repair the AN/APQ-92 search radar antenna/receiver and associated equipment.

Instruction: Lectures and practical exercises in the maintenance of the AN/APQ-92 search radar antenna/receiver and associated equipment, including use of block diagrams and signal tracing in system fault diagnosis and correction, function and analysis of terrain clearance, microwave and radiating, search receiving, and AFC and local oscillator groups; test set operation and components, and search receiver check-out and repair.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, credit in electronics laboratory on the basis of institutional evaluation (4/74).

NV-1715-0515

AN/ASQ-17B Integrated Electronics Central Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, El Toro, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 12/68–1/88.

Objectives: To train maintenance personnel to maintain and repair the AN/ASQ-17B integrated electronics central.

Instruction: Lectures and practical exercises in the maintenance and repair of the AN/ASQ-17B integrated electronics central, including operation of IFF systems, transmitter and receiver operation, power supply and distribution, automatic radio direction finder, associated coders, and troubleshooting and adjustment procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics, and additional credit in electronics on the basis of institutional evaluation (4/74).

NV-1715-0516

AN/APS-115(B) Search Radar System Intermediate Maintenance

(AN/APS-115 Search Radar System Intermediate Maintenance)

Course Number: C-100-3571.

Location: *All Versions:* Air Maintenance Training Detachment, Moffett Field, CA. *Version 1:* Air Maintenance Training Detachment, Jacksonville, FL. *Version 2:* Air Maintenance Training Detachment, Patuxent River, MD.

Length: 4 weeks (160 hours).

Exhibit Dates: *Version 1:* 12/76–Present. *Version 2:* 2/73–11/76.

Objectives: To train fleet maintenance personnel to operate and maintain the AN/APS-115 radar system.

Instruction: *All Versions:* Lectures and practical exercises in the operation and maintenance of the AN/APS-115 radar system, including introduction to related integrated circuits and logic devices; block-diagram analysis; components; detailed operation of control boxes, antenna, and receiver-transmitter; and alignment and trouble isolation procedures. *Version 1:* Includes repair of the AN/APS-115(B) radar system.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in basic radar theory and operation (7/81). *Version 2:* In the vocational certificate category, 2 semester hours in electronics (4/74); in the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation (4/74).

NV-1715-0517

VS AW Sensor Operator S-2G

Course Number: D-210-0010.

Location: Fleet Aviation Specialized Operational Training Group, Quonset Point, RI.

Length: 6 weeks (210 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train flight personnel to operate the passive and active equipment in the AW S2G aircraft.

Instruction: Lectures and practical exercises in the operation of ASW equipment carried in the S2G aircraft, including MAD fundamentals, operation, and signal interpretation; radar fundamentals; target interpretation; air navigation computer; ESM equipment and tactics; introductory oceanography; Jezebel operations background; passive listening techniques and equipment; active acoustical equipment; and signature interpretation.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74).

NV-1715-0518

AN/ARN-21B/D TACAN Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 3 weeks (120 hours).

Exhibit Dates: 6/69–1/88.

Objectives: To train maintenance personnel to operate and maintain the AN/ARN-21B/D TACAN receiver at the intermediate level.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/ARN-21B/D TACAN receiver, including theory of operation, special test equipment and circuit analysis of system components, block diagrams, and troubleshooting and alignment procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronic equipment maintenance (4/74); in the lower-division baccalaureate/associate degree category, credit in electronic equipment maintenance on the basis of institutional evaluation (4/74).

NV-1715-0519

AN/ARN-52(V) TACAN Receiver Intermediate Maintenance

Course Number: C-102-3034.

Location: Air Maintenance Training Detachment, Meridian, MS; Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, Key West, FL; Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Santa Ana, CA; Air Maintenance Training Detachment, Imperial Beach, CA; Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, El Toro, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 5/68–12/80.

Objectives: To train maintenance personnel with backgrounds in transistor fundamentals to operate and maintain the AN/ARN-52(V) TACAN receiver.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/ARN-52(V) TACAN receiver, including theory of operation, circuit analysis and block diagrams of system components, channel servo operation, power supply, range-measuring and bearing-measuring circuitry, and troubleshooting and alignment procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronic equipment maintenance (4/74); in the lower-division baccalaureate/associate degree category, credit in electronic equipment maintenance on the basis of institutional evaluation (4/74).

NV-1715-0520

5"/54 Rapid Fire Gun and Mount Mk 42 Mods 7 and 8, Class C1
(Gun Mount 5"/54 Mk 42 Mods 7 and 8)

Course Number: A-113-0029.

Location: Service School Command, Great Lakes, IL.

Length: 19 weeks (570 hours).

Exhibit Dates: 1/67–12/78.

Objectives: To train gunner's mates to maintain advanced gun systems.

Instruction: Lectures and practical exercises in the maintenance of advanced gun systems, including electrical and hydraulic circuits, rapid fire gun mount and controlling system characteristics, specific gun mount operation, power supplies, test equipment, related electronic amplifiers, and maintenance management and logistics.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electromechanical laboratory (9/77).

NV-1715-0521

A-5A RA-5C AN/ASB-12 Line and Shop Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Sanford, FL.

Length: 12 weeks (480 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel to service and maintain the AN/ASB-12 bomb-directing set.

Instruction: Lectures and practical exercises in the servicing, maintenance and modification of the AN/ASB-12 bomb-directing set, including introductory navigation and auto navigation techniques and systems components, video scanners, radar techniques, tie-in equipment, bombing computer elements, all-weather and visual modes, and overall system analysis.

Credit Recommendation: In the vocational certificate category, 5 semester hours in aircraft navigation systems (4/74).

NV-1715-0522

Aviation Electronics Officers, Class O

Course Number: Not available.

Location: Air Technical Training Center, Memphis, TN.

Length: 40 weeks (1420 hours).

Exhibit Dates: 4/57–12/68.

Objectives: To train aviation ground officers or aviators and warrant officers to supervise electrical and electronic maintenance activities.

Instruction: Lectures and practical exercises in the supervision of electrical and electronic maintenance activities, including basic electricity and electronic theory, introduction to radar, avionic systems operation, administrative procedures, and automatic flight control and special systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic electricity, 3 in electronics, 3 in electronic systems, 6 in electronic systems laboratory (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity and electronics, 5 in engineering electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity and electronics, 3 in electronics laboratory (4/74).

NV-1715-0523

Electronics Technician, Class C, Wideband Synthesized Independent Sideband Receiver

Course Number: A-101-039.

Location: Naval Training Center, Great Lakes, IL.

Length: 4 weeks (160 hours).

Exhibit Dates: 5/68–12/68.

Objectives: To train electronic technicians and radiomen to operate and maintain the AN/FRR-60(V) model DDR-5M synthesized independent sideband receiver and ancillary equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/FRR-60(V) model DDR-5M synthesized independent sideband receiver and ancillary equipment, including introduction to communications systems, receiver equipment, circuit analysis, the 3M system, component analysis, and power supplies.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electrical laboratory (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0524

AN/SPS-52 Radar Set

Course Number: Not available.

Location: Naval Schools Command, Mare Island, CA.

Length: 28 weeks (840 hours).

Exhibit Dates: 2/68–9/82.

Objectives: To train enlisted personnel to operate and maintain the AN/SPS-52 radar set.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/SPS-52 radar set, including system capabilities and function, block-diagram analysis, digital computer troubleshooting procedures, power distribution system, major units of the Tartar weapons system, other radar and missile systems operations, detailed description of mathematics, operation of test equipment, and functional description of the digital-to-analog converter.

Credit Recommendation: In the vocational certificate category, 3 semester hours in digital logic (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in digital logic on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0525

A-3B, RA3B, EA3B AN/ALQ-35 DECM System Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train fleet personnel to maintain the AN/ALQ-35 electronics countermeasures system and associated special support equipment at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of the AN/ALQ-35 electronic countermeasures system and associated special support equipment, including brief review of radar and electronic countermeasures, functional description of the system and all component subsystems, use of standard and specialized electronic test equipment, and alignment, troubleshooting, and repair procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronic equipment maintenance (4/74).

NV-1715-0526

Terrier Radar Set AN/SPG-55B Mod 5

Course Number: A-104-0091; A-104-0092.

Location: Guided Missiles School, Dam Neck, VA; Naval Schools Command, Mare Island, CA.

Length: 30 weeks (900–1073 hours).

Exhibit Dates: 2/68–12/76.

Objectives: To train fire control technicians to maintain the AN/SPG-55B radar system and to use associated test equipment for evaluation of system performance.

Instruction: Lectures and practical exercises in the maintenance of the AN/SPG-55B radar system and the use of associated test equipment for evaluation of system performance, including organization of radar systems, general radar principles and circuits, analysis of system components, track radiation, track receiver, range and angle tracking, pulsed radar monitoring, signal flow, electronic counter-countermeasures, and troubleshooting and alignment.

Credit Recommendation: In the vocational certificate category, 15 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical laboratory, and 2 additional credits in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0527

E-2A AN/ASQ-52 Data Communications System Special Support Equipment Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 10/67–1/88.

Objectives: To train electronics technicians who have backgrounds in the maintenance of data communications systems to operate and maintain the AN/ASQ-52 data communications system's special support equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/ASQ-52 data communications system's special support equipment, including block- and logic-diagram analysis of data communications system test equipment, modes of operation, power supply, flight-line test set components and operation, various module analyses, and testing procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in digital communication equipment (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in digital communication equipment on the basis of institutional evaluation (4/74).

NV-1715-0528

AN/ALQ-51A Countermeasures Set

Course Number: Not available.

Location: Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Sanford, FL; Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Miramar, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 10/67-1/88.

Objectives: To train fleet maintenance personnel in AN/ALQ-51A countermeasures set theory and maintenance procedures.

Instruction: Lectures and practical exercises in AN/ALQ-51A countermeasures set introduction; block-diagram analysis; programmer, video delay, electronic gate, system blanking, modulation control, interim scan/final scan, and output and helix modulator assemblies; low-, intermediate-, and high-voltage power supplies; control circuits location, use, and theory; and intermediate maintenance procedures, including line checks, power supply checks, module checks, and troubleshooting procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic equipment maintenance (4/74).

NV-1715-0529

AN/ASM-398 Projected Map Display Set (PMDS) Intermediate Maintenance

Course Number: C-150-3783.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: 5 weeks (200 hours).

Exhibit Dates: *Version 1:* 4/73-Present. *Version 2:* 9/72-3/73.

Objectives: To train electronics maintenance personnel to service AN/ASM-398 projected map display sets.

Instruction: *All Versions:* Lectures in AN/ASM-398 projected map display set servicing, including analog and digital circuit theory and operation, basic logic theory and microcircuitry, test programming description and procedures, self-test fault isolation, test set calibration, and associated test equipment operation.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in digital circuit analysis or 1 semester hour in digital systems for electrical engineering majors (3/82). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in digital computer hardware, and additional credit in digital computer hardware on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in digital computer hardware on the basis of institutional evaluation (4/74).

NV-1715-0530

A-6 Search Radar Module Analyzer Test Console

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 10 weeks (400 hours).

Exhibit Dates: 4/68-1/88.

Objectives: To train maintenance personnel to operate and maintain circuit/system module-level test and repair facilities for search radar sets.

Instruction: Lectures and practical exercises in circuit and functional analysis of search radar system modules, including a variety of circuit types and modes of operation, and troubleshooting, maintenance, and repair procedures using standard and specialized electronic test equipment.

Credit Recommendation: In the vocational certificate category, 7 semester hours in electronic equipment maintenance (4/74); in the lower-division baccalaureate/associate degree category, credit in electronic equipment maintenance on the basis of institutional evaluation (4/74).

NV-1715-0531

Radio Transceiver AN/WRC-1 Family Equipment
(AN/URT-23(V) Radio Transmitter Maintenance)

Course Number: A-101-0109; F-101-0027; L-101-0039.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Fleet Ballistic Missile Submarine Training Center, Charleston, SC.

Length: 4 weeks (120 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train electronics technicians and radiomen to operate and maintain the AN/URT-23(V) transmitter.

Instruction: Lectures and practical exercises in the operation function and location of test points and subassemblies including block diagrams and schematics for signal tracing analysis of RF, IF, audio and power amplifiers, balance modulator, oscillators, keying circuits, power supplies, power distribution, and monitoring circuits. Preventive maintenance, alignment, troubleshooting and corrective maintenance procedures to replace defective vacuum tubes are given. NOTE: In April 1975 course was modified to include the AN/WRC-1 radio receiver and power amplifier subsystem.

Credit Recommendation: In the vocational certificate category, 2 semester hours in transmitter repair and maintenance (9/77).

NV-1715-0532

Basic Electricity and Electronics for Torpedoman's Mate

Course Number: K-123-571.

Location: Fleet Anti-Submarine Warfare School, San Diego, CA.

Length: 8 weeks (240 hours).

Exhibit Dates: 5/64-12/68.

Objectives: To train enlisted personnel to use and understand electricity, electronic devices, and standard test equipment.

Instruction: Lectures and practical exercises in the use of electricity, electronic devices, and standard test equipment, including basic electricity principles, vacuum tube electronics, introduction to transmitters, receivers, and component subsystems; and electronic test equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in electricity and electronics (4/74); in the upper-division baccalaureate category, 2 semester hours in electricity and electronics on the basis of institutional evaluation (4/74).

NV-1715-0533

P-3C Communication/Navigation Organizational Maintenance

Course Number: C-102-3591.

Location: *All Versions:* Air Maintenance Training Detachment, Moffett Field, CA. *Version 1:* Air Maintenance Training Detachment, Jacksonville, FL. *Version 2:* Air Maintenance Training Detachment, Patuxent River, MD.

Length: 8-9 weeks (320-360 hours).

Exhibit Dates: *Version 1:* 1/80-Present. *Version 2:* 11/72-12/79.

Objectives: To train fleet maintenance personnel who have had previous training in basic electronics to operate, test, and troubleshoot the P-3C communications and navigation systems.

Instruction: *All Versions:* Lectures and practical exercises in the operation, testing, and troubleshooting of the P-3C communications and navigation radar, radar altimeters, radio navigation systems, teletype teleprinter, digital data link, and computer general information.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in communications and systems maintenance (7/81); in the lower-division baccalaureate/associate degree category, 3 semester hours in avionics technology (7/81). *Version 2:* In the vocational certificate category, 6 semester hours in communications and systems maintenance (4/74); in the lower-division baccalaureate/associate degree category, credit in communications and systems maintenance on the basis of institutional evaluation (4/74).

NV-1715-0534

AN/ASN-50 Attitude Heading Reference System Intermediate Maintenance

Course Number: C-602-3010.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Imperial Beach, CA; Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, Norfolk, VA; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 2 weeks (56-80 hours).

Exhibit Dates: 9/70-Present.

Objectives: To train electrical maintenance personnel to operate and maintain the attitude-heading reference system.

Instruction: Lectures and practical exercises in the operation and maintenance of the attitude-heading reference system, including special and general test equipment, component operation, and testing and repair procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics on the basis of institutional evaluation (7/81).

NV-1715-0535

Mk 84 Fire Control System (FCS) Technician

Course Number: A-121-0015.

Location: Guided Missiles School, Dam Neck, VA.

Length: 26-28 weeks (901-945 hours).

Exhibit Dates: 1/66-1/88.

Objectives: To train maintenance personnel to maintain missile fire control systems.

Instruction: Lectures and practical experience in fire control systems maintenance, including digital system operation and functional analysis, software and hardware, naval operations with Mk 84 fire control systems, and operational and maintenance procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in digital computer fundamentals, 4 in electronic system maintenance (4/74); in the upper-division baccalaureate category, 3 semester hours in digital computer fundamentals (4/74).

NV-1715-0536

Aviation Antisubmarine Warfare (AASW) Operator, Class A

Course Number: C-210-2010.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: *Version 1:* 9–12 weeks (367 hours). *Version 2:* 12 weeks (383–460 hours). *Version 3:* 16–17 weeks (636–668 hours).

Exhibit Dates: *Version 1:* 7/75–4/85. *Version 2:* 4/72–6/75. *Version 3:* 11/68–3/72.

Objectives: To provide enlisted personnel with training in the fundamentals of antisubmarine warfare.

Instruction: For this course after 4/85 see NV-1715-1436. *Version 1:* Lectures and practical exercises in block diagram analysis of ASW systems and use, maintenance and repair of ASW equipment. *Version 2:* Lectures and practical exercises in electricity and electronics, AC and DC fundamentals, block-diagram analysis of ASW systems and use, maintenance and repair of ASW equipment. *Version 3:* Lectures and practical exercises in electricity and electronics, AC and DC fundamentals, block-diagram analysis of ASW systems, and use, maintenance, and repair of ASW equipment. Electronic devices and systems is also included.

Credit Recommendation: *Version 1:* Credit is not recommended because of the military-specific nature of the course (2/81). *Version 2:* In the vocational certificate category, 2 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics, and additional credit in electricity or electronics on the basis of institutional evaluation (4/74). *Version 3:* In the vocational certificate category, 3 semester hours in electricity or electronics, 2 in electrical laboratory (4/74); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0537

Aviation Fire Control Technician, Class A

Course Number: Not available.

Location: Air Technical Training Center, Memphis, TN.

Length: 11 weeks (440 hours).

Exhibit Dates: 6/66–12/68.

Objectives: To train graduates of the Avionics Fundamentals School to operate fire control equipment.

Instruction: Lectures and practical exercises in weapon system radar fundamentals, including alignment and troubleshooting techniques, basic test equipment, synchros and servos; gyroscopes, magnetic amplifiers, and accelerometers; transmitters, receivers, antenna, and power supplies; analog and digital computers operation and maintenance; and airborne weapon system radars, maintenance, bomb director systems, and safety precautions.

Credit Recommendation: In the vocational certificate category, 3 semester hours in radar principles (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in radar principles, 1 in analog computers, 1 in digital computer fundamentals, and, on the basis of institutional evaluation, additional credit in radar principles (4/74).

NV-1715-0538

AN/AKT-22(V) Telemetric Data Transmitting Set and AN/UKM-2A Telemetric Data Test Set Intermediate Maintenance

Course Number: C-102-3400.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, North Island, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 7/77–Present.

Objectives: To train aviation anti-submarine warfare technicians in the operation, troubleshooting and repair of a telemetric data transmitting set (AN/AKT-22(V)) and its related test set (AN/UKM-2A) at the intermediate level.

Instruction: Lectures and practical exercises in the operation, troubleshooting and repair, to the element level, of a telemetric data set and its related test set including a introduction to basic telemetry, transmitter operation and repair, antenna coupling and circuitry repair, and use of related test and repair equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory, 1 in electronics (telemetry) for non-electrical engineering students (3/82).

NV-1715-0539

AN/AQM-18(V)1 Thru (V)5 Sonar Computer Recorder Group Test Central and AN/AQM-20 Computer Group Power Systems Test Set Intermediate Maintenance

Course Number: C-102-3111.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, Moffett Field, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 12/78–Present.

Objectives: To train aviation maintenance personnel in the operation, maintenance and repair of a sonar computer recorder group test central (AN/AQM-18(V)1 thru 5) and the computer group power system test set (AN/AQM-20) at the intermediate level.

Instruction: Lectures and practical exercises in the operation, maintenance and repair of a sonar computer recorder test set and its related computer group power system test set including circuit and signal flow analysis, individual subsystem analysis, fault isolation and repair procedures utilizing standard electronic equipment, and computer related automatic testing procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics maintenance procedures, 2 in electronics maintenance laboratory for non-electrical engineering students (3/82).

NV-1715-0540

AN/ASQ-56A Integrated Electronics Central and Related Systems Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Sanford, FL.

Length: 7 weeks (280 hours).

Exhibit Dates: 9/67–1/88.

Objectives: To train maintenance personnel to operate and maintain AN/ASQ-56A integrated electronic control systems.

Instruction: Lectures and practical exercises in AN/ASQ-56A electronic control equipment operation and maintenance, including UHF transmitters, receivers, amplifiers, servos, antennas, and controls; IFF/SIF systems; power supply operation; TACAN system operation and maintenance, AGC and video circuits; block-diagram and circuit analysis; and troubleshooting procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in electronic equipment, and credit in maintenance laboratory on the basis of institutional evaluation (4/74).

NV-1715-0541

Aviation Support Equipment Mobile Electric Power Plant Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Norfolk, VA; Air Maintenance Training Detachment, North Island, CA.

Length: 3 weeks (96 hours).

Exhibit Dates: 2/68–1/88.

Objectives: To train military personnel to maintain mobile electric power plants and control systems.

Instruction: Lectures and practical exercises in DC generator system, including maintenance publications, component repair, power system circuit analysis, and inspection and troubleshooting procedures; AC generator system, including power system circuit analysis, transformer-rectifier power supply, component repair, and inspection and troubleshooting procedures; and AC transistorized generator system, including control circuit components, circuit analysis, power supply, component repair, and inspection and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in power generator maintenance (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in power generator maintenance, and additional credit in power generator maintenance on the basis of institutional evaluation (4/74).

NV-1715-0542

RA-5C Semi-Automatic Test Equipment Air Data, Flight Reference, and Flight Control Intermediate Maintenance

Course Number: C-100-3743.

Location: Air Maintenance Training Detachment, Sanford, FL.

Length: 3 weeks (120 hours).

Exhibit Dates: 9/67–12/68.

Objectives: To train maintenance personnel to operate, calibrate, and maintain RA-5C semiautomatic air data, flight reference, and flight control equipment.

Instruction: Lectures in flight control test bench introduction, flight parameter simulator, pressure and vacuum group and flight parameter simulator testing, flight reference analyzers testing, flight control simulator and control panel test bench, control and guidance test set group introduction, and flight control analyzer testing.

Credit Recommendation: In the vocational certificate category, 2 semester hours in flight control and simulator (4/74).

NV-1715-0543

RA-5C Photo Systems Electronics

Course Number: Not available.

Location: Air Maintenance Training Detachment, Sanford, FL.

Length: 3 weeks (120 hours).

Exhibit Dates: 12/65–12/68.

Objectives: To provide maintenance personnel with training in basic electricity and electronics.

Instruction: Lectures and practical exercises in basic electricity, including Ohm's law, Simpson 260 multimeter operation, series and parallel circuits, relay principles, and schematic reading; basic electronics, including resistors, inductance, capacitance, electron tubes introduction, power supplies filtering and regulation, amplifiers, oscillators, and coupling and tuned circuits; and transistors, including junction transistors, basic transistor circuitry, semiconductors, circuits schematic tracing, special maintenance considerations, and test equipment.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in basic electricity and electronics, and additional credit in basic electricity or electronics on the basis of institutional evaluation (4/74).

NV-1715-0544

Communications Technician (M), Class A

Course Number: Not available.

Location: Naval School, Treasure Island, CA; Naval School, Great Lakes, IL.

Length: 28 weeks (980 hours).

Exhibit Dates: 7/62–12/68.

Objectives: To train enlisted personnel to maintain naval electronic equipment.

Instruction: Lectures and practical exercises in AC and DC fundamentals and analysis; oscilloscope applications; pulse techniques; microwave techniques and control equipment; and electronic devices, including tubes and solid state, communication transmitters and receivers, teletype terminal and single-sideband equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 16 semester hours in basic electricity or radio electronics; in the upper-division baccalaureate category, 6 semester hours in radio electronics and 1 in electricity (12/68).

NV-1715-0545

RADIAC Instrument Maintenance

Course Number: A-670-0020.

Location: Naval Schools Command, Treasure Island, CA.

Length: 4–5 weeks (180–190 hours).

Exhibit Dates: *Version 1:* 8/70–Present. *Version 2:* 1/66–7/70.

Objectives: To train enlisted personnel to operate and maintain RADIAC instruments.

Instruction: *All Versions:* Lectures and practical exercises in operation, maintenance, and repair of radiation related equipment, including dosage hazards; radiological monitoring and decontamination; basic nuclear physics; radiac computer indicator, detector, and calibrator maintenance; radioactive sources leak testing; atomic energy commission license requirements; electronics review; and standard test equipment operation.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in radiation equipment maintenance (11/81); in the lower-division baccalaureate/associate degree category, 2 semester hours in radiation equipment maintenance, and credit in physics laboratory on the basis of institutional evaluation (11/81); *Version 2:* in the lower-division baccalaureate/associate degree category, 1 semester hour in radiation equipment maintenance, and credit in physics laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0546

Automatic Telephones, Class C

Course Number: A-623-0014.

Location: Training Center, Great Lakes, IL.

Length: 11 weeks (385 hours).

Exhibit Dates: 1/72–1/75.

Objectives: To train interior communication electricians to operate, maintain, and repair automatic telephone systems.

Instruction: Lectures and practical exercises in automatic telephone system operation, maintenance, and repair, including troubleshooting line circuits, multilined systems installation and troubleshooting, telephone circuits, circuit tracing, wiring, line finder and finder controls analysis, connector trouble analysis and test set operation, various line dial telephone systems operation, power equipment, and switches and relays.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in telephone repair, installation, and maintenance, and additional credit in telephone repair, installation, and maintenance on the basis of institutional evaluation (4/74).

NV-1715-0547

RA-5C Semi-Automatic Test Equipment Bomb Director

Course Number: C-100-3742.

Location: Air Maintenance Training Detachment, Sanford, FL.

Length: 5 weeks (200 hours).

Exhibit Dates: 9/67–1/88.

Objectives: To train maintenance personnel to operate, service, maintain, and calibrate a bomb director test group and test set for guidance control systems.

Instruction: Lectures and practical exercises in bomb director test group equipment testing and operation, including digital signal simulator and navigation aids analysis, radar and TV test equipment introduction, navigational equipment testing, and bomb director test set operation and maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours in general equipment maintenance laboratory (4/74); in the lower-division baccalaureate/associate degree category, credit in general equipment maintenance on the basis of institutional evaluation (4/74).

NV-1715-0548

OA-3734/ASM-77 Ballistic Computer Test Console Intermediate Maintenance

Course Number: C-150-3767.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 7 weeks (280 hours).

Exhibit Dates: 3/73–1/88.

Objectives: To train maintenance personnel with knowledge of ballistics computer theory to maintain the ballistics computer test console at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of semiautomatic ballistics computer test consoles, including block-diagram analysis, testing programs, theory of operation, ARA testing, equipment timing controls, order and information registers, and special operating procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0549

F-4J AN/AJB-7 Loft Bomb Computer System and AN/ASN-70 Vertical Flight Reference System Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, El Toro, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 3/71–1/88.

Objectives: To train maintenance personnel with knowledge of transistors and miniature component repair to maintain and repair the loft bomb computer and vertical flight reference system of the F-4J aircraft.

Instruction: Lectures and practical exercises in the maintenance and repair of the loft bomb computer and the vertical flight reference system of the F-4J aircraft, including circuits and gyro control system and functional testing of components for the two systems.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (4/74).

NV-1715-0550

AN/AQS-13B Sonar Intermediate Maintenance

Course Number: C-130-3399.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, North Island, CA.

Length: 10 weeks (400 hours).

Exhibit Dates: 3/80–Present.

Objectives: To provide training for avionics personnel in the maintenance and repair of the AN/AQS-13B sonar detecting ranging set and of the AN/AQM-24 test control set.

Instruction: Lectures and practical exercises in the operation and maintenance of a sonar system and its related test set including familiarization with basic sonar operation, logic gates, decoders, block diagram analysis, power supplies and distribution, timer, data, mixers, CRT beam positioning, audio, and integrated circuit analysis and troubleshooting.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics maintenance laboratory (3/82); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics circuit analysis, 1 in electronics laboratory for non-electrical engineering students (3/82).

NV-1715-0551

Mk V Atmosphere Analyzers

Course Number: F-623-031.

Location: Submarine School, Groton, CT.

Length: 2 weeks (60 hours).

Exhibit Dates: 6/71–1/88.

Objectives: To train electricians and shipyard instrument technicians to operate, maintain, troubleshoot, and repair Mk V atmosphere analyzers.

Instruction: Lectures and practical exercises in the operation and maintenance of Mk V atmosphere analyzers, including equipment components and flow systems, the 3M System, theory of operation, electronic block diagrams, the strip chart recorder, and alignment and troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0552

F-4B/J Air Data Computer Set Intermediate Maintenance

Course Number: C-602-3810.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, El Toro, CA.

Length: 2–3 weeks (80–96 hours).

Exhibit Dates: 3/70–1/88.

Objectives: To provide maintenance personnel with knowledge of transistors and miniature component repair to maintain the air data computer set on the F-4B/J aircraft.

Instruction: Lectures and practical exercises in the maintenance of the air data computer set on the F-4B/J aircraft, including components and functional analysis of the computer compensator, test equipment, and component repair and calibration.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (4/74).

NV-1715-0553

AN/APN-130 Radar Navigation Set Intermediate Maintenance

Course Number: C-102-3032.

Location: Naval Air Station, North Island, CA; Air Maintenance Training Detachment, Ream Field, CA; Air Maintenance Training Detachment, Lakehurst, NJ; Air Maintenance Training Detachment, Key West, FL; Air Maintenance Training Detachment, Quonset Point, RI; Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 3–4 weeks (132–160 hours).

Exhibit Dates: 4/68–1/88.

Objectives: To train personnel to maintain the APN-130 radar navigational system at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of the APN-130 radar navigational system, including Doppler theory and system operation, power supply and test set operation, signal data converter (hover and navigate modes), modulation, summation circuits, and system alignment and troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0554

Electronics Technician (ET) Senior Conversion

Course Number: Not available.

Location: Electronics Technician, Class A School, Treasure Island, CA; Electricity and Electronics, Class P School, Great Lakes, IL; Electrician's Mate, Class A School, San Diego, CA; IC Electrician, Class A School, San Diego, CA.

Length: 48 weeks (1440 hours).

Exhibit Dates: 1/55–10/68.

Objectives: To train enlisted personnel to be electronics technicians.

Instruction: Lectures and practical exercises in AC and DC fundamentals; series-parallel circuits and machinery; vacuum tubes; power supplies; audio, video, RF, and magnetic amplifiers; transmitter, receiver, oscillator, and TRF circuits; sonar and radar equipment maintenance; Loran equipment maintenance; teletypewriter terminal equipment maintenance; and electronics administration.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, 6 semester hours in physics, 12 in engineering electronics (12/68).

NV-1715-0555

Aviation Antisubmarine Warfare (AASW) for Naval Flight Officers P3A/B(D)

Course Number: E-2D-066.

Location: Fleet Aviation Specialized Operational Training Group, Pacific, Moffett Field, CA.

Length: 7 weeks (245 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train flight officers in the techniques of airborne antisubmarine warfare (AASW).

Instruction: Lectures and practical exercises in the operation of airborne antisubmarine warfare equipment and in AASW tactics, including oceanography and underwater acoustics principles, electronic warfare tactics, and equipment capabilities, limitations, and applications to submarine force missions.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (4/74).

NV-1715-0556

Advanced First Term Avionics, Class A1
(Advanced First Term Avionics, Class B (AFTA))

Course Number: C-100-2010; C-111-2010.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: *Version 1:* 20–27 weeks (800 hours). *Version 2:* 26 weeks (1040 hours).

Exhibit Dates: *Version 1:* 1/76–3/89. *Version 2:* 11/69–12/75.

Objectives: To train graduates of avionics technician courses to troubleshoot, test, and maintain navigation and radar systems.

Instruction: *All Versions:* Lectures and practical exercises in simple DC and AC circuits, resonance, time constant, decibels, and ideal transistors; transistor theory, including biasing, load line analysis; equivalent circuits, RC, transformers, direct coupled amplifiers, feedback amplifiers, video amplifiers, and power amplifiers; power supplies, regulators, wave-shaping circuits, and oscillators; fundamentals of computer logic and systems, with emphasis on maintenance of equipment; microwave principles, including characteristics of transmission lines, wave-guides, cavities, antennas, microwave tubes and circuits; fundamentals of AM, FM, and SSB; and block diagrams and functional operation of navigation and radar systems, with emphasis on maintenance and repair. *Version 1:* Instruction includes a brief review of mathematics in the fundamentals of algebra, linear and quadratic equations, ratios, angles, trigonometric fundamentals, vectors, vector algebra and use of slide rules. Also offered is an introduction to solid state physics and semiconductors. *Version 2:* Instruction includes exercises in mathematics including fundamentals of algebra, linear and quadratic equations, ratios, angles, trigonometric fundamentals, vectors, vector algebra and the use of the slide rule. Also, there is an introduction to physics including theory of matter, heat, light, sound and cryogenics.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in AC circuits, 4 in active devices and circuits, 3 in computer principles and maintenance and 3 in communications systems (2/81). *Version 2:* In the vocational certificate category, 12 semester hours in mathematics and electronics (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronics (4/74); in the upper-division baccalaureate category, 3 semester hours in mathematics, 6 in engineering electronics (12/68).

NV-1715-0557

AN/SPS-40 Radar System
(Electronics Technician AN/SPS-40 Radar Set Maintenance)

Course Number: A-104-0040; A-104-0041.

Location: Service Schools Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 8 weeks (240 hours).

Exhibit Dates: 7/72–9/77.

Objectives: To train enlisted personnel to operate and maintain the AN/SPS-40 radar set and associated test equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/SPS-40 radar set and associated test equipment, including detailed operation and troubleshooting procedures for power, hydraulic, antenna, timing, frequency generation, transmitter, receiver, moving-target indicator, and video distribution subsystems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics (4/74); in the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation (4/74).

NV-1715-0558

RO-358/AQS-13A Multipurpose Recorder Intermediate Maintenance

Course Number: C-102-3401.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, North Island, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 5/79–Present.

Objectives: To train technicians in the intermediate maintenance of a multipurpose chart recorder (RO-358/AQS-13A) including theory, maintenance and troubleshooting.

Instruction: Lectures and practical exercises in the operation, maintenance and repair of a multipurpose chart recorder including the unregulated and regulated power supply description, stylus and chart drive circuits, performance standards, and alignment procedures. Laboratory includes troubleshooting defective equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic instrumentation or 1 in electronic troubleshooting laboratory for non-electrical engineering students (3/82).

NV-1715-0559

AN/ASQ-81(V) Magnetic Anomaly Detection Set Intermediate Maintenance

Course Number: C-102-3109.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, North Island, CA.

Length: 2 weeks (72 hours).

Exhibit Dates: 9/76-Present.

Objectives: To train maintenance personnel in the operation, troubleshooting and repair of a magnetic anomaly detection set (AN/ASQ-81(V)) at an intermediate level.

Instruction: Lectures and practical exercises in the operation, troubleshooting and intermediate repair of a magetic anomaly detection set (AN/ASQ-81(V)) including basic magnetic theory, troubleshooting procedures to the bad element level and block diagram analysis.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics maintenance laboratory (3/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical motor controls laboratory for non-electrical engineering students (3/82).

NV-1715-0560

Oxygen Generator Electrical Model 6L16 (Enlisted)

Course Number: F-623-029.

Location: Submarine School, Groton, CT.

Length: 5 weeks (150 hours).

Exhibit Dates: 4/68-1/88.

Objectives: To train enlisted personnel who have backgrounds in electronics and electricity, magnetic amplifiers, and transistor theory to maintain and operate the 6L16 electrolytic oxygen generator.

Instruction: Lectures and practical exercises in the operation and maintenance of the 6L16 electrolytic oxygen generator, including the electrolytic process of producing oxygen; flow system analysis; functions of electronic control system; hydraulic flow components; electrolytic cells; power supplies and troubleshooting; annunciators (contact and magnetic amplifier types); pressure controller system function (operation and analysis); calibration; and troubleshooting and test procedures.

Credit Recommendation: In the vocational certificate category, credit in electronics laboratory or technical elective on the basis of institutional evaluation (4/74).

NV-1715-0561

S-2D/E AQA-4(V) Indicator Group System Intermediate Maintenance

Course Number: C-102-3617; C-102-135.

Location: Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 3 weeks (120 hours).

Exhibit Dates: 6/66-1/88.

Objectives: To train maintenance personnel to operate, test, and maintain the AN/AQA-4(V) indicator group system.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/AQA-4(V) indicator group system, including circuit analysis of the lofar chain, the reference signal generator, the codar chain, and power supplies; overall and subsystem block-diagram analysis; and troubleshooting and repair procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0562

RF-4B AN/ASQ-88 RT-736 and KY-531 Flight Director

Course Number: C-102-195.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/70-1/88.

Objectives: To train maintenance personnel to service and maintain the TACAN portion of AN/ASQ-88 CNI systems and flight director groups.

Instruction: Lectures and practical exercises in the functional analysis of transceivers, pulse decoders, and flight director computers, with emphasis on troubleshooting and servicing procedures. This course is highly specialized and has limited educational value.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0563

AN/APX-64(V) IFF Transponder Set Intermediate Maintenance

Course Number: C-102-3065.

Location: Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, Cp. Pendleton, CA; Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Santa Ana, CA; Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Meridian, MS.

Length: 3 weeks (120 hours).

Exhibit Dates: 4/68-1/88.

Objectives: To train electronic maintenance personnel to maintain, service, troubleshoot, and align AN/APX-64(V) IFF transponder sets.

Instruction: Lectures and practical exercises in basic IFF characteristics, block-diagram analysis, detailed logic and circuit theory, and maintenance and operating procedures for IFF transponders.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0564

Meteorological/Oceanographic Equipment Maintenance, Class C

Course Number: Not available.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 17 weeks (680 hours).

Exhibit Dates: 5/68-1/88.

Objectives: To train aviation and electronics technicians to operate and maintain meteorological and oceanographic equipment.

Instruction: Lectures and practical exercises in atom and electron theory; semiconductors, diodes, and transistors; amplifiers, bias and bias stabilization; practical transistor amplifiers; sine wave oscillators; switching, gating, and pulse circuits; weather radar operation and troubleshooting; facsimile transmission theory, operation, and troubleshooting; weathervision TV cameras, transmitters, receivers, and video monitors; sound systems and relays; upper-air sounding equipment, sensors, transducers, transmitters, and receivers analysis and troubleshooting; transmissometer and RVR converter; and oceanographic elements, thermometric devices, bathythermographs, and buoys.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics and electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics and electrical laboratory (4/74).

NV-1715-0565

1. Electricity, Electronics and Hydraulics Class AP
2. Electricity, Electronics and Hydraulics, Class P (E, E & H. Class P)

Course Number: A-041-0012.

Location: Service Schools Command, Great Lakes, IL.

Length: *Version 1:* 9 weeks (360 hours). *Version 2:* 14 weeks (420 hours).

Exhibit Dates: *Version 1:* 8/81-Present. *Version 2:* 2/68-1/74.

Objectives: To provide enlisted personnel with basic training in the maintenance of missile-launching and gun systems.

Instruction: *Version 1:* Lectures and practical exercises in the theory and practice of AC/DC motors and generators; solid state power supplies; number systems, logic gates, digital arithmetic and circuits, counters, registers; synchro servos and hydraulic controls. *Version 2:* Lectures and practical exercises in hydraulics, AC and DC circuits, synchro-servo systems, basic electronics, magnetic amplifiers, and circuit analysis.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in electromechanical controls, 2 in digital logic (1/82). *Version 2:* In the vocational certificate category, 15 semester hours in electricity and electronics (4/74); in the upper-division baccalaureate category, 3 semester hours in electricity and electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0566

Electronics Maintenance Course Interrogator Set AN/TPX-42A(V) 5, Class C

Course Number: C-103-2028.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN; Air Technical Training Center, Glynco, GA.

Length: 14-19 weeks (560 hours).

Exhibit Dates: 3/73-5/79.

Objectives: To train electronics technicians who have had previous training in number systems, Boolean algebra, digital fundamentals, and solid-state theory to maintain an AN/TPX-42(V) type 5 radar system installation and to use associated test equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of AN/TPX-42(V) type 5 radar system installations and the use of associated test equipment, including review of transistor theory, integrated circuits, basic logic elements, gates, adders, multivibrators, flip-flops, counters, multiplexers, shift registers, AC and DC conversion devices, interrogator set alignment and trouble analysis; and test equipment, interference blanker, video signal processor, indicator data processor, and indicator assembly, components, operation, and trouble analysis.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics maintenance and repair, 1 in digital logic (2/81).

NV-1715-0567

AN/AQA-7(V)6/7 Sonar Computer Recorder Group Difference Data Intermediate Maintenance

Course Number: C-130-3571.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, Moffett Field, CA.

Length: 5 weeks (240 hours).

Exhibit Dates: 3/80–Present.

Objectives: To train experienced technicians in the maintenance and repair of a particular piece of anti-submarine warfare equipment at the intermediate level.

Instruction: Instruction and practical exercises in the operation, troubleshooting and repair of a particular piece of anti-submarine warfare equipment (AN/AQA-7(V)6/7) including differences from other versions of the equipment, built-in test procedures, circuit analysis and fault isolation, power supply repair, signal flow analysis and computer fault isolation and repair.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in digital system maintenance, 2 in electronics laboratory for non-electrical engineering students (3/82).

NV-1715-0568

QH-50C Weapons System Intermediate Electronics Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Dam Neck, VA; Air Maintenance Training Detachment, North Island, CA.

Length: 8 weeks (320 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel to maintain Dash weapon systems and to use special support equipment.

Instruction: Lectures and practical exercises in maintenance and troubleshooting procedures for target control systems and QH-50C drone avionic systems, and use of standard and special support equipment. The course is extremely specialized and has very little technical information.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical and electronics laboratory (4/74).

NV-1715-0569

Advanced Naval Flight Officer Training, Airborne Electronic Warfare Phase

Course Number: Not available.

Location: Naval Air Station, Corpus Christi, TX.

Length: 8–9 weeks (146–160 hours).

Exhibit Dates: 3/73–1/88.

Objectives: To provide officers with basic knowledge and skills prerequisite to operational training in electronic warfare replacement training squadrons.

Instruction: Lectures and practical exercises in basic electronics theory, electronic support measures, electronic countermeasures operator techniques, planning and analysis procedures, and electronic warfare evaluation procedures. The material presented in this course is at a very basic survey level.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0570

Basic Point Defense Officer

Course Number: A-2F-0035.

Location: Guided Missiles School, Mare Island, CA.

Length: 3 weeks (105 hours).

Exhibit Dates: 1/70–1/88.

Objectives: To train junior officers to perform and supervise the maintenance of the basic point defense surface missile system.

Instruction: Lectures and practical exercises in the maintenance and maintenance management of the basic point defense surface missile system, including block diagrams, module and component identification, the 3M system, planned maintenance system, specific missile equipment, ancillary equipment and fire control system, launching system, tactical operations, alignment and adjustments, and electromagnetic interference and support.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0571

Strike Armament Intermediate Maintenance Repair

Course Number: C-646-3118.

Location: Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, North Island, CA.

Length: 8 weeks (299 hours).

Exhibit Dates: 3/73–Present.

Objectives: To train enlisted personnel to inspect, test, assemble and repair aviation armament equipment.

Instruction: Lectures and practical exercises in the inspection, testing, and repair of assembly aviation armament equipment (VA-VF type), including the 3M system, operation of airborne missile launchers, suspension and releasing equipment analysis, rocket and flare dispensers, specific aircraft gun components and operation, and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/85).

NV-1715-0572

Tartar Officer Advanced
(Tartar Weapons Officer)

Course Number: A-2F-0037.

Location: Guided Missiles School, Dam Neck, VA.

Length: 4–6 weeks (160–179 hours).

Exhibit Dates: 10/72–Present.

Objectives: To train officers with previous gunnery experience to operate and maintain missile equipment on DDG-2 ships.

Instruction: Lectures and practical exercises in the operation and maintenance of missile equipment on the DDG-2 ships, including Tartar overview, search radar, specific radar equipment, cooling and dry air systems, system interface, target detection and identification, selection and tracking, controls and indicators for the master control panel, target evaluation, air ready mode, designation modes, FCS acquisition-to-track sequences, specific track modes, launching system, firing circuits, data flow, logistics, and administration procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/89).

NV-1715-0573

Strategic Weapons System (SWS) Command Polaris
(SSBN Command Weapons System Orientation—Polaris)

Course Number: A-2F-0023.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Guided Missiles School, Dam Neck, VA.

Length: 7 weeks (230–245 hours).

Exhibit Dates: 11/72–12/80.

Objectives: To train officers with submarine experience to operate the fleet ballistic weapons system.

Instruction: Lectures and practical exercises in the operation of fleet ballistic weapons systems, using a block diagram approach and includes principles of digital computers, data transmission systems and inertial instruments, operation and administration of subsystem equipment, tactical applications, weapons subsystem equipment, and re-entry system.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (9/77).

NV-1715-0574

Missile Technician Polaris
(Missile Technician Polaris, 598/608 Class)
(Missile Technician, Class C (1), Polaris)
(MTC1 Polaris Missile Technician Maintenance, Class C)

Course Number: A-121-0249; A-121-0016.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Guided Missiles School, Dam Neck, VA.

Length: 21–22 weeks (770–834 hours).

Exhibit Dates: 1/64–12/80.

Objectives: To study the theory of operation, fault isolation, and to make repairs on a Polaris missile system.

Instruction: A study of the operation and schematic analysis of a missile system including circuit and logic diagrams for control, sequential operations, displays, alarms, and power supplies; environmental systems using pneumatic displays, electronic monitoring equipment and electrical controls utilizing relay logic. Perform fault isolation, make adjustments, calibrate, troubleshoot, and repair missile systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in electronics technology (9/77).

NV-1715-0575

Missile Launcher Mk 21 Mod 2 Theory and Operation

Course Number: F-633-013.

Location: Submarine School, Groton, CT.

Length: 2 weeks (60 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To provide fleet ballistic missile officers and enlisted personnel with advanced refresher training in theory and operation of Polaris launching systems.

Instruction: Lectures and practical exercises in operation, capabilities and limitations, and systematic evaluation of problems for the Mk 21 Mod 2 Polaris launching systems, components, and support systems.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0576

Poseidon Missile Technician Conversion (A-2/A-3 to C-3)

Course Number: A-121-0139.

Location: Naval Guided Missiles School, Dam Neck, VA.

Length: *Version 1:* 12 weeks (400 hours). *Version 2:* 13 weeks (446 hours).

Exhibit Dates: *Version 1:* 11/83-Present. *Version 2:* 11/72-10/83.

Objectives: To train Polaris missile technicians to maintain and test Poseidon missiles.

Instruction: *Version 1:* Lectures and laboratory exercises in the maintenance and repair of the Poseidon including a review of hydraulic, pneumatic, electro mechanical and hydraulic launch and support systems. The Poseidon missile and its accompanying computer is studied in-depth with troubleshooting down to the module level. *Version 2:* Lectures and laboratories in flight control systems, Poseidon missile launching systems, fire control systems, Poseidon guidance computers, inertial components, temperature-monitoring and control groups, missile test and readiness equipment, electronic counters, electronic voltmeters, oscilloscopes, and digital computer fundamentals.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in hydraulics (11/83); in the lower-division baccalaureate/associate degree category, 2 semester hours in electro mechanical maintenance, 3 in computer/control systems troubleshooting (11/83). *Version 2:* In the vocational certificate category, 4 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (4/74).

NV-1715-0577

SSBN Mk 84 Polaris Weapons Officer

Course Number: A-2F-0034.

Location: Guided Missiles School, Dam Neck, VA.

Length: 10 weeks (350 hours).

Exhibit Dates: 2/72-1/88.

Objectives: To familiarize officers with the capabilities and limitations of fleet ballistic missile system equipment.

Instruction: Lectures and practical exercises in capabilities, functions, and principles of operation of the subsystems and components of fleet ballistic missile systems.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0578

Sonar Technician Class A-2 (Intermediate Electronics)

Course Number: J-130-052; K-130-559.

Location: Fleet Anti-Submarine Warfare School, Key West, FL; San Diego, CA.

Length: 14 weeks (420 hours).

Exhibit Dates: 6/68-2/79.

Objectives: To provide enlisted personnel with a basic review of mathematics and electricity, and advanced training in DC and AC circuit theory, electronics, and servos.

Instruction: Lectures and practical exercises in basic mathematics and electricity; AC circuit theory, including inductance, capacitance, and resonance; electronics, including vacuum tubes, transistors, amplifiers, oscillators, and servos; and digital and analog computer fundamentals.

Credit Recommendation: In the vocational certificate category, 16 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics (4/74).

NV-1715-0579

RA-5C AN/ASB-12 Bomb Directing Set Organizational Maintenance

Course Number: C-111-3743.

Location: Air Maintenance Training Detachment, Albany, GA.

Length: 7 weeks (280 hours).

Exhibit Dates: 3/70-1/88.

Objectives: To train maintenance personnel to operate and maintain AN/ASB-12 bomb-directing sets.

Instruction: Lectures and practical exercises in bombing computer systems, television systems, and system testing.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics, 1 in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics (4/74).

NV-1715-0580

Sonar Technician Class A-1 (Basic Electronics)

Course Number: K-130-560.

Location: Fleet Anti-Submarine Warfare School, San Diego, CA.

Length: 10 weeks (300 hours).

Exhibit Dates: 6/68-3/75.

Objectives: To provide enlisted personnel with training in basic electrical and electronic fundamentals.

Instruction: Lectures and practical exercises in basic AC and DC electrical fundamentals and circuit theory; basic electronics, including vacuum tubes, power supplies, synchros, and servos; use of common hand tools; basic motors; and electronic maintenance procedures. Note: This evaluation is based only on 4 weeks of the 10-week course; the remaining 6 weeks are apparently classified for military security reasons.

Credit Recommendation: In the vocational certificate category, 5 semester hours in electricity and electronics and additional credit on the basis of institutional evaluation (see Note above) (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity and electronics and additional credit on the basis of institutional evaluation (see Note above) (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (see Note above) (4/74).

NV-1715-0581

IOIC Electronic Data Processing Maintenance

Course Number: D-150-010.

Location: Reconnaissance Attack Squadron Three, Albany, GA.

Length: 19 weeks (760 hours).

Exhibit Dates: 1/69-1/88.

Objectives: To train data systems technicians to troubleshoot and repair electronic data processing equipment.

Instruction: Lectures and practical exercises in Integrated Operational Intelligence Center (IOIC) systems cross-training; operation and maintenance of magnetic tape processors, interface equipment, digital computers, and high-speed line printers; and use of test equipment for troubleshooting and repair.

Credit Recommendation: In the vocational certificate category, 6 semester hours in computer electronics, 2 in computer electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer electronics, 1 in computer electronics laboratory (4/74).

NV-1715-0582

AN/ASA-47 Doppler/Airmass Navigational Computer System Intermediate Maintenance

Course Number: C-102-3554.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 2-3 weeks (80-120 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train fleet maintenance personnel to maintain the AN/ASA-47 Doppler air mass navigational computer system.

Instruction: Lectures and practical exercises in the maintenance of the AN/ASA-47 Doppler air mass navigational computer system, including circuit analysis of components (position indicator, computer, and latitude-longitude indicator), operation of special support equipment, and alignment procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics, 1 in electronics laboratory (4/74).

NV-1715-0583

AN/APN-182(V) Radar Navigational Set Intermediate Maintenance

Course Number: C-102-3398.

Location: *Version 1:* Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, Imperial Beach, CA. *Version 2:* Air Maintenance Training Detachment, Quonset Point, RI.

Length: *Version 1:* 4 weeks (160 hours). *Version 2:* 6 weeks (240 hours).

Exhibit Dates: *Version 1:* 10/74-Present. *Version 2:* 2/73-9/74.

Objectives: To train maintenance personnel to maintain the AN/APN-182(V) radar navigation set at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of the AN/APN-182(V) radar navigation set, including a brief discussion of Doppler theory, logic circuits, digital circuits, integrated circuits, specific equipment component breakdown, test set operation, power supply and receiver transmitter unit, clock circuits and tracker, digital scaler, summing amplifiers, demodulator, function board, and troubleshooting and alignment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in radar electronics (3/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in digital electronics, 1 in electronics theory for nonelectrical engineering majors (3/82). *Version 2:* In the vocational certificate category, 6 semester hours in electronics, 2 in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics; 3 in electronics laboratory (4/74).

NV-1715-0584

AN/APN-154(V) Radar Beacon Intermediate Maintenance

Course Number: C-102-3031.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, El Toro, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 2/72–Present.

Objectives: To train maintenance personnel to maintain the AN/APN-154(V) radar beacon at the intermediate level and to use associated test equipment.

Instruction: Lectures and practical exercises in the maintenance of the AN/APN-154(V) radar beacon and the use of associated test equipment, including controls and indicators, block diagrams and signal flow, component characteristics, electrical characteristics, and alignment and troubleshooting techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in aviation electronic instrumentation laboratory for non-electrical engineering majors (3/82).

NV-1715-0585

Mk 88 Mod 1 Fire Control Technician Conversion (Mk 80 & 84 to Mk 88)

Course Number: A-121-0137.

Location: Guided Missiles School, Dam Neck, VA.

Length: 16 weeks (490 hours).

Exhibit Dates: 10/72–11/83.

Objectives: To train fire control system technicians to operate and maintain the Mk 88 fire control system and associated nontactical equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of the Mk 88 fire control system and associated nontactical equipment, including system components; weapon system orientation (Poseidon missile operation, circuit analysis, guidance computer, inertial guidance components, power distribution, launching system, and data flow interface); digital geoballistic computer arithmetic, memory, program control, input/output devices, and loading; digital transmitter-receiver core memory and list processor; magnetic disk file memory and programming, and the subsystems of the Mk 88 system.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics, 2 in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics, 1 in electronics laboratory (4/74).

NV-1715-0586

Mk 152 Computer and Peripheral Equipment/Common Core

Course Number: A-150-0083; A-150-0084.

Location: Guided Missiles School, Mare Island, CA; Guided Missiles School, Dam Neck, VA.

Length: 12 weeks (324 hours).

Exhibit Dates: 6/71–12/78.

Objectives: To train fire control technicians to operate, adjust, and maintain the Mk 152 computer and peripheral equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of the Mk 152 computer and peripheral equipment, including block diagram of computer complex, review of computer number systems, manual operation, instruction word analysis and operation, computer logic operations, sequence analysis, control instruction analysis, logical and arithmetic instruction analysis, and diagnostic routines for the specific computer equipment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in computer electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer electronics, 1 in computer electronics laboratory (4/74).

NV-1715-0587

Gyrocompass Technician Electrical, Class C1

(Electrical Gyrocompass Operation Maintenance Technician, Class C)

(Gyrocompass Technician—Electrical, Class C)

Course Number: *Version 1:* A-670-0021. *Version 2:* A-670-021.

Location: Interior Communications Class C School, Great Lakes, IL.

Length: *Version 1:* 9 weeks (253–270 hours). *Version 2:* 12 weeks (320 hours).

Exhibit Dates: *Version 1:* 11/72–1/88. *Version 2:* 1/68–10/72.

Objectives: To train communications electricians to operate and repair Mk 23 and Mk 19 gyrocompasses.

Instruction: *All Versions:* Lectures and practical exercises in the operation and maintenance of Mk 23 and Mk 19 gyrocompasses, including theory of operation, special test equipment, electrical checks, servo and follow-up loop adjustment, AC and DC power supplies, various circuits, auxiliary operating modes, and various component and subsystem analyses. *Version 2:* Includes corrective maintenance procedures and tender systems tests.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in electromechanical systems and 2 in electromechanical laboratory (9/77). *Version 2:* In the vocational certificate category, 6 semester hours in electronics, 2 in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics, 1 in electronics laboratory (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0588

AN/BST-1 Tender Maintenance

Course Number: F-623-035.

Location: Submarine School, Groton, CT.

Length: 2 weeks (60 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To train communications electricians or electronics technicians to maintain and operate the AN/BST-1 system.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/BST-1 system, including system power supplies, special transistors, launch control subsystem circuitry and arming, monitor circuits, signal unit, launch control test set, detonator resistance and electrical cable test set, pressure switch test set, buoy subsystem, electrical control system, programmer and associated test set, transmitters, handling and rigging procedures, and voltage regulator for the subsystem.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical laboratory (4/74).

NV-1715-0589

Air Launched Weapons Guided Missile Intermediate Maintenance

Course Number: C-122-3111.

Location: Air Maintenance Training Detachment, Mayport, FL; Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, North Island, CA.

Length: 2-4 weeks (80–160 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To train maintenance personnel to operate and maintain air-launched guided missiles.

Instruction: Lectures and practical exercises in the operation and maintenance of air-launched guided missiles, including operation, testing, and components of specific air-to-air and air-to-surface guided missiles.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/85).

NV-1715-0590

Electronics Technician, AN/SRN-14, Omega Receiver Maintenance, Class C

Course Number: A-102-0088.

Location: Electronics Technician Class C School, Norfolk, VA.

Length: 5 weeks (200 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train enlisted personnel to operate and maintain AN/SRN-14 Omega receiving sets.

Instruction: Lectures and laboratories in the operation, maintenance, and repair of Omega receivers; system circuit analysis; and use of tools and test equipment.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electrical equipment maintenance (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical equipment maintenance on the basis of institutional evaluation (4/74).

NV-1715-0591

AN/APX-72 Radar Identification System Intermediate Maintenance

Course Number: Not available.

Location: *All Versions:* Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Santa Ana, CA; Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL. *Version 1:* Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Cherry Point, NC. *Version 2:* Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Quonset Point, RI; Air Maintenance Training Detachment, Imperial Beach, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: *Version 1:* 9/74-Present. *Version 2:* 10/68-8/74.

Objectives: To train maintenance personnel to maintain, repair and test the AN/APX-72 radar identification systems to the component level.

Instruction: *All Versions:* Lectures and practical exercises in block-diagram analysis of radar identification systems, and use of prescribed test equipment in troubleshooting, repairing, bench testing, and aligning radar identification systems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in basic radar theory and operations (7/81). *Version 2:* In the vocational certificate category, 2 semester hours in electronic equipment maintenance (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronic equipment maintenance on the basis of institutional evaluation (4/74).

NV-1715-0592

QH-50D OPERATIONAL TELEMETRY MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Dam Neck, VA.

Length: 9 weeks (360 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train electronics technicians who have experience in Dash weapons systems maintenance to maintain and service Dash operational telemetry systems.

Instruction: Lectures and practical exercises in the block-diagram analysis, circuit operational analysis, systems maintenance, and repair of QH-50D telemetry systems.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronic systems maintenance (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronic systems maintenance on the basis of institutional evaluation (4/74).

NV-1715-0593

1. RADARMAN, CLASS B, OPERATIONAL PHASE
2. RADARMAN, CLASS B, MAINTENANCE PHASE

(Radarman, Class B)

Course Number: *Version 1:* A-221-012. *Version 2:* Not available.

Location: Fleet Anti-Air Warfare Training Center, San Diego, CA; Naval Schools Command, Treasure Island, CA.

Length: *Version 1:* 9 weeks (264 hours). *Version 2:* 33-42 weeks (1350 hours).

Exhibit Dates: *Version 1:* 3/69-1/88. *Version 2:* 1/56-2/69.

Objectives: To train radarmen to operate Combat Information Centers and to train CIC personnel to analyze radar circuit operation and repair equipment.

Instruction: *Version 1:* Lectures and practical exercises in the operation of Combat Information Centers and training of CIC personnel, including electronic warfare principles, navigation and plotting, communications procedures, naval tactics, and training methods. *Version 2:* Lectures and practical exercises in radar circuit operation and equipment repair, including basic electricity and electronics, radar system components, overall system functions, field maintenance, and maintenance supervision.

Credit Recommendation: *Version 1:* Credit is not recommended because of the military-specific nature of the course (4/74). *Version 2:* In the vocational certificate category, 3 semester hours in basic electricity, 7 in radio/electronics, 2 in equipment maintenance (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electricity, 9 in radio/electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity, 7 in radio or electronics (4/74).

NV-1715-0594

F-4J AN/AWG-10 TRANSMITTER AND ANTENNA POSITIONING INTERMEDIATE MAINTENANCE

Course Number: C-602-3817.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Oceana, VA.

Length: 6 weeks (240 hours).

Exhibit Dates: 9/69-1/88.

Objectives: To train maintenance personnel familiar with AN/AWG-10 equipment and component repair to maintain, at the intermediate level, transmitter and antenna-positioning portions of the AN/AWG-10 missile control system.

Instruction: Lectures and practical exercises in the maintenance of transmitter and antenna-positioning portions of the AN/AWG-10 missile control system, including block-diagram and circuit analysis of specialized radar equipment, power supplies, pulse circuitry, timing, antenna control and scan pattern generator, velocity signal computer and antenna servo, antenna operation, and troubleshooting techniques.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronic systems maintenance (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electronic systems maintenance on the basis of institutional evaluation (4/74).

NV-1715-0595

RADIOMAN, CLASS A

Course Number: *Version 1:* A-201-0014; A-202-0014. *Version 2:* A-201-013; A-201-014; A-202-014. *Version 3:* Not available. *Version 4:* Not available.

Location: Service School Command, San Diego, CA; Service School Command, Bainbridge, MD.

Length: *Version 1:* Self-paced 8 weeks (284 hours). *Version 2:* 14 weeks (560 hours). *Version 3:* 14 weeks (412 hours). *Version 4:* 24 weeks (720 hours).

Exhibit Dates: *Version 1:* 1/81-Present. *Version 2:* 7/72-12/80. *Version 3:* 1/67-6/72. *Version 4:* 8/56-12/66.

Objectives: To train enlisted personnel as radio communications operators.

Instruction: *Version 1:* Self paced instruction and practical exercises in the operation of teletypewriter equipment and procedures, message processing, security procedures and operation of specific communications equipment. *Version 2:* Lectures and practical exercises in the operation of radio communications systems, including teletypewriter equipment and procedures, radio principles, message processing, circuit drill and operation, receivers and transmitters, security procedures and operation of specific communications equipment. The course also includes maintenance procedures, ancillary equipment, emergency communications. *Version 3:* Lectures and practical exercises in the operation of radio communications systems including teletypewriter equipment and procedures, radio principles, message processing, circuit drill and operation, receivers and transmitters, security procedures, and operation of specific communications equipment. The course also includes voice circuits and voice relay equipment, basic frequency theory, block diagrams, telegraph use, administration, and function of teletypewriter units and associated equipment. *Version 4:* Lectures and practical exercises in the operation of radio communications systems, including teletypewriter equipment and procedures, radio principles, message processing, circuit drill and operation, receivers and transmitters, security procedures and operation of specific communications equipment. The course also includes sound power and radiotelephone procedures, basic electricity and electronics, block diagrams, telegraph use, function of teletypewriter units and associated equipment, test equipment and adjustment, equipment components, and preventive and operational maintenance procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in typing (5/82). *Version 2:* In the vocational certificate category, 2 semester hours in radio operation (4/74). *Version 3:* In the vocational certificate category, 2 semester hours in electrical laboratory (4/74). *Version 4:* In the vocational certificate category, 4 semester hours in electricity or electronics, 2 in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68), and credit in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electricity or electronics on the basis of institutional evaluation (4/74).

NV-1715-0596

A-6 AN/APQ-92 SEARCH RADAR AND ASSOCIATED TEST EQUIPMENT INTERMEDIATE MAINTENANCE

Course Number: *Version 1:* C-111-3761. *Version 2:* Not available. *Version 3:* Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: *Version 1:* 13 weeks (520 hours). *Version 2:* 12 weeks (480 hours). *Version 3:* 8 weeks (320 hours).

Exhibit Dates: *Version 1:* 9/71-1/88. *Version 2:* 1/70-8/71. *Version 3:* 2/68-12/69.

Objectives: To train enlisted personnel to operate, troubleshoot, and maintain the AN/APQ-92 search radar and associated test console.

Instruction: *All Versions:* Lectures and practical exercises in the operation, troubleshooting, and maintenance of the AN/APQ-92 search radar and associated test console, including various radar displays, block-diagram analysis, components, and assembly of the electrical synchronizer, transmission chain circuits, servo electronics unit, antenna/receiver, and related circuits. *Version 1:* Includes control signals, additional circuit analyses, bombardier/navigator control box operation, video processor, and terrain clearance equipment. *Version 2:* Includes control signals, additional circuit analyses, bombardier/navigator control box operation, video processor, and terrain clearance equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 7 semester hours in electrical equipment maintenance laboratory (4/74); in the lower-division baccalaureate/associate degree category, 7 semester hours in electrical equipment maintenance laboratory on the basis of institutional evaluation (4/74). *Version 2:* In the vocational certificate category, 6 semester hours in electrical equipment maintenance laboratory (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electrical equipment maintenance laboratory on the basis of institutional evaluation (4/74). *Version 3:* In the vocational certificate category, 4 semester hours in electrical equipment maintenance laboratory (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electrical equipment maintenance laboratory on the basis of institutional evaluation (4/74).

NV-1715-0597

Terrier Radar Set AN/SPG-55B Mod 5
(Fleet Input)

Course Number: A-104-0143; A-104-0144.

Location: Guided Missiles School, Dam Neck, VA; Combat Systems Technical School Command, Mare Island, CA.

Length: 19 weeks (651-690 hours).

Exhibit Dates: 11/72-12/76.

Objectives: To train fire control technicians to operate, maintain, and repair AN/SPG-55B Mod 5 radar set.

Instruction: Lectures and practical exercises in the operation, maintenance, and repair of AN/SPG-55B Mod 5 radar set, including use of electronic testing equipment (oscilloscopes, multimeters, and signal generators). Terrier weapons system description, various modes of operation, power supplies, synchronizer, timing circuits, electronic countermeasures, various circuit analyses, frequency monitoring, operation of various channels, range and beacon tracking, alignment and systems tests, and radiation and monitoring information.

Credit Recommendation: In the vocational certificate category, 10 semester hours in electronic equipment usage (4/74); in the lower-division baccalaureate/associate degree category, credit in electronic maintenance equipment usage on the basis of institutional evaluation (4/74).

NV-1715-0598

Tradevman, Class C7
(Tradevman School, Class B)

Course Number: *Version 1:* C-191-2011. *Version 2:* Not available. *Version 3:* Not available. *Version 4:* Not available. *Version 5:* Not available.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: *Version 1:* 28 weeks (1120 hours). *Version 2:* 21-22 weeks (850-874 hours). *Version 3:* 23 weeks (920 hours). *Version 4:* 35 weeks (1412 hours). *Version 5:* 35-36 weeks (1416-1440 hours).

Exhibit Dates: *Version 1:* 9/80-12/84. *Version 2:* 6/72-8/80. *Version 3:* 10/71-5/72. *Version 4:* 7/68-9/71. *Version 5:* 5/56-6/68.

Objectives: To train tradevmen to operate and maintain training equipment.

Instruction: *All Versions:* Lectures and practical experience in mathematics, basic electricity, amplifiers, power supplies, test equipment, video tape recorders, avionics physics, digital computer circuits, programming, device simulation, air conditioning, and closed-circuit television operation and maintenance. *Version 4:* Instruction includes communications circuits and analog computers. *Version 5:* Instruction includes communications circuits and analog computers.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in electronics devices and systems, 3 in digital principles, 2 in CCTV systems and 2 in physics (mechanics) (2/81); in the upper-division baccalaureate category, 4 semester hours in digital computer fundamentals (2/81). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in basic mathematics, 1 in television principles (4/74); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, 3 in introduction to digital computers, 2 in computer laboratory, and 2 in electrical laboratory, all on the basis of institutional evaluation (4/74). *Version 3:* In the lower-division baccalaureate/associate degree category, 1 semester hour in basic mathematics on the basis of institutional evaluation, 2 in television principles on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, 3 in introduction to digital computers, 2 in computer laboratory, and 2 in electrical laboratory, all on the basis of institutional evaluation (4/74). *Version 4:* In the lower-division baccalaureate/associate degree category, 1 semester hour in basic mathematics on the basis of institutional evaluation, 2 in television principles on the basis of institutional evaluation, and (4/74); in the upper-division baccalaureate category, 3 semester hours in basic electricity, 3 in electronics, 3 in receiver and transmitter circuitry, 3 in introduction to analog computers, 3 in introduction to digital computers, and 2 in electrical laboratory, all on the basis of institutional evaluation (4/74). *Version 5:* In the vocational certificate category, 1 semester hour in basic mathematics, 2 in television principles (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in basic electricity, 5 in electronics, 3 in receiver and transmitter circuits, 2 in introduction to digital computers, 1 in introduction to analog computers, and 2 in electrical laboratory, all on the basis of institutional evaluation (4/74).

NV-1715-0599

Airborne Early Warning/Electronics
Countermeasures Evaluator,
Class O

Course Number: Not available.

Location: Air Technical Training Center, Glynco, GA.

Length: 7 weeks (272 hours).

Exhibit Dates: 10/65-12/68.

Objectives: To train junior line officers to operate airborne early warning and electronic countermeasures equipment.

Instruction: Lectures and practical exercises in the operation of airborne early warning and electronic countermeasures equipment, including associated electronics equipment components and operation, signal evaluation, airborne navigation fundamentals, communications, control, weather and reporting, early warning tactics, and radar navigation fundamentals.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (4/74).

NV-1715-0600

P-3 PB-20N Automatic Flight Control
System Maintenance, No. 13

Course Number: Not available.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 3 weeks (104 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train electrical maintenance personnel familiar with P-3 aircraft systems to maintain and operate the PB20N automatic flight control system.

Instruction: Lectures and practical exercises in the maintenance and operation of the PB20N automatic flight control system as installed in the P-3 aircraft, including system components, power supply and monitor, hydraulic booster assembly, trim circuits, gyro systems, controls, amplifier and computer, signal chain and channel, test sets, and troubleshooting techniques.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics, 1 in electronics laboratory (4/74).

NV-1715-0601

RA-5C Flight Control and Electrical
Systems Electronics
Intermediate Maintenance

Course Number: C-602-3750; C-602-223.

Location: Air Maintenance Training Detachment, Albany, GA.

Length: 2 weeks (80 hours).

Exhibit Dates: 9/69-1/88.

Objectives: To train maintenance personnel who have experience on transistorized equipment and RA-5C flight control systems to operate and test the electronic equipment in the flight control and electrical systems of RA-5C aircraft.

Instruction: Lectures and practical exercises in the operation and testing of the electronic equipment in the flight control and electrical systems of RA-5C aircraft, including system electronics; various amplifier, balancer, and compensator components and operations; and electrical systems electronics maintenance and operation.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical laboratory (4/74).

NV-1715-0602

Talos Gunner's (Missile) Handling

Course Number: Not available.

Location: Naval Schools Command, Mare Island, CA.

Length: 3 weeks (90 hours).

Exhibit Dates: 2/68-12/78.

Objectives: To train gunner's mates to assemble, disassemble, and replace modules of the Talos guided missile and to test and service the missile using specialized equipment.

Instruction: Lectures and practical exercises in the assembly, disassembly, and replacement of modules and the testing and servicing of Talos guided missiles, including aerodynamics, input power and major assemblies of test equipment, receiving and pretest inspection, preventive maintenance, and component handling.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical laboratory (4/74).

NV-1715-0603

Terrier/Tartar Gunner's Mate

Course Number: Not available.

Location: Guided Missiles School, Dam Neck, VA; Naval Schools Command, Mare Island, CA.

Length: 3 weeks (90 hours).

Exhibit Dates: 2/68-12/75.

Objectives: To train gunner's mates to maintain and repair Terrier and Tartar guided missile test equipment.

Instruction: Lectures and practical exercises in the maintenance and repair of Terrier and Tartar guided missiles, including assembly, disassembly, and replacement of faulty modules; hydraulic fill, bleeding, and testing; internal configuration and block diagrams; containers; special tools; test set operation; flight sequences; ordnance components of homing missiles and beam-riding missiles; and beam-riding and homing principles.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0604

Poseidon Missile Technician

Course Number: A-121-0138.

Location: Guided Missiles School, Dam Neck, VA.

Length: 18 weeks (557 hours).

Exhibit Dates: 11/72-6/76.

Objectives: To train graduates of the Polaris Electronics School to perform as Poseidon missile technicians.

Instruction: Lectures and practical exercises in the operation and maintenance of Poseidon missile equipment, including ballistic missile flight, capabilities and limitations, missile construction, symbology, propulsion system, ordnance system, power generation and distribution, missile flight sequence, instrumentation, missile testing and results analysis, missile transfer equipment and procedures, external test equipment and simulators, individual package testing, special-purpose digital computers, and radiation and detection equipment.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (4/74).

NV-1715-0605

Terrier Weapons

Course Number: A-2F-0039.

Location: Guided Missiles School, Dam Neck, VA.

Length: 6 weeks (192 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train officers who are graduates of Naval Gunnery School and who possess previous weapons/gunnery department experience to operate and maintain Terrier weapons systems on DLG-16 class ships.

Instruction: Lectures and practical exercises in the operation and maintenance of the Terrier weapons systems equipment on DLG-16 class ships, including weapons control, guided missile fire control system, search radar, missiles, guided missile launching systems, weapon system maintenance, flight analysis and system testing.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0606

Strategic Weapons System (SWS)
Weapons Officer Polaris
(Mk 80 Weapons Officer)

Course Number: A-2F-0022.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Guided Missiles School, Dam Neck, VA.

Length: 8-10 weeks (248-350 hours).

Exhibit Dates: 1/70-12/83.

Objectives: To train officers to supervise the operation and maintenance of fleet ballistic missiles.

Instruction: Topics cover terms, abbreviations, symbols, and diagrams used in electronics, servo systems, gyros, digital systems, and the physics of motion, light and fluids. Major emphasis is on practical exercises in the operation and maintenance of fleet ballistic missiles on 598 or 608 class SSBN submarines, including functional aspects of specific systems and subsystems, and emphasizing data flow, control and indications, switching, patching, casualty recognition, and readiness testing; and operation and monitoring of various system components and devices.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical laboratory (9/77).

NV-1715-0607

Missile Technician Mk 84 Polaris (A-3)

Course Number: A-121-017.

Location: Guided Missiles School, Dam Neck, VA.

Length: 23 weeks (967 hours).

Exhibit Dates: 11/72-11/83.

Objectives: To train enlisted personnel to operate, test, and maintain missile equipment on Polaris FBM submarines.

Instruction: Lectures and practical exercises in the operation, testing, and maintenance of missile equipment on Polaris FBM submarines, including weapons system orientation, Polaris missile components, electrical subsystem, guidance subsystem characteristics and circuitry, guidance computer, timing, telemetry, fire control interface and timing, missile test and readiness equipment, specific module operation test set equipment, and radiation and detection equipment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical laboratory (4/74).

NV-1715-0608

Talos Officers
(Talos Weapons/Fire Control/Missile Battery)

Course Number: A-2F-0013.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 6/72-12/78.

Objectives: To train junior officers to supervise the maintenance of the Talos weapons system.

Instruction: Lectures and practical exercises in the maintenance and maintenance management of the Talos weapons system, including Talos system operation, search radar introduction, weapon direction system; specific equipment components; transmitter and microwave; receivers and ranging circuits; servos; associated computer equipment and logic introduction; launching system; Talos missile flight termination, propulsion, hydraulic, electrical, control, steering-intelligence, and anti-ship systems; target processing; telemetry; flight analysis; and system testing.

Credit Recommendation: In the vocational certificate category, 3 semester hours in missiles (4/74).

NV-1715-0609

Optical Landing Systems
Maintenance, Class C

Course Number: C-670-2010.

Location: Technical Training Center, Lakehurst, NJ; Air Technical Training Unit, Philadelphia, PA.

Length: 6 weeks (240 hours).

Exhibit Dates: 4/66-1/88.

Objectives: To train communications electricians to troubleshoot and maintain the Fresnel Lens Optical Landing System Mk 6 Mod 1 and the manually operated visual landing aid system Mk I Mod 1, 2, and 3, or Mk II.

Instruction: Lectures and practical exercises in the troubleshooting and maintenance of the Fresnel Lens Optical Landing System Mk 6 Mod 1 and the manually operated visual landing aid system Mk I Mod 1, 2, and 3, or Mk II, including electrical and solid-state devices, component identification, test equipment, indicator assembly stabilization, stabilization control equipment, reference lighting circuits, and lighting assembly.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, credit in electricity or electronics on the basis of institutional evaluation (4/74).

NV-1715-0610

UH-2C, HH-2C, HH-2D Automatic
Stabilization Equipment
Intermediate Maintenance
(UH-2C Automatic Stabilization Equipment Intermediate Maintenance)

Course Number: C-602-3388.

Location: Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 2-4 weeks (72-160 hours).

Exhibit Dates: 12/68-1/88.

Objectives: To train maintenance personnel to test, maintain, and repair automatic stabilization equipment in UH-2C, HH-2C, and HH-2D helicopters.

Instruction: Lectures and practical exercises in the testing, maintenance, and repair of automatic stabilization equipment in UH-2C, HH-2C, and HH-2D helicopters, including operation of power supply circuitry, synchronization loop, amplifier-demodulator circuitry, roll channel, test sets, sensor unit, vertical gyro, accelerometer, actuators, and pitch, yaw, and collective channels.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0611

F-4J AN/AWG-10 Antenna Control
and Missile Control
Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, El Toro, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 8/68-1/88.

Objectives: To train maintenance personnel familiar with miniature component repair and AN/AWG-10 equipment to maintain the antenna control and missile control portions of the AN/AWG-10 missile control system.

Instruction: Lectures and practical exercises in the maintenance of the antenna control and missile control portions of the AN/AWG-10 missile control system, including antenna control operation, scan pattern generator operation, velocity signal computer and antenna servo operation, specific missile auxiliary signal generator equipment analysis, missile drive tuners, launch signal and pilot command signal computers, circuits, and alignment and malfunction isolation procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0612

F-4J COMMUNICATION, NAVIGATION, IDENTIFICATION (CNI) ORGANIZATIONAL MAINTENANCE

Course Number: C-102-3815.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/73-1/88.

Objectives: To train maintenance personnel to operate and maintain the F-4J CNI systems.

Instruction: Lectures and practical exercises in the operation and maintenance of the F-4J CNI systems, including compact wire bundle identification, communication equipment components, UHF communication and intercommunication systems, TACAN navigational set, navigational computer, radar altimeter, IFF transponder set, air-to-air identification, dar beacon, data link and instrument landing systems analysis, and check-out and trouble analysis.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0613

F/RF-4B/J AUTOMATIC FLIGHT CONTROL SYSTEMS INTERMEDIATE MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/71-1/88.

Objectives: To train maintenance personnel who have completed courses in transistor and digital fundamentals to maintain the automatic flight control systems of the F-4B aircraft.

Instruction: Lectures and practical exercises in the maintenance of the automatic flight control systems of the F-4B aircraft (with and without data link), including component functions, surface control and flight control systems, block-diagram analysis, power supply and switching circuits, signal circuit analysis, automatic pilot coupler analysis, and test equipment operation and components.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (4/74).

NV-1715-0614

RF-4B INERTIAL NAVIGATION SYSTEM ORGANIZATIONAL MAINTENANCE

Course Number: C-102-3838.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train maintenance personnel who have completed courses in digital and transistor fundamentals to operate and troubleshoot the AN/ASN-46A and the AN/ASN-74 inertial navigation systems.

Instruction: Lectures and practical exercises in the operation and troubleshooting of the AN/ASN-46A and the AN/ASN-74 inertial navigation systems, including navigational principles, terms and vectors; heading, attitude, and cockpit displays, block-diagram analysis, synchros, Boolean algebra, gyroscope principles, logic circuits, accelerometers and integrators, and alignment and testing procedures.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (4/74).

NV-1715-0615

A-4C/E BOMBING SYSTEM AN/AJB-3 AND REMOTE STANDBY ATTITUDE INDICATOR

Course Number: C-602-0057.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Beaufort, SC.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train maintenance personnel who have completed courses in transistor fundamentals and A-4 systems to operate and maintain the AN/AJB-3 and remote-standby, attitude-indicator systems.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/AJB-3 and remote-standby, attitude-indicator systems, including displacement gyro, compass adapter, bomb release computer, all-attitude indicator, and associated components of specific equipment; power supply and system analysis; and alignment and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical laboratory (4/74).

NV-1715-0616

SH-3A AUTOMATIC STABILIZATION EQUIPMENT MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Ream Field, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 5 weeks (200 hours).

Exhibit Dates: 3/68-1/88.

Objectives: To train maintenance personnel to maintain the SH-3A helicopter's automatic stabilization equipment at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of the SH-3A helicopter's automatic stabilization equipment, including flight theory, stabilization problems, system functions, circuit analysis of control channels, test equipment, and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (4/74).

NV-1715-0617

A-7 AN/ASW-26/30 AUTOMATIC FLIGHT CONTROL SYSTEM INTERMEDIATE MAINTENANCE

Course Number: C-602-3782; C-602-162.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: 2 weeks (64 hours).

Exhibit Dates: *Version 1:* 1/81-Present. *Version 2:* 9/68-12/80.

Objectives: To train fleet maintenance personnel who have backgrounds in A-7 aircraft systems to operate, test, troubleshoot and maintain specific automatic flight control systems equipment at the intermediate level.

Instruction: *All Versions:* Lectures and practical exercises in the operation, testing, troubleshooting, and maintenance of the AN/ASW-26 and AN/ASW-30 automatic flight control systems, including component theory, various module analyses, circuit analysis, modes of operation, yaw stabilization and control augmentation, trim theory, and specific component testing procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in autopilot electronics maintenance (3/82). *Version 2:* In the vocational certificate category, 2 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (4/74).

NV-1715-0618

GUNNER'S MATE CLASS C ROCKET LAUNCHER MK 108

Course Number: Not available.

Location: Service Schools Command, Great Lakes, IL.

Length: 8 weeks (240 hours).

Exhibit Dates: 2/68-6/75.

Objectives: To train gunner's mates to operate, maintain, and repair the Mk 108 rocket launcher and associated components and support equipment.

Instruction: Lectures and practical exercises in the operation, maintenance, and repair of the Mk 108 rocket launcher and associated components and support equipment, including electrical control circuits, synchros, amplifiers, hydraulic control systems, launcher power drives, assembly and disassembly procedures, and test equipment.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0619

Sparrow III, Sidewinder, Shrike and Walleye Guided Missile Test Equipment (CVA/CVS) Intermediate Maintenance

Course Number: C-122-3109.

Location: Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, North Island, CA.

Length: 7 weeks (280 hours).

Exhibit Dates: 2/73-1/88.

Objectives: To train enlisted personnel to operate, calibrate, and maintain air-launched guided missile test equipment at the intermediate level.

Instruction: Lectures and practical exercises in the operation, calibration, and maintenance of air-launched guided missile test equipment, including principles of modulation, Doppler principles, and Sparrow III, Sidewinder, Shrike, and Walleye block-diagram analysis, data flow, test set operation and components, circuits, signal generation, electronic theory, power supplies, and detailed calibration procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronic laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronic laboratory (4/74).

NV-1715-0620

Gunner's Mate Class C Guided Missile Launching System (GMLS)

Course Number: Not available.

Location: Service Schools Command, Great Lakes, IL.

Length: 24 weeks (620 hours).

Exhibit Dates: 2/68-1/88.

Objectives: To train gunner's mates to operate, maintain, and repair missile-launching systems.

Instruction: Lectures and practical exercises in the operation, maintenance, and repair of missile-launching systems, including configuration, characteristics, and performance of guided missiles; electrical and servo system input and output; power drive, testing of magnetic and electronic amplifiers, synchro servo systems, and hydraulic mechanical components; power supplies; electronic and hydraulic circuits; AC and DC amplifiers; oscilloscopes; modulator and demodulator units; fire-fighting equipment operation; and maintenance management.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0621

SH-3 Automatic Stabilization Equipment Intermediate Maintenance

Course Number: C-602-3398.

Location: Air Maintenance Training Detachment, Imperial Beach, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 5-6 weeks (200-240 hours).

Exhibit Dates: 5/68-9/81.

Objectives: To train maintenance personnel to maintain the SH-3 helicopter's automatic stabilization equipment at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of the SH-3 helicopter's automatic stabilization equipment, including flight theory, controls, hydraulic systems and servos, pitch channel and vertical gyro operation, various signal paths and circuits, modulators and demodulators, monitor panel, test set operation, yaw channel familiarization, collective channel operation, cyclic coupler system components, and troubleshooting and test procedures.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (4/74).

NV-1715-0622

Talos Guided Missile and Guided Missile Test Set Maintenance

Course Number: Not available.

Location: Guided Missiles School, Dam Neck, VA; Naval Schools Command, Mare Island, CA.

Length: 23 weeks (690 hours).

Exhibit Dates: 2/68-12/78.

Objectives: To train enlisted personnel to test and maintain Talos guided missiles, and to operate and maintain associated test sets and equipment.

Instruction: Lectures and practical exercises in the testing and maintenance of Talos guided missiles, and in the operation and maintenance of associated test sets and equipment, including description of the electrical, control, steering intelligence, mid-course guidance, terminal guidance and airborne flight evaluation systems; components and operation of specific guided missile test sets and fuze test equipment; and components of specific combined-unit telemeter ground stations and the Talos weapon systems.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0623

Launcher Technician Mk 88 Fire Control Conversion

Course Number: A-633-0015.

Location: Guided Missiles School, Dam Neck, VA.

Length: 2 weeks (63 hours).

Exhibit Dates: 1/70-5/76.

Objectives: To train enlisted personnel who have had training on the Polaris missile-launching system to operate and maintain mechanical and electrical subsystems of the Poseidon missile-launching systems.

Instruction: Lectures and practical exercises in the operation and maintenance of mechanical and electrical subsystems of Poseidon missile-launching systems, including principles of inertial guidance and flight control, warhead configuration, and deployment, principles of hydraulics and pneumatics, repair of the launch tube, missile ejector group and missile suspension system components; dissassembly and assembly of gas piston-operated pneumatic valves, advanced theory of specific valves, detailed logic and analysis of the solid-state integrated circuitry, and troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0624

Gunnery Officers (Relative Rate)

Course Number: J-2E-101.

Location: Fleet Anti-Air Warfare Training Center, Dam Neck, VA.

Length: 2 weeks (70 hours).

Exhibit Dates: 5/72-1/88.

Objectives: To train junior officers from ships with specific gun mount and relative rate fire control systems to perform as gunnery officers.

Instruction: Lectures and practical exercises in fundamentals of gunnery, including target designation and acquisition, ammunition, magazines, small arms, target tracking, velocity computations, fire control principles, and alignment and repair of various systems and equipment.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74).

NV-1715-0625

Gunnery Officers—Weapons Department Officers

Course Number: J-2E-0100, J-2E-1002.

Location: Fleet Anti-Air Warfare Training Center, Dam Neck, VA.

Length: 4 weeks (140 hours).

Exhibit Dates: 5/72-1/88.

Objectives: To train junior officers to perform as gunnery or fire control division officers.

Instruction: Lectures and practical exercises in the fundamentals of gunnery, including anti-air warfare and fire control principles, ammunition, ballistics, magazines, administrative procedures, small arms, gunfire analysis, target tracking, missile systems, and operation repair, and alignment of specific equipment.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74).

NV-1715-0626

Gunner's Mate Class C ASROC Launching Group

Course Number: Not available.

Location: Service Schools Command, Great Lakes, IL.

Length: 15 weeks (450 hours).

Exhibit Dates: 2/68-1/88.

Objectives: To train gunner's mates to operate, maintain, and repair advanced rocket-launching systems.

Instruction: Lectures and practical exercises in the operation, maintenance, and repair of advanced rocket-launching systems, including power supplies, electronic and hydraulic systems, control circuitry, launching machinery construction and operation, testing and monitoring of signal inputs, management procedures, and logistics.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0627

AN/ARW-77 Bullpup Guidance Control System

Course Number: Not available.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 7/69–1/88.

Objectives: To train maintenance personnel who have backgrounds in transistor fundamentals to maintain and operate the AN/ARW-77 Bullpup transmitter.

Instruction: Lectures and practical exercises in the maintenance and operation of the AN/ARW-77 Bullpup transmitter, including operational analysis, circuit analysis and block diagrams of the transmitter, amplifiers, control units, generator and mixer and command board, and testing, alignment, and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (4/74).

NV-1715-0628

AN/DPM-7 Sparrow III Guided Missile Test Equipment Intermediate Maintenance

(Sparrow III Missile Test Equipment Maintenance Training-Depot Test Equipment of the AN/DPM-7)

Course Number: Not available.

Location: Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, Miramar, CA.

Length: 4–5 weeks (160–200 hours).

Exhibit Dates: 7/67–1/88.

Objectives: To train enlisted personnel to troubleshoot and maintain the Sparrow III missile and associated test equipment.

Instruction: Lectures and practical exercises in the troubleshooting and maintenance of the Sparrow III missile and the calibration and maintenance of associated test equipment, including check-out procedures, missile and test set, components, subassemblies, data flow, power supply block analyses, and test set repair procedures.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (4/74).

NV-1715-0629

Class A Aviation Guided Missileman

Course Number: Not available.

Location: Aviation Guided Missileman School, Memphis, TN.

Length: *Version 1:* 27 weeks (1080 hours). *Version 2:* 24 weeks (960 hours).

Exhibit Dates: *Version 1:* 7/58–12/68. *Version 2:* 1/57–6/58.

Objectives: To teach enlisted personnel basic electronics and operation of electronic test equipment, and to train them to operate air-launched guided missiles.

Instruction: *All Versions:* Lectures and practical exercises in electronics fundamentals and operation of electronic test equipment, including AC and DC principles, radar electronics fundamentals, transmitter theory, transistors, amplifiers, vacuum tubes, various circuits, and receiver theory. *Version 1:* Includes receiver alignment and troubleshooting and antenna systems. *Version 2:* Includes gyros, synchros, and servos; guided missile components; and missile system testing.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics, 3 in electronic circuits (12/68). *Version 2:* In the vocational certificate category, 8 semester hours in electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics, 2 in electronic circuits (12/68).

NV-1715-0630

ASROC Missile Assembly and Maintenance

Course Number: K-121-1021.

Location: Fleet Anti-Submarine Warfare School, San Diego, CA.

Length: 2 weeks (70 hours).

Exhibit Dates: 8/72–6/87.

Objectives: To train weapons and torpedo officers and designated strikers to assemble and maintain the Asroc missile.

Instruction: Lectures and practical exercises in the assembly and maintenance of the ASROC missile, including system components, testing, packaging, and safety, and specific-equipment test, repair, and maintenance.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0631

A-4 Armament System Organizational Maintenance

Course Number: C-646-3716.

Location: Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Beaufort, SC.

Length: 2 weeks (74 hours).

Exhibit Dates: 2/73–1/88.

Objectives: To train maintenance personnel with knowledge of the A-4 series aircraft and aviation or munitions fundamentals to maintain and operate the A-4 armament system.

Instruction: Lectures and practical exercises in the operation and maintenance of the A-4 armament system, including basic control analysis, alternate controls, gun control system, circuit analysis, fuze-arming system components, missile system components and launcher and tester, special weapons, and suspension and accessory equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (4/74).

NV-1715-0632

F-4B/J Armament, Missile and Weapons Control System Organizational Maintenance

(F-4B/J Armament, Missile and Weapons Control System Maintenance)

Course Number: C-646-3806.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel with knowledge of electrical fundamentals to operate and maintain armament, missile, and weapon control systems equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of armament, missile, and weapon control systems equipment, including F-4B/J equipment, configuration, and control panels; specific guided missile launcher equipment circuitry, test sets, and operation; wing missile pylon operation; centerline system and wing fuel tank pylon operation and components, fuze function control system, multiple weapons system electrical operation, and miscellaneous systems and test sets.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0633

QH-50D Weapons System Electronic Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Dam Neck, VA; Air Maintenance Training Detachment, North Island, CA.

Length: 6–8 weeks (200–320 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel to maintain the DASH weapons system electronic system.

Instruction: Lectures and practical exercises in DASH avionics system maintenance and troubleshooting procedures, including radio receiver and decoder functional analysis; automatic flight control system power distribution, gyroscope theory, directional gyroscope operation, barometric altimeter, and circuitry; radio receiving set organizational maintenance, flight control test set maintenance, and special support equipment maintenance; and functional check-out and system troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical laboratory (4/74).

NV-1715-0635

Airborne Radar Intercept Operator

Course Number: Not available.

Location: Air Technical Training Center, Glynco, GA.

Length: 9–10 weeks (352–392 hours).

Exhibit Dates: 10/65–1/88.

Objectives: To train enlisted personnel to perform as airborne radar intercept operators.

Instruction: Lectures and practical exercises in airborne radar intercept operations, including communications and navigation equipment, flight line procedures, survival equipment, jet operation, general aircraft systems, meteorology, cruise control, approaches, computer-based solutions, navigation procedures, voice procedures, intercept procedures and tactics, radar fundamentals, path analysis, and Sidewinder intercepts.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0636

CONALOG II Maintenance (SPERRY)

Course Number: A-623-0033; F-623-027.

Location: Submarine School, Groton, CT.

Length: 5 weeks (200 hours).

Exhibit Dates: 3/67–1/88.

Objectives: To train enlisted personnel to operate and maintain the submarine pictorial display and control system (CONALOG).

Instruction: Lectures and practical exercises in the operation and maintenance of the submarine pictorial display and control system, including functional block analysis, data flow within systems, power supplies, and test set and associated testing procedures for the specific equipment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0637

S-2D/E AN/ARN-52(V) NAVIGATIONAL TACAN MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Key West, FL.

Length: 3 weeks (120 hours).

Exhibit Dates: 9/66-12/68.

Objectives: To train enlisted personnel who have had training in basic transistors to operate and maintain the AN/ARN-52 navigational TACAN.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/ARN-52 navigational TACAN, including theory of operation, power supply, analysis of various circuits, and block-diagram analysis for range- and bearing-measuring circuitry.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0638

1. ELECTRONICS TECHNICIAN, CLASS A, PHASE SEIR (SHIPBOARD EQUIPMENT INDOCTRINATION, RADAR)
2. ELECTRONICS TECHNICIAN, CLASS C, SHIPBOARD EQUIPMENT INDOCTRINATION (RADAR)

Course Number: *Version 1:* A-104-0012. *Version 2:* A-104-012; A-104-013.

Location: Service School Command, Treasure Island, CA; Service School Command, Great Lakes, IL.

Length: *Version 1:* 8 weeks (290 hours). *Version 2:* 12 weeks (472 hours).

Exhibit Dates: *Version 1:* 7/74-9/77. *Version 2:* 4/68-6/74.

Objectives: To train graduates of basic electronics courses to operate, maintain, and repair electronic equipment in shipboard radar systems.

Instruction: Lectures and practical exercises in the operation, maintenance, and repair of electronic equipment in shipboard radar systems, including basic theory of radar repeaters and identification systems, repair and replacement of modular assemblies, logical troubleshooting procedures, and operation and analysis of various components in specific indicator group equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electronics laboratory (9/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (9/77). *Version 2:* In the vocational certificate category, 3 semester hours in electrical laboratory (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0639

1. ELECTRONICS TECHNICIAN, CLASS A, PHASE SEIN (SHIPBOARD EQUIPMENT INDOCTRINATION, COMMUNICATIONS)
2. ELECTRONICS TECHNICIAN, CLASS C SHIPBOARD EQUIPMENT INDOCTRINATION (COMMUNICATIONS)

Course Number: A-102-0012; A-102-012; A-102-013.

Location: Service School Command, Treasure Island, CA; Service School Command, Great Lakes, IL.

Length: *Version 1:* 8 weeks (250 hours). *Version 2:* 12 weeks (357 hours).

Exhibit Dates: *Version 1:* 7/74-9/77. *Version 2:* 3/68-6/74.

Objectives: To train electronics technicians to operate, maintain, and repair shipboard electronics communications equipment.

Instruction: Lectures and practical exercises in the operation, maintenance, and repair of shipboard electronics communications equipment, including principles and operation of transmitters, oscillators, and antennas; circuit diagrams for major components; transceiver and telegraph terminal equipment; telecommunications fundamentals; controls; and testing and installation procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in communications equipment (9/77); in the lower-division baccalaureate/associate degree category, 2 semester hours in communications laboratory (9/77). *Version 2:* In the vocational certificate category, 6 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical laboratory, and additional credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0640

1. P-3C SENSOR STATION THREE (RADAR/DISPLAY)TECHNICIAN ORGANIZATION MAINTENANCE
2. P-3C SENSOR STATION THREE (RADAR/DISPLAY TECHNICIAN) ORGANIZATIONAL MAINTENANCE
3. P-3C SENSOR STATION THREE (RADAR/DISPLAYS) INTEGRATED SYSTEM ORGANIZATIONAL MAINTENANCE

Course Number: C-102-3593.

Location: Naval Air Maintenance Training, Jacksonville, FL; Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: *Version 1:* 7 weeks (280 hours). *Version 2:* 12 weeks (480 hours). *Version 3:* 9 weeks (360 hours).

Exhibit Dates: *Version 1:* 8/79-Present. *Version 2:* 11/72-7/79. *Version 3:* 1/72-10/72.

Objectives: To train fleet maintenance personnel to operate and maintain the P-3C Sensor Station Three radar/display systems at the block diagram level.

Instruction: *All Versions:* Lectures and practical exercises in the operation and maintenance of P-3C Sensor Station Three radar/display systems, including specific equipment components, block diagrams, trouble analysis, and adjustment; radar and IFF systems and a magnetic anomaly detection system. *Version 1:* Includes functions of logic units for specific display equipment and infrared detection. *Version 2:* Includes functions of logic units for specific display equipment and a low-light-level television system.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electronic equipment maintenance (7/81). *Version 2:* In the vocational certificate category, 8 semester hours in electronic equipment maintenance on the basis of institutional evaluation (4/74). *Version 3:* In the vocational certificate category, 6 semester hours in electronic equipment maintenance on the basis of institutional evaluation (4/74).

NV-1715-0641

S-2D/E AVIONICS SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: C-602-3611.

Location: Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: 3/71-1/88.

Objectives: To train maintenance personnel to maintain S-2D/E avionics systems.

Instruction: Lectures and practical exercises in the maintenance of S-2D/E avionics systems, including block diagrams of various electronic systems, use of specialized test equipment, intercommunications equipment operation and troubleshooting, IFF equipment, Doppler navigation equipment operation, and components and testing of specific subsystems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronic systems maintenance (4/74).

NV-1715-0642

SUBMARINE INTERIOR COMMUNICATIONS (IC) SYSTEMS

Course Number: F-623-016.

Location: Submarine School, Groton, CT.

Length: 4 weeks (120 hours).

Exhibit Dates: 2/68-1/88.

Objectives: To train submarine personnel to operate and maintain shipboard communications systems and associated equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of shipboard communications systems and associated equipment, including theory of operation, component parts, introductory mathematics, basic electricity and electronics, transformer theory, and analysis of motor-generator controls, ship speed monitors, hydrogen detectors, synchro systems, announcing systems, and talkback and electrical control systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electricity (4/74).

NV-1715-0643

1. RADARMAN, CLASS A
2. CLASS A RADARMAN SCHOOL (OPERATIONAL COURSE)

Course Number: Not available.

Location: Naval Schools Command, Treasure Island, CA.

Length: *Version 1:* 20 weeks (600 hours). *Version 2:* 12 weeks (480 hours).

Exhibit Dates: *Version 1:* 9/58-12/68. *Version 2:* 10/56-8/58.

Objectives: To train enlisted personnel to perform as on-board radar repairmen.

Instruction: *All Versions:* Lectures and practical exercises in the functions of on-board radar repairmen, including operation and maintenance procedures for specific radar equipment, air and surface search and height-finding radar sets and associated remote repeaters, air plotting and maneuvering, tactics and radar navigation, communications equipment, and test sets. *Version 1:* Includes basic electricity and electronics and special radar circuits. *Version 2:* Includes countermeasures equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in electricity or electronics, 5 in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68). *Version 2:* In the lower-division baccalaureate/associate degree category, 5 semester hours in electricity or electronics on the basis of institutional evaluation (4/74).

NV-1715-0644

F/RF-8 Shoehorn Organizational Maintenance

Course Number: C-102-3851.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 3–4 weeks (100–160 hours).

Exhibit Dates: 6/71–1/88.

Objectives: To train fleet maintenance personnel to operate and maintain a Shoehorn electronic countermeasures system.

Instruction: Lectures and practical exercises in the operation and maintenance of a Shoehorn electronic countermeasures system, including basic principles of sound, logic, and radar; introduction to electronic countermeasures; Shoehorn system and component block diagram and locations; peripheral equipment; testing procedures; and hard line and connector repair.

Credit Recommendation: In the vocational certificate category, 1 semester hour in equipment maintenance on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, credit in equipment maintenance on the basis of institutional evaluation (4/74).

NV-1715-0645

AN/SPA-62 Countermeasures Receiving Group, Class C

Course Number: A-104-025.

Location: Electronics Technician, Class C School, Treasure Island, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 10/68–1/88.

Objectives: To train personnel with prior technical training in the operation, maintenance, and repair of the AN/SPA-62 countermeasures receiving group.

Instruction: Lectures and practical exercises on the operation, maintenance, and repair of the AN/SPA-62 countermeasures receiving group, including maintenance and material management, special circuits and semiconductor devices used in the AN/SPA-62, system block diagram, operating procedures, printed circuit board repair techniques, radar set modifications, receiver, trigger and gate generator, normal and ECCM video realignment, power supplies, and control monitor.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronic maintenance techniques (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronic maintenance techniques on the basis of institutional evaluation (4/74).

NV-1715-0646

Intermediate Aviation Fire Control Technician, Class B

Course Number: Not available.

Location: Air Technical Training Center, Memphis, TN.

Length: 34 weeks (1360 hours).

Exhibit Dates: 4/59–12/68.

Objectives: To provide aviation fire control technicians with supplemental training in electronics maintenance.

Instruction: Lectures and practical exercises in the intermediate maintenance of aviation fire control equipment, including electricity and mathematics, principles of electronics, advanced electronics, and essentials of fire control; supervisory training; and supply procedures.

Credit Recommendation: In the vocational certificate category, 5 in electronic circuits, 1 in analog computers, 1 in digital computers, 4 in electronics laboratory, 1 in maintenance supervision, and 1 in maintenance coordination (4/74); in the lower-division baccalaureate/associate degree category, 15 semester hours in engineering electronics (12/68); in the upper-division baccalaureate category, 4 semester hours in basic electric circuits, 5 in electronic circuits on the basis of institutional evaluation, 1 in analog computers on the basis of institutional evaluation, 1 in digital computers on the basis of institutional evaluation, 2 in electronic laboratory on the basis of institutional evaluation, credit in maintenance supervision on the basis of institutional evaluation, and, for non-science majors, 1 in maintenance coordination (4/74).

NV-1715-0647

Class A Guided Missileman

Course Number: Not available.

Location: Guided Missiles School, Dam Neck, VA.

Length: 24 weeks (725 hours).

Exhibit Dates: 6/59–12/68.

Objectives: To train personnel to perform as junior guided missilemen.

Instruction: Lectures and practical exercises on the basic electronics and circuits of guided missiles, including magnetic amplifiers, oscillators, transmitters, transmission lines, TRF receivers, superheterodyne receiver, transistors, radar special circuits, and principles of guided missiles and nuclear weapons.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics or electricity, 2 in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronics or electricity (12/68); in the upper-division baccalaureate category, 1 semester hour as an elective in electronics or electricity, 1 in electrical laboratory (4/74).

NV-1715-0648

Aviation Ordnanceman, Class A

Course Number: C-646-2010.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN; Air Technical Training Center, Jacksonville, FL.

Length: *Version 1:* 8–10 weeks (257–400 hours). *Version 2:* 9 weeks (297 hours). *Version 3:* 13–18 weeks (505–720 hours).

Exhibit Dates: *Version 1:* 1/78–9/88. *Version 2:* 6/74–12/77. *Version 3:* 5/63–5/74.

Objectives: To train enlisted personnel to perform as aviation ordnancemen.

Instruction: For this course after 9/88 see NV-1715-1437. *All Versions:* Lectures and practical exercises in the functions of aviation ordnancemen, including aircraft ordnance and electrical armament circuits, assembly and disassembly of guided missiles, aircraft machine gun and small arms repair, ammunition handling, pyrotechnics, underwater munitions and special weapons, ordnance administration, and test units for specific equipment. *Version 2:* Instruction includes elementary algebra and mathematics, physics, electrical and electronic fundamentals. *Version 3:* Instruction includes elementary algebra and mathematics, physics, electrical and electronic fundamentals.

Credit Recommendation: *Version 1:* Credit is not recommended due to the limited, specialized nature of the course (2/81). *Version 2:* In the vocational certificate category, 1 semester hour in mathematics (6/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity (6/75). *Version 3:* In the vocational certificate category, 8 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (4/74); in the upper-division baccalaureate category, credit in electricity or electronics on the basis of institutional evaluation (4/74).

NV-1715-0649

Terrier Weapon Direction System Mk 3 (DE Mk 9)

Course Number: Not available.

Location: Service Schools Command, Great Lakes, IL.

Length: 20 weeks (600 hours).

Exhibit Dates: 2/68–12/75.

Objectives: To train enlisted personnel to maintain and repair weapons direction systems.

Instruction: Lectures and practical exercises in the maintenance and repair of weapons direction systems, including Terrier weapon system fundamentals; analysis of weapons direction systems, including power supplies, simulating system, sweep generation and deflection, video and tracking systems, symbol generation and display, target evaluation, director-channel switching, designation data converting system, weapons assignment, and casualty analysis; and related computer and systems equipment.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics, 1 in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour as an elective in electronics (4/74).

NV-1715-0651

Communications Technician (M) Class A

Course Number: None.

Location: Naval School, Treasure Island, CA; Naval School, Great Lakes, IL.

Length: 38 weeks (1330 hours).

Exhibit Dates: 7/62–12/68.

Objectives: To train enlisted personnel to maintain naval electronic communications and radar equipment.

Instruction: Lectures and practical exercises in naval electronic communications and radar equipment maintenance, including AC and DC fundamentals and analysis, oscilloscope applications, pulse techniques, microwave techniques and control equipment, electronic devices operation, and radar equipment fundamentals.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 22 semester hours in physics (electricity) and engineering electronics and additional credit based on examination or on institutional evaluation (4/74); in the upper-division baccalaureate category, 18 semester hours in physics (electricity) and engineering electronics (12/68).

NV-1715-0652

1. Gunner's Mate, Class A1, Phase I
2. Gunner's Mate, Class A1
3. Gunner's Mate Class A, Phase I (A-1)

Course Number: A-041-0010.

Location: Service Schools Command, Great Lakes, Il.

Length: *Version 1:* 5 weeks (175 hours). *Version 2:* 12 weeks (400 hours). *Version 3:* 16 weeks (447 hours).

Exhibit Dates: *Version 1:* 8/81-Present. *Version 2:* 2/74-7/81. *Version 3:* 2/68-1/74.

Objectives: To train enlisted personnel to operate and maintain gun mount and missile launching systems.

Instruction: *Version 1:* Lectures and exercises in hand tools, ordnance identification, missile systems and small arms. *Version 2:* Lectures and practical exercises in AC and DC motors, generators, gearing systems, servos, basic vacuum tube and transistor electronics, fundamental fluid mechanics, munitions, small arms and fire control systems. *Version 3:* Lectures and practical exercises in electrical fundamentals, including elements, matter, electron theory, magnetism, AC and DC theory and circuitry, and application of circuits including transformers; equipment and machinery construction and operation, including gun mounts, and surface-to-air and surface-to-underwater missile launching systems; control systems fundamentals, and standard and digital computers used for solving control problems; hand tools usage; small arms operation; explosives characteristics; hydraulics; and synchro-servo systems troubleshooting and alignment.

Credit Recommendation: *Version 1:* Credit is not recommended because of the military-specific nature of the course (1/82). *Version 2:* In the vocational certificate category, 3 semester hours in electricity and electronics laboratory and 1 in munitions laboratory (9/77). *Version 3:* In the vocational certificate category, 4 semester hours in electricity (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity (6/75).

NV-1715-0653

Gunner's Mate Class A, Phase II (A-2)

Course Number: A-041-0011.

Location: Service Schools Command, Great Lakes, IL.

Length: 7 weeks (163 hours).

Exhibit Dates: 2/68-12/73.

Objectives: To train gunner's mates to operate the electronics systems contained in missile launching systems.

Instruction: Lectures and practical exercises in the operation of the electronics systems in missile launching systems, including theory of operation and construction of vacuum tube, solid-state circuits, and magnetic amplifiers; circuit analysis techniques; weapons department organization; and troubleshooting of electronic circuitry.

Credit Recommendation: In the vocational certificate category, 7 semester hours in electronic fundamentals (6/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronic fundamentals and 1 in electronic laboratory (6/75).

NV-1715-0654

Mk 9 and Mk 10 5"/38 Caliber Twin Gun Mount Power Drive Maintenance

Course Number: K-041-2060.

Location: Fleet Training Center, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train enlisted personnel to operate, maintain, and repair the Mk 9 and Mk 10 Ford power drives and indicator-receiver regulators.

Instruction: Lectures and practical exercises in the operation, maintenance, and repair of the Mk 9 and Mk 10 Ford power drives and indicator-receiver regulators, including elementary hydraulics, electric circuits, control systems, disassembly and assembly, and adjustment procedures.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74).

NV-1715-0655

3"/50 Rapid Fire Twin Mount Power Drive and Gun Maintenance
(3"/50 Caliber Rapid Fire Twin Mount Gun Maintenance (Mk 35))

Course Number: J-113-1202.

Location: Fleet Combat Direction Systems Training Center, Atlantic, Dam Neck, Virginia Beach,VA.

Length: 3-4 weeks (105-120 hours).

Exhibit Dates: 10/72-Present.

Objectives: To train gunnery personnel to test, adjust, and maintain the 3"/50 caliber rapid fire gun mount and control system.

Instruction: Lectures and practical exercises in the testing, adjustment, and maintenance of the 3"/50 caliber rapid fire gun mount, including gun and motor field control circuits; parallax system operation; elevation and train receiver regulators; amplifier cabinet components; gun mechanism; loader drive operation, main cam shaft operation; feeding and shifting mechanism; timing; brake system; and lubrication procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (9/84).

NV-1715-0656

Data Systems Technician, Class C, Peripherial Group RD-281(V)/UYK Recorder Reproducer Magnetic Disk File Equipment Maintenance

Course Number: A-150-0067.

Location: Naval Schools Command, Mare Island, CA.

Length: 5 weeks (150 hours).

Exhibit Dates: 4/70-1/88.

Objectives: To train enlisted personnel to operate and maintain a recorder-reproducer magnetic disk RD-281/UYK.

Instruction: Lectures and practical exercises in disk file familiarization, programming considerations, disk file adjustment and maintenance, instruction set familiarization, and malfunctions isolation.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0657

Mardan/Verdan Computer Theory

Course Number: F-193-084.

Location: FBM Submarine Training Center, Charleston, SC.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train the navigation electronics technician to operate the MARDAN or VERDAN computer and to understand its theory of operation.

Instruction: Lectures in MARDAN or VERDAN computer operation, including Boolean algebra review, computer program loading, power sequencing and protective circuitry, GP arithmetic operations, digital differential analyzer operation and mechanization, input/output operation, and troubleshooting techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0658

Terrier Weapons System Mk 76 Mod 8
(Terrier Weapons Systems with Digital Fire Control Systems (MFCS Mk 76-6/AFCS))

Course Number: A-121-0180.

Location: Naval Guided Missiles School, Dam Neck, VA.

Length: 10-11 weeks (400-470 hours).

Exhibit Dates: *Version 1:* 1/83-Present. *Version 2:* 10/72-12/82.

Objectives: To train enlisted personnel to operate and maintain the Terrier digital fire control weapons system and to supervise its operation, maintenance, and testing.

Instruction: *All Versions:* Lectures and practical exercises in Terrier weapons system introduction; ship sensors and search radars, including three-dimensional ones; fire control systems, including gunfire and underwater fire; power distribution and control circuits; tactical data systems; weapons direction system; guided missile fire control system data flow and interface; launching system and Terrier missile; and weapons system testing and alignment procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in electronic troubleshooting procedures (11/83). *Version 2:* In the vocational certificate category, 6 semester hours in electrical laboratory (3/74).

NV-1715-0659

P-3 Power Generating System and AVQ-2 Searchlight Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 5/71-1/88.

Objectives: To train maintenance personnel to test, troubleshoot, and repair the P-3 generator, supervisory panel, buss transfer relay, deicer timer, and a specific searchlight.

Instruction: Lectures and practical exercises in the testing, troubleshooting, and repair of the P-3 generator, supervisory panel, buss transfer relay, deicer timer, and the AVQ-2C searchlight, including use of oscilloscope and multimeter in the troubleshooting, operation, and repair of the various components of the power-generating system, and searchlight components, operation, test and repair procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour as an elective in electricity (5/74).

NV-1715-0660

MOTION PICTURE PROJECTION SYSTEM MAINTENANCE, CLASS C

Course Number: A-690-0014; A-690-0015.

Location: Naval School, San Diego, CA; Naval School, Norfolk, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 2/70–1/88.

Objectives: To train projectionists to maintain, troubleshoot, and repair JAN 16mm sound motion picture projectors.

Instruction: Lectures and practical exercises in JAN 16mm sound motion picture projector maintenance, troubleshooting, and repair, including mechanical and electrical components, power supply and vacuum tube amplifier theory, and audio system troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in media, 3 in audio-visual equipment repair (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in media, 1 in audio-visual technology, 1 as an elective in electrical technology, 1 as an elective in electromechanical technology (3/74).

NV-1715-0661

STROMBERG CARLSON AUTOMATIC TELEPHONE XY SWITCHING SYSTEM MAINTENANCE, CLASS C1

Course Number: A-623-0043.

Location: Service School Command, Great Lakes, IL.

Length: 7 weeks (220 hours).

Exhibit Dates: 12/74–1/88.

Objectives: To train personnel in the maintenance, repair and checkout of automatic electric telephone systems.

Instruction: Areas of instruction include the Stromberg Carlson automatic telephone system, relaying fundamentals, analysis of system design, priorities and faults.

Credit Recommendation: In the vocational certificate category, 3 semester hours in telephone switch gear (9/77).

NV-1715-0662

MODEL 28 ASR TELETYPE MAINTENANCE

Course Number: A-160-0023.

Location: Teletype Maintenance Class C School, Pearl Harbor, HI. Teletype Maintenance Class C School, Norfolk, VA. Teletype Maintenance Class C School, San Diego, CA.

Length: 9–10 weeks (270–328 hours).

Exhibit Dates: 10/71–1/88.

Objectives: To train personnel to install, maintain, and repair Mod 28 automatic send and receive teletypes (AN/UGC-6K, AN/UGC-20 and AN/UGC-6K modified for low-level keying), and in methods for planned maintenance system implementation.

Instruction: Lectures and practical exercises in the installation, maintenance, and repair of Mod 28 automatic send and receive teletypes and in the implementation of maintenance data collection systems, including introductions to AN/UGC-6K, automatic typer, keyboard, perforator and reperforator, and transmitter distributor; operation of electrical components; troubleshooting of the AN/UGC-6K; introduction to the AN/UGC-20 and to various teletype equipment; and introduction to low-level keying.

Credit Recommendation: In the vocational certificate category, 6 semester hours in teletypewriter maintenance (9/83); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electrical technology, mechanical technology, or electromechanical technology (9/83).

NV-1715-0663

TELETYPE MAINTENANCE, CLASS C, LOW LEVEL KEYING TELETYPE MAINTENANCE

Course Number: A-160-0052; A-160-0053.

Location: Naval Schools Command, Norfolk, VA; Fleet Training Center, Pearl Harbor, HI; Service School Command, San Diego, CA.

Length: 3 weeks (105 hours).

Exhibit Dates: 1/71–Present.

Objectives: To train enlisted personnel to install low-level modification kits and to adjust, maintain, and repair the Mod 28 teletypwriter.

Instruction: Lectures and practical exercises in the installation, adjustment, maintenance, and repair of MOD 28 teletypewriter equipment modified for low-level keying, including electrical orientation; semiconductor fundamentals; radio frequency and electromagnetic interference; purpose and construction of MK-1088/UG modification kit; modes of operation; circuit symbols, electrical service assemblies, and options; test equipment; circuit card analysis; modification kit installation; adjustments; converter; repair; and troubleshooting.

Credit Recommendation: In the vocational certificate category, 3 semester hours in teletype maintenance (9/83); in the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in mechanical, electrical, or electromechanical technology (9/83).

NV-1715-0664

1. TELETYPE REPERFORATOR TT-253/UGC COMBINED MAINTENANCE
2. TELETYPEWRITER REPERFORATOR TT-253/UG SERIES AND TELETYPEWRITER DISTRIBUTOR TT187/UG SERIES
   (Teletypewriter Reperforator TT-253/UG Series and Transmitter Distributor TT-187/UG Series Teletype machines)
   (Teletypewriter Reperforator TT-253/UG)

Course Number: A-160-0076; L-160-0012; L-160-012.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 4–5 weeks (120–150 hours).

Exhibit Dates: *Version 1:* 4/74–1/88. *Version 2:* 7/69–3/74.

Objectives: To train rated personnel to operate and maintain TT-253/UG teletypewriter reperforators, TT-187/UG distributor transmitters, and associated equipment.

Instruction: Lectures and practical exercises on the operation and maintenance of TT-253/UG teletypewriter reperforators and TT-187/UG distributor transmitters, including general system information; theory of system operation; and service and repair of these distributor-transmitters.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electromechanical technician training (9/77). *Version 2:* In the vocational certificate category, 3 semester hours in teletypewriter reperforation (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in electro-mechanical technology (5/74).

NV-1715-0665

TELETYPEWRITER SYSTEM (AFLOAT) MAINTENANCE MODELS TT70A/UG AND AN/UGC-5 TT-252 TYPING PERFORATOR

Course Number: K-160-262.

Location: Fleet Training Group, Pearl Harbor, HI.

Length: 6 weeks (180 hours).

Exhibit Dates: 4/66–12/68.

Objectives: To train enlisted personnel on TT-70A teletypewriters and on AN/UGC-5 perforators.

Instruction: Lectures and practical exercises on the operation and preventive maintenance of TT-70A/UG teletypewriters and the operation of the typing perforator TT-252/UG, including teletypewriter introduction, Mod 28 component parts, keyboard and adjustments, automatic typer and adjustments, theory of perforator operation, the TT-252/UG typing perforator, and punching, tape feed, printing operation, and troubleshooting.

Credit Recommendation: In the vocational certificate category, 4 semester hours in teletypewriter operation and repair (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in electromechanical technology (5/74).

NV-1715-0666

1. TT-264/AG TELETYPEWRITER GROUP INTERMEDIATE MAINTENANCE
2. P-3TT-264/AG TELETYPEWRITER GROUP MAINTENANCE, NO. 20

Course Number: C-102-3550.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Jacksonville, FL.

Length: 3 weeks (120 hours).

Exhibit Dates: *Version 1:* 9/74–Present. *Version 2:* 3/68–8/74.

Objectives: To train maintenance personnel to repair specific teletypewriters.

Instruction: *Version 1:* The course includes instruction in the alignment, troubleshooting and repair of the teletypewriter by utilizing schematic circuits, block diagrams and standard electronic maintenance equipment. *Version 2:* Lectures and practical exercises in the servicing and maintenance of a teletypewriter. Course includes all elements of the teletypewriter ribbon-feed group, printer breakdown, motor servicing, magnetic selector, selector clutch-release system, the printing system, character advance and carriage return, advance prevention, print-prevention system, and general troubleshooting.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electromechanical maintenance procedures (7/81). *Version 2:* In the vocational certificate category, 2 semester hours in electromechanical technology (5/74).

NV-1715-0667

5"/54 RAPID FIRE MOUNT FUZESETTER, TRAIN AND ELEVATION (SERVO AMPLIFIER SYSTEM)

Course Number: K-041-2029.

Location: Fleet Training Center, San Diego, CA.

Length: 3 weeks (90 hours).

Exhibit Dates: 2/69–1/88.

Objectives: To train enlisted personnel to operate and maintain a specific artillery fuzesetter and fire control equipment.

Instruction: Lectures and practical exercises on a specific artillery fuzesetter and fire control equipment. Course includes power supplies and servo units, signal tracing, sequence control circuits, use of schematics, and the operation and maintenance of AC and DC amplifiers.

Credit Recommendation: In the vocational certificate category, 2 semester hours as an elective in electronics (5/74); in the lower-division baccalaureate/associate degree category, 1 semester hour as an elective in electronics (5/74).

NV-1715-0668

5"/54 Mount Rapid Fire Mk 42 Mod 7
Operation and Maintenance

Course Number: J-041-0128, K-041-2056.

Location: Fleet Training Center, San Diego, CA.

Length: 3 weeks (90 hours).

Exhibit Dates: 10/71–1/88.

Objectives: To train enlisted personnel to operate and maintain a gun mount.

Instruction: Lectures and practical exercises in the operation and maintenance of a gun mount. Course includes basic electricity, electrical control systems, and the general operation of a 5-inch gun mount.

Credit Recommendation: In the vocational certificate category, 1 semester hour in basic electricity (5/74).

NV-1715-0669

Marine Air Traffic Control Unit
Auxiliary Equipment
Maintenance, Class C

Course Number: Not available.

Location: Air Technical Training Center, Glynco, GA.

Length: 7 weeks (280 hours).

Exhibit Dates: 6/69–1/88.

Objectives: To train enlisted personnel to operate, maintain, and repair specific AC generators and air conditioners.

Instruction: Lectures and practical exercises in the operation, maintenance, and repair of auxiliary equipment. Course includes simple DC circuits, conductors, insulators, resistors, inductance, capacitance, basic electrical indicating instruments, AC generators, transformers, AC motors, semiconductor fundamentals, rectifiers, starting currents, fault currents, battery charging circuits, and air conditioning fundamentals.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical and air conditioning fundamentals (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical and air conditioning fundamentals (3/74).

NV-1715-0670

1. Air Traffic Control Electronics
   Maintenance Officers, Class O
2. Ground Controlled
   Approach/Radar Air Traffic
   Control Center Electronics
   Maintenance Officers, Class O

Course Number: Not available.

Location: Air Technical Training Center, Glynco, GA.

Length: *Version 1:* 4 weeks (144 hours). *Version 2:* 4 weeks (152 hours).

Exhibit Dates: *Version 1:* 6/70–1/88. *Version 2:* 8/65–5/70.

Objectives: To train electronics maintenance officers to supervise the installation, maintenance, and repair of air traffic control systems associated with ground-controlled approach units and air traffic control centers.

Instruction: *All Versions:* Lectures and practical exercises in the installation, maintenance, and repair of air traffic control systems associated with ground-controlled approach units and air traffic control centers, including organization and installation requirements, air traffic control system complexes, principles and characteristics of air traffic control systems, test equipment and inspections, communications, supply and maintenance procedures, and flight testing. *Version 1:* Includes system siting, radar and radio principles and navigational aids.

Credit Recommendation: *Version 1:* Credit is not recommended because of the limited technical nature of the course (3/74). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in maintenance management (12/68).

NV-1715-0671

SP-2 AN/APS-20B/E Radar Set
Intermediate Maintenance
Course

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 7/69–1/88.

Objectives: To train maintenance personnel in the maintenance, repair, and functional testing of the AN/APS-20B/E radar set at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance, repair, and functional testing of the AN/APS-20B/E radar set, including theory of operation of the AN/APS-20B/E; radar set control C-1449/APS-20B/E; low-voltage power supply PP-347/APS-20B/E; electrical synchronizer SN-55/APS-20B/E; transmitter T-467/APS-20B/E; high-voltage control; radar IF amplifiers; receiver R-251/APS-20B/E and duplexer; and indicator IP-414-A/APA-125.

Credit Recommendation: In the vocational certificate category, credit in radar on the basis of institutional evaluation (6/74).

NV-1715-0672

E-2A AN/APS-96 Search Radar
Intermediate Maintenance

Course Number: C-102-3471.

Location: Air Maintenance Training Detachment, Air Maintenance Training Detachment, Miramar, CA, North Island, CA.

Length: *Version 1:* 5 weeks (200 hours). *Version 2:* 7–8 weeks (280–320 hours).

Exhibit Dates: *Version 1:* 12/84–Present. *Version 2:* 3/68–11/84.

Objectives: To train maintenance personnel to maintain the AN/APS-96 search radar set at the intermediate and organizational levels.

Instruction: Lectures and practical exercises in the intermediate maintenance of the AN/APS-96 search radar, including transmit operation; receive operation; miscellaneous equipments functional description; introduction to pulse compression techniques; functional theory; trigger timer and synchronizer theory; theory of operation of specific delay line, radio frequency oscillator, radar receiver, radar modulator, and trigger pulse amplifier; power supplies; and control circuits, system emergency mode, and test operations.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in radar circuits and systems, 1 in radar laboratory (5/85). *Version 2:* In the vocational certificate category, credit in radar on the basis of institutional evaluation (6/74).

NV-1715-0673

Naval Tactical Data System (NTDS)
Tracker/Supervisor

Course Number: K-221-0039; K-221-1010.

Location: Fleet Combat Training Center, Pacific, San Diego, CA; Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA.

Length: 3 weeks (98–120 hours).

Exhibit Dates: 5/72–1/88.

Objectives: To train enlisted personnel in the skills related to tactical data collection systems, execution procedures, and interpretation of information unique to the mode of operation.

Instruction: Lectures and practical exercises on the Naval Tactical Data System (NTDS) including introduction to NTDS, NTDS block-diagram analysis, data display equipment, manual air tracking, surface tracking, tracking considerations, identification, IFF/SIF/PIF, track supervisor, system tracking, NTDS communications, universal keyset, navigation keyset, utility mode, data links, beacon video processor, ECM supervisor, ECM keyset, height/size, and communication security and user overview.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (6/74).

NV-1715-0674

Air Intercept Controller Naval
Tactical Data Systems (NTDS)
Qualification

(Basic Naval Tactical Data System
(NTDS) Air Intercept Controller)

Course Number: K-2G-0027; K-221-0027.

Location: Fleet Combat Training Center, Dam Neck, VA; Fleet Anti-Air Warfare Training Center, San Diego, CA.

Length: 6 weeks (173–240 hours).

Exhibit Dates: 6/72–Present.

Objectives: To train officers and radarmen to perform as basic NTDS air intercept controllers.

Instruction: Lectures and practical exercises in air intercept control, including fleet anti-air warfare, threat intelligence, interceptor aircraft characteristics and air-to-air weapons systems, air navigation aids, communications equipment, intercept control communications procedures and vocabulary, radar indicator equipment, identification equipment, and preparation and procedures for NTDS control.

Credit Recommendation: In the vocational certificate category, credit in aircraft traffic control operation on the basis of institutional evaluation (6/86).

NV-1715-0676

Acoustic Anti-Submarine Operator
Transition

Course Number: E-210-53.

Location: Fleet Airborne Electronics Training Unit, Pacific, Moffett Field, CA.

Length: 3 weeks (98 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train the acoustic AW in DIFAR equipment operation.

Instruction: Lectures and practical exercises on DIFAR equipment operation, including acoustic sensor signal generator and listening devices, sonobuoy receiver system, AN/AQA-7 systems analysis, signal flow, frequency spectrum, nondirectional modes of operation, range mode of operation, acoustic recorder/reproducer, time code generator, and capabilities of sensor station 1 and 2.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/74).

NV-1715-0677

SH-3 AN/AQS-13 SONAR MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Ream Field, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 6 weeks (240 hours).

Exhibit Dates: 8/67-12/68.

Objectives: To train enlisted personnel to operate and maintain sonar systems.

Instruction: Lectures and practical exercises in the maintenance of a specific sonar system. Topics include sonar fundamentals, semiconductor theory and circuits, cathode ray tube (CRT) operation, power supply elements and operation and use of test equipment, and discussion of transmitters, receivers, transducers, display devices, amplifiers, resolvers, and troubleshooting techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in communications systems on the basis of institutional evaluation (6/74); in the upper-division baccalaureate category, credit in communications on the basis of institutional evaluation (6/74).

NV-1715-0678

RADAR/MAD FOR NONACOUSTIC
OPERATOR P3A/B(D)

Course Number: E-210-45.

Location: Fleet Aviation Specialized Operational Training Group, Pacific, Moffett Field, CA.

Length: 2 weeks (70 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train VP antisubmarine warfare sensor operators in the operation of nonacoustic sensors.

Instruction: Lectures and practical exercises in nonacoustic sensors, including magnetic environment, equipment familiarization and procedures, magnetic compensation equipment and procedures, MAD signal interpretation, AN/AIC-22 intercommunication system, navigation plotter familiarization and application of navigation principles, radar fundamentals, radar equipment components and operating procedures, airborne recognition equipment and preflight procedures, and radar tactical employment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/74).

NV-1715-0679

NONACOUSTIC ANTISUBMARINE OPERATOR
TRANSITION P-3C
(Nonacoustic Operator Transition)

Course Number: E-210-54.

Location: Fleet Aviation Specialized Operational Training Group, Pacific, Moffett Field, CA.

Length: 4 weeks (126 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train the nonacoustic AW operator in P3C procedures.

Instruction: Lectures and practical exercises in P3C procedures, including sensor station; search and localization sensors, radar principles; radar navigation principles; magnetic environment principles; electronic warfare principles; electronic intelligence recognition; sensor data display system; intercommunication system; radar scan converter system; MAD signal interpretation; emitter scan characteristics; threat signal identification; and 14B40 trainer laboratory.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/74).

NV-1715-0680

DENTAL EQUIPMENT REPAIR
TECHNOLOGY, CLASS C
(Basic Dental Repair Technician)
(Dental Technician Repair, Class C)
(Dental Repair Technician, Basic)

Course Number: B-198-0013; B-670-10.

Location: Naval Medical Center, San Diego, CA; National Medical Center, Bethesda, MD.

Length: 24 weeks (900 hours).

Exhibit Dates: *Version 1:* 1/78-12/89. *Version 2:* 6/55-12/77.

Objectives: To train personnel to perform as basic dental repair technicians.

Instruction: For this course after 12/89 see NV-1715-1511. *Version 1:* Lectures and practical exercises in the installation, maintenance and repair of dental operating room and prosthetic laboratory equipment, including the use of hand and power tools, a basic understanding of electricity, water systems and hydraulic systems, and a familiarization with common dental equipment such as electro/mechanical operating chairs, oral evacuation systems and X-ray equipment. *Version 2:* Lectures and practical exercises in the maintenance and repair of dental operating room and prosthetic laboratory equipment, including applied physics, repair of dental operating room equipment, repair of dental prosthetic laboratory equipment, instructor training, and petty officer leadership training.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in mechanical shop practices and 3 in troubleshooting and maintenance of electromechanical equipment (6/83). *Version 2:* In the vocational certificate category, 2 semester hours in machine shop (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in machine shop on the basis of institutional evaluation (6/74).

NV-1715-0681

TARTAR WEAPONS SYSTEM MISSILE FIRE
CONTROL SYSTEM (MFCS) MK 74
MOD 0

Course Number: A-121-0023; A-121-0024.

Location: Guided Missiles School, Dam Neck, VA; Training Center, Mare Island, CA.

Length: 11 weeks (323 hours).

Exhibit Dates: 10/72-12/75.

Objectives: To train senior petty officers on the Tartar missile weapons system.

Instruction: Lectures and practical exercises on Tartar weapons system missile fire control system Mk 74 Mod 0, including supplemental reports, introduction to OP3472, DDG weapons system, Tartar weapons system, system functional diagrams, system testing and casualty analysis, standard missile (MR), DDG battery alignment, ECM/ECCM, shipboard practices and exercises, and UHF TM system.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-1715-0682

F/RF-4B POWER GENERATING SYSTEM
MAINTENANCE

Course Number: C-602-182.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train strikers to maintain the power generating system of the F/RF-4B aircraft at the intermediate and organizational level.

Instruction: Lectures and practical exercises in F/RF-4B power generating system maintenance, including familiarization and circuit analysis of power generating system, circuit analysis, troubleshooting procedures and test equipment, electrical power generating system, alternating current generators, specific electrical power test set, testing of the frequency and load control box and the generator control panel, and saturable current potential transformer.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/74).

NV-1715-0683

UH-2C, HH-2C, HH-2D AUTOMATIC
STABILIZATION EQUIPMENT
ORGANIZATIONAL MAINTENANCE

Course Number: C-602-3389.

Location: Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 4 weeks (112 hours).

Exhibit Dates: 2/72-1/88.

Objectives: To train maintenance personnel to maintain and repair the automatic stabilization equipment installed on UH-2C, HH-2C, and HH-2D helicopters.

Instruction: Lectures and practical exercises in the organizational maintenance of UH-2C, HH-2C, and HH-2D automatic stabilization equipment, including introduction and theory of the automatic stabilization equipment system; operation and maintenance of the ASE channels; roll, pitch, and yaw channels; collective channel; and review and testing of the ASE system.

Credit Recommendation: In the vocational certificate category, 2 semester hours in helicopter control systems on the basis of institutional evaluation (6/74).

NV-1715-0684

SHIPBOARD DECOY SYSTEM (CHAFFROC)
LAUNCHER OPERATION AND
MAINTENANCE MK 28 MOD 1-5

Course Number: J-113-0103; J-041-1032; J-113-1032.

Location: Fleet Combat Direction Systems Training Center, Atlantic, Dam Neck, VA.

Length: 2 weeks (70 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train enlisted personnel to operate and maintain a rocket launching system, including loading, unloading, preventive maintenance, casualty analysis, and corrective maintenance.

Instruction: Lectures and practical exercises in the operation and maintenance of a rocket launching system. Topics include basic electricity, basic hydraulics, hydraulic pumps and valves, and information pertaining to specific equipment. Coverage of the topics is very limited.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electromechanical laboratory (6/74).

NV-1715-0685

Advanced Sonar Maintenance, 561 (Class B Sonarman)

Course Number: 561.

Location: Fleet Sonar School, San Diego, CA.

Length: 18 weeks (596 hours).

Exhibit Dates: 7/55-12/68.

Objectives: To train enlisted personnel to repair sonar and associated equipment.

Instruction: Lectures and practical exercises in advanced sonar maintenance, including fundamental mathematics, electricity and electronics theory, vacuum tube fundamentals, basic electronic circuits, basic servo systems, and circuit analysis and troubleshooting sonar equipment.

Credit Recommendation: In the vocational certificate category, 12 semester hours in electricity or electronics, 4 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68).

NV-1715-0686

RA-5C AN/ALQ-61 Countermeasures Set Special Support Equipment

Course Number: Not available.

Location: Air Maintenance Training Detachment, Sanford, FL.

Length: 11 weeks (440 hours).

Exhibit Dates: 8/67-12/68.

Objectives: To train enlisted personnel to operate, maintain, and service specific countermeasures equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/ALQ-61 countermeasures set, including line test, shop test, and calibration procedures for the countermeasures test sets.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics laboratory (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (6/74).

NV-1715-0687

RA-5C AN/ALQ-55 DECM System

Course Number: Not available.

Location: Air Maintenance Training Detachment, Sanford, FL; Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 8 weeks (320 hours).

Exhibit Dates: 2/67-12/68.

Objectives: To train fleet maintenance personnel to service and maintain specific electronic equipment.

Instruction: Lectures and practical exercises in the service and maintenance procedures for specific electronic equipment. Topics include system functional analysis, preamplifier and multicoupler, RF circuitry, synchronizer, receivers, high-resolution module, jam frequency generators, and an introduction to logic. Foundation material in digital fundamentals and circuitry is included in the course.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics, 2 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics, 1 in electrical laboratory (12/68).

NV-1715-0688

F-8 Communication Navigation and Identification (CNI) Systems Organizational Maintenance

Course Number: C-102-3859; C-102-306.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 2 weeks (60-80 hours).

Exhibit Dates: 3/70-1/88.

Objectives: To train maintenance personnel to handle operational data flow and to maintain the F-8 aircraft's communications, navigation, and identification systems.

Instruction: Lectures and practical exercises in the organizational maintenance of the F-8 aircraft's communications, navigation, and identification systems, including integration electronics systems, automatic radio direction finders, radar altimeter, block-diagram analysis of the TACAN system, and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical maintenance laboratory (6/74).

NV-1715-0689

Submarine Sonar Subjective Analysis (SSSA)

Course Number: A-130-0020; F-130-020.

Location: Submarine School, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI; Fleet Ballistic Missile Submarine Training Center, Charleston, SC.

Length: 4-5 weeks (120-150 hours).

Exhibit Dates: 12/69-4/87.

Objectives: To provide sonar technicians with advanced training in the analysis and classification of underwater sonar information.

Instruction: Lectures and practical exercises in the analysis and classification of underwater sonar information, including security, acoustic intercept, use of filters, tone-finding techniques, diesel submarines, patrol craft, warships, analysis of target and non-target noise, and principles of magnetic tape recording.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (10/89).

NV-1715-0690

Communications Quality Monitoring System Operator

Course Number: A-201-0020.

Location: Service Schools Command, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 10/71-1/88.

Objectives: To train enlisted personnel to monitor the performance of operational communication systems.

Instruction: Lectures and practical exercises in the duties and skills necessary to perform as communications quality monitoring systems operators, including fundamentals of communications, teletype terminology, audio techniques, quality control methods, and systems application.

Credit Recommendation: In the vocational certificate category, 1 semester hour in basic electrical laboratory (6/74).

NV-1715-0691

A-6A Weapons System Specialist Organizational Maintenance

Course Number: C-102-3954; C-000-3764.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 10-12 weeks (400-480 hours).

Exhibit Dates: 9/71-1/88.

Objectives: To train enlisted personnel to maintain the A-6A aircraft.

Instruction: Lectures and practical exercises in the maintenance of the A-6A weapons system, including aircraft systems familiarization, ballistics computer, radar systems, DIANE system operation and tie-in, diagnostics, and troubleshooting procedures. Course provides good introduction to digital systems and basic digital computer theory.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer fundamentals and systems, 1 in computer systems laboratory (6/74).

NV-1715-0692

Advanced Sonar, 567

Course Number: 567.

Location: Fleet Sonar School, Key West, FL.

Length: 14 weeks (558 hours).

Exhibit Dates: 10/57-12/68.

Objectives: To train enlisted personnel to operate, maintain, and repair specific sonar and ancillary equipment.

Instruction: Lectures and practical exercises in sonar maintenance at the advanced level. Course includes brief and basic coverage of electricity, special electronic circuits, and meter theory.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical laboratory (6/74).

NV-1715-0693

Terrier Radar Set AN/SPG-55B Continuous Wave Acquisition and Tracking (CWAT)

Course Number: A-104-0135.

Location: Guided Missiles School, Dam Neck, VA.

Length: 8 weeks (309 hours).

Exhibit Dates: 10/72-12/80.

Objectives: To train enlisted personnel to maintain and troubleshoot a specific radar set.

Instruction: Lectures and practical exercises in the maintenance and operation of the AN/SPG-55B radar set and specialized electronic test equipment, including differential voltmeters, pulse generators, VSWR indicators, spectrum analyzers, digital voltmeters and counters, square-wave generators, and continous-wave radio frequency analyzers.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics laboratory (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (6/74); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (6/74).

NV-1715-0694

Advanced Sonar, 557

Course Number: 557.

Location: Fleet Sonar School, Key West, FL.

Length: 11 weeks (440 hours).

Exhibit Dates: 7/57-12/68.

Objectives: To train enlisted personnel to operate and learn advanced sonar techniques.

Instruction: Lectures and practical exercises in the operation of sonar at an advanced level. Topics include basic mathematics, basic fire control, elementary wiring diagrams, and testing, calibration, and maintenance of fire control systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electricity, 1 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (12/68).

NV-1715-0695

P-3 AN/APS-80 SEARCH RADAR SYSTEM MAINTENANCE, 49

Course Number: C-102-3536.

Location: *All Versions:* Air Maintenance Training Detachment, Moffett Field, CA. *Version 1:* Air Maintenance Training Detachment, Jacksonville, FL. *Version 2:* Air Maintenance Training Detachment, Patuxent River, MD.

Length: 3 weeks (96-136 hours).

Exhibit Dates: *Version 1:* 5/77-Present. *Version 2:* 1/70-4/77.

Objectives: To train experienced technicians to maintain the AN/APS-80 search radar at the module and component levels.

Instruction: *All Versions:* Lectures and practical exercises in the maintenance and alignment procedures for the AN/APS-80 search radar system, including introduction to the P-3 search radar system; dual radar installation in the P-3; antenna azimuth and tilt systems; dual installation switching arrangement; P-3 radar system alignment; modulator power supply, electronic synchronizer; AC power distribution; and TR tube and associated circuitry. *Version 1:* Includes the radar magnatron and DC power distribution.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in basic radar systems and 1 in radar system laboratory (7/81). *Version 2:* In the vocational certificate category, 1 semester hour in electronics, 1 in electronics laboratory (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics, and additional credit in electronics on the basis of institutional evaluation (6/74).

NV-1715-0696

AVIATION ANTISUBMARINE WARFARE (AASW) SENSOR STATION THREE OPERATOR, P-3C

(Aviation Antisubmarine Warfare (AASW) Nonacoustic Operator P-3C)

Course Number: E-210-0050; E-210-050.

Location: Fleet Aviation Specialized Operational Training Group, Moffett Field, CA.

Length: 3-4 weeks (105-126 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train VP antisubmarine warfare operators in the operation of nonacoustic equipment.

Instruction: Lectures and practical exercises in nonacoustic equipment, including operation; intercept procedures; terminology; and applications and skills of scope interpretation, including sensor station duties and techniques, equipment operation, search and localization sensors, radar principles, radar navigation principles, magnetic environment principles, electronic warfare principles, and electronic intelligence recognition.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/74).

NV-1715-0697

SH-2D LIGHT AIRBORNE MULTIPURPOSE SYSTEMS (LAMPS) AVIONIC EQUIPMENT ORGANIZATIONAL MAINTENANCE

Course Number: C-102-3376.

Location: Air Maintenance Training Detachment, Lakehurst, NJ; Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/73-1/88.

Objectives: To train fleet maintenance personnel in the maintenance of SH-2D avionics equipment.

Instruction: Lectures and practical exercises in the maintenance of SH-2D avionics equipment, including LAMPS organizational maintenance, radar/ESM, antisubmarine warfare, communications/navigation equipment, systems operation and analysis, troubleshooting and repair, use of test equipment, publications, and safety procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics maintenance (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics maintenance (6/74).

NV-1715-0698

AVIATION SUPPORT EQUIPMENT NC-10B/C MOBILE ELECTRIC POWER PLANT SYSTEMS INTERMEDIATE MAINTENANCE

(Aviation Support Equipment NC-10B Mobile Electric Power Plant Systems Intermediate Maintenance)

Course Number: C-602-3228.

Location: Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, North Island, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: *Version 1:* 1/80-Present. *Version 2:* 2/70-12/79.

Objectives: To train aviation support equipment technicians to perform intermediate maintenance on the systems of the NC-10B and the NC-10B/C electric power plant.

Instruction: Lectures and practical exercises in the maintenance of NC-10B and NC-10B/C electric power plants, including mechanical systems, maintenance, electrical systems, component removal and replacement, and troubleshooting and adjustments.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in AC/DC generator operation and repair (3/82). *Version 2:* In the vocational certificate category, 1 semester hour in support equipment maintenance (6/74).

NV-1715-0699

A-6A AUTOMATIC FLIGHT CONTROL SYSTEM INTERMEDIATE MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 7 weeks (280 hours).

Exhibit Dates: 3/68-1/88.

Objectives: To train maintenance personnel to maintain, test, and troubleshoot the AN/ASW-16 automatic flight control system and the flight control test console at the intermediate maintenance level.

Instruction: Lectures and practical exercises in the AN/ASW-16 automatic flight control system and the flight control test console, including introduction to semiautomatic check-out equipment, operation and maintenance of the air data computer, operational theory of the air navigation computer and related components, and maintenance of the automatic flight control system.

Credit Recommendation: In the vocational certificate category, 10 semester hours in electrical and electronic systems (6/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in electrical and electronic systems (6/74).

NV-1715-0700

AVIATION SUPPORT EQUIPMENT NC-2A MOBILE ELECTRIC POWER PLANT INTERMEDIATE MAINTENANCE

Course Number: C-602-3226.

Location: Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, North Island, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 6/71-Present.

Objectives: To train aviation support equipment technicians to perform maintenance on the NC-2A mobile electric power plant.

Instruction: Lectures and practical exercises in the maintenance of the NC-2A mobile electric power plant, including introduction to the NC-2A; NC-2A familiarization; NC-2A electrical description and theory of operation, drive motor operation and regulation; line troubleshooting; and bench test, repair, and adjustment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in AC/DC generator operation and repair (3/82).

NV-1715-0701

F-4J RT-793/ASQ UHF TRANSCEIVER INTERMEDIATE MAINTENANCE

Course Number: C-102-218.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, El Toro, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 9/70-1/88.

Objectives: To train personnel in the intermediate maintenance of the RT-793/ASQ UHF transceiver.

Instruction: Lectures and practical exercises in the intermediate maintenance of the RT-793/ASQ UHF transceiver, including theory of operation, and laboratory and maintenance procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in avionics maintenance technology (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in avionics maintenance technology (6/74).

NV-1715-0702

SPARROW III, SIDEWINDER, SHRIKE, AND WALLEYE GUIDED MISSILE TEST EQUIPMENT, INTERMEDIATE MAINTENANCE (SHORE)

Course Number: C-122-3110.

Location: Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, North Island, CA.

Length: 7 weeks (280 hours).

Exhibit Dates: 4/73–1/88.

Objectives: To train enlisted personnel to operate, maintain, and calibrate air launched guided missile test equipment.

Instruction: Lectures and practical exercises in the theory, operation, maintenance, and calibration of air launched guided missile equipment, including the Sparrow, Sidewinder, Shrike, and Walleye systems.

Credit Recommendation: In the vocational certificate category, 8 semester hours in electronics, 6 in electronics laboratory (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electronics, 3 in electronics laboratory (6/74); in the upper-division baccalaureate category, 2 semester hours in electronics laboratory (6/74).

NV-1715-0703

Tartar Fire Control and Missile Officer

Course Number: A-2F-0010.

Location: Guided Missiles School, Dam Neck, VA.

Length: 13 weeks (331 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train commissioned officers to maintain, operate, and handle logistics for Tartar shipboard missile systems.

Instruction: Lectures and practical exercises in the maintenance and operation of Tartar missile systems. Course includes the capabilities and characteristics of the Tartar missile systems, with strong emphasis on weapons system employment, firing considerations, and operation of various radar systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electrical systems (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical systems (6/74).

NV-1715-0704

DIFAR Training for Acoustic Operators P-3A/B(D) and P3C (Jezebel Gram Analysis for AW's P-3A/B (DIFAR Retrofit))

Course Number: E-210-42.

Location: Fleet Airborne Electronics Training Unit, Pacific, Moffett Field, CA.

Length: 6 weeks (203–224 hours).

Exhibit Dates: 10/71–1/88.

Objectives: To train enlisted personnel in acoustic detection techniques for qualification as a sensor station operator aboard P3A/B (DIFAR Retrofit) aircraft.

Instruction: Lectures and practical exercises in acoustic detection techniques for qualification as a sensor station operator aboard P3A/B (DIFAR Retrofit) aircraft. Course includes Jezebel fundamental analysis procedures, aural listening techniques, acoustic listening devices, and specialized test equipment.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/74).

NV-1715-0705

Strategic Weapons (SWS) System Electronic A School (Polaris Electronics, Class A)

Course Number: A-121-0142; A-121-142; A-000-037.

Location: Naval Guided Missiles School, Dam Neck, VA.

Length: *Version 1:* 16–18 weeks (480–543 hours). *Version 2:* 26 weeks (910 hours). *Version 3:* 22 weeks (703 hours).

Exhibit Dates: *Version 1:* 5/76–2/88. *Version 2:* 4/67–4/76. *Version 3:* 1/66–3/67.

Objectives: To provide strategic weapsons systems technicians with training in electricity/electronics fundamentals.

Instruction: For this course after 2/88 see NV-1715-1400. *Version 1:* Lectures and practical exercises in basic electricity and electronics including safety, introduction to matter, magnetism, electricity, series circuits, parallel circuits, combination circuits, meters, induction, capacitance, time constants, series and parallel reactive circuits, relays, transformers, motors, servos, scopes, transistor-diode theory, CRT, clamp-limitor circuits, FETS, amplifier types, SCRs, power supplies and filters, voltage regulation, zeners, amplifier coupling, UJT, oscillators, multivibrators, superheterodyne receivers and associated circuitry, video amplifiers, tuned circuit alignment, troubleshooting practice, accelerometers, mechanics of motion, gyroscopes, binary math, codes, gates, ALUs, data transmission, logic diagrams, programming, and digital troubleshooting. *Version 2:* Lectures and practical exercises in Polaris missile technology, including basic electrical theory, transistor circuit analysis, modern digital computer circuits and logic operations, inertial guidance theory, radar, sonar and communications fire control. *Version 3:* Lectures and practical exercises in Polaris missile technology, including basic electrical theory, transistor circuit analysis, modern digital computer circuits and logic operations, inertial guidance theory, radar, sonar, and communications fire control.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity, 2 in basic electronics, 2 in semiconductors, 2 in electronic circuits, 2 in data processing, 3 in digital computer fundamentals, all non-calculus based (11/83). *Version 2:* In the vocational certificate category, 25 semester hours in electronics or computer technology (6/74); in the lower-division baccalaureate/associate degree category, 12 semester hours in electronics or computer technology (6/74); in the upper-division baccalaureate category, 3 semester hours as an elective in digital computer fundamentals, or electrical or electronics laboratory (6/74). *Version 3:* In the vocational certificate category, 20 semester hours in electronics or computer technology (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electrical or electronics laboratory (6/74).

NV-1715-0706

F-4J AN/AWG-10 Missile Control Display and Built-In Test (BIT) Intermediate Maintenance

Course Number: C-602-3818.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 5–6 weeks (200–240 hours).

Exhibit Dates: 1/71–1/88.

Objectives: To train personnel to maintain the AN/AWG-10 missile control display and built-in test.

Instruction: Lectures and practical exercises in the maintenance of the AN/AWG-10 missile control display and built-in test. Course includes inspection techniques, troubleshooting procedures, the missile auxiliary generator, and topics on basic computer control of servo systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in basic computers and/or servo laboratory (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic computers and/or servo laboratory (6/74).

NV-1715-0707

APA-56 Indicator Assembly

Course Number: D-100-012.

Location: Oceanographic Air Survey Unit, Patuxent River, MD.

Length: 3 weeks (90 hours).

Exhibit Dates: 12/66–12/68.

Objectives: To train enlisted personnel to operate, maintain, adjust, and troubleshoot the APA-56 indicator and associated test equipment.

Instruction: Lectures and practical exercises in the operation, maintenance, adjustment, and troubleshooting of the APA-56 indicator and associated test equipment, including power supplies, circuit analysis, signal distributor, console indicator, relay priority system, camera PPI and grid map converter.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/74).

NV-1715-0708

Central Gyro Reference System (AN/AJA-2), Class C

Course Number: D-602-017.

Location: Oceanographic Air Survey Unit, Patuxent River, MD.

Length: 3 weeks (90 hours).

Exhibit Dates: 12/66–12/68.

Objectives: To train aviation electricians to operate, maintain, and troubleshoot the AN/AJA-2 central gyro reference system.

Instruction: Lectures and practical exercises in the operation, maintenance, and troubleshooting of the AN/AJA-2 central gyro reference system, including review of basic electronics and electricity pertaining to the central gyro reference system, definition of terms and descriptions of equipment, three-gyro stable platform, timing and functional operations, detailed circuit analysis and preflight procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/74).

NV-1715-0709

E-2A Inertial Navigation System AN/ASN-36 Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 3/68–1/88.

Objectives: To train enlisted personnel to maintain the ASN-36 inertial navigation system.

Instruction: Lectures and practical exercises in the maintenance of the ASN-36 inertial navigation system. Topics include gyroscopes, accelerometers, servos, platform stabilization, control servos, control and navigation computer, analog-to-digital encoders, and analog and digital computations (functional approach only).

Credit Recommendation: In the vocational certificate category, 5 semester hours in electrical and/or mechanical technology (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical and/or mechanical technology (7/74); in the upper-division baccalaureate category, 1 semester hour in electrical and/or mechanical technology on the basis of institutional evaluation (7/74).

NV-1715-0710

AN/ARC-51, 51A, 51AX, 51B, RT-793/ASQ and RT-1010/ASQ-140 Communication Systems Intermediate Maintenance (AN/ARC-51, 51A and 51AX Communication Systems Intermediate Maintenance)

(P-3 AN/ARC-51A Communication Systems Maintenance, No. 22)

Course Number: C-102-3014.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Kingsville, TX; Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Santa Ana, CA; Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, Cp. Pendleton, CA; Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, Key West, FL; Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 2 weeks (80–96 hours).

Exhibit Dates: 1/68–Present.

Objectives: To train enlisted personnel to maintain, operate, and troubleshoot the AN/ARC-51, 51A and 51AX communication systems.

Instruction: Lectures and practical exercises in the maintenance, operation, and troubleshooting of the AN/ARC-51, 51A, and 51AX communication systems, including block-diagram analysis of transceivers. Specific topics include frequency frequency synthesis, AC/DC power supplies, RF and power amplifiers, transmitters and related circuitry.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics laboratory (7/81).

NV-1715-0711

Advanced Sonar Course 566

Course Number: 566.

Location: Fleet Sonar School, Key West, FL.

Length: 5–6 weeks (225 hours).

Exhibit Dates: 10/57–12/68.

Objectives: To train enlisted personnel to maintain, calibrate, and operate sonar equipment.

Instruction: Lectures and practical exercises in the maintenance, calibration, and operation of sonar equipment at the advanced level. Course includes a review of mathematics, electricity, receivers, transmitters, and circuits.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical laboratory on the basis of institutional evaluation (7/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (7/74).

NV-1715-0712

Missile Technician, Class B
(Class B Guided Missileman)

Course Number: Not available.

Location: Guided Missile School, Dam Neck, VA.

Length: 38–41 weeks (1,140–1,435 hours).

Exhibit Dates: 3/61–12/83.

Objectives: To provide the student with the technical background in mathematics, physics, and electronics necessary to analyze the operational capabilities and limitations of a complex missile weapon system.

Instruction: Lectures and practical exercises in technical mathematics, physics, and electronics. The mathematics instruction covers algebra, trigonometry, and basic calculus. Physics topics include mechanics, with emphasis on missile trajectories and the properties of matter, heat, light, sound, electricity, and magnetism. In the electronics section, DC and AC circuits, vacuum tubes, semiconductors, amplifiers, amplitude, frequency, phase, and pulse modulation are studied. In addition, computer fundamentals are presented. A significant part of the program is devoted to inertial components and weapon systems.

Credit Recommendation: In the vocational certificate category, 6 semester hours in mathematics, 4 in electronics, 3 in electricity, and, on the basis of institutional evaluation, additional credit in electronics laboratory (8/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in mathematics, 4 in physics, 3 in electricity or electronics, and, on the basis of institutional evaluation, additional credit in electrical laboratory (12/68).

NV-1715-0713

Carrier Air Traffic Control Center Equipment Maintenance, AN/SPN-35A and AN/SPN-35, Class C

(Carrier Air Traffic Control Center Equipment Maintenance, AN/SPN-35, Class C)

Course Number: C-103-2012.

Location: *Version 1:* Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN. *Version 2:* Air Technical Training Center, Glynco, GA.

Length: 8–10 weeks (300–360 hours).

Exhibit Dates: *Version 1:* 8/77–8/82. *Version 2:* 10/65–7/77.

Objectives: To train graduates of electronics technicians school, class A, in the operation and maintenance of the AN/SPN-35A and AN/SPN-35 radar sets and associated auxiliary electronic equipment.

Instruction: *All Versions:* Lectures and practical exercises in operation and maintenance of specific radar sets and associated electronic equipment, including radar circuit theory, radar transmitters, receivers, antenna stabilization, indicators, system alignment, AN/SPN-35 modifications, and differences between AN/SPN-35A and AN/SPN-35 radar sets.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in troubleshooting and repair of radar systems (2/81). *Version 2:* In the vocational certificate category, 4 semester hours in electronics laboratory (7/74); in the upper-division baccalaureate category, 3 semester hours in electronics laboratory (7/74).

NV-1715-0714

Basic Propulsion Engineering, Class A

Course Number: A-650-010.

Location: Naval Training Center, Great Lakes, IL.

Length: *Version 1:* 5 weeks (152 hours). *Version 2:* 9 weeks (275 hours).

Exhibit Dates: *Version 1:* 6/70–12/73. *Version 2:* 1/67–5/70.

Objectives: To train personnel in basic propulsion engineering, class A.

Instruction: *All Versions:* Lectures and practical exercises in basic propulsion engineering, class A, including introduction to marine power plants, introduction to boilers, combustion principles, internal-combustion engines, measuring and control devices, electrical theory, blueprints and telephones, pumps, power transfer equipment, valves, piping, and fittings. *Version 1:* Topics include power transfer equipment, handtools, instruments, and materials. *Version 2:* Topics include mathematics review, mechanical theory, metallurgy, fluid theory, heat theory, and logs.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (7/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in basic engineering theory, 2 in electronics laboratory (7/74).

NV-1715-0715

Carrier Air Traffic Control Center Equipment Maintenance, AN/SPN-6 and AN/SPN-12 (XN-4), Class C

Course Number: Not available.

Location: Air Technical Training Center, Glynco, GA.

Length: 3 weeks (120 hours).

Exhibit Dates: 2/65–12/68.

Objectives: To train selected electronics technicians to operate AN/SPN-6 and AN/SPN-12 (XN-4) air traffic control electronic equipment.

Instruction: Lectures and practical exercises in operation of air traffic control electronic equipment. Course includes transmitters and receivers, antenna stabilization, and air speed radar operation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical laboratory (7/74); in the upper-division baccalaureate category, 2 semester hours in electrical laboratory (7/74).

NV-1715-0716

Basic Undersea Weapons Circuits

Course Number: A-123-0130; A-123-119.

Location: Naval Training Center, Orlando, FL; Advanced Undersea Weapons School, Key West, FL; Fleet Anti-Submarine Warfare School, San Diego, CA.

Length: 8 weeks (283 hours).

Exhibit Dates: 1/70–6/87.

Objectives: To train enlisted personnel in basic undersea weapons circuits.

Instruction: Lectures and practical exercises in basic undersea weapons circuits, including introduction, direct current and Ohm's law, alternating current, synchros, introduction to electronics, basic amplifier circuits theory, principles of receiver operation, and transmitters and transducers.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electricity and electronics (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity and electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electrical and electronic laboratory for non-electrical-engineering students (6/74).

NV-1715-0717

Advanced Undersea Weapons Circuits

Course Number: A-123-0131.

Location: Advanced Undersea Weapons School, Orlando, FL; Fleet Anti-Submarine Warfare School, Key West, FL; Fleet Anti-Submarine Warfare School, San Diego, CA.

Length: 12 weeks (420 hours).

Exhibit Dates: 6/70–6/87.

Objectives: To train enlisted personnel in advanced undersea weapons circuits.

Instruction: Lectures and practical exercises in advanced undersea weapons circuits, including basic mathematics, test equipment, undersea weapons power systems, undersea weapon circuits, undersea weapons systems sections, synchro-servo system principles, gyroscopic concepts, transistors and printed circuits, and computer fundamentals.

Credit Recommendation: In the vocational certificate category, 5 semester hours in electricity and electronics (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electronic laboratory for engineering students, or 2 as a technical elective for non-engineering students (6/74).

NV-1715-0718

Torpedoman's Mate, Class A
(Torpedoman's Mate, Class A, Intermediate Maintenance Prerequisite)

Course Number: A-123-0129.

Location: Naval Training Center, Orlando, FL; Advanced Undersea Weapons School, Key West, FL; Fleet Anti-Submarine Warfare School, San Diego, CA.

Length: 5 weeks (155 hours).

Exhibit Dates: 6/70–6/87.

Objectives: To train torpedoman's mates in intermediate electronics maintenance.

Instruction: Lectures and practical exercises in electronics maintenance, including basic principles of synchros, basic amplifier circuits, principles of receiver operation, transmitters and transducers, theory of vacuum tube operation, methods of biasing vacuum tubes, troubleshooting amplifiers, detector circuits, electronic test equipment, troubleshooting power supplies, oscillator circuits, basic transmitter circuitry, and principles of transducer operation.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (6/74); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory for non-electrical-engineering students (6/74).

NV-1715-0719

Torpedoman's Mate Surface Operator Special
(Torpedoman's Mate, Class A)
(Torpedoman's Mate, Class A, Surface)

Course Number: A-123-0171; A-123-0128.

Location: Service School Command, Orlando, FL; Advanced Undersea Weapons School, Key West, FL; Fleet Anti-Submarine Warfare School, San Diego, CA.

Length: 4–5 weeks (142–175 hours).

Exhibit Dates: 6/70–6/87.

Objectives: To train torpedoman's mates in surface weapons.

Instruction: Lectures and practical exercises in surface weapons, including torpedo explosives, specific torpedos, stand-off weapons, specific torpedo tubes, firing craft procedures for specific torpedos, and associated equipment. The course includes instruction in steam, mechanical and wire-guided torpedos, standoff weapons and depth charges.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/83).

NV-1715-0720

Torpedoman's Mate Submarine Operator Special
(Torpedoman's Mate, Class A)
(Torpedoman's Mate, Class A, Submarine)

Course Number: A-123-0169; A-123-0127.

Location: Naval Training Center, Orlando, FL; Advanced Undersea Weapons School, Key West, FL; Fleet Anti-Submarine Warfare School, San Diego, CA.

Length: 4–6 weeks (160–257 hours).

Exhibit Dates: 6/70–6/87.

Objectives: To train enlisted personnel as torpedoman's mates.

Instruction: Lectures and practical exercises in submarine weapons, including introduction to explosives, specific torpedos, introduction to SUBROC missile, specific submerged torpedo tubes, and torpedo tube loading procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/83).

NV-1715-0721

Electronics Officers Administrative

Course Number: Not available.

Location: Electronics Officers School, Great Lakes, IL.

Length: 14 weeks (420 hours).

Exhibit Dates: 9/57–12/58.

Objectives: To train junior officers to maintain and repair sonar, radar, and loran equipment; to administer the operation of electronics installations; and to conduct training programs for ET strikers.

Instruction: Lectures and practical exercises in the maintenance and repair of loran, sonar, radar, and other miscellaneous electronic equipment. Course includes fundamentals of electricity and vacuum-tube electronics as well as a description of radar, loran and sonar systems.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electricity or electronics (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory (6/74).

NV-1715-0722

Electronics Technician, Class A—A-1
(Electronic Fundamentals)

Course Number: A-100-0012.

Location: Electronics Technician Class A School, Great Lakes, IL; Electronics Technician Class A School, Treasure Island, CA.

Length: *Version 1:* 10 weeks (364 hours). *Version 2:* 13–14 weeks (390–420 hours).

Exhibit Dates: *Version 1:* 7/74–9/77. *Version 2:* 5/66–6/74.

Objectives: To train enlisted personnel who are graduates of a basic electricity and electronics course to perform as electronics technicians.

Instruction: *All Versions:* Lectures and practical exercises in the operation, maintenance, and repair of electronic equipment, including electronic circuits, basic meters, basic oscilloscopes, power supplies, electron tube and half/full wave rectifier circuits, electrical wiring techniques, filter circuits, mounting and soldering techniques, voltage regulators, transmitting circuits, modulator unit, RC coupled amplifiers, use of the tube tester, multigrid vacuum tube amplifiers, and audio power amplifiers. *Version 1:* Also covers electron tubes and solid state receivers and devices.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electricity and electronics and 2 in electronics laboratory (9/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics (9/77). *Version 2:* In the vocational certificate category, 10 semester hours in electricity and electronics (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory, or 2 in introduction to electronics for non-engineering students (6/74).

NV-1715-0723

Electronics Technician, Class A—A-2
(Electronic Circuit Applications)

Course Number: *All Versions:* A-100-0014. *Version 2:* A-100-014; A-100-015.

Location: Electronics Technician Class A School, Great Lakes, IL; Electronics Technician Class A School, Treasure Island, CA.

Length: *Version 1:* 7 weeks (255 hours). *Version 2:* 9–12 weeks (270–368 hours).

Exhibit Dates: *Version 1:* 7/74–9/77. *Version 2:* 5/66–6/74.

Objectives: To train enlisted personnel who are graduates of a basic electricity and electronics course to perform as electronics technicians.

Instruction: *All Versions:* Lectures and practical exercises in the operation, maintenance, and repair of radar-related electronic equipment, including pulse circuits, timing circuits, multivibrators, clippers and counters, cathode followers, transistor printed-circuit training device, oscilloscope circuits, microwave circuits, and radar timers and modulators. *Version 1:* Also covers control systems, magnetic amplifiers, Boolean algebra and simplified digital circuits.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in radar systems (9/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in radar systems (9/77). *Version 2:* In the vocational certificate category, 10 semester hours in electricity and electronics (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electronic instrumentation laboratory for engineers or physical science majors, or 2 in applied electronics for non-engineering students (6/74).

NV-1715-0724

ELECTRONICS TECHNICIAN, CLASS A—A-3 (COMMUNICATIONS)

Course Number: *All Versions:* A-102-0010. *Version 2:* A-102-010; A-102-011.

Location: Electronics Technician Class A School, Great Lakes, IL; Electronics Technician Class A School, Treasure Island, CA.

Length: *Version 1:* 5 weeks (172 hours). *Version 2:* 5–8 weeks (150–240 hours).

Exhibit Dates: *Version 1:* 7/74–9/77. *Version 2:* 5/66–6/74.

Objectives: To train enlisted personnel to perform as electronics technicians.

Instruction: Lectures and practical exercises in the operation, maintenance, and repair of electronic equipment, including introduction to communications; HF communication receivers; UHF communications equipment; and specific radio receivers, radio transmitters, special circuits, power supplies, and audio circuits.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in communications equipment (9/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in communications laboratory (9/77). *Version 2:* In the vocational certificate category, 4 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in engineering electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in radio laboratory (6/74).

NV-1715-0725

ELECTRONICS TECHNICIAN, CLASS A—A-3 (RADAR)

Course Number: *All Versions:* A-104-0010; A-104-0011. *Version 2:* A-104-010, A-104-011.

Location: Electronics Technician, Class A School, Great Lakes, IL; Electronics Technician, Class A School, Treasure Island, CA.

Length: *Version 1:* 3 weeks (110 hours). *Version 2:* 5 weeks (150 hours).

Exhibit Dates: *Version 1:* 7/74–9/77. *Version 2:* 5/66–6/74.

Objectives: To train enlisted personnel to perform as electronics technicians.

Instruction: *All Versions:* Lectures and practical exercises in the operation, maintenance, and repair of radar-related electronic equipment, including types of radar and moving-target indicators; review of special circuits; and specific radar set, antenna, synchro, R-F system, receiver, transmitter, and modulator.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in radar electronics (9/77). *Version 2:* In the vocational certificate category, 2 semester hours in electronics laboratory (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in engineering electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electronic instrumentation laboratory (6/74).

NV-1715-0726

U-1700 MAINTENANCE

Course Number: A-150-0108.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 9/77–Present.

Objectives: To train data systems technicians in the operation and maintenance of a UNIVAC 1701 keypunch unit.

Instruction: Lectures and practical exercises in the theory of operation and the maintenance procedures for a UNIVAC card keypunch unit including the mechanical systems, the keyboard, the core memory unit, the block diagrams and the troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in computer I/O equipment operation and repair (11/81).

NV-1715-0727

ELECTRONICS TECHNICIAN, CLASS A (COMMUNICATIONS, RADAR AND SONAR SPECIALTIES)

Course Number: None.

Location: Electronics Technician, Class A School, Great Lakes, IL; Electronics Technician, Class A School, Treasure Island, CA.

Length: 24–26 weeks (720–780 hours).

Exhibit Dates: 1/54–5/62.

Objectives: To train electronic technicians to operate and repair complex communications systems, including radar and sonar systems.

Instruction: Lectures and practical exercises in operation and maintenance of complex communications systems. Course includes basic electrical and electronic circuit theory, block-diagram analysis, and troubleshooting techniques.

Credit Recommendation: In the vocational certificate category, 18 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 9 semester hours in electronics (6/74); in the upper-division baccalaureate category, 3 semester hours in basic electronics, 1 in electrical laboratory as technical electives for non-electrical-engineering majors, or 2 semester hours in electronic instrumentation or radio laboratory for electrical engineering students (6/74).

NV-1715-0728

GUN FIRE CONTROL SYSTEM (GFCS), MK 37, MK 68, MK 56 RADAR SIGNAL PROCESSING EQUIPMENT (RSPE) MAINTENANCE

Course Number: K-113-158.

Location: Fleet Training Center, San Diego, CA.

Length: 6 weeks (180 hours).

Exhibit Dates: 6/71–1/88.

Objectives: To train technicians and designated strikers to operate and maintain radar gun control systems, including GFCS Mk 37, Mk 68, and Mk 56.

Instruction: Lectures and practical exercises in the operation and maintenance of radar gun control systems. Course includes review of basic transistor electronics, primary radar circuitry including IF detection and amplification; automatic target range acquisition and tracking; and logic circuitry.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (6/74); in the upper-division baccalaureate category, 1 semester hour in electronic instrumentation laboratory (6/74).

NV-1715-0729

INTERIOR COMMUNICATIONS (IC) ELECTRICIANS, CLASS A (A-1)

Course Number: A-632-0012.

Location: Interior Communication Electricians, Class A School, San Diego, CA; Interior Communication Electricians, Class A School, Great Lakes, IL.

Length: 18 weeks (510 hours).

Exhibit Dates: 11/65–12/68.

Objectives: To train technicians to operate, maintain and repair shipboard interior communications equipment.

Instruction: Lectures and practical exercises in operation, maintenance, and repair of shipboard interior communications systems and equipment. Course includes DC/AC electrical theory, audio amplifiers, magnetic amplifiers and gyroscopic equipment, block diagrams, signal tracing, and troubleshooting techniques.

Credit Recommendation: In the vocational certificate category, 12 semester hours in electricity or electronics (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours as a technical elective in electronics instrumentation for non-electrical-engineering majors, or 2 in electrical or electronics laboratory for non-electrical-engineering majors, and 1 in electrical laboratory (6/74).

NV-1715-0730

ELECTRONICS TECHNICIAN, CLASS A (COMMUNICATIONS)

Course Number: Not available.

Location: Electronics Technician, Class A Schools, Great Lakes, IL; Electronics Technician, Class A Schools, Treasure Island, CA.

Length: 38 weeks (1140 hours).

Exhibit Dates: 6/62–4/66.

Objectives: To train personnel to maintain a variety of Naval electronic equipment.

Instruction: Lectures and practical exercises in the maintenance of Naval electronic equipment, including electronic fundamentals, electronic circuit fundamentals, transmitter applications, receiver applications, pulse techniques, control systems, microwave techniques, electronic equipments, communication receivers and transmitters, teletype terminal equipment, and single-sideband equipment.

Credit Recommendation: In the vocational certificate category, 28 semester hours in electricity and electronics (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in physics (electricity), 12 in engineering electronics (12/68); in the upper-division baccalaureate category, 6 semester hours in electricity and electronics for non-engineering majors, 3 as a technical elective in electrical or electronic laboratory for non-electrical-engineering students, 1 in instrumentation laboratory for electrical engineering students (6/74).

NV-1715-0731

ELECTRONICS TECHNICIAN, CLASS A (RADAR)

Course Number: Not available.

Location: Electronics Technician, Class A School, Great Lakes, IL; Electronics Technician, Class A School, Treasure Island, CA.

Length: 38 weeks (1140 hours).

Exhibit Dates: 6/62-4/66.
Objectives: To train personnel to maintain electronic equipment.
Instruction: Lectures and practical exercises in the maintenance of electronic equipment, including radar equipment fundamentals, multivibrators, synchronization, oscillators, magnetrons, klystrons, clampers, limiters, and clippers; introduction to radar equipment; primary power distribution; modulator; transmitter; RF system and duplexer; receiver and adapter indicator; radar set control; antenna and synchro systems; equipment review; and block diagram of a specific radar set.
Credit Recommendation: In the vocational certificate category, 28 semester hours in electricity and electronics (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in physics (electricity), 12 in engineering electronics (12/68); in the upper-division baccalaureate category, 6 semester hours in electricity and electronics for non-engineering students, 3 as a technical elective for non-electrical-engineering students, 1 in instrumentation laboratory for electrical engineers (6/74).

NV-1715-0732

RA-5C Flight Control System Electronics (Intermediate Maintenance)

Course Number: Not available.
Location: Air Maintenance Training Detachment, Sanford, FL.
Length: 6 weeks (240 hours).
Exhibit Dates: 9/67-1/88.
Objectives: To train maintenance personnel to maintain and service the RA-5C flight control system.
Instruction: Lectures and practical exercises in the maintenance of the RA-5C flight control system. Course includes hydraulic and airflow systems., directional control systems, flight control systems, and use of training units, meters, and oscilloscopes.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (7/74).

NV-1715-0733

A-4 Walleye Weapon Delivery System

Course Number: Not available.
Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.
Length: 3 weeks (120 hours).
Exhibit Dates: 11/67-1/88.
Objectives: To train enlisted personnel to maintain and repair the Walleye weapons system.
Instruction: Lectures and practical exercises in the maintenance and repair of the Walleye weapons system. Course includes logic systems, power generators, instrumentation usage, system familiarization, and troubleshooting procedures.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1715-0734

TT-299B/UG Teletypewriter Set Maintenance (Enlisted)

Course Number: F-101-018.
Location: Submarine School, Groton, CT.
Length: 4 weeks (120 hours).
Exhibit Dates: 8/67-12/68.
Objectives: To train submarine radiomen and submarine tender personnel to repair the TT-299B/UG teletypewriter set.
Instruction: Lectures and practical exercises in planned and corrective maintenance of a specific teletypewriter set, including introduction to specific teletypewriter set; mechanical function of the keyboard; nomenclature; analysis of the printer main shaft; electromechanical function of the magnetic selector; functional purpose of the start clutch and range selector; mechanical functions of the printing mechanism and the print-and-advance prevent mechanism; mechanical operations of specific functions; and preparation for adjustments and tool kit inventory.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1715-0735

Automatic Electric—Strowger Switching Telephone Systems Maintenance, Class C1

Course Number: A-623-0044.
Location: Service School Command, Great Lakes, IL.
Length: 6 weeks (173 hours).
Exhibit Dates: 12/74-8/79.
Objectives: To train personnel in the maintenance, repair and checkout of automatic electric telephone systems.
Instruction: Areas of instruction include the Strowger Switch telephone system, relaying fundamentals, analysis of system design, priorities and faults.
Credit Recommendation: In the vocational certificate category, 3 semester hours in telephone switch gear (9/77).

NV-1715-0736

KC-130-F S-5 Automatic Pilot and Related Instruments Intermediate Maintenance

Course Number: Not available.
Location: Air Maintenance Training Detachment, El Toro, CA.
Length: 2 weeks (80 hours).
Exhibit Dates: 7/68-1/88.
Objectives: To train enlisted personnel to repair and maintain the automatic pilot installed in the KC-130F aircraft.
Instruction: Lectures and practical exercises in the repair and maintenance of the automatic pilot installed in KC-130F aircraft. Course includes MA-1 compass operation (electronics), and the operation of the SA-5 automatic pilot.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1715-0737

F-8 Automatic Flight Control System Intermediate Maintenance

Course Number: Not available.
Location: Air Maintenance Training Detachment, Miramar, CA.
Length: 2 weeks (80 hours).
Exhibit Dates: 11/70-1/88.
Objectives: To train maintenance personnel to troubleshoot and repair F-8 automatic flight control systems.
Instruction: Lectures and practical exercises in the maintenance and repair of F-8 automatic flight control systems. Course includes a review of vacuum tube theory, transistor theory, aerodynamics, and test equipment operation.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics laboratory (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (7/74).

NV-1715-0738

H-53 Automatic Flight Controls Systems Intermediate Maintenance

Course Number: C-602-3442.
Location: Air Maintenance Training Detachment, Santa Ana, CA.
Length: 2 weeks (80 hours).
Exhibit Dates: 5/70-1/88.
Objectives: To train enlisted personnel who have had previous training in transistor fundamentals to operate and maintain at the intermediate level the automatic flight control system installed in H-53 aircraft.
Instruction: Lectures and practical exercises in the operation and maintenance of the automatic flight control system installed in the H-53 aircraft, including attitude-indicating system components, stick trim system, amplifier circuit analysis, synchronizer circuits, control box wiring, detailed analysis of circuits, test procedures and test equipment.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (7/74).

NV-1715-0739

P-3 Communication/Navigation Organizational Maintenance

Course Number: Not available.
Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.
Length: 2 weeks (80 hours).
Exhibit Dates: 7/70-1/88.
Objectives: To train fleet maintenance personnel to operate and maintain P-3 communication/navigation systems.
Instruction: Lectures and practical exercises in the operation and maintenance of P-3 communication/navigation systems, including high-, very-high-, and ultra-high-frequency communications circuits; recorders and teletypewriter group components and maintenance; radio navigation electronic circuitry (automatic direction finder, radar altimeter, Loran and TACAN equipment, beacon receiving set, and various indicator groups); and navigation systems, including computer groups.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (7/74).

NV-1715-0740

Mine Detection Sonar Technical Maintenance

Course Number: C-570.
Location: Fleet Sonar School, San Diego, CA.
Length: 4 weeks (120 hours).
Exhibit Dates: 4/55-12/63.
Objectives: To train enlisted personnel who have electronics backgrounds to operate, test, and repair mine detection sonar.
Instruction: Lectures and practical exercises in the operation, testing, and repair of mine detection sonar, including test equipment (meters, tube testers, oscilloscopes, signal generators, and C & R bridges), special circuits (power supplies, diodes and triodes, multivibrators, synchros, and DC

generators), specific equipment components, AC and DC power, troubleshooting procedures, receiver and transmitter functions, servo systems, and calibration and alignment procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in electrical laboratory (7/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (7/74).

NV-1715-0741

Automatic Flight Control System (AN/ASW-15) and Air Data Computer (560T27-1) Organizational Maintenance

Course Number: C-602-3496.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 1/72–1/88.

Objectives: To train electricians to maintain and repair C-2A aircraft air data computers.

Instruction: Lectures and practical exercises in C-2A aircraft air data computer maintenance and repair, including flight controls, components description and operation, system operation, and preflight checks.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1715-0742

Marine Air Traffic Control Maintenance Supervisor Training, Class C

Course Number: Not available.

Location: Air Technical Training Center, Glynco, GA.

Length: 3 weeks (120 hours).

Exhibit Dates: 5/70–1/88.

Objectives: To train electronics technicians to supervise the installation, maintenance, and repair of air traffic control systems.

Instruction: Lectures and practical exercises in air traffic control systems installation, maintenance, and repair, including system characteristics, system siting, flight inspections, maintenance policies, naval supply system, and maintenance funds administration.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (7/74).

NV-1715-0743

Naval Air Weapons Systems Orientation, Class O

Course Number: Not available.

Location: Air Technical Training Center, Jacksonville, FL.

Length: 8 weeks (320 hours).

Exhibit Dates: 8/57–12/68.

Objectives: To train enlisted personnel to supervise naval air weapons systems maintenance in operational aircraft squadrons.

Instruction: Lectures and practical exercises in naval air weapons systems maintenance, including aircraft armament control systems, air-launched guided missiles, electronic circuitry, fire control systems, all-weather aero-armament control system, missile systems introduction, and maintenance administration.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (7/74).

NV-1715-0744

Aviation Ordnance Officers, Class O

Course Number: Not available.

Location: Air Technical Training Center, Jacksonville, FL.

Length: 10 weeks (400 hours).

Exhibit Dates: 1/53–12/68.

Objectives: To train officers to be aviation ordnance officers.

Instruction: Lectures and practical exercises in electricity and electronics, aviation fire control systems, aircraft munitions, turrets, machine guns, and torpedoes.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electricity and electronics (7/74).

NV-1715-0745

AN/SPS-40B/C/D Radar Set Difference Maintenance (Electronics Technician, Class C1)

Course Number: A-104-0164.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 4 weeks (120 hours).

Exhibit Dates: 7/76–1/88.

Objectives: To provide the skills and knowledge necessary to maintain the AN/SPS-40B/C/D radar set.

Instruction: Course teaches maintenance of the AN/SPS-40B/C/D radar set; power control and distribution, air system, cooling system, antenna system, timing and trigger generation, frequency generation, low- and high-power transmitting group, receiver system, and test functions.

Credit Recommendation: In the vocational certificate category, 1 semester hour in communication system, 1 in electronics laboratory (11/77).

NV-1715-0746

E-2A AN/ASQ-58 Integrated Electronic Central UHF RT-542/ASQ and RT-559/ASQ Power Supply-AM-2310/ASQ Intermediate Maintenance

Course Number: C-102-3473.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 4/68–1/88.

Objectives: To train maintenance personnel to maintain UHF equipment and power supplies.

Instruction: Lectures and practical exercises in the maintenance of UHF equipment and power supplies, including transceiver block diagrams, circuit analysis, theory of operation, power distribution, and automatic equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics (3/74).

NV-1715-0747

SH-3A/D AN/AQS-13A Sonar Intermediate Maintenance

Course Number: C-130-3396.

Location: Air Maintenance Training Detachment, North Island, San Diego, CA; Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, Quonset Point, RI; Air Maintenance Training Detachment, Imperial Beach, CA.

Length: *Version 1:* 7 weeks (280 hours). *Version 2:* 6 weeks (240 hours).

Exhibit Dates: *Version 1:* 10/76–Present. *Version 2:* 11/72–9/76.

Objectives: To train fleet maintenance personnel in the maintenance of the AN/AQS-13A sonar system.

Instruction: *Version 1:* Upon completion of the course, the student will be able to troubleshoot, repair and maintain the following components of a specific sonar system at the board or component level: system timers, transmitter/receiver, power supply circuit, transducer circuit, underwater voice communication circuit, and minimum performance testing and alignment. *Version 2:* Lectures and practical exercises in the maintenance of a specific sonar system, including introduction, associated test equipment, power supply, transmit and receive circuitry, video display, reeling machine and associated circuit analysis, minimum performance standards test, and troubleshooting.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in marine electronics repair and maintenance, 1 in electronics laboratory (4/85). *Version 2:* In the vocational certificate category, 3 semester hours in electrical laboratory (7/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory on the basis of institutional evaluation (7/74).

NV-1715-0748

RA-5C Photo Reconnaissance System Organizational Maintenance (RA-5C Photo Reconnaissance Line Maintenance)

Course Number: C-100-3748.

Location: Air Maintenance Training Detachment, Albany, GA; Air Maintenance Training Detachment, Sanford, FL.

Length: 4 weeks (152–160 hours).

Exhibit Dates: 9/67–1/88.

Objectives: To train selected enlisted personnel to maintain and repair the RA-5C photographic reconnaissance system.

Instruction: Lectures and practical exercises in the maintenance and repair of the RA-5C photographic reconnaissance system. Course includes knowledge of camera-system parts, function and control; familiarity of appropriate cameras designed to work with the system; and malfunction detection.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1715-0749

AN/SPS-29E Radar Set Maintenance (Electronics Technician, Class C1)

Course Number: A-104-0151.

Location: Service School Command, San Diego, CA.

Length: 9 weeks (272–360 hours).

Exhibit Dates: *Version 1:* 5/79–Present. *Version 2:* 9/75–4/79.

Objectives: To provide the skills and knowledge necessary to maintain the AN/SPS-29E radar set.

Instruction: Topics include operation and maintenance of the AN/SPS-29E radar set and the AN/SPA-62 receiver; AC and DC distribution, cooling and air pressurization function, monitoring function, trigger generating function, transmitter group, antenna function, normal realignment group, canceller, and integrator groups.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in circuit and pneumatic system troubleshooting (5/82). *Version 2:* In the vocational certificate category, 3 semester hours in communications systems, 2 in electronics laboratory (11/77).

NV-1715-0750

RF-4B Camera Control System
Organizational Maintenance

Course Number: C-198-3831.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/71-1/88.

Objectives: To train enlisted personnel in RF-4B aircraft camera control system maintenance.

Instruction: Lectures and practical exercises in RF-4B aircraft camera control system maintenance, including preflight procedures, camera control system components, reconnaissance camera loading, installation and removal of cameras and associated equipment, and maintenance procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1715-0751

RF-4B Photographic Film Correlator-Processor Set ES-55A
Intermediate Maintenance

Course Number: C-198-3833.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train maintenance personnel to maintain the ES-55A correlator-processor.

Instruction: Lectures and practical exercises in ES-55A correlator-processor set maintenance, including side-looking radar (SLR) fundamentals, optical and electrical system functions, maintenance procedures, and troubleshooting and calibration procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1715-0752

RF-4B Camera Control System
Intermediate Maintenance

Course Number: C-198-3832.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 7 weeks (280 hours).

Exhibit Dates: 3/68-1/88.

Objectives: To train experienced maintenance personnel to operate, troubleshoot, repair, and maintain the RF-4B camera control system at the intermediate level.

Instruction: Lectures and practical exercises in the operation, troubleshooting, repair, and maintenance of the RF-4B camera control system, including basic electronics review, camera control panels, photographic system power, optical viewfinder, aircraft parameter control, still-picture camera equipment, low- and high-altitude panoramic camera components, aircraft camera mount set, test equipment, and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0753

1. Data Systems Technician, Class A
2. Data Systems Technician, Class A, Phase A-1
3. Data Systems Technician, Class A (DS "A")

Course Number: A-150-0025.

Location: *All Versions:* Naval School, Mare Island, CA. *Version 2:* Naval School, Great Lakes, IL.

Length: *Version 1:* 22 weeks (925 hours). *Version 2:* 18 weeks (720 hours). *Version 3:* 38 weeks (1140 hours).

Exhibit Dates: *Version 1:* 4/79-9/86. *Version 2:* 1/70-3/79. *Version 3:* 6/62-12/69.

Objectives: To train enlisted personnel to maintain data processing equipment.

Instruction: *Version 1:* Lectures and practical exercises in basic digital concepts and computer systems troubleshooting and operation. The course includes whole number system conversions, arithmetic operations in base 2, 8, 10, 16, one's and two's compliment arithmetic, operation of simple logic gates in terms of truth tables and Boolean expressions, deriving Boolean expressions of logic circuits with Karneough maps simplification techniques, FF and basic register operation, counters, shift registers, data transfer methods, arithmetic circuits, computer timing circuits, Core memory systems, DA, AD and synchro-servo input/output systems operation, machine language programming and troubleshooting of a COMTRAN 10 digital trainer followed by similar training on a 16-bit computer. *Version 2:* Lectures and practical exercises in vacuum tube and transistor circuits, Boolean algebra, logic equation reduction, number systems, counters and registers, input/output devices, storage devices, and computer programming using the CP-788/GYK. The programming taught in this course is not directly applicable to commercial machines. (See NV-1715-0043, NV-1715-0044 and NV-1715-0045 for Phase A-2, Parts I, II, and III respectively.) *Version 3:* Part 1 of this course consists of the first 28 weeks of the Electronics Technician, Class A program (NV-1715-0730 or NV-1715-0731). Part 2 (10 weeks) includes data processing system functions, digital computer mathematics, digital computer programming, symbolic logic and Boolean algebra, data storage, input/output devices, digital control concepts, operation and application of dual-trace oscilloscope to digital computer maintenance, printed circuit board repair, and analog-to-digital conversion.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in basic digital electronics, 3 in computer organization and architecture and 2 in computer systems laboratory (1/82). *Version 2:* In the vocational certificate category, 12 semester hours in computers (3/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in computers (3/74). *Version 3:* In the vocational certificate category, 28 semester hours in electricity and electronics, 2 in digital computer programming, and 4 in digital computer repair and digital laboratory (7/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in physics (electricity), 12 in engineering electronics (12/68), 1 in digital computer programmming, and 2 in digital computer repair laboratory (7/74); in the upper-division baccalaureate category, 6 semester hours in electricity and electronics, 3 as a technical elective in electronics, 1 in introduction to digital computers, and 1 in digital computer laboratory (7/74).

NV-1715-0754

Electronics Technician, Class C7
(Electronics Technician, Class B)
(ET,B)

Course Number: A-100-0016, A-100-0017.

Location: Service School Command, San Diego, CA. Electronics Technician, Class B School, Treasure Island, CA. Electronics Technician, Class B School, Great Lakes, IL.

Length: *Version 1:* 28 weeks (1120 hours). *Version 2:* 27 weeks (810 hours). *Version 3:* 39 weeks (1170 hours). *Version 4:* 45 weeks (1350 hours). *Version 5:* 46 weeks (1380 hours).

Exhibit Dates: *Version 1:* 1/82-Present. *Version 2:* 1/75-12/81. *Version 3:* 12/71-12/74. *Version 4:* 7/69-11/71. *Version 5:* 6/62-6/69.

Objectives: To provide the basic theory necessary in the training of electronics technicians.

Instruction: *Version 1:* Lectures and practical exercises in basic mathematics, including simple right angle trigonometry, logarithms, complex numbers, Boolean algebra, all pertaining to electronics theory. Technical topics include AC/DC circuit theory and theorems, transients, solid state devices, signal and power amplifiers, power supplies, communication circuits, transmission lines, antenna, microwave devices and radar systems, navigation systems, digital devices, computer fundamentals, soldering techniques and training in supervision and management. *Version 2:* Lectures in basic mathematics including trigonometry, logarithms, complex numbers, Boolean algebra, as they pertain to electronics theory. Technical topics include AC/DC theory, transients, solid state devices, coupled circuits, synchros, servos, navigation and radar systems, and training in supervision and management. *Version 3:* Topics include direct current analysis, review mathematics for electronics, analysis of transient responses, vacuum tubes, solid-state devices, coupled circuits, multivibrators, time-base generators, synchros and servos, computers, communications, test equipment, communications system testing, continuous- and pulsed-wave radar systems, radar special circuits, navigation systems, and supervision and management. *Version 4:* Topics include review mathematics, circuits, basic algebra, matrix algebra, mathematics, applied technical mathematics, semiconductors, capacitance, inductance, circuit analysis, transient analysis, resonance, coupled circuits, vacuum tubes, power supplies, limiters, tuned power amplifiers, oscillators and frequency generation, communications test procedures, propagation, antennas, microwave devices, and computer logic circuits. *Version 5:* Topics include applied mathematics, electronic fundamentals and advanced fundamentals, calculus, inductance, capacity, resonance, transient analysis, vacuum and gas tubes, semiconductor devices, coupled circuits, graphical and small signal analysis, circuit applications, power supplies, multivibrators, voltage and current time-base generators, oscillators, communications systems, antenna theory, waveguides, transmission lines, propagation, radar systems and basic computers, klystrons and magnetrons, synchro and servo systems, radar principles, Boolean algebra, navigational and identification system, digital and analog computers, electronic countermeasures, and electronic administration.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in technical algebra, 6 in AC/DC circuit analysis, 6 in electronic devices and systems, 1 in operational amplifier theory, 3 in electronic communication, 3 in radar and microwave theory, 4 in digital and computer fundamentals and 1 in soldering laboratory (5/82). *Version 2:* In the lower-division baccalaureate/associate degree category, 20 semester hours in electronics technician training and 2 in humanities (industrial relations) (11/77). *Version 3:* In the vocational certificate category, 12 semester hours in mathematics and 20 in electronics (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in business organization and management, 12 in engineering electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in mathematics, 5 in electronics (7/74). *Version 4:* In the vocational certificate category, 12 semester hours in mathematics and 20 in electronics (7/74); in the lower-division baccalaureate/associate degree category, 12 in engineering electronics (12/68); in the upper-division baccalaureate category, 4 semester hours in mathematics, 6 in electronics (7/74). *Version 5:* In the vocational certificate category, 12 semester hours in mathematics and 20 in electronics (7/74); in the lower-division baccalaureate/associate degree category, 12 semester hours in engineering electronics, 4 in mathematics (12/68); in the upper-division baccalaureate category, 3 semester hours in mathematics, 5 in electronics (7/74).

NV-1715-0755

Interior Communications (IC) Electrician, Class C7
(Interior Communications (IC) Electrician, Class B)

Course Number: A-623-0013.

Location: Naval Training Center, Great Lakes, IL.

Length: *Version 1:* 20 weeks (700 hours). *Version 2:* 26 weeks (850 hours). *Version 3:* 30 weeks (900 hours). *Version 4:* 24 weeks (746 hours). *Version 5:* 34 weeks (1,020 hours).

Exhibit Dates: *Version 1:* 10/80–5/87. *Version 2:* 12/77–9/80. *Version 3:* 4/71–11/77. *Version 4:* 9/69–3/71. *Version 5:* 7/63–8/69.

Objectives: To train students in the basic electrical and electronic skills necessary to maintain, troubleshoot, repair, align, and calibrate the electrical equipment found aboard a ship.

Instruction: For this course after 5/87 see NV-1715-1296. *Version 1:* Lectures and practical exercises in AC and DC circuits, magnetics, semi-conductors, digital logic and logic circuits, static control devices, syncros and mechanical devices, and repair, calibration, troubleshooting and aligning of electrical, electronic and mechanical systems used in the operation of a ship. *Version 2:* Lectures and practical exercises in AC and DC circuits, semiconductors, digital logic and logic circuits, static control devices, syncros and mechanical devices, and repair, calibration, troubleshooting and aligning of electrical, electronic and mechanical systems used in the operation of a ship. *Version 3:* Lectures and practical exercises in the repair, calibration, troubleshooting, and aligning of numerous electrical and electronic systems used in the operation of a ship. *Version 4:* Covers review of algebra; DC and AC series and parallel circuits; principles of magnetism; use of basic meters and the oscilloscope; RL, RC, and RLC circuits; transformer theory; electron tubes and semiconductors; operating characteristics of tube-type power supplies, audio, push-pull, and feedback amplifiers and cathode followers, solid-state power supplies, amplifiers, regulators, pulse-shaping circuits, and oscillators; basic logic operations; diode gate and DCTL circuit equivalents; inverters, clocks counters, half and full adders, and memory devices. *Version 5:* Topics include those in version 2, with considerable effort devoted to shipboard electrical and electronic systems, including motors, sound systems, syncros, magnetic amplifiers, monitoring systems, and power switchgear. There is much less emphasis on transistor circuits and digital logic.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in AC/DC circuits, 2 in digital logic and 3 in electromechanical systems (1/82). *Version 2:* In the vocational certificate category, 2 semester hours in computer technology, 7 in electricity and electronics, and 7 in electrical and electronics laboratory (9/77); in the lower-division baccalaureate/associate degree category, 3 in electricity and electronics and 1 in electronics laboratory (9/77). *Version 3:* In the vocational certificate category, 8 semester hours in electronics laboratory (7/74); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (7/74). *Version 4:* In the vocational certificate category, 8 semester hours in electricity and electronics (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics on the basis of institutional evaluation (7/74); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (7/74). *Version 5:* In the vocational certificate category, 6 semester hours in electricity and electronics (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics, and credit in electrical laboratory on the basis of institutional evaluation (12/68); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (7/74).

NV-1715-0756

AN/SPS-29C Radar Set Maintenance
(Electronics Technician, Class C1)

Course Number: A-104-0150.

Location: Service School Command, San Diego, CA.

Length: 9 weeks (272 hours).

Exhibit Dates: 3/75–1/88.

Objectives: To train selected personnel to maintain a radar system in a high degree of readiness.

Instruction: Course concentrates on familiarization and operation of a radar set and on the functional analysis and maintenance of that set. Includes AC/DC power distribution, cooling modulation, transmitting/receiving, ranging, tuning, and countermeasures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics (11/77).

NV-1715-0757

E-2B Weapon System Specialist Organizational Maintenance

Course Number: C-150-3482.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 9–12 weeks (384 hours).

Exhibit Dates: 5/71–1/88.

Objectives: To train technicians to isolate, maintain, and repair the E-2B weapon system.

Instruction: Lectures and practical exercises in the isolation, maintenance, and repair of the E-2B weapon system. Course includes general avionics, IFPM, ATDS communications and navigation, ATDS detection, and control and display.

Credit Recommendation: In the vocational certificate category, 4 semester hours as an elective in instrument repair (8/74); in the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in instrument repair (8/74).

NV-1715-0758

Surface Missile Systems, Officer

Course Number: Not available.

Location: Guided Missiles School, Dam Neck, VA; Naval Schools Command, Mare Island, CA.

Length: 11 weeks (330 hours).

Exhibit Dates: 2/68–12/78.

Objectives: To train enlisted personnel to operate fire control, missile battery, and surface missile systems.

Instruction: Lectures and practical exercises in the operation of surface missile weapons systems. Course includes equipment engineering, systems engineering, and weapon system management.

Credit Recommendation: Insufficient data for evaluation (8/74).

NV-1715-0759

Disturbed Line of Sight Gunfire Control System Maintenance

Course Number: J-113-1062.

Location: Fleet Anti-Air Warfare Training Center, Dam Neck, VA.

Length: 3 weeks (105 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train enlisted personnel to maintain and adjust disturbed-line-of-sight gunfire control systems.

Instruction: Lectures and practical exercises in disturbed-line-of-sight gunfire control systems maintenance and adjustment, including use of schematic prints and diagrams, concept and application of planned maintenance system, system data flow, power distribution, lead-computing gunsights, antenna-positioning system, gun order computations, and radar functional description, testing, adjustment, and troubleshooting procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours as an elective in electricity or electronics (8/74).

NV-1715-0760

Mk 113 Mod 7 Fire Control System (FCS) Maintenance
(Underwater Fire Control System (FCS) Technician (Torpedoes) Mk 113 Mod 7)

Course Number: A-113-0045; A-113-0017; A-113-0038.

Location: Guided Missiles School, Dam Neck, VA.

Length: 17–19 weeks (541–595 hours).

Exhibit Dates: 10/70–1/88.

Objectives: To train enlisted personnel to operate and maintain underwater fire control systems.

Instruction: Lectures and practical exercises in the operation and maintenance of underwater fire control systems, including analog computations, digital equipment, and system casualty analysis.

Credit Recommendation: elective in computer science (8/74). In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electronics, 3 as an elective in computer science (8/74).

NV-1715-0761

UH-2A/B Tactical Air Navigation (TACAN) AN/ARN-52(V)

Course Number: Not available.

Location: Air Maintenance Training Detachment, Ream Field, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 2/66–12/68.

Objectives: To train maintenance personnel to maintain and troubleshoot the AN/ARN-52 tactical air navigation (TACAN) trainer.

Instruction: Lectures and practical exercises in the operation, maintenance, and servicing of the AN/ARN-52 TACAN trainer, including circuitry procedures, power distribution and supply, block-diagram analysis, channel-servo operation, video decoder, and range circuits theory.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electricity or electronics (8/74).

NV-1715-0762

Mk 27 Gyrocompass Maintenance, Class C

Course Number: A-670-0026.

Location: Development and Training Center, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 3/74–1/88.

Objectives: To train personnel with previous electrical training to maintain the MK 27 gyrocompass.

Instruction: Lectures and practical exercises in the principles, maintenance, and repair of the MK 27 gyrocompass and instruction on the use of required test and monitoring equipment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in small equipment repair (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic instrumentation (6/75).

NV-1715-0763

Launcher Technician

Course Number: A-633-0016.

Location: Guided Missiles School, Dam Neck, VA.

Length: 11 weeks (384 hours).

Exhibit Dates: 2/71–5/76.

Objectives: To provide training in all weapon systems in use aboard Fleet Ballistic Missile (FBM) submarines.

Instruction: Classroom and laboratory instruction in submarine subsystems, including hydraulics, pneumatics, electric power generation, and engineering power plant; navigational subsystems; fire control; rockets and missiles; missile guidance and flight control; mechanical and electrical launcher subsystems; and electrical, power, and hydraulic test and calibration equipment.

Credit Recommendation: In the vocational certificate category, 4 semester hours in hydraulic, pneumatic, or electrical systems (6/75); in the lower-division baccalaureate/associate degree category, 6 semester hours in hydraulic, pneumatic, or electrical systems (6/75); in the upper-division baccalaureate category, 4 semester hours in hydraulic, pneumatic, or electrical systems (6/75).

NV-1715-0764

DLG 6-16 Combat System

Course Number: A-121-0189.

Location: Guided Missiles School, Dam Neck, VA.

Length: 10 weeks (330 hours).

Exhibit Dates: 10/72–12/81.

Objectives: To provide instruction for senior maintenance supervisors in the integration of the DLG 6-16 Combat System.

Instruction: Lectures and practical exercises in the operation and interface of the various subsystems of the DLG 6-16 Combat System.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/75).

NV-1715-0765

RF-4B Shoehorn Organizational Maintenance

Course Number: C-102-3831; C-102-0242.

Location: Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 4 weeks (160 hours).

Exhibit Dates: 8/69–1/88.

Objectives: To train fleet maintenance personnel to maintain the Shoehorn aircraft radar system.

Instruction: Lectures and practical exercises in the Shoehorn aircraft radar system, including radar review, logic symbology, corrosion control, introduction to planned maintenance, and decibels; and purpose, components, operational block diagrams, and interface and test equipment of the radar homing and warning system, the radar receiver, the countermeasures set, the countermeasures receiver and transmitter, the tagging and blanking unit, and the countermeasures chaff dispenser set.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0766

Electronics Maintenance (Officers) (Electronics Officers (Maintenance))

Course Number: Not available.

Location: Electronics Officers School, Great Lakes, IL.

Length: *Version 1:* 48 weeks (1440 hours). *Version 2:* 52 weeks (1620 hours).

Exhibit Dates: *Version 1:* 12/63–12/68. *Version 2:* 1/58–11/63.

Objectives: To provide officers who have electronics backgrounds with advanced training in electronics and management skills.

Instruction: *All Versions:* Lectures and practical exercises in mathematics, including algebra and trigonometry; basic electricity and electronics, including circuit analysis, motors, generators, power supplies, vacuum tubes, amplifiers, and oscillators; and modulation and detection, energy transmission, servomechanisms, and test equipment operation. *Version 1:* Instruction includes calculus, physics, digital numbers, and Boolean algebra, and semiconductors. *Version 2:* Instruction emphasizes special equipment operation.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 24 semester hours in electricity or electronics, 9 in mathematics, 8 in physics (3/74); in the upper-division baccalaureate category, 5 semester hours in mathematics, 3 in physics, 10 in engineering electronics (12/68). *Version 2:* In the lower-division baccalaureate/associate degree category, 15 semester hours in electricity or electronics, 6 in mathematics (3/74); in the upper-division baccalaureate category, 5 semester hours in mathematics, 3 in physics, 10 in engineering electronics (12/68).

NV-1715-0767

Light Airborne Multi-Purpose System (LAMPS) Sensor Operator

Course Number: D-210-0020.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA.

Length: 5 weeks (182 hours).

Exhibit Dates: 4/68–1/88.

Objectives: To train antisubmarine airborne crewmembers in the operation of electronic sensor equipment.

Instruction: Lectures and laboratory exercises in the operation of electronic sensor equipment, characteristics of underwater sound signals, analysis of target signals, radar fundamentals and operation, and active and passive acoustics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (6/75).

NV-1715-0768

Tactical Electronic Warfare

Course Number: D-00-0032.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA.

Length: 5 weeks (200 hours).

Exhibit Dates: 4/68–1/88.

Objectives: To train pilots and flight officers in the concepts, planning, and techniques of electronic warfare.

Instruction: Classroom and practical training in active and passive electronic warfare policies and tactics and operation of various electronic warfare systems and equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics (6/75).

NV-1715-0769

E-2B Detection System Organizational Maintenance

Course Number: C-104-3471.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/73–1/88.

Objectives: To train electronics technicians in the maintenance of the E-2B detection system.

Instruction: Instruction in radar principles, data acquisition, encoding, troubleshooting, and test instrument usage.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (6/75).

NV-1715-0770

ASROC Launching Group Mk 16 Maintenance, Class C1 (ASROC Launching Group Mk 16)

Course Number: A-121-0010.

Location: Gunner's Mate Class C, Great Lakes, IL.

Length: *Version 1:* 13 weeks (520 hours). *Version 2:* 10 weeks (450 hours).

Exhibit Dates: *Version 1:* 4/80–Present. *Version 2:* 10/69–4/76.

Objectives: To provide gunner's mates with training in the maintenance, adjustment, and operation of the Launching Group Mk 16.

Instruction: Lectures and practical exercises in ASROC weapon system, launching group Mk 16, administration and supply, stand Mk 107 and carriage Mk 7, relay transmitters, power train, power drive amplifier, elevation power drive, launcher and missile simulator and checkout, hydraulic and electronic systems, and hydraulic and pneumatic devices.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electro-mechanical maintenance (1/82). *Version 2:* In the vocational certificate category, 4 semester hours in electro-mechanical laboratory (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in electro-mechanical laboratory (6/75).

NV-1715-0771

AIR TRAFFIC CONTROL CENTER
EQUIPMENT MAINTENANCE
AN/TRN-28, CLASS C

Course Number: C-103-2027.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN; Air Technical Training Center, Glynco, GA.

Length: 5–7 weeks (200 hours).

Exhibit Dates: 4/73–12/83.

Objectives: To train technicians to maintain specific electronic air traffic control equipment.

Instruction: Lectures and practical exercises in block diagram analysis, troubleshooting techniques, electronic circuitry, encoding, transmission and system alignment, and drive development on the AN/TRN-28 system.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronic systems repair (2/81).

NV-1715-0772

INDEPENDENT VARIABLE DEPTH SONAR
HOIST AN/SQA-13 MAINTENANCE
(AN/SQA-13 (V) Independent Variable Depth Sonar Operation and Maintenance)

Course Number: *Version 1:* K-041-2019. *Version 2:* K-041-124.

Location: Fleet Training Center, San Diego, CA.

Length: *Version 1:* 4 weeks (120 hours). *Version 2:* 2 weeks (60 hours). *Version 3:* 3 weeks (90 hours).

Exhibit Dates: *Version 1:* 1/81–Present. *Version 2:* 1/74–12/80. *Version 3:* 6/71–12/73.

Objectives: To train personnel to operate, maintain, and repair a variable depth sonar hoist mechanism.

Instruction: *All Versions:* Lectures and practical exercises in basic hydraulics and specialized subassemblies related to a military sonar hoist mechanism. *Version 1:* Includes principles of hydraulics, static hydraulic components, hydraulic pumps, control devices and accessories. *Version 2:* Includes basic electricity.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in machinery hydraulics (5/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in hydraulics (fluid statics) (5/82). *Version 2:* Credit is not recommended because of the limited technical nature of the course (6/75). *Version 3:* In the vocational certificate category, 1 semester hour in basic electrical laboratory (6/75).

NV-1715-0773

AN/ARC-52 RADIO SET INTERMEDIATE
MAINTENANCE

Course Number: C-102-3019.

Location: *All Versions:* Air Maintenance Training Detachment, Jacksonville, FL. *Version 2:* Air Maintenance Training Detachment, Meridian, MS; Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Santa Ana, CA; Air Maintenance Training Detachment, Quonset Point, RI; Air Maintenance Training Detachment, Imperial Beach, CA; Air Maintenance Training Detachment, Norfolk, VA; Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: *Version 1:* 1/80–Present. *Version 2:* 12/70–12/79.

Objectives: To provide maintenance personnel with the technical knowledge necessary to maintain a specific military radio set.

Instruction: Lectures and practical exercises in the operation of the AN/ARC-52 radio receiver and transmitter with instruction in diagnosis, troubleshooting, maintenance, and repair of specific subsections of the equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in electronics laboratory (3/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in aviation radio/transceiver repair or 1 semester hour in aviation radio communication repair (3/82). *Version 2:* In the vocational certificate category, 2 semester hours in basic communications laboratory (6/75).

NV-1715-0774

1. AN/AQA-7(V) 1,2 AND 3 SONAR COMPUTER RECORDER GROUP AND AN/ASA-76 GENERATOR-TRANSMITTER GROUP INTERMEDIATE MAINTENANCE
2. AN/AQA-7 (V) SONAR COMPUTER-RECORDER GROUP INTERMEDIATE MAINTENANCE

Course Number: C-102-3075.

Location: *All Versions:* Air Maintenance Training Detachment, Moffett Field, CA. *Version 1:* Air Maintenance Training Detachment, Jacksonville, FL. *Version 2:* Air Maintenance Training Detachment, Patuxent River MD; Air Maintenance Training Detachment, Cecil Field, FL.

Length: *Version 1:* 15 weeks (600 hours). *Version 2:* 11 weeks (440 hours).

Exhibit Dates: *Version 1:* 11/78–Present. *Version 2:* 2/74–10/78.

Objectives: To train experienced personnel in the maintenance and repair procedures for a sonar computer-recorder and the specialized test equipment at the component level.

Instruction: Lectures and practical exercises in the theory, operation, and maintenance of a sonar computer-recorder, including demultiplexer, frequency, multiplier storer, spectrum analyzer-quantizer, and digital memory units to include fault localization, fault isolation, component replacement, disassembly, interchange, reassembly, alignment/adjustment, and safety precautions and checkout procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electronics laboratory and 3 in communications electronics (7/81); in the lower-division baccalaureate/associate degree category, 3 semester hours in digital/analog system operations (7/81). *Version 2:* In the vocational certificate category, 3 semester hours in communications electives; in the lower-division baccalaureate/associate degree category, 1 semester hour in communications laboratory (6/75).

NV-1715-0775

AN/ALR-54 COUNTERMEASURES
RECEIVING SET INTERMEDIATE
MAINTENANCE

Course Number: C-102-3389.

Location: Air Maintenance Training Detachment, Lakehurst, NJ; Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/72–1/88.

Objectives: To provide instruction in the maintenance of electronic countermeasures receiving equipment.

Instruction: Instruction covers theory and practical applications of specific circuits, RF detection, video display, power supplies, logic boards, and filters, and practical exercises in circuit analysis, troubleshooting, and repair.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (6/75); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (6/75).

NV-1715-0776

E-2B ELECTRONIC SYSTEMS
ORGANIZATIONAL MAINTENANCE

Course Number: C-102-3479.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: *Version 1:* 7 weeks (280 hours). *Version 2:* 3 weeks (120 hours).

Exhibit Dates: *Version 1:* 1/81–Present. *Version 2:* 11/73–12/80.

Objectives: To provide maintenance technicians with overall knowledge of a specialized electronics system.

Instruction: *Version 1:* Lectures and laboratory in organizational maintenance of an integrated system incorporating communication, navigation, detection, data link and computer and display equipment. The student will understand electronic and digital circuit operation and perform troubleshooting down to the functional unit level. *Version 2:* Lectures and practical exercises to include block diagram and functional description of communications/navigations system, detection system and data links; system interface; basic operation and troubleshooting; removal and replacement of Weapons Replaceable Assemblies (WRAs); installation procedures; and test equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in integrated electronic/computer systems operation (1/86); In the lower-division baccalaureate/associate degree category, 1 semester hour in digital circuits, 1 in communication/radar circuits, and 1 in electronic circuits (1/86). *Version 2:* In the vocational certificate category, 2 semester hours in electronics laboratory (6/75).

NV-1715-0777

E-2B AIRBORNE TACTICAL DATA SYSTEMS (ATDS) OPERATOR TRAINING

Course Number: D-102-0001.

Location: Carrier Airborne Early Warning Training Squadron 120, Norfolk, VA.

Length: 15 weeks (523 hours).

Exhibit Dates: 1/70–1/88.

Objectives: To provide personnel with basic skills to operate, maintain, and troubleshoot the specialized aircraft tactical data system of the E-2B aircraft.

Instruction: Lectures and practical exercises in block diagram description and troubleshooting procedures for detection; computer, communication, and navigation subsystems; and the aircraft communication and navigation system, with emphasis on test equipment, fault isolation, and basic deployment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electrical laboratory (6/75).

NV-1715-0778

BASIC POINT DEFENSE SURFACE MISSILE SYSTEM

Course Number: A-121-0122.

Location: Combat Systems Technical School Command, Mare Island, CA.

Length: *Version 1:* 14 weeks (560 hours). *Version 2:* 20 weeks (700 hours).

Exhibit Dates: *Version 1:* 3/77–Present. *Version 2:* 9/71–2/77.

Objectives: To train personnel in the operation, maintenance, troubleshooting, and repair of a missile fire control system.

Instruction: *Version 1:* Lectures and practical exercises in the functional understanding of a missile fire control and launcher system. Analysis of circuit diagrams with a general review of amplitude modulation and detection for the purpose of tracing signal paths to isolate system faults using test equipment and schematics. *Version 2:* Lectures and practical exercises in the principles of amplitude modulation and detection, analysis of specialized electronic systems, and maintenance and trouble isolation procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in electronic test and maintenance (11/81); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical test and maintenance (11/81). *Version 2:* In the vocational certificate category, 7 semester hours in electrical test and maintenance (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical test and maintenance (6/75).

NV-1715-0779

1. ELECTRONIC WARFARE TECHNICIAN
   CLASS A, PREVENTIVE
   MAINTENANCE TECHNOLOGY
   (Basic Electronic Technology Training)
2. ELECTRONIC WARFARE
   FUNDAMENTALS AND PREVENTIVE
   MAINTENANCE TECHNOLOGY
   (Electronic Warfare
   Fundamentals/Technology, Class A1)
3. ELECTRONIC WARFARE
   FUNDAMENTALS AND PREVENTIVE
   MAINTENANCE TECHNOLOGY
4. ELECTRONIC WARFARE TECHNICIAN,
   CLASS A (A-1),
   FUNDAMENTALS/BASIC OPERATOR
   (Electronic Warfare Technician, Class
   A (A-1), Fundamentals)

Course Number: *All Versions:* A-102-0093. *Version 1:* A-102-0209. *Version 2:* A-102-0209; A-102-0214. *Version 3:* A-102-0154.

Location: *Version 1:* Naval Technical Training Center, Corry Station, Pensacola, FL. *Version 2:* Naval Technical Training Center, Corry Station, Pensacola, FL. *Version 3:* Naval Technical Training Center, Corry Station, Pensacola, FL. *Version 4:* Schools Command, Treasure Island, CA.

Length: *Version 1:* 17–19 weeks (680–760 hours). *Version 2:* 17–19 weeks (680–760 hours). *Version 3:* 17–19 weeks (680–760 hours). *Version 4:* 17–21 weeks (595–721 hours).

Exhibit Dates: *Version 1:* 9/78–1/86. *Version 2:* 2/77–8/78. *Version 3:* 4/75–1/77. *Version 4:* 3/72–3/74.

Objectives: To provide technicians with the fundamentals of transistor/vacuum tube electronics necessary to maintain and repair electronic warfare systems.

Instruction: *All Versions:* Classroom and laboratory instruction in electronic circuit theory including linear and nonlinear circuits, motors, antennas, power supplies, receiver principles, pulse and video display circuits, deception repeaters, transmission systems, electromagnetic devices, and electronic systems maintenance. *Version 1:* Upon completion of the course, the student will be able to: (1) be familiar with the theory and operation of diodes and bipolar and unipolar transistors (2) be familiar with the theory and operation of power supplies, amplifiers, oscillators, detectors, discriminators, and other signal receiver components (3) be able to troubleshoot and identify failed components through use of multimeters, function generators, oscilloscopes and power meters. *Version 2:* Includes instruction in digital techniques.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic devices, 2 in electronic communications (1/84). *Version 2:* In the vocational certificate category, 3 semester hours in semiconductor devices, 3 in digital techniques, 3 in communications circuits, and 3 in UHF systems (1/77); in the lower-division baccalaureate/associate degree category, credit in semiconductor devices and basic digital systems on the basis of institutional evaluation (1/77). *Version 3:* In the vocational certificate category, 3 semester hours in semiconductor devices, 3 in UHF systems, and 3 in communications circuits (1/77); in the lower-division baccalaureate/associate degree category, credit in semiconductor devices on the basis of institutional evaluation (1/77). *Version 4:* In the vocational certificate category, 3 semester hours in fundamentals of electronic circuit theory (6/75); in the lower-division baccalaureate/associate degree category, 6 semester hours in fundamentals of electronic circuit theory (6/75); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (6/75).

NV-1715-0780

ELECTRONIC WARFARE ELECTRONIC SUPPORT MEASURES SYSTEM MAINTENANCE, CLASS A

(Electronic Warfare Technician AN/WLR-1 Electronic Support Measures System Maintenance)
(Electronic Warfare Technician, Class A (A-2), Electronic Support Measures System Maintenance)

Course Number: A-102-0094; A-102-0221.

Location: *All Versions:* Naval Technical Training Center, Corry Station, Pensacola, FL. *Version 2:* Schools Command, Treasure Island, CA.

Length: *Version 1:* 7–12 weeks (280–480 hours). *Version 2:* 12–14 weeks (360–420 hours).

Exhibit Dates: *Version 1:* 1/77–Present. *Version 2:* 3/72–12/76.

Objectives: To provide electronics technicians with instruction in the operation, maintenance, and repair of electronic countermeasures systems.

Instruction: *Version 1:* Upon completion of the course the student will be able to describe the theory and operation of the system, calibrate, align and make performance tests on the equipment, and troubleshoot and repair the following components and circuitry as found on the AN/WLR-1 ESM system: receivers, omni directional antenna, video system, mechanical components, power supplies, signal generators, interconnects, servos and resolvers, tuners, and other signal processing circuits. *Version 2:* Classroom and laboratory instruction in the use of specialized test equipment and the operation and maintenance of complex electronic circuitry.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in UHF receiver systems, 3 in troubleshooting and maintenance (7/87). *Version 2:* In the vocational certificate category, 4 semester hours in maintenance and repair of electronic systems (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (6/75).

NV-1715-0781

ELECTRONIC WARFARE DECEPTION REPEATER SYSTEMS MAINTENANCE, AN/SLQ-22B(V)1

(Electronic Warfare Deception Repeater Systems Maintenance, AN/SLQ-22A(V)2)
(Electronic Warfare Technician, Class A (A-3), Deception Repeater Systems Maintenance)
(Electronic Warfare Technician, Class A (A-3), Electronic Countermeasures Systems Maintenance)

Course Number: A-102-0236; A-102-0219; A-102-0095.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL; Schools Command, Treasure Island, CA.

Length: 8 weeks (240 hours).

Exhibit Dates: 3/72–10/77.

Objectives: To train technicians in the operation and repair of electronic countermeasures systems.

Instruction: Classroom and laboratory instruction in block diagram theory, circuit analysis, and troubleshooting techniques.

Credit Recommendation: In the vocational certificate category, 4 semester hours in UHF electronics maintenance (1/77).

NV-1715-0782

Electronic Warfare Technician, Class A (A-4), Tactical Operations

Course Number: A-102-0096.

Location: Schools Command, Treasure Island, CA.

Length: 10 weeks (350 hours).

Exhibit Dates: 3/72-1/88.

Objectives: To train technicians in the principles of electronic warfare systems.

Instruction: Classroom and laboratory instruction in electronic warfare analysis and specific hardware systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronic systems repair laboratory techniques (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronic systems repair laboratory techniques (6/75).

NV-1715-0783

Sonar AN/SQS-39 Through 46 and Aspect Maintenance

Course Number: A-130-0043.

Location: Fleet Sonar School, Key West, FL.

Length: 10 weeks (330 hours).

Exhibit Dates: 8/69-1/88.

Objectives: To train personnel to service and maintain a specific military sonar system.

Instruction: Lectures and practical exercises in the operation of a specific sonar system to include troubleshooting, calibration, DC power supply circuits, AC power distribution, time base generators, and other related sonar circuitry.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic electronics (6/75).

NV-1715-0784

Torpedoman's Mate, Class A, Submarine and Surface Prerequisite

Course Number: A-123-0148.

Location: Naval Training Center, Orlando, FL.

Length: 2 weeks (67 hours).

Exhibit Dates: 6/70-1/88.

Objectives: To provide personnel with basic skill-level training in hand tools and electrical measurement devices prerequisite to entry in the Torpedoman's Mate, Class A program.

Instruction: Classroom and practical instruction in common hand tools, basic electricity, VOM's, megohmmeters, and soldering techniques.

Credit Recommendation: In the vocational certificate category, 1 semester hour in basic test equipment (6/75).

NV-1715-0785

Torpedoes Mk 46 Mod 1, Mk 44 Mod 1, and AWTT Mk 32 Organizational Maintenance

Course Number: A-123-0145.

Location: Service Schools Command, Orlando, FL.

Length: 2 weeks (60 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To provide personnel with knowledge of introductory operational and maintenance procedures for torpedoes.

Instruction: Instruction includes physical and operational characteristics and firing craft procedures for the surface/craft-fired antisubmarine warfare weapons.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/75).

NV-1715-0786

Torpedo Mk 45 Mods 1 and 2 Test Equipment Intermediate Maintenance

Course Number: A-123-0137.

Location: Service Schools Command, Orlando, FL.

Length: 7 weeks (210 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train personnel in the use and maintenance of torpedo test equipment.

Instruction: Instruction and practical experience in the maintenance of various test sets, including preparation for use, component replacement and adjustment, performance tests, troubleshooting, and operational checks.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/75).

NV-1715-0787

Torpedo Mk 37 Mods 0, 1, 2, and 3 Organizational Maintenance

Course Number: A-123-0143.

Location: Service Schools Command, Orlando, FL.

Length: 2 weeks (60 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To provide personnel with introductory training in the maintenance of torpedoes aboard operating submarines.

Instruction: Instruction includes physical and operational characteristics of the torpedo; pre-loading and unloading procedures; patrol maintenance, emergency, and post-fire procedures; and film analysis.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/75).

NV-1715-0788

Torpedo Mk 37 Mods 2 and 3 Test Equipment Intermediate Maintenance

(Torpedo Mk 37 Mods 0, 2, and 3 Test Equipment Intermediate Maintenance)

Course Number: A-123-0134.

Location: Service School Command, Orlando, FL.

Length: 7 weeks (200-210 hours).

Exhibit Dates: *Version 1:* 3/77-Present. *Version 2:* 1/70-2/77.

Objectives: To train technicians in test procedures for torpedo test equipment.

Instruction: *Version 1:* Lectures and practical exercises in the use, maintenance and troubleshooting of torpedo test equipment. *Version 2:* Instruction and practical training in the use and maintenance of torpedo test equipment.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic troubleshooting (4/83). *Version 2:* Credit is not recommended because of the military-specific nature of the course (6/75).

NV-1715-0789

Torpedo Mk 37 Mods 2 and 3 Intermediate Maintenance

(Torpedo Mk 37 Mods 0, 2, and 3 Intermediate Maintenance)

Course Number: A-123-0133.

Location: Service Schools Command, Orlando, FL.

Length: 14 weeks (424 hours).

Exhibit Dates: *Version 1:* 9/77-Present. *Version 2:* 1/70-8/77.

Objectives: To train personnel in the maintenance of torpedo control systems.

Instruction: *All Versions:* Instruction and practical training in the maintenance of electrical control systems for torpedoes, including troubleshooting procedures and functions of basic control system components.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in system troubleshooting or as a technical elective (4/83). *Version 2:* Credit is not recommended because of the limited technical nature of the course (6/75).

NV-1715-0790

AN/SPS-43A/37A Radar Set Maintenance (Electronics Technician, Class C1)

(AN/SPA-37/37A Radar Sets, AN/SPA-63 Countermeasures Receiving Group, and AN/SPS-43/43A Radar Sets Differences)

Course Number: A-104-0149.

Location: Service School Command, San Diego, CA.

Length: 11 weeks (330-440 hours).

Exhibit Dates: *Version 1:* 9/80-Present. *Version 2:* 11/77-8/80.

Objectives: To train electronics technicians in radar and ECM to operate, maintain, and calibrate specified radar sets and the AN/SPA-63 countermeasures receiver.

Instruction: Lectures and practical exercises on the operation, maintenance and calibration of the AN/SPS-37/37A, AN/SPS-43/43A radar sets and the AN/SPA-63 ECM receiver. Includes system parameters, power supplies and distribution, pulse generators and exciters, modulators and power amplifiers, power monitor and vswr circuits, antenna and auto-tune system, receiver circuits, test equipment usage, generators, frequency counters, and oscilloscopes and dvms.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in radar systems, 2 in radar systems laboratory and 1 in electronic troubleshooting (5/82). *Version 2:* In the lower-division baccalaureate/associate degree category, 6 semester hours in radar systems and measurements (11/77).

NV-1715-0791

Telemetering Ground Station AN/SKQ-2

Course Number: A-121-0113.

Location: Guided Missiles School, Mare Island, CA.

Length: 4 weeks (100 hours).

Exhibit Dates: 1/70-12/78.

Objectives: To provide technicians with practical training in the operation, adjustment, and maintenance of telemetry systems.

Instruction: Instruction includes electronic circuitry, block diagram analysis, and troubleshooting techniques.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronic equipment laboratory (6/75).

NV-1715-0792

Tartar Mk 152 Computer Complex

Course Number: A-150-0079; A-150-0080.

Location: Guided Missiles School, Mare Island, CA; Guided Missiles School, Dam Neck, VA.

Length: 9 weeks (283 hours).

Exhibit Dates: 6/71–3/75.

Objectives: To train personnel in the maintenance of computer systems, digital computer interfaces, and signal converters associated with fire control computers.

Instruction: Instruction and practical experience in the operation and maintenance of interface and signal conversion equipment for computer systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer interface circuits (6/75).

NV-1715-0793

Talos Radar AN/SPW-2B

Course Number: A-104-0085.

Location: Naval Schools Command, Mare Island, CA.

Length: 16–18 weeks (534–590 hours).

Exhibit Dates: 3/71–12/78.

Objectives: To train personnel in the operation, maintenance, troubleshooting, and repair of specialized radar equipment.

Instruction: Practical training in operational principles of general purpose test equipment, including oscilloscopes, power and frequency meters, and specialized military equipment. Topics also include circuit analysis and maintenance and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics maintenance (6/75).

NV-1715-0794

SUBROC Missile Mk 28 Mod 1
Intermediate Maintenance

Course Number: A-121-0144.

Location: Service Schools Command, Orlando, FL.

Length: 7–12 weeks (326–420 hours).

Exhibit Dates: 1/70–Present.

Objectives: To train personnel to test, assemble, disassemble, and perform intermediate maintenance on the SUBROC guided missile.

Instruction: Lectures and practical exercises in identification and assembly of parts, including mechanical handling, installation of fittings, and test monitoring.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (4/83).

NV-1715-0795

SUBROC Missile Mk 28 Mod 1 Test
Equipment Intermediate
Maintenance
(SUBROC Missile Mk 28 Mod 0 Test Equipment Intermediate Maintenance)

Course Number: A-121-0145.

Location: Service School Command, Orlando, FL.

Length: 20 weeks (632 hours).

Exhibit Dates: 4/66–Present.

Objectives: To train personnel to use the circuit schematics of the SUBROC missile and to operate test equipment for trouble analysis.

Instruction: Lectures and practical exercises in checkout and assembly of the SUBROC missile to cover circuitry and circuit tracing; operation of electronic test equipment including differential voltmeter, oscilloscope, counters and test equipment calibration; trouble isolation and operational checks fundamentals.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic test equipment, 3 in electronic troubleshooting (4/83).

NV-1715-0796

RT-736 and KY-531 Tactical Air
Navigation (TACAN)
Intermediate Maintenance

Course Number: C-102-3098.

Location: Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 3 weeks (120 hours).

Exhibit Dates: 2/74–1/88.

Objectives: To provide avionics maintenance personnel with instruction in the maintenance of the TACAN system.

Instruction: Lectures and practical exercises in TACAN theory, pulse decoder, block diagram analysis, and troubleshooting.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft electronics (6/75).

NV-1715-0797

RT-541/ASQ Receiver/Transmitter
and KY-309/ASQ Pulse Decoder
and RT-547/ASQ-19
Receiver/Transmitter and KY-312/ASQ-19 Pulse Decoder
Intermediate Maintenance

Course Number: C-102-3094.

Location: Air Maintenance Training Group, Whidbey Island, WA; Air Maintenance Training Group, Oceana, VA; Air Maintenance Training Group, Miramar, CA; Air Maintenance Training Group, El Toro, CA; Air Maintenance Training Group, Cherry Point, NC; Air Maintenance Training Group, North Island, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 11/73–Present.

Objectives: To provide maintenance personnel with knowledge of theory of operation, testing, and system troubleshooting procedures for a military communications system.

Instruction: Lectures and practical exercises to include maintenance procedures, pulse decoder circuits, block diagrams, and an introduction to receiver/transmitter theory.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hour in electronics laboratory (5/85).

NV-1715-0798

OA-3731/ASM-76 Computer Detector
Test Console Intermediate
Maintenance

Course Number: C-150-3486.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 2/74–1/88.

Objectives: To train personnel in the maintenance of a specific computer detector test console.

Instruction: Instruction in adapter components; signal generators, including power supplies and timing generators; and testing theory of military computer detection systems.

Credit Recommendation: In the vocational certificate category, 1 semester hour in basic electronics laboratory (6/75).

NV-1715-0799

Marine Air Traffic Control
Communications Repairman,
Class C

Course Number: C-103-2029.

Location: Naval Air Training Command, Millington,TN; Air Technical Training Center, Memphis, TN; Air Technical Training Center, Glynco, GA.

Length: 7–8 weeks (233–266 hours).

Exhibit Dates: 5/73–3/83.

Objectives: To train personnel to inspect, test, maintain, and repair a specific military radio transmitter and receiver and associated communications equipment.

Instruction: Lectures and practical exercises in radio receiver and transmitter maintenance and repair, including system troubleshooting, circuit tracing on a block diagram level, and alignment procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in basic communications laboratory (2/81).

NV-1715-0800

1. Cryptologic Technician O, High Frequency Direction Finding (HFDF), Communications Technical Control, Class C1
2. High Frequency Direction Finding (HFDF) Communications Technical Control
(Communications Technician "O" Branch, HFDF Communications Technical Control)

Course Number: A-580-0017.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: *Version 1:* Self-paced 6 weeks (240 hours). *Version 2:* 6 weeks (225 hours).

Exhibit Dates: *Version 1:* 2/76–12/80. *Version 2:* 1/70–1/76.

Objectives: To train communications technicians to operate and repair direction finding communications systems.

Instruction: Classroom and practical instruction in special electronic circuits, telegraph, teletype, and communications systems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in communication equipment operation (1/77). *Version 2:* In the vocational certificate category, 4 semester hours in electronic systems maintenance (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (6/75).

NV-1715-0801

Terrier ASMD-70 55B Radar Update
(Terrier AN/SPG-55B ASMD 70 Radar Update)

Course Number: A-100-0023.

Location: Combat Systems Technical School Command, Mare Island, CA.

Length: 5 weeks (173 hours).

Exhibit Dates: 10/71–1/88.

Objectives: To provide personnel, previously trained in radar, with the basic knowledge and skills required to maintain a modified radar.

Instruction: Lectures and practical training in the operation and maintenance of the modified radar, including range tracking circuits and narrow pulse techniques.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/75).

NV-1715-0802

Gunner's Mate, Class B

Course Number: A-041-0014.
Location: Gunner's Mate School, Great Lakes, IL.
Length: 25 weeks (752 hours).
Exhibit Dates: 12/67-12/73.
Objectives: To train personnel in the basic principles and procedures of operating and maintaining gun mounts and associated fire control circuits.
Instruction: Lectures and practical exercises in basic electricity and electronics, mathematics, mechanics, and equipment troubleshooting.
Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics, and 1 in mathematics (6/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics and 2 in electricity (6/75); in the upper-division baccalaureate category, 3 semester hours in electronics on the basis of institutional evaluation (6/75).

NV-1715-0803

Mk 101 Mods 17 Through 20 Fire Control System (FCS) Maintenance, Class C1

Course Number: A-113-0057.
Location: Fire Control Technician, Class C School, Great Lakes, IL.
Length: 21 weeks (710-737 hours).
Exhibit Dates: 1/71-1/88.
Objectives: To train fire control technicians to operate, adjust, and maintain an underwater fire control system.
Instruction: Instruction includes block diagram analysis, troubleshooting techniques, electronic circuitry, and electro-mechanical devices.
Credit Recommendation: In the vocational certificate category, 4 semester hours in electronic systems and 2 in electronics laboratory (9/77).

NV-1715-0804

Terrier Weapon System DLG-28 (Class System Level Maintenance)

Course Number: A-121-0098.
Location: Guided Missiles School, Mare Island, CA.
Length: 13 weeks (450 hours).
Exhibit Dates: 1/72-1/81.
Objectives: To train fire control technicians in the operation and repair of weapon control systems.
Instruction: Lectures and practical exercises in systems components, alignment, maintenance and troubleshooting, including block diagram analysis, signal flow, and repair techniques.
Credit Recommendation: In the vocational certificate category, 4 semester hours in electronic systems maintenance (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (6/75).

NV-1715-0805

Tartar Weapons System Mk 74 Mod 6 Tartar Weapons System Missile Fire Control System (MFCS) Mk 74 Mods 6 and 7

Course Number: A-121-0182; A-121-0183.
Location: *All Versions:* Naval Guided Missiles School, Dam Neck, VA; *Version 2:* Naval Schools Command, Mare Island, CA.
Length: *Version 1:* 10 weeks (362 hours). *Version 2:* 12 weeks (325 hours).
Exhibit Dates: *Version 1:* 5/75-2/88. *Version 2:* 3/72-4/75.
Objectives: To train senior fire control technicians to supervise the operation and maintenance of a Tartar weapon system.
Instruction: For this course after 2/88 see NV-1715-1384. *Version 1:* Lectures and practical exercises in the operation, function, maintenance and repair of the Tartar weapon system components including the radar system transmitter, receiver and signal computer; the control computer (UNIVAC 1219) system, I/O console, diagnostics, block diagram analysis, paper tape reader, and other major components; interfacing procedures for system components; power supply and power flow analysis. *Version 2:* Lectures and laboratories in block diagrams, including maintenance and operations procedures, and testing and alignment of weapon system equipment.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in computer system troubleshooting laboratory, 3 in electronic troubleshooting laboratory (11/83). *Version 2:* Credit is not recommended because of the military-specific nature of the course (6/75).

NV-1715-0806

Sonar AN/SQS-26AX Retrofit Maintenance

Course Number: A-130-0044.
Location: Fleet Antisubmarine Training Center, San Diego, CA; Fleet Sonar School, Key West, FL.
Length: 26 weeks (798-842 hours).
Exhibit Dates: 5/71-10/83.
Objectives: To train technicians in the operation and repair of a sonar system.
Instruction: Lectures and laboratory instruction in the theory of operation and preventive and corrective maintenance of the sonar set and Louis-Allis power supply. Topics include linear and nonlinear electronic circuits, block diagram analysis, and troubleshooting techniques.
Credit Recommendation: In the vocational certificate category, 6 semester hours in electronic troubleshooting (8/77).

NV-1715-0807

A-7A/B/E AN/ASW-26/30 Automatic Flight Control System Organizational Maintenance
(A-7 Automatic Flight Control System Organizational Maintenance)

Course Number: C-602-3788; C-602-195.
Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.
Length: 2-3 weeks (80-100 hours).
Exhibit Dates: 9/68-1/88.
Objectives: To provide instruction in the maintenance of an automatic flight control system.
Instruction: Lectures and practical exercises on circuit analysis applied to flight control systems, stabilization, and automatic landing assemblies.
Credit Recommendation: In the vocational certificate category, 2 semester hours in advanced avionics/electronics maintenance (6/75).

NV-1715-0808

Fire Control Technician Class A, Phase 2SS

Course Number: A-113-0026.
Location: Service School Command, Great Lakes, IL.
Length: 12 weeks (360 hours).
Exhibit Dates: 1/67-1/88.
Objectives: To provide fire control technicians with the electrical/electronic/mechanical fundamentals related to torpedoes and underwater fire control systems.
Instruction: Lectures and practical exercises in electro-mechanical devices, analog computers, mechanical integrators, and trigonometry function generating devices.
Credit Recommendation: In the vocational certificate category, 8 semester hours in analog computers and electro-mechanical systems (6/75); in the lower-division baccalaureate/associate degree category, 4 semester hours in analog computers and electro-mechanical systems; in the upper-division baccalaureate category, 1 semester hour in laboratory (6/75).

NV-1715-0809

AN/SPS-40B Radar Set Maintenance (Electronics Technician, Class C1)
(AN/SPS-40B/C/D Radar Set Maintenance)

Course Number: A-104-0133.
Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.
Length: *Version 1:* 9 weeks (360 hours). *Version 2:* 8 weeks (240 hours).
Exhibit Dates: *Version 1:* 11/81-Present. *Version 2:* 4/76-10/81.
Objectives: To provide the skills and knowledge necessary to operate and maintain the AN/SPS-40B/C/D radar set.
Instruction: Course includes operation and maintenance of the AN/SPS-40B/C/D radar set; power control and distribution; air system; cooling system; antenna system; timing and trigger generation; frequency generation; low- and high-power transmitting group; receiver system; and test functions.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in circuit and system troubleshooting (5/82). *Version 2:* In the vocational certificate category, 2 semester hours in communications systems, 2 in electronics laboratory (11/77).

NV-1715-0810

AN/SRN-18 Radio Satellite Navigation Set Maintenance, Class C-1

Course Number: A-102-0082.
Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.
Length: 5 weeks (150 hours).
Exhibit Dates: 10/77-1/88.
Objectives: To provide the skills and knowledge necessary to maintain the AN/SRN-18 radio navigation set.
Instruction: Includes operation and familiarization with AN/SRN-18; antenna/receiver signals, DPU, power supply, thermal printer, test generator; system troubleshooting; and supply procedures.
Credit Recommendation: In the vocational certificate category, 2 semester hours in

electronic communications systems, 1 in electronic communications laboratory (11/77).

NV-1715-0811

AN/APX-72 Series IFF Transponder
System Maintenance
(AN/APX-72 Maintenance, Class C-1)

Course Number: A-102-0063.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 3 weeks (90-120 hours).

Exhibit Dates: *Version 1:* 10/81-Present. *Version 2:* 12/75-9/81.

Objectives: To provide skills and training necessary to perform preventive and corrective maintenance on an aircraft interrogation system.

Instruction: Topics include theoretical and practical instruction in operation, maintenance, alignment, adjustment, and repair of a transponder system.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic systems, 1 in electronics troubleshooting (5/82). *Version 2:* In the vocational certificate category, 2 semester hours in electronics or aircraft electronics (11/77).

NV-1715-0812

AIMS Mk XII IFF System Maintenance
(Electronics Technician, Class
C1)

Course Number: A-102-0062.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: *Version 1:* 17 weeks (680 hours). *Version 2:* 16 weeks (480 hours).

Exhibit Dates: *Version 1:* 1/81-Present. *Version 2:* 10/75-12/80.

Objectives: To provide skills and knowledge necessary to perform preventive and corrective maintenance required to maintain the Mk XII aircraft interrogation system.

Instruction: *All Versions:* Course covers operation and maintenance of radar test sets, transponder systems, interrogator systems, interference blankers, and decoders. *Version 1:* Includes power supplies, digital logic, signal conditioning, transmitters and receivers, displays and circuit analysis and troubleshooting to the component level.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems, 1 in electronics systems laboratory and 1 in electronic troubleshooting (5/82). *Version 2:* In the vocational certificate category, 3 semester hours in communications systems, 3 in electronics laboratory (11/77).

NV-1715-0813

AIMS Mk XII System Differences
Equipment Maintenance, Class
C-1

Course Number: A-102-0064.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 4 weeks (120 hours).

Exhibit Dates: 11/75-1/88.

Objectives: To train electronics technicians to operate, repair, maintain and calibrate the accessory equipment AIMS Mk XII (interrogator and decoder unit) associated with an aircraft interrogator unit.

Instruction: Lectures and practical exercises in the operation and purposes of the Mk XII system, the AN/UPX-27 interrogator set, and the AN/UPA-59A decoder group equipment; computer logic, trigger and encoding circuits, transmitter and receiver circuits and troubleshooting and alignment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory (11/77).

NV-1715-0814

AN/UPN-12 Loran Receiver Set
Maintenance (Electronics
Technician, Class C1)
(Electronics Technician, Class C,
AN/UPN-12 Loran Receiving Set
Maintenance, Class F-1)

Course Number: A-102-0040.

Location: Service School Command, San Diego, CA; Fleet Mine Warfare Training Center, Charleston, SC; Fleet Training Center, Norfolk, VA.

Length: 2 weeks (60-80 hours).

Exhibit Dates: 8/75-1/88.

Objectives: To provide the skills and knowledge necessary to operate and maintain the AN/UPN-12(A) Loran receiver set.

Instruction: Topics include operation and familiarization; functional block diagram, pulse section, counter section, switch section, delay crank section, master pedestal section, pedestal generator section, sweep section, AFC section, and alignment and fault isolation procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in communications systems (11/77).

NV-1715-0815

Miniature Electronic Repair
Program, Class F-1
(Miniature/Microminiature Electronic
Repair (2M))

Course Number: A-100-0034.

Location: Fleet Training Center, Mayport, FL; Fleet Training Center, Pearl Harbor, HI; Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA; Fleet Mine Warfare Training Center, Charleston, SC.

Length: *Version 1:* 4 weeks (160 hours). *Version 2:* 3 weeks (90 hours).

Exhibit Dates: *Version 1:* 1/79-Present. *Version 2:* 11/76-12/78.

Objectives: To provide personnel with the latest methods in disassembly, repair, and soldering of miniature printed circuits, components, terminals, circuit board laminates and conductors.

Instruction: Practical training in printed circuit board repair, terminal and connector pin soldering, micro-electronic circuit soldering, micro-miniature circuit board repair and parts installation, and micro-electronic connector pin soldering techniques; also includes replacement of components on microminiature single and double sided printed circuit boards and preventive maintenance procedures for the repair station and associated components.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic maintenance and troubleshooting (5/82). *Version 2:* In the vocational certificate category, 3 semester hours in electronics technology (11/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics technology (11/77).

NV-1715-0816

Prospective Electronics Material
Officer—Pacific Fleet, Class C2

Course Number: A-4B-0018.

Location: Service School Command, San Diego, CA.

Length: 4 weeks (120 hours).

Exhibit Dates: 9/77-1/88.

Objectives: To provide the knowledge and skills necessary to administer and supervise the electronics maintenance division on board a Pacific fleet ship.

Instruction: Course includes audio-tutorial instruction in electronics materials management; communications systems, radar systems, navigation aids, electronic warfare, safety, training programs, and test equipment management.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (10/77).

NV-1715-0817

DD-063 Class Electronic Warfare
Suite
(Countermeasures Receiving Set
AN/WLR-1C (IV) Class F-1)

Course Number: A-102-0203.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 8-9 weeks (320-360 hours).

Exhibit Dates: 12/76-12/82.

Objectives: Provides electronic warfare team training and technical maintenance in electronic support measures systems for the Spruance class destroyer.

Instruction: Provides training in operations under simulated conditions; alignment, repair and preventive maintenance of the AN/WLR-1C (V) with Band 10 and AN/WLR-11A.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronic maintenance (1/77).

NV-1715-0818

Cryptologic Technician M, Bullseye
Wideband DF Maintenance
(Cryptologic Technician M, Basic Bullseye Maintenance)
(Bullseye System Basic Maintenance)

Course Number: A-102-0151.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: *Version 1:* 13 weeks (536 hours). *Version 2:* 8 weeks (308-320 hours).

Exhibit Dates: *Version 1:* 5/82-4/84. *Version 2:* 11/74-4/82.

Objectives: To teach personnel with the cryptologic technician M rating to perform basic electronic maintenance on the Bullseye high-frequency, direction-finding (HFDF) system.

Instruction: *Version 1:* Upon completion of the course, the student will be able to: (1) describe operation, function and signal flow in the various subsystems of wideband antennas, receivers, magnetic recorders and spectrum analyzers (2) test, align, maintain, troubleshoot and repair down to the component level. *Version 2:* Includes instruction and practical application on the Bullseye system and equipment block diagrams of the various subsystems. Preventive maintenance and minor corrective maintenance procedures applicable to the OPEG, AN/FRD-10, AN/FLR-11, AN/FRA-54, and the AN/FRQ-15 are also taught.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic system maintenance (1/84). *Version 2:* In the vocational certificate category, 3 semester hours in communications electronics (1/77).

NV-1715-0819

Cryptologic Technician M, Bullseye Narrowband Maintenance
(Bullseye Narrowband Maintenance Technician)

Course Number: A-102-0152.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: 28 weeks (1120 hours).
Exhibit Dates: 8/74-12/83.
Objectives: To provide personnel with the cryptologic technician M rating with sufficient training to perform electronic maintenance on the Bullseye Narrowband system.
Instruction: Subjects covered include principles, history, and evaluation of high-frequency direction finding; antenna types and construction; electromechanical, electrical, and electronic theory; principles of operation; preventive and corrective maintenance procedures and techniques on the high-frequency, direction-finding equipment; proper use of test equipment to evaluate high-frequency, direction-finding antenna systems.
Credit Recommendation: In the vocational certificate category, 6 semester hours in electronic troubleshooting procedures (1/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to computer science, 3 in computer technician training (1/77).

NV-1715-0820

Reserve Cryptologic Technician, Intermediate Cryptanalysis
(Reserve Naval Security Group-13.1 Intermediate Cryptanalysis)

Course Number: A-232-0056.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: 2 weeks (80 hours).
Exhibit Dates: 1/77-12/82.
Objectives: To provide working knowledge of the cryptanalytic techniques and practical experience in solving transposition ciphers and polygraphic substitution systems employing large tables and small matrices, including four-square, two-square, and Playfair cipher systems, and cryptosystems employing irregular cipher-text units.
Instruction: Instruction consists of a brief review of cryptographic terminology and techniques used in the solution of unilateral and multilateral substitution systems, including transposition ciphers and various polygraphic substitution systems.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/77).

NV-1715-0821

Reserve Cryptologic Technician Processing and Reporting, Phase I
(Processing and Reporting)
(Reserve Naval Security Group-3)

Course Number: A-232-0050.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: 2 weeks (80 hours).
Exhibit Dates: 1/77-12/82.
Objectives: To provide an introduction to basic traffic analysis.
Instruction: Course includes the construction of communications net diagrams by analysis of call signs and message externals of intercepted traffic.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/77).

NV-1715-0822

Reserve Cryptologic Technician Processing and Reporting, Phase II
(Processing and Reporting)
(Reserve Naval Security Group-4)

Course Number: A-232-0054.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: 2 weeks (80 hours).
Exhibit Dates: 1/77-12/82.
Objectives: To gain knowledge of the report writing phase of processing and reporting operations and to gain practical experience in the preparation of the special intelligence product and technical reports.
Instruction: Student will obtain practical experience in assembling and correlating special intelligence materials; in fusing collateral; in writing special intelligence product reports; in selecting the proper vehicle for electrical reporting and preparing it for transmissions; and in preparing special intelligence product and technical reports in required machinable manipulative formats.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/77).

NV-1715-0823

Reserve Cryptologic Technician Naval Security Group Orientation
(Reserve Naval Security Group-1)

Course Number: A-230-0015.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: 2 weeks (80 hours).
Exhibit Dates: 1/77-12/82.
Objectives: To familiarize the student with the organization, mission, and functions of the Naval security group and other cryptologic agencies engaged in the national intelligence effort.
Instruction: Course introduces the student to all phases of Naval security group operations including Morse, non-Morse, radiotelephone, communications security, electronic intelligence (ELINT), processing and reporting, special identification techniques, research and development, general service and Naval security group special communication, communications security material system, Armed Forces courier service, and an introduction to elementary applications of cryptanalysis and traffic analysis.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/77).

NV-1715-0824

Reserve Cryptologic Technician, Basic Cryptanalysis
(Reserve Naval Security Group-13)

Course Number: A-232-0055.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: 2 weeks (80 hours).
Exhibit Dates: 1/77-12/82.
Objectives: To provide the student with a basic knowledge of cryptographic terminology, cryptanalysis techniques, and experience in solving unilateral substitution systems employing standard and mixed alphabets, multilateral substitution with single equivalent alphabets, and multilateral substitution with variants.
Instruction: Instruction covers cryptanalytic terminology and definition, basic statistical analysis, unilateral and multilateral substitution ciphers, and key and keyword recovery.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/77).

NV-1715-0825

Reserve Cryptologic Technician Simulated Operational Training Phase I
(Reserve Naval Security Group Simulated Operational Training Phase I)

Course Number: A-232-0051.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: 2 weeks (80 hours).
Exhibit Dates: 1/77-12/82.
Objectives: To provide team training in collection, cryptanalysis, traffic analysis, reporting and forwarding of intercept materials.
Instruction: Simulates operations performed by a small Naval security detachment. Using analytic techniques, the group studies complex encrypted rotating call signs and frequency rotas to determine organization and composition (order-of-battle) of the enemy. Under supervision, students copy simulated enemy traffic, perform basic traffic analysis and cryptanalysis, and prepare special intelligence reports for electrical forwarding.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/77).

NV-1715-0826

Reserve Cryptologic Technician Simulated Operational Training Phase II
(Reserve Naval Security Group Simulated Operations Training Phase II)

Course Number: A-232-0057.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: 2 weeks (80 hours).
Exhibit Dates: 1/77-12/82.
Objectives: To provide advanced training in collection, direction finding, cryptanalysis, traffic analysis, reporting and forwarding of intercept materials.
Instruction: Simulates operations performed by a small Naval security group division afloat by applying various cryptanalysis and traffic analysis techniques to simulated enemy intercept. Complex problems, including encrypted rotating call signs and frequencies are analyzed to determine the location, organization, and composition (order-of-battle) of the enemy. Students copy simulated enemy chatter and traffic, sort and log intercept, perform cryptanalysis and traffic analysis and prepare daily special intelligence summaries and technical reports for electrical forwarding.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/77).

NV-1715-0827

Reserve Cryptologic Technician Simulated Operational Training Phase III
(Reserve Naval Security Group Simulated Operations Training Phase III)

Course Number: A-232-0052.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/77–12/82.

Objectives: To provide a realistic operational environment for advanced training in traffic analysis including reporting and forwarding of intercept materials.

Instruction: Course simulates the operation of a small Naval security group division afloat, located off the coast of a hypothetical country. During theoretical crisis, students are responsible for quick and accurate special intelligence responses. Problems generated include advanced traffic analysis of call sign and frequency rotas; order-of-battle, high frequency direction-finding and address system reconstruction. Special intelligence summaries are prepared and forwarded electrically.

Credit Recommendation: Credit is not recommended because of the military-specific nature of of the course (1/77).

NV-1715-0828

AN/GYK-9 (FLEXSCOP) Maintenance
(Cryptologic Technician M, Flexscop Maintenance, Class C3)

Course Number: A-102-0079.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 24–26 weeks (948–1024 hours).

Exhibit Dates: *Version 1:* 6/81–9/85. *Version 2:* 2/75–5/81.

Objectives: To teach performance of preventive and corrective maintenance on the CP-818 Flexscop computer system, and the TT-617/G line printer.

Instruction: *All Versions:* In-depth coverage of programming logic diagram analysis and maintenance procedures for the CP-818A computer and associated I/O devices. Includes safety precautions and procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in digital computer systems operation and maintenance (1/84). *Version 2:* In the vocational certificate category, 6 semester hours in troubleshooting computer systems and subsystems (1/77); in the lower-division baccalaureate/associate degree category, 4 semester hours in applied computer systems (1/77).

NV-1715-0829

Cryptologic Technician M, Class A3
(Cryptologic Technician Maintenance)

Course Number: A-102-0109.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: *Version 1:* 16 weeks (621 hours). *Version 2:* Self-paced 12 weeks (400 hours). *Version 3:* Self-paced 12 weeks (480 hours).

Exhibit Dates: *Version 1:* 11/79–Present. *Version 2:* 2/77–10/79. *Version 3:* 8/74–1/77.

Objectives: To teach basic electronic maintenance of equipment used in conjunction with cryptologic mission.

Instruction: *Version 1:* Provides a strong technical foundation and hands-on exercises to allow the student to test, troubleshoot and repair digitally tuned receivers, magnetic recorders, 8080 and 6800 microprocessor systems and basic teletype equipment. *Version 2:* Emphasis is on equipment configurations and procedures used in Naval security group activities. Included are basic safeguards for security; use of maintenance documentation; safety precautions and practices; principles of operation and maintenance of antenna and RF distribution systems, radio receivers, and tape recorders; principles of TTY and communication terminal equipments; and use of common and special purpose test equipment. *Version 3:* Emphasis is on equipment configurations and procedures used in Naval security group activities. Included are basic safeguards for security; use of maintenance documentation; safety precautions and practices; principles of operation and maintenance of antenna and RF distribution systems, radio receivers, and tape recorders; principles of TTY and communication terminal equipments; and use of common and special purpose test equipment.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in digital computer technology, 3 in analog and digital test equipment, 3 in digital HF receiver systems (1/84). *Version 2:* In the vocational certificate category, 3 semester hours in electronic test equipment (1/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in digital systems fundamentals (1/77). *Version 3:* In the vocational certificate category, 3 semester hours in electronic test equipment (1/77).

NV-1715-0830

Cryptologic Technician M, Bullseye Wideband Maintenance
(Bullseye Wideband Maintenance Technician, Class C3)

Course Number: A-102-0153.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 28 weeks (1108–1120 hours).

Exhibit Dates: 12/74–12/78.

Objectives: To teach personnel with cryptologic technician M rating to perform electronic maintenance on the Bullseye Wideband system.

Instruction: Teaches preventive and corrective maintenance on the AN/FLR-11 and AN/FRA-54 equipment and associated systems.

Credit Recommendation: In the vocational certificate category, 9 semester hours in communication electronics or computer systems (1/77); in the lower-division baccalaureate/associate degree category, credit is recommended in communication electronics or for a basic course in computer science on the basis of institutional evaluation (1/77).

NV-1715-0831

Aviation Squadron Electronic Warfare (EW) Officer, Class A2

Course Number: C-2D-3814.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 4 weeks (148–160 hours).

Exhibit Dates: 1/77–Present.

Objectives: To provide formal training for the aviation officer assigned to an electronic warfare officer billet in a tactical air/antisubmarine warfare squadron.

Instruction: Topics include technology, organization, equipment, publications, weapons systems, training, and operations. Subjects include correspondence writing, equipment operation, training development, and operational planning.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/87).

NV-1715-0832

Naval Security Group Direct Support Operations
(Officer Direct Support Operations, Class C4)

Course Number: A-3B-0012.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: Self-paced 4 weeks (148–160 hours).

Exhibit Dates: 1/77–12/78.

Objectives: To train junior officers for assignment to a Naval security direct support unit.

Instruction: Course provides training in the mission, task, and functions of the direct support unit; includes operational objectives and operational and management reports.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/77).

NV-1715-0833

Cryptologic Technician R High Frequency Direction Finder (HFDF) Operator
(High Frequency Direction Finder Operator, Class C3)

Course Number: A-231-0012.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: Self-paced 5 weeks (188–200 hours).

Exhibit Dates: 1/77–12/78.

Objectives: To provide background, theory, and knowledge of procedures necessary to operate direction-finding equipment in current use.

Instruction: Subjects include history and theory of direction finding; review of mathematics and basic radio theory; review of security practices and principles; calibration and operation of equipment and systems; charts, plotting, and fixes; communications practices and procedures; and simulated watchstanding.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/77).

NV-1715-0834

Reserve Cryptologic Technician Direct Support
(Reserve Training Officer Direct Support Operations, Class F1)

Course Number: A-230-0016.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/77–12/82.

Objectives: To learn about Naval security group elements afloat and to enable students to perform in responsible, often independent positions.

Instruction: Student is trained to assume duties as Officer in Charge or Leading Petty Officer of a Naval security group afloat: emphasis is placed on independent operations. Tactical and operational control methods are explained and proper use of governing directives is stressed.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/77).

NV-1715-0835

Cryptologic Technician M AN/FLR-15 Maintenance, Class C3

Course Number: A-102-0084.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: Self-paced 36 weeks (1428-1440 hours).

Exhibit Dates: 11/75-12/81.

Objectives: To teach preventive and corrective maintenance on the AN/FLR-15 equipment.

Instruction: Subjects include electromechanical, electrical, and electronic theory; principles of operation; preventive and corrective maintenance procedures and techniques on the AN/FLR-15, OL-125 and associated test equipment.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in basic digital circuits and 3 in PDP 11/35 Computer Technician training (1/77).

NV-1715-0836

Cryptologic Technician R, Class A3
(Cryptologic Technician Collection Branch)

Course Number: A-231-0044.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: Self-paced 22 weeks (880 hours).

Exhibit Dates: 11/73-Present.

Objectives: To provide basic instruction and practical application in intercept of Morse communications.

Instruction: Includes operation of radio receiving equipment and typewriters; basic safeguards of security; communication procedures and systems; theory and operation of communication equipment. Provides basic instruction and practical application in intercept of Morse communications and develops ability to copy Morse code at a speed of 18 GPM and touch type at 25 WPM.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics or general technical subjects (7/87).

NV-1715-0837

Cryptologic Technician T, Class A3 Preparatory
(Cryptologic Technician Technical Basic Preparatory, Class A)

Course Number: A-231-0045.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: Self-paced 13 weeks (508-520 hours).

Exhibit Dates: 5/75-5/86.

Objectives: To provide instruction and practical experience in intercept of non-Morse communications.

Instruction: Course includes fundamental concepts of communications and techniques required to perform intercept of selected non-Morse signals. Students study International Morse code and learn to transcribe 8 GPM using Morse Coder Trainer and 15 GPM using paper and pen. Touch typing at 25 WPM is required. For course after 1986, see NV-1715-1243.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronic communications (1/77).

NV-1715-0838

Cryptologic Technician T, Field Operations Type One, Class A3, Special Non-Morse
(Cryptologic Technician Technical Field Operations, Type One)

Course Number: A-231-0046.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: Self-paced 5 weeks (200 hours).

Exhibit Dates: 1/77-6/87.

Objectives: To provide instruction and training in intercept of non-Morse communications.

Instruction: Includes concepts of collection analysis reporting and forwarding on non-Morse (plain text and enciphered) communications signals and the operation of the AN/GSQ-76 data acquisition system (TEBO) and associated equipment.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (1/77).

NV-1715-0839

Cryptologic Technician T, Field Operations Type Two, Class A3, International Commercial Radio (ICR) Non-Morse
(Cryptologic Technician Technical Field Operations, Type Two)

Course Number: A-231-0047.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: Self-paced 3 weeks (108-120 hours).

Exhibit Dates: 5/76-1/86.

Objectives: To provide instruction and practical experience in intercept of non-Morse communications.

Instruction: Includes basic concepts in International Commercial Radio collection, analysis, reporting, and forwarding of ICR non-Morse communications signals and instruction in the operation of the AN/TCA-4 (KINDER) digital converting programming group and associated equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in radio operation (1/77).

NV-1715-0840

Cryptologic Technician T, Field Operations Type Three, Class A3, AN/FLR-11/15 Operations
(Cryptologic Technician Technical Field Operations, Type Three)

Course Number: A-231-0024.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: Self-paced 6 weeks (228-240 hours).

Exhibit Dates: 5/76-12/81.

Objectives: To provide training to operate all components of the AN/FLR-11 and AN/FLR-15.

Instruction: Topics include theory and knowledge of procedures necessary to operate all components of the AN/FLR-11 and AN/FLR-15; operating and basic adjustments; equipment demonstrations; practical application; and simulated watchstanding.

Credit Recommendation: In the vocational certificate category, 3 semester hours in communications equipment (1/77).

NV-1715-0841

Countermeasures Receiving Set AN/WLR-11A
(AN/WLR-11A Maintenance Training, Class C-1)

Course Number: A-102-0150.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 5 weeks (188-200 hours).

Exhibit Dates: 7/75-12/83.

Objectives: To provide technical training in the maintenance of the AN/WLR-11A and associated equipment in a shipboard environment with minimum supervision.

Instruction: Subjects include digital logic review, alignment, repair, and preventive maintenance of the AN/WLR-11A and interface with AN/WLR-1.

Credit Recommendation: In the vocational certificate category, 3 semester hours electronic communications equipment (1/77).

NV-1715-0842

AN/SLQ-19 and AN/SLQ-26(V) with AN/SLD-1 Countermeasures Set Maintenance
(Countermeasures Set AN/SLQ-26, Class C-1)

Course Number: A-102-0192.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 10 weeks (400 hours).

Exhibit Dates: 7/74-12/81.

Objectives: To prepare personnel to operate, maintain, and repair the AN/SLQ-19 and AN/SLQ-26(V) systems.

Instruction: Topics include digital logic review, alignment, repair, and preventive maintenance of the AN/SLQ-19 and AN/SLQ-26(V) systems, including the AN/SLD-1A.

Credit Recommendation: In the vocational certificate category, 6 semester hours in communications electronics (1/77).

NV-1715-0843

Cryptologic Technician T, Flexscop Operator
(Flexscop Operator, Class C3)

Course Number: A-231-0025.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: Self-paced 4-6 weeks (160-240 hours).

Exhibit Dates: 11/74-12/78.

Objectives: To provide technical skills necessary to operate the CP-818 data computer and ancillary equipment associated with the Flexscop system.

Instruction: Includes introduction to and operating procedures for the digital data computer CP-818 and ancillary equipment. Air Force personnel attend additional 2 weeks for simulated watchstanding that parallels on-site operations.

Credit Recommendation: In the vocational certificate category, 2 semester hours in introduction to computer systems and operation (1/77); in the lower-division baccalaureate/associate degree category, credit in introduction to computer science on the basis of institutional evaluation (1/77).

NV-1715-0844

Reserve Cryptologic Technician T, Advanced, Class F1
(Reserve Naval Security Group-10-T)
(Advanced T Branch Training Orientation)

Course Number: A-231-0041.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/73-12/82.

Objectives: To provide basic and update branch training beyond the Naval Security group division level training.

Instruction: Course provides current professional, practical, and knowledge factor requirements in communications equipment operation.

Credit Recommendation: In the vocational certificate category, 1 semester hour in communications equipment operation (1/77)

NV-1715-0845

Reserve Cryptologic Technician
Signal Analysis, Class F1
(Reserve Naval Security Group-5 Signal Analysis)

Course Number: A-232-0049.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/72-12/82.

Objectives: Students learn about various types of communication signals currently in use throughout the world.

Instruction: Introduction to modulation; training in graphic analysis; fundamental use of the sonagraph and undulator recorder; step-by-step breakdown of all non-Morse transmissions, beginning with basic transmissions and progressing to complex signals.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronic communications (1/77).

NV-1715-0846

Cryptologic Technician T, Flexscop
Programmer, Class C3

Course Number: A-532-0016.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: Self-paced 18-19 weeks (729-760 hours).

Exhibit Dates: 3/74-10/84.

Objectives: To teach skills necessary to perform systems analyst/programmer functions using the C-818/U Flexscop computer system.

Instruction: Subjects include program writing, assembling systems/programs, and troubleshooting faulty programs/systems, and instruction related to on-site programming applications.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer science assembly language (1/84).

NV-1715-0847

Tartar Missile Fire Control Systems
(MFCS) Mk 74 Mods 4/5/8

Course Number: A-121-0239.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 20 weeks (800 hours).

Exhibit Dates: 1/80-Present.

Objectives: To provide senior petty officers with the knowledge and techniques to coordinate and supervise planned and corrective maintenance needed on a specialized missile weapons system (Tartar).

Instruction: Lectures and practical exercises covering the operational differences of the Tartar missile weapons system radar from other fire control radars and the operation of the fire control computer including number system conversions, functional operations and the maintenance requirements of the missile system.

Credit Recommendation: In the vocational certificate category, 3 semester hours in systems maintenance (11/81); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic digital and computer fundamentals (11/81).

NV-1715-0848

Reserve Cryptologic Technician
Communications Technical
Control, Class F1
(Reserve Naval Security Group-7 Communications Technical Control)

Course Number: A-580-0026.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/74-12/82.

Objectives: To teach basic communications technical control.

Instruction: Topics include basic technical control operation/administrative procedures, telegraph signal characteristics and printing systems, signal distortion, safety, DC patching, telegraph test equipment, control reporting, cryptographic equipment and setup/operation procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in teletype equipment (1/77).

NV-1715-0849

Cryptologic Technician O, Tactical
Communications Systems
Operations and Management,
Class C3

Course Number: A-580-0020.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: Self-paced 12 weeks (480 hours).

Exhibit Dates: 3/75-10/79.

Objectives: To provide training in tactical communications systems operation and management.

Instruction: Subjects include basic theory of electricity; operating principles of transmitters, receivers, transmission lines and multicouplers; circuit control and traffic reporting procedures; shipboard communications; high frequency direction-finding (HFDF) operations and communications; and communications management.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic electricity and 6 in radio communication and communicator (1/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in management procedures (1/77).

NV-1715-0850

Cryptologic Technician O, Class A3
(Cryptologic Technician Communications Rating, Class A)

Course Number: A-580-0016.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: Self-paced 17 weeks (668-680 hours).

Exhibit Dates: 10/75-8/79.

Objectives: Provides instruction in basic radio printer communications.

Instruction: Includes cryptographic equipment operating techniques; developing teletypewriter operator skills; Naval message format preparation; the tape relay procedure method of message delivery; communications security, organization, systems, logs, and files.

Credit Recommendation: In the vocational certificate category, 3 semester hours in teletype usage (1/77).

NV-1715-0851

Electronics Technician A,
Communications
(Electronics Technician Communications Basic, Class A1)

Course Number: A-102-0227.

Location: Service School Command, Great Lakes, IL.

Length: 17 weeks (619 hours).

Exhibit Dates: 10/77-7/80.

Objectives: To provide knowledge and skills in electronics fundamentals and electronic circuit analysis.

Instruction: Subjects include basic electronics technology, troubleshooting procedures, use of basic electronics test equipment and common hand tools, and introduction to communications fundamentals.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity and electronics, 6 in radar principles, 2 in electronics laboratory (10/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics, 3 in radar systems (10/77).

NV-1715-0852

Electronics Technician
Communications Equipment
Fundamentals, Class A1

Course Number: A-102-0228.

Location: Service School Command, Great Lakes, IL.

Length: 13 weeks (422 hours).

Exhibit Dates: 10/77-7/80.

Objectives: To develop troubleshooting skills using generic communications systems.

Instruction: Course includes principles of operation, 3M documentation, corrective and preventive maintenance techniques for generic communications systems (AN/WRC-1, R-1051, AN/URC-35, AN/URT-23, AN/URA-38, AN/SRC-20/21, AN/UCC-1, Teletype System).

Credit Recommendation: In the vocational certificate category, 7 semester hours in communications equipment (10/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in communications laboratory (10/77).

NV-1715-0853

Electronics Technician
Communications—Nuclear Field,
Class A1

Course Number: A-102-0226.

Location: Service School Command, Great Lakes, IL.

Length: 22 weeks (791 hours).

Exhibit Dates: 10/77-7/80.

Objectives: To provide nuclear field electronics technicians with a basic knowledge of electronics fundamentals and develop troubleshooting skills using generic communications equipment.

Instruction: Topics include basic electronics technology, troubleshooting procedures, basic electronics test equipment and common hand tools, introduction to communications, principles of operation, 3M documentation, corrective and preventive maintenance techniques for generic communications equipment AN/WRC-1, R-1051, AN/URC-35, AN/URT-23, and AN/URA-38.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity and electronics, 6 in radar systems, 4 in communications equipment, and 2 in electronics laboratory (10/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics, 3 in radar systems, and 1 in communications laboratory (10/77).

NV-1715-0854

Electronics Technician Radar Basic
(Electronics Technician Radar, Class A1)

Course Number: A-104-0173.
Location: Service School Command, Great Lakes, IL.
Length: 17 weeks (619 hours).
Exhibit Dates: 10/77-7/80.
Objectives: To provide knowledge and skills in electronic fundamentals and circuit analysis.
Instruction: Topics include electronic technology, troubleshooting procedures, use of basic electronics test equipment and common hand tools, and introduction to radar fundamentals.
Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity and electronics, 6 in radar systems, 2 in electronics laboratory (10/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics, 3 in radar systems (10/77).

NV-1715-0855

Electronics Technician Radar
Equipment Fundamentals, Class A1

Course Number: A-104-0174.
Location: Service School Command, Great Lakes, IL.
Length: 12 weeks (400 hours).
Exhibit Dates: 10/77-7/80.
Objectives: To develop troubleshooting skills using generic radar systems.
Instruction: Course includes principles of operation; 3M documentation; corrective and preventive maintenance techniques for generic radar systems AN/SPS-10, Mk X IFF, AN/SPA-25; electronic liquid cooling and dry air systems.
Credit Recommendation: In the vocational certificate category, 2 semester hours in radar electronics, 3 in electronics laboratory (10/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (10/77).

NV-1715-0856

Electronics Technician Radar—
Nuclear Field, Class A1

Course Number: A-104-0172.
Location: Service School Command, Great Lakes, IL.
Length: 21 weeks (729 hours).
Exhibit Dates: 10/77-7/80.
Objectives: To provide nuclear field electronics technicians with a basic knowledge of electronics fundamentals and to develop troubleshooting skills using generic radar equipment.
Instruction: Subjects are basic electronic technology and troubleshooting procedures including use of basic electronics test equipment and common hand tools; introduction to radar; principles of operation; 3M documentation; corrective and preventive maintenance techniques for generic radar equipment AN/SPS-10; electronics liquid cooling and dry air systems.
Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity and electronics, 2 in electronics laboratory, 6 in radar systems and 2 in radar electronics (10/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics, 3 in radar systems (10/77).

NV-1715-0857

Sonar AN/SQS-23 Operator
(Sonar AN/SQS-23 Series (Sonar) Operator Basic)

Course Number: K-130-0084; A-130-0084.
Location: Fleet Antisubmarine Warfare Training Center, San Diego, CA.
Length: 3 weeks (90-94 hours).
Exhibit Dates: 7/77-11/87.
Objectives: To train personnel in the operation of AN/SQS-23 sonar systems.
Instruction: Lectures and practical exercises in the operation of AN/SQS-23 sonar sets and associated equipment.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/86).

NV-1715-0858

Sonar AN/SQS-35(IVDS) Operator
(Sonar AN/SQS-35(V) AN/SQS-38 Operator Basic)

Course Number: A-130-0085.
Location: Fleet Antisubmarine Warfare Training Center, San Diego, CA.
Length: 2 weeks (63 hours).
Exhibit Dates: 5/75-1/88.
Objectives: Course trains Naval and Coast Guard personnel to operate the AN/SQS-35/38 sonar.
Instruction: Course contains topics pertinent only to the specified sonar.
Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (8/77).

NV-1715-0859

Sonar AN/SQQ-23A (PAIR)
Organizational Maintenance

Course Number: A-130-0096.
Location: Fleet Antisubmarine Warfare Training Center, San Diego, CA.
Length: 25 weeks (744 hours).
Exhibit Dates: 5/76-1/88.
Objectives: To train selected enlisted personnel to operate and maintain the AN/SQQ-23A sonar system.
Instruction: Classroom and laboratory experiences related to the operation and maintenance of the sonar AN/SQQ-23A. Includes circuit analysis and troubleshooting, system turn on and troubleshooting, receiver subsystems analysis and troubleshooting, solid state transmitters, and recorder/reproducer.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic troubleshooting (8/77).

NV-1715-0860

Sonar AN/SQQ-23 (PAIR) Operator
Basic

Course Number: A-130-0097.
Location: Fleet Antisubmarine Warfare Training Center, San Diego, CA; Fleet Mine Warfare Training Center, Charleston, SC.
Length: 8 weeks (239 hours).
Exhibit Dates: 8/77-1/88.
Objectives: To train selected personnel with sonar technician "G" rating to operate the AN/SQQ-23 PAIR sonar and to perform operator preventive maintenance.
Instruction: Classroom instruction and laboratory practice activities related to basic operation and preventive maintenance of the sonar AN/SQQ-23.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (8/77).

NV-1715-0861

Sonar AN/SQS-53 Operator Basic

Course Number: A-130-0103.
Location: Fleet Antisubmarine Warfare Training Center, San Diego, CA.
Length: 4 weeks (116 hours).
Exhibit Dates: 8/76-1/88.
Objectives: To prepare personnel to operate the AN/SQS-53 sonar system.
Instruction: Course content concerns the operation of the specified sonar system.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the training (8/77).

NV-1715-0862

Sonar AN/SQR-17 Organizational
Maintenance
(Sonar AN/SQR-17 and AN/SKR-4 Organizational Maintenance)

Course Number: A-130-0110.
Location: Fleet Antisubmarine Warfare Training Center, San Diego, CA.
Length: 11 weeks (352 hours).
Exhibit Dates: 4/76-10/86.
Objectives: To provide surface sonar technicians with skills and knowledge to maintain the sonar signal processing set AN/SQR-17 and telemetric data receiving set AN/SKR-4A.
Instruction: Classroom and laboratory experiences in theory and applications of maintenance procedures and techniques unique to the sonar AN/SQR-17. Also includes basic integrated circuit nomenclature and spectrum analyzer operation and maintenance.
Credit Recommendation: In the vocational certificate category, 1 semester hour in advanced instrumentation (8/77).

NV-1715-0863

Sonar AN/SQS-26 BX Maintenance

Course Number: A-130-0046.
Location: Fleet Antisubmarine Warfare Training Center, San Diego, CA.
Length: 20 weeks (625 hours).
Exhibit Dates: 12/76-1/88.
Objectives: Course prepares personnel with Sonar Technician "G" rating to maintain the sonar AN/SQS-26BX system.
Instruction: Topics such as servo control logic, transmitter testing, signal processing, and fault isolation of the specified sonar system.
Credit Recommendation: In the vocational certificate category, 6 semester hours in electronic troubleshooting (8/77).

NV-1715-0864

Sonar AN/SQS-23 D-G Series (TRAM)
Maintenance
(Sonar AN/SQS-23 D-G Series TRAM, MIP, LORA Maintenance)

Course Number: A-130-0049.
Location: Fleet Antisubmarine Warfare Training Center, San Diego, CA.
Length: 12 weeks (375 hours).
Exhibit Dates: 8/76-11/87.
Objectives: To train sonar technicians in the maintenance of the AN/SQS-23 sonar system.
Instruction: Lectures and practical exercises in preventive and corrective maintenance of sonar and associated support

equipment. Includes heater and DC power supplies, transmission circuits, transmitting cooling systems, performance monitor equipment, system test circuits, presentation and receiving circuits, and related topics.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic troubleshooting (8/77).

NV-1715-0865

Sonar AN/BQS-11/12/13 Maintenance
(Submarine Sonar AN/BQS-11/12/13 System Maintenance)
(Sonar Detecting Ranging Set AN/BQS-11/12/13 Combined Maintenance)

Course Number: A-130-0065.

Location: Fleet Antisubmarine Warfare Training Center, San Diego, CA.

Length: 10 weeks (400 hours).

Exhibit Dates: 5/74–11/78.

Objectives: To train sonar technicians in the preventive and corrective maintenance of the AN/BQS-11/12/13 sonar systems.

Instruction: Lectures and practical exercises in preventive and corrective maintenance of AN/BQS-11/12/13 sonar systems with emphasis on troubleshooting techniques.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic troubleshooting (8/77).

NV-1715-0866

Sonar AN/SQS-35(V) Maintenance

Course Number: A-130-0069.

Location: Fleet Antisubmarine Warfare Training Center, San Diego, CA.

Length: 13 weeks (520 hours).

Exhibit Dates: 1/76–12/85.

Objectives: To train sonar technicians to maintain, calibrate, and operate the AN/SQS-35(V) sonar and associated equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/SQS-35(V) sonar systems and associated timing, transmitter, receiver, and servo equipments. See NV-1715-1272 for course after 1986.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic troubleshooting (8/77).

NV-1715-0867

Sonar Electronics Intermediate (SEI)

Course Number: A-130-0039.

Location: Fleet Antisubmarine Warfare Training Center, San Diego, CA.

Length: 17 weeks (680 hours).

Exhibit Dates: 8/74–2/79.

Objectives: To provide enlisted personnel with a basic working knowledge of electric circuits, electronics, and computer logic circuits.

Instruction: Topics include basic electricity and electronics, DC and AC theory, vacuum tubes, solid state devices, transformer operation, power supplies, amplifiers, wave form generators, analog computer circuits, digital numbering, "and" "or" gates and flip-flop switching, memory devices, and biasing techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in electricity and electronics, 3 in computer logic circuits (8/77).

NV-1715-0868

Sonar Detecting/Ranging Set AN/BQS-8/10/14/20 Combined Maintenance
(AN/BQS-8B, 10A, 14A Sonar System Maintenance)

Course Number: A-130-0036.

Location: Fleet Antisubmarine Warfare Training Center, San Diego, CA.

Length: 3 weeks (60–90 hours).

Exhibit Dates: 1/76–1/88.

Objectives: Student learns to operate the AN/BQS-8B/10A, 14A and 20 and detect malfunctions.

Instruction: Topics pertain specifically to sonar system equipment.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (8/77).

NV-1715-0869

DD-963 Facilities Control Quality Monitoring Processing Unit Operators
(DD-963 Facilities Control Quality Monitoring and Message Processing (FCQM) Operators, Class F-1)

Course Number: A-201-0021.

Location: Service School Command, San Diego, CA.

Length: 3 weeks (90 hours).

Exhibit Dates: 7/77–1/88.

Objectives: To provide the skills and knowledge necessary to operate a radio communications system.

Instruction: Course provides instruction in the operation of quality monitoring and control systems, high frequency radio equipment, and message processing equipment.

Credit Recommendation: In the vocational certificate category, 3 semester hours in communications systems (11/77).

NV-1715-0870

DD-963 Spruance Class Destroyer Radio Communications Systems Maintenance
(Radio Communications System Maintenance for DD-963 Class Ships, Class C-1)

Course Number: A-101-0096.

Location: Service School Command, San Diego, CA.

Length: 8 weeks (240–320 hours).

Exhibit Dates: *Version 1:* 9/78–Present. *Version 2:* 11/77–8/78.

Objectives: To train electronic technicians to operate, align, and repair a radio communications system for naval vessels.

Instruction: Lectures and laboratories in circuit analysis and block diagrams of receivers and transmitters; logic systems; synthesizers; RF and control sections; power supplies and antennas; and use of test equipment to troubleshoot and repair the specified equipment.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in circuit and system troubleshooting and 2 in communications systems (5/82). *Version 2:* In the vocational certificate category, 3 semester hours in communications systems, 2 in electronics laboratory (11/77); in the lower-division baccalaureate/associate degree category, 2 semester hours in communications systems (11/77).

NV-1715-0871

Submarine Satellite Information Exchange System (SSIXS) Operational Control Center Maintenance

Course Number: A-101-0081.

Location: Service School Command, San Diego, CA.

Length: 10 weeks (300 hours).

Exhibit Dates: 9/75–1/88.

Objectives: To provide the skills and knowledge necessary to operate and maintain a satellite information exchange system operational control center.

Instruction: Students attend ten separate courses in sequence. Units of instruction include the operation and maintenance of the TT-624 line printer, RD-397/U (XN-1) signal data recorder-reproducer, ON-143 (V3)/USQ interconnecting group, AN/USH-22(V) magnetic tape subsystem, and the AN/USH-23(V) magnetic disk subsystem.

Credit Recommendation: In the vocational certificate category, 3 semester hours in computer peripherals maintenance and 1 in troubleshooting techniques (11/77).

NV-1715-0872

AN/USQ-64(V) CUDIXIS Maintenance
(Common User Digital Information Exchange System (CUDIXS) Maintenance)

Course Number: A-101-0082.

Location: Service School Command, San Diego, CA.

Length: *Version 1:* 23 weeks (920 hours). *Version 2:* 19 weeks (570 hours).

Exhibit Dates: *Version 1:* 3/80–Present. *Version 2:* 11/75–2/80.

Objectives: To provide the skills and knowledge to operate and maintain a data processing communications system.

Instruction: *Version 1:* Lectures and practical exercises in the HP2100 minicomputer system with cassette and mag tape loader subsystems. Included are subsystems for interfacing, display, and control; operation and maintenance of line printers, data recorder/reproducers, mag tape and disk subsystems and terminals. *Version 2:* Students attend ten separate courses in sequence. Units of instruction include the operation and maintenance of the TT-624 line printer, RD-397/U (XN-1) signal data recorder-reproducer, ON-143(V3)/USQ interconnecting group, AN/USH-22(V) magnetic tape subsystem, AN/USH-23(V) magnetic disk subsystem, AN/UYK-20 data processing set, and associated communications systems.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in minicomputer systems, 1 in digital communications, 3 in computer peripheral maintenance and 1 in electronic troubleshooting (5/82); in the upper-division baccalaureate category, for engineering majors 1 semester hour in minicomputer systems (5/82). *Version 2:* In the vocational certificate category, 2 semester hours in communications systems, 3 in computer peripherals maintenance, and 1 in troubleshooting techniques (11/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in digital computer systems (11/77).

NV-1715-0873

SUBMARINE SATELLITE INFORMATION EXCHANGE SYSTEM (SSIXS) FOR SHIPBOARD INSTALLATIONS MAINTENANCE

Course Number: A-101-0083.

Location: Service School Command, San Diego, CA; Submarine School, Groton, New London, CT.

Length: *Version 1:* 8-9 weeks (340-380 hours). *Version 2:* 16 weeks (480 hours).

Exhibit Dates: *Version 1:* 4/78-1/87. *Version 2:* 9/75-3/78.

Objectives: To provide the skills and knowledge necessary to maintain a satellite information exchange system.

Instruction: For this course after 1/87 see NV-1715-1471. *Version 1:* Classroom and laboratory practice in digital logic, microprocessors (8080A), UARTS and associated processor support circuits. Maintenance and repair of digital data communications equipment (FSK), with extensive Built-in-Test Equipment (BITE), supporting encryption equipment, processor interfaces and digital computers. *Version 2:* Students attend seven separate courses in sequence. Units of instruction include the operation and maintenance of the AN/WSC-3 satellite communications set, AN/UYK-20 data processing set, ON-143(V3)/USQ interconnecting group, and associated communications systems.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in introductory digital logic, 1 in digital electronic maintenance and repair laboratory and 1 in communications electronics maintenance and repair laboratory (3/81); in the upper-division baccalaureate category, 2 semester hours in microcomputer hardware (3/81). *Version 2:* In the vocational certificate category, 2 semester hours in electronics technician training, 3 in computer peripherals maintenance, and 1 in troubleshooting techniques (11/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in digital computer systems (11/77).

NV-1715-0874

FLEET SATELLITE COMMUNICATIONS FLEET BROADCAST CONTROL SUBSYSTEM MAINTENANCE (ELECTRONICS TECHNICIAN, CLASS C1)

Course Number: A-101-0085; A-101-0086.

Location: Service School Command, San Diego, CA.

Length: 2 weeks (65 hours).

Exhibit Dates: 1/77-1/88.

Objectives: To provide skills and knowledge in operation and maintenance, without supervision, of a time division multiplexer and satellite signal receiving set.

Instruction: Theoretical and practical instruction in the operation, troubleshooting, and preventive maintenance of a radio receiver and a time division multiplexer to the card/module level of operation.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory (11/77).

NV-1715-0875

AN/SYQ-7(V)3 NAVAL MODULAR AUTOMATED COMMUNICATIONS SYSTEMS NAVMACS V3 MAINTENANCE

(Naval Modular Automated Communications System (NAVMACS) A Maintenance)

Course Number: A-101-0214; A-101-0089.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: *Version 1:* 13-14 weeks (520-560 hours). *Version 2:* 20 weeks (600 hours).

Exhibit Dates: *Version 1:* 1/82-Present. *Version 2:* 9/75-12/81.

Objectives: To provide the skills and knowledge necessary to operate and maintain a modular automated communications system.

Instruction: *Version 1:* Course content includes an introduction to digital computers and the operation, maintenance and troubleshooting of computer peripherals including recorders/reproducers, line printers, data terminals and paper tape punch readers. *Version 2:* Students attend ten separate courses in sequence. Units of instruction include digital computers TT-624 line printer, AN/WSC communications equipment, and various troubleshooting and maintenance laboratories.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in computer architecture and machine language, 2 in computer peripherals laboratory and 1 in electronic troubleshooting (5/82). *Version 2:* In the vocational certificate category, 2 semester hours in electronics technician training and 1 in troubleshooting techniques (11/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in digital computer systems (11/77).

NV-1715-0876

AN/WSC-3 COMMUNICATIONS SET, OE-82B/WSC-1 ANTENNA GROUP AND AN/SRA-33 ANTENNA COUPLER GROUP

(AN/WSC-3 Stand-Alone Maintenance)

(AN/WSC-3 Satellite Communications Set and OE-82B/WSC-1(V) Antenna Group)

Course Number: A-101-0138.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: *Version 1:* 4 weeks (160 hours). *Version 2:* 3 weeks (90 hours).

Exhibit Dates: *Version 1:* 7/80-Present. *Version 2:* 6/77-6/80.

Objectives: To provide the skills and knowledge required to operate and maintain a satellite communications set and related antenna equipment.

Instruction: Theoretical and practical instruction in equipment operation, troubleshooting, and preventive maintenance of a satellite communications set.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic troubleshooting (5/82). *Version 2:* In the vocational certificate category, 2 semester hours in electronics technician training (11/77).

NV-1715-0877

AN/WSC-5 TACTICAL SATELLITE COMMUNICATIONS SYSTEM MAINTENANCE

(Tactical Satellite Communications Equipment Maintenance AN/WSC-5(V))

Course Number: A-102-0126.

Location: Service School Command, San Diego, CA.

Length: 7 weeks (210 hours).

Exhibit Dates: 11/77-1/88.

Objectives: To provide the skills and knowledge for the maintenance of the AN/WSC-5(V) tactical satellite communications equipment.

Instruction: Lessons and demonstrations of the theory of operation and use of the AN/WSC-5(V) tactical satellite communications system; a comprehensive analysis of all units of the system; diagnostic troubleshooting techniques for the repair and calibration of the system; the use of specialized test equipment and application of preventive maintenance procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in communications systems and 3 in electronics laboratory (11/77).

NV-1715-0878

SUBMARINE SATELLITE INFORMATION EXCHANGE SYSTEM (SSIXS) OPERATIONAL CONTROL CENTER OPERATOR

Course Number: A-202-0020.

Location: Service School Command, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 11/77-1/88.

Objectives: To train technicians as designated operators on the submarine satellite information exchange system operational control center shore message processing system.

Instruction: Lessons and instruction on the operation and use of the operational control center system; message modes, control console and retrieval from memory; monitoring of the system for sequential operational steps for proper operation.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (11/77).

NV-1715-0879

COMMON USERS DIGITAL INFORMATION EXCHANGE SYSTEM (CUDIXS) OPERATORS

Course Number: A-202-0021.

Location: Service School Command, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 4/76-1/88.

Objectives: To provide the skills and knowledge necessary to operate the common users digital information exchange system.

Instruction: Units of instruction include operational procedures, system alarms, program loading, message handling, system status, system recovery, and link operation.

Credit Recommendation: In the vocational certificate category, 2 semester hours in communication systems (11/77).

NV-1715-0880

MISSILE TECHNICIAN POLARIS CONVERSION

Course Number: A-121-0461.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 12 weeks (360 hours).

Exhibit Dates: 1/76-1/88.

Objectives: To teach the theory, operation, maintenance, and repair of a Polaris launching system.

Instruction: Course offers a study of the functional operation and schematic analysis of a missile fire control system, including control, logic, program timer, display, simulator, power supplies, launcher alignment, calibration, launcher troubleshooting, fault analysis, and repair. Course is a combination consisting of the following: Polaris A3 Missile Advanced Training (A-121-0261), Missile Test and Readiness Equipment (MTRE) Mk 3 Programmer Timer Digital Multimeter Advanced Training (A-121-0262), Missile Test and Readiness Equipment Mk 3 Measurement, Display and Simulation Groups Advanced Training (A-121-0263), Guidance Power Supplies Mk 115/116 Advanced Training (A-121-0266), Missile Test and Readiness Equipment (MTRE) Mk 3 Mods 4 and 5 Operation/Interface and Mechanical Repair Advanced Training (A-121-0264) and either Mk 17 Mod 1 Launcher Advanced Training (A-121-0271) and Mk 17 Launcher Pneumatic (A-121-0273) or Mk 21 Mod 2 Launcher Advanced Training (A-121-0272) and Mk 21 Launcher Pneumatic (A-121-0274).

Credit Recommendation: In the vocational certificate category, 4 semester hours in electromechanics for completion of all components of the entire course (9/77); in the lower-division baccalaureate/associate degree category, 5 semester hours in electronic technology for completion of all components of the entire course (9/77).

NV-1715-0881

Navigation Technician SSN 668 Class

Course Number: A-193-0103.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 13 weeks (520 hours).

Exhibit Dates: 5/76–1/88.

Objectives: To provide study of a navigational system consisting of a digital computer and satellite receiver, and to teach fault isolation and repair of the equipment, and to provide familiarization with system programs used to operate and diagnose the system.

Instruction: This is an initial course in the theory, operation, and maintenance of specified equipment, teaching basic inertial navigation theory, central computer complex subsystem theory and basic operation, system data flow, fault isolation, and the operational techniques of resets, calibration and error analysis. A combination course consisting of the following: Dual Mini Ships Inertial Navigation System (SINS) Maintenance (A-193-0103), Satellite Receiver AN/SRN-9A Combined Maintenance (A-102-0168), Omega Navigation Set AN/BRN-7 Combined Maintenance (A-102-0131), Inertial Navigation Principles (A-193-0050) and Central Computer Complex Duel Miniature (CCCDEMIN) Ships Inertial Navigation System (SINS) (A-115-0104).

Credit Recommendation: In the vocational certificate category, 5 semester hours in electronics technology for completion of all components of the entire course (9/77).

NV-1715-0882

585/594 Fleet Ballistic Missile (FBM) Electronic Surveillance Measures (ESM) Technician

Course Number: A-233-0047.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 20 weeks (540 hours).

Exhibit Dates: 9/77–1/88.

Objectives: A combined series of courses involving sophisticated electronic equipment aboard submarines.

Instruction: Course is a combination of the following: IFF AN/APX-72 and AN/UPX-17 Combined Maintenance (A-102-0229), Radar AN/BPS-12, 13, 14 Combined Maintenance (A-104-0165), ESM AN/WLR-1 F/3A Combined Maintenance (A-233-0034), Radio Direction Finder AN/BRD-6 Combined Maintenance (A-102-0159), and Periscope Type 8B and 15D E/E Adapter Combined Maintenance (A-233-0032).

Credit Recommendation: In the vocational certificate category, 6 semester hours in electromechanical technology for completion of all components of the course (9/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics engineering technology for completion of all components of the course (9/77).

NV-1715-0883

Electronic Surveillance Measures (ESM) Technician SSN 637 Class, Class C-1

Course Number: A-233-0044.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 22 weeks (660 hours).

Exhibit Dates: 12/72–1/88.

Objectives: To provide non-nuclear submarine electronics technician personnel training in sophisticated electronic equipment aboard submarines.

Instruction: Course presents training in the operation and maintenance of specified electronic equipment and is a combination of the following courses: Electronic Surveillance Measures (ESM) AN/WLR-6 Combined Maintenance (A-233-0041), IFF AN/APX-72 and AN/UPX-17 Combined Maintenance (A-102-0229), Radar AN/BPS-12, 13, 14 Combined Maintenance (A-104-0165), and Periscope Type 15 B/D and E Adapter Combined Maintenance (A-233-0037).

Credit Recommendation: In the vocational certificate category, 12 semester hours in electronics technology for completion of all components of the entire course (9/77); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics engineering technology for completion of all components of the entire course (9/77).

NV-1715-0884

Missile Test and Readiness Equipment (MTRE) Mk 3 Programmer/Timer Digital Multimeter Advanced Training, Class C1

Course Number: A-121-0262.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: 6/74–1/88.

Objectives: To teach the theory of operation, adjustment, fault isolation, and repair of a special-purpose digital programmer and timer for military equipment using a specially designed digital multimeter.

Instruction: Course includes a study of the functional operation of a digital programmer and timer utilizing circuit logic and logic diagrams including control, program instructions, and sequential operations. Use of test equipment including a special purpose digital multimeter to isolate faults, make adjustments, calibrate, troubleshoot, and repair military equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics technology (9/77).

NV-1715-0885

Submarine Communications Equipment Combined Maintenance

(Submarine Communications Equipment)

(Radio Equipment Submarine Maintenance)

Course Number: A-101-0061; A-101-0062.

Location: Submarine School, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 21 weeks (840 hours).

Exhibit Dates: 7/75–3/89.

Objectives: Course is designed to train technicians to operate, maintain, and repair a submarine communications system.

Instruction: For this course after 3/89 see NV-1715-1474. Lectures and practical exercises on a submarine communications system including various types of antennas, antenna couplers, receivers, and transmitter systems. Course covers block-diagram functional description of each subsection, signal tracing using schematics, preventive maintenance, alignment, adjustment, calibration, and troubleshooting to isolate the fault to the board or component level. Combination course consists of the following: Transceiver AN/SRC-20 Combined Maintenance (A-101-0103), Special Communications Equipment AN/BRT-2 Operator-Maintenance (A-101-0095), Antenna Multicoupler AN/BRA-16 Combined Maintenance (A-101-0104), Antenna Coupler CU-1441 Combined Maintenance (A-101-0107), Transmitter AN/WRT-4 Combined Maintenance (A-101-0106), Radio Transceiver AN/WRC-1 Family Equipment (A-101-0109), Antenna Group AN/BRA-8B Combined Maintenance (A-101-0098), Radio (Submarine) Receiver/Converter Combined Maintenance (A-101-0124) and Antenna Systems Fundamentals (Submarines) (A-101-0123).

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics communications for completion of all components of the entire course (9/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronic engineering technology laboratory for completion of all components of the entire course (9/77).

NV-1715-0886

Interior Communications (IC) Package Course for SSN/SSBN

Course Number: A-623-0030.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 10 weeks (400 hours).

Exhibit Dates: 3/77–1/88.

Objectives: To provide theory and skills for operation and maintenance of various subsystems aboard submarines.

Instruction: Combination course consists of the following: Electronic Hovering and Depth Control Combined Maintenance (A-623-0041), Integrated Announcing System AN/WIC-2 Combined Maintenance (A-623-0051), Atmosphere Analyzer Central Atmosphere Monitoring System (CAMS) Mk 1 (A-623-0048), Submarine Gyro Compass Mk 19 Mod 3 Combined Maintenance (A-670-0042), Dial X Telephone System Combined Maintenance (A-623-0058), Hydrogen Detector (Englehart) Combined Maintenance (A-623-0068) and Total Hydrocarbon Analyzer Combined Maintenance (A-623-0061). Topics include theory and analysis of DC and AC circuits, introduction to vacuum tubes, and solid-state devices, electromechanical components, and amplification and control.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics technology to be granted for completion of all components of the course (9/77).

NV-1715-0887

3306/3309 FTB Conversion Training

Course Number: A-121-0460.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine School, New London, CT.

Length: 18 weeks (540 hours).

Exhibit Dates: 1/76–1/88.

Objectives: This is a conversion course designed to train a fire control (ballistic missile) specialist in the operation and maintenance of the Mk 80 fire control system.

Instruction: Combination course consisting of the following: Alignment Group Mk 1 Mods 0 and 1 (A-121-0283), Fire Control System Mk 80 Controls and Indications (A-121-0279), Polaris Target Card Computer System Mk 148 Mod 0 Theory (A-121-0275), Polaris Target Card Computer System Mk 148 Mod 0 Maintenance (A-121-0276), Fire Control System Technician, Mk 80 (A-121-0244), Data Computation and Transmission Loops FCS Mk 80 (A-121-0280), Mk 80 FCS Technician Replacement Training (A-121-0244), Switchboards and Power Supplies (A-121-0278), Digital Evaluation Unit (A-121-0282), and Mk 2 Guidance System (A-121-0254). Major areas covered are power supplies, alignment, computer theory, digital logic and guidance systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in electronics engineering technology for completion of the entire program to include all component courses (9/77).

NV-1715-0888

637 Class Electronic Surveillance Measures (ESM) ELINT Technician

(Electronic Surveillance Measures (ESM) ELINT Technician SSN 637 Class, Class C-1)

Course Number: A-233-0045.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine School, Groton, New London, CT.

Length: 15 weeks (600 hours).

Exhibit Dates: 6/76–1/88.

Objectives: To teach digital computer principles and the operation and maintenance of a digitally controlled communications receiver.

Instruction: Course consists of combination of the following: Basic Computer Theory (A-100-0032, A-100-0045) and ESM AN/BRD Combined Maintenance (A-102-0127).

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 10 semester hours in electronics technology or computer technology for completion of the entire program to include all component parts (9/77).

NV-1715-0889

Electronic Surveillance Measures (ESM) Technician SSN 688 Class, Class C1

Course Number: A-233-0046.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine School, New London, CT.

Length: 28 weeks (1120 hours).

Exhibit Dates: 6/77–1/88.

Objectives: To provide non-nuclear submarine electronics technician personnel training in the operation and maintenance in specified equipment.

Instruction: Course is a combination of the following: AN/BPS-15 Combined Maintenance (A-102-0199), IFF AN/APX-72 and AN/UPX-17 Combined Maintenance (A-102-0229), Basic Computer Theory (A-100-0045, A-100-0032), Periscope Type 18 Combined Maintenance (A-102-0157), and ESM AN/WLR-8 Combined Maintenance (A-233-0040).

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics technician training (9/77); in the lower-division baccalaureate/associate degree category, 5 semester hours in electronics technology, 5 in computer technology, 2 in electronics engineering, and an additional 5 in electronics technology or computer technology, all to be granted only for completion of all components of the entire course (9/77).

NV-1715-0890

Mk 112 Mod 2 Fire Control System (FCS) Maintenance, Class C1

Course Number: A-113-0059.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 20 weeks (600 hours).

Exhibit Dates: 3/73–1/88.

Objectives: Provides necessary theory and skills required to maintain the large number of subsystems comprising a fire control system.

Instruction: Course provides primary training at the systems level in data processing, target tracking, and torpedo subsystems. Includes study of induction motors, generators, hysteresis motors, test equipment, number systems, and basic switching logic also at the systems level. Electromechanical components such as brakes, clutches, switches, relays, synchros, and resolvers are studied. Course includes classroom and laboratory study.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical technology or electromechanical technology (9/77).

NV-1715-0891

Alignment Group Mk 1 Mods 0 and 1, Class F-1

Course Number: A-121-0283; L-121-0056.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: 1/61–1/88.

Objectives: Provides corrective maintenance training related to alignment group Mk 1 Mods 0 and 1.

Instruction: To teach maintenance supportive theory and laboratory work involving fault isolation, alignment, adjustment, and calibration procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronics engineering technology (9/77).

NV-1715-0892

Controls and Indicators, Fire Control System (FCS) Mk 80, Class F1

Course Number: A-121-0279; L-121-0053.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (79 hours).

Exhibit Dates: 10/74–1/88.

Objectives: To provide training for maintenance and repair of the Mk 49 control console and the attack center indicating panel Mk 225.

Instruction: Course includes maintenance supportive theory which does not involve signal or electron flow or detailed mechanical breakdown except for the specified equipment. Student obtains skills to perform fault isolation and repairs on specified equipment.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (9/77).

NV-1715-0893

Polaris Target Card Computer System Mk 148 Mod 0 Maintenance, Class F1

Course Number: A-121-0276.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: 8/74–1/88.

Objectives: This is an application course utilizing theory acquired in the Polaris Target Card Computer System Mk 148 Mod 0 Theory course (A-121-0275).

Instruction: Course offers laboratory work involving fault isolation and repair of the Polaris target card computer system (PTCCS) Mk 148 Mod 0. Corrective maintenance is stressed.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics technology (9/77).

NV-1715-0894

Polaris Target Card Computer System Mk 148 Mod 0 Theory, Class C1

Course Number: A-121-0275; L-121-0049.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 3 weeks (84 hours).

Exhibit Dates: 8/74–1/88.

Objectives: To present a theory course supporting corrective maintenance of the Polaris target card computer system Mk 148 Mod 0.

Instruction: Course offers advanced theory involving control, logic, signal flow and sequential operation of the Polaris target card computer system (PTCCS); includes fault isolation procedures, repair and replacement of components, as well as functional interface with the remainder of the weapons system including power requirements and input and output signals in terms of type, format, source and destination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in logic and control systems (9/77).

NV-1715-0895

Data Computation and Transmission Loops Fire Control System (FCS) Mk 80, Class C1

Course Number: A-121-0280; L-121-0048.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 3 weeks (90 hours).
Exhibit Dates: 10/74–1/88.
Objectives: To provide training for corrective maintenance of the FCS Mk 80 Mods 2 and 3.
Instruction: Course offers maintenance support theory which does not involve signal or electron flow or detailed mechanical component breakdown except for the specialized equipment specified.
Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (9/77).

NV-1715-0896

Electronic Test Equipment Basic Operator, Class F1
(Electronic Test Equipment Operation)

Course Number: A-198-0023; L-198-0012.
Location: Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 2 weeks (60 hours).
Exhibit Dates: 4/74–1/88.
Objectives: To provide the training necessary to enable the student to effectively care for and use common types of test equipment.
Instruction: The course explains the proper care and use of DC current and voltmeters, AC voltmeters, ohmmeter, vacuum tube voltmeters, differential voltmeters, and the volt-ohm-milliammeter. Meter scale reading accuracy and the loading effects of a voltmeter are explained. Practical exercises using an ohmmeter to test transistors and the use of meters in transistor and tube circuits are given. Oscilloscopes, RF generators, and frequency counters operation are explained and their use in aligning a superheterodyne receiver is given as a practical exercise.
Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics laboratory (9/77).

NV-1715-0897

Polaris Target Card Computer System Peripheral Equipment, Class C1

Course Number: A-121-0277; L-121-0051.
Location: Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 4 weeks (120 hours).
Exhibit Dates: 9/74–1/88.
Objectives: Teaches corrective maintenance of a computer tape reader, a card punch/reader, and an IBM selectric typewriter transmitter receiver.
Instruction: Course concentrates on operational tests and procedures for the maintenance of the equipment specified; provides the theory necessary to support all corrective maintenance without going into signal or electron flow or detailed mechanical component breakdown except for those components unique to the peripheral equipment. Also provides skills to perform fault isolation and make repairs with limited supervision to the card punch/reader, punched tape reader, and the typewriter transmitter receiver.
Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics technology (9/77).

NV-1715-0898

Controllers and Circuit Breakers Combined Maintenance
(Circuit Breakers and Controllers)
(Controllers Circuit Breakers, Class F1)

Course Number: A-662-0038; L-662-0013.
Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Fleet Ballistic Missile Training Center, Charleston, SC; Submarine School, Groton, CT.
Length: 2 weeks (60-62 hours).
Exhibit Dates: *Version 1:* 4/85–Present. *Version 2:* 6/72–3/85.
Objectives: To provide necessary principles of circuit breakers and controllers to enable effective maintenance and repair of equipment used on submarines.
Instruction: *Version 1:* Lectures and laboratory instruction provides training in the operation, maintenance, and fault detection for high voltage circuit breakers, motor controllers, and switch gear. Upon successful completion of the course, the student will be able to perform normal switching operations to isolate a circuit under fault conditions, connect an across-the-line starter for starting large motors, and remove and repair circuit breakers and switch gear. *Version 2:* Approximately 30 percent of course is devoted to theory and characteristics of circuit breakers, under voltage relays, under frequency relays, various tripping devices and the fundamentals of DC voltmeters and AM meters. Student learns purpose, characteristics, and the principle of operation, maintenance and adjustments on 6 types of circuit breakers and 5 types of controllers used aboard submarines.
Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electrical technology laboratory (11/85). *Version 2:* In the vocational certificate category, 1 semester hour in electronics technology (9/77).

NV-1715-0899

Polaris Loran "C" Advanced Training
(Loran "C" Advanced Maintenance)
(Loran "C" AN/WPN Refresher Maintenance Class F1)

Course Number: A-193-0258; L-193-0011.
Location: Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 2 weeks (60 hours).
Exhibit Dates: 9/74–1/88.
Objectives: To offer the theory of operation of a Loran "C" receiver and to teach the student to perform fault isolation and make repairs.
Instruction: Course covers timing loop, modes, frequencies, input/output signals, sequential operation, control and indicators, and alarm search loop of a Loran 'C' receiver, and teaches the student to perform systematic fault isolation, operational tests using test equipment, repair, alignment, adjustment, and calibration procedures on the equipment.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronics technology (9/77).

NV-1715-0900

Submarine Emergency Communications Transmitter (SECT) Buoy AN/BST-1 Maintenance
(SECT Buoy AN/BST-1 Basic Maintenance, Class F1)
(AN/BST-1 SECT Maintenance for Submarine Tender Technician)

Course Number: A-130-0144; L-101-0013.
Location: Submarine Training Center, Pearl Harbor, HI; Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Submarine School, New London, CT.
Length: 2 weeks (60 hours).
Exhibit Dates: 2/75–1/88.
Objectives: To provide theory and skills necessary for the operation, maintenance, and repair of the SECT buoy AN/BST-1.
Instruction: Major areas of course cover troubleshooting and programming of the specialized equipment specified.
Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics technology (9/77).

NV-1715-0901

Generator Regulators, Class F-1

Course Number: L-662-0023.
Location: Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 1-2 weeks (35-60 hours).
Exhibit Dates: *Version 1:* 11/85–Present. *Version 2:* 7/72–10/85.
Objectives: This is a basic course in the operation, maintenance and troubleshooting of static regulators.
Instruction: *Version 1:* Lectures and laboratory exercises in the theory of static exciters and magnetic amplifiers are offered in this course designed to refresh learning of experienced enlisted personnel in the maintenance and repair of voltage and speed regulators (from 43.2 kw to 2000 kw) at the component level. *Version 2:* Approximately 60 percent of this course is devoted to classroom work on AC theory and vector analysis of circuits and components with the remainder of the time spent in troubleshooting 2000 KW voltage regulators and 300 KW speed/voltage regulators. Time is given to review of previous training.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in electrical engineering technology (power option) laboratory (11/85). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electrical engineering technology (power option) (9/78).

NV-1715-0902

Maintenance Analysis Test Set (MATS) Mk 352, Class F1

Course Number: A-121-0285; L-121-0030.
Location: Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 2 weeks (57-60 hours).
Exhibit Dates: 1/61–1/88.
Objectives: To present theory of operation of specific military equipment and fault isolation and repair of that equipment.
Instruction: Course presents a study of the theory of operation of specialized military equipment utilizing logic and-or-nor gates and their sequential operation. Students will perform fault isolation tests and make repairs on the equipment.
Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics (9/77).

NV-1715-0903

Radio Direction Finder AN/BRD-6 Combined Maintenance
(Radio Direction Finder AN/BRD-6 Operational Maintenance)
(AN/BRD-6B Combined Maintenance, Class F1)

Course Number: A-102-0159; L-102-0020; F-101-0023.
Location: Submarine School, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 2 weeks (60 hours).
Exhibit Dates: 11/73–Present.

Objectives: To teach the theory of operation and maintenance of special military equipment.

Instruction: Course offers theory of operation of special military equipment including antenna loops, pre-amps, flood detectors, RF units, IF units, power supplies and synchro units. Students learn to perform adjustments, fault isolation, signal trace, and to make repairs to the component level.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics (11/85).

NV-1715-0904

Digital Fundamentals, Basic
(Basic Digital Computer Theory)
(Basic Digital Fundamentals, Class F1)

Course Number: A-100-0045; L-000-0058; F-000-0080.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Fleet Ballistic Missile Submarine Training Center, Charleston, SC.

Length: 3 weeks (90 hours).

Exhibit Dates: 6/76–1/88.

Objectives: To provide an introduction to digital fundamentals, including number systems, Boolean algebra, logic conventions, combinational and sequential circuits, memory A/D and D/A conventions, digital logic families, and organization of a typical computer.

Instruction: Course offers a study of binary, octal, duodecimal, BCD, and hexadecimal number systems. Includes conversions between number systems, binary arithmetic, complements, excess three code, and negative number representation, Boolean algebra, Veitch diagrams, graphical symbols, gates, flipflops, counters and registers. Topics include a study of the control unit, arithmetic unit, memory unit and I/O unit; Ellol detection and collection; analog-to-digital, digital-to-analog programming, diagnostics; digital logic families; and the organization of a general purpose computer.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in electronics technology or computer technology (9/77).

NV-1715-0905

Special Technology I

Course Number: A-100-0046; L-000-0033.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 4–6 weeks (120–180 hours).

Exhibit Dates: 4/75–6/76.

Objectives: To provide the student working in communications with a thorough practical knowledge of basic electronics.

Instruction: Course covers AC and DC circuits with vacuum tubes, amplifiers, and an introduction to solid-state devices; also covers structure of matter, physical aspects of resistors, inductors, and capacitors; Ohm's and Kirchoff's laws for DC series, parallel, and series-parallel circuits, DC bridge circuits, voltage dividers, reading schematic diagrams, use of a multimeter AC voltage generation and characteristics of a sinewave, ideal transformers; AL, AC, and ALC series and parallel circuits with respect to current, voltage, power, Q, impedance and resonance, characteristics of tube-type diodes and their application to power supplies, multielement tubes, basic class A, B, AB, and C tube-type amplifiers and their frequency response, and introduction to solid-state theory, diodes, transistors, and their respective application to power supplies and amplifiers. After January 1976 course included arithmetic and an overall review of the course.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics (9/77).

NV-1715-0906

Special Technology II

Course Number: A-100-0047; L-000-0034.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: 4/75–6/76.

Objectives: To provide a practical course in basic electronics.

Instruction: Topics covered include tubes, transistors, amplifiers, oscillators, modulation, transmitters, wave propagation, and power supplies, antennas, and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics engineering technology (9/77).

NV-1715-0907

Special Technology III

Course Number: A-100-0048; L-000-0035.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: 2/75–1/88.

Objectives: To provide the student working in communications with a thorough practical knowledge of basic radio receiver circuits.

Instruction: Course is structured to be the apex of Special Technology I and II and is designed primarily for technicians working with radio frequencies. Principles of operation of a TRF, superheterodyne, and single-sideband receivers are given, including the RF, IF, and audio amplifiers, detector circuits, oscillator circuits, and mixer circuits. The advantages and disadvantages of a TRF, superheterodyne and single-sideband are explained. Understanding of schematic diagrams, signal flow, and troubleshooting procedures are given. Students use a VTVM, RF signal generator, and an oscilloscope in troubleshooting a superheterodyne circuit.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics (9/77).

NV-1715-0908

Missile Test and Readiness Equipment
(MTRE) Mk 3 Measurement,
Display and Simulation Groups
Advanced Training
(Missile Test and Readiness Equipment (MTRE) Mk 3 Mods 4 and 5 Measurement, Display and Simulation Groups Advanced Training, Class F1)

Course Number: A-121-0263.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: 7/74–1/88.

Objectives: To learn functional operations and to isolate faults and make repairs on special-purpose military equipment.

Instruction: Course teaches the functional operation of special military equipment utilizing circuit and logic diagrams including control, logic, program sequence, sequential operations, alarms and displays, and to isolate faults, troubleshoot, repair, adjust and calibrate the equipment studied.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronics technology (9/77).

NV-1715-0909

Polaris A3 Missile Advanced Training

Course Number: A-121-0261.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: 1/66–1/88.

Objectives: To study the theory of operation and fault isolation, and to make repairs on missile fire control systems.

Instruction: Course offers a study of the functional operations and schematic analysis of a missile fire control system including its control, logic, sequential operation and teaches student to learn fault isolation and component replacement.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronics technology (9/77).

NV-1715-0910

Missile Launcher Mk 17 Mod 1
Advanced Training, Class C1

Course Number: A-121-0271.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: 7/74–1/88.

Objectives: To study electrical, mechanical, pneumatic and hydraulic theory and to learn to troubleshoot and maintain special military equipment utilizing these components.

Instruction: A study of dehumidifier systems, including heating and cooling, pneumatic relays and electronic monitoring equipment; theory and maintenance of high-pressure air, nitrogen, and hydraulic valve systems; electronic environmental monitoring equipment, including moisture and humidity detection; electrical control system utilizing relay logic; and fault isolation and repair of equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electromechanical technology (9/77).

NV-1715-0911

Polaris/Poseidon Radio Navigation
Set AN/BRN-3 Receiver
Advanced Training, Class F1

Course Number: A-193-0261.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Submarine School, New London, CT.

Length: 2 weeks (60 hours).

Exhibit Dates: 1/75–6/83.

Objectives: To provide knowledge and skills required for the corrective maintenance, fault isolation and repair of a navigation control console.

Instruction: For this course after 6/83 see NV-1715-1455. Course offers classroom and laboratory time in advanced theory and corrective maintenance of a radio navigation receiver.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (9/77).

NV-1715-0912

1. Sonar Receiving Set AN/BQR-15

Combined Maintenance
2. Sonar Receiving Set AN/BQR-15 Mod 0 Advanced Maintenance, Class F1
(Sonar Receiving Set AN/BQR-15 Mod 0 Operator and Maintenance)

Course Number: A-130-0238; A-130-0125; F-130-0034.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine School Groton, New London, CT; Fleet Ballistic Missile Submarine Training Center, Charleston, SC.

Length: 2 weeks (67-80 hours).

Exhibit Dates: *Version 1:* 3/81-Present. *Version 2:* 10/75-2/81.

Objectives: To provide theory of operation and maintenance on the specific military equipment.

Instruction: *All Versions:* Course includes the study of the theory of operation of specialized military equipment. Student learns to perform fault isolation, calibrate, and adjust the equipment. *Version 1:* Includes basic maintenance and repair.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronic maintenance and repair laboratory (3/81). *Version 2:* Credit is not recommended because of the military-specific nature of the course (9/77).

NV-1715-0913

Navigation Satellite Receiver AN/WRN-5 Combined Maintenance
(Loran AN/WRN-5 Combined Maintenance)
(Satellite Navigation System AN/WRN-5)
(Satellite Receiver AN/WRN-5 Combined Maintenance, Class C-1)
(AN/WRN-5 Combined Maintenance)
(Navigation Set Operation and Maintenance)

Course Number: A-193-0054.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine School Groton, New London, CT.

Length: 3 weeks (90-117 hours).

Exhibit Dates: *Version 1:* 1/80-Present. *Version 2:* 8/73-12/79.

Objectives: To provide the necessary skills and theory to operate, repair, and maintain a satellite receiver/computer.

Instruction: *All Versions:* Course discusses arithmetic logic, input/output devices, analog-to-digital conversion, synchro-to-digital conversion, and phase modulation detection. More than 50 percent of the course is devoted to operational description of the equipment. *Version 1:* Includes discussion at the functional level of a satellite navigation receiver system. *Version 2:* Includes discussion at the functional level of magnetic and core memories of a computer.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic systems troubleshooting and maintenance (10/89). *Version 2:* In the vocational certificate category, 1 semester hour in computer technology (9/77).

NV-1715-0914

IFF AN/APX-72 and AN/UPX-17 Combined Maintenance
(IFF Transponder AN/APX-72 and AN/UPX-17 Combined Maintenance, Class F1)

Course Number: A-102-0229; A-102-0161.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine School, Groton, CT; Submarine School, New London, CT.

Length: 2 weeks (60 hours).

Exhibit Dates: 11/76-1/88.

Objectives: To provide training in the operation and maintenance of the AN/APX-72 and AN/UPX-17 IFF equipments aboard submarines.

Instruction: Major emphasis of course is on qualitative functional and operational description of the specified equipment concentrating on corrective maintenance.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics technology (9/77).

NV-1715-0915

Polaris/Poseidon Radio Navigation Set AN/BRN-3, Data Processor Advanced Training, Class F1

Course Number: A-193-0260.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Submarine School, New London, CT.

Length: 2 weeks (60 hours).

Exhibit Dates: 1/75-1/88.

Objectives: Course offers a review of theory and maintenance procedures for radio navigation equipment.

Instruction: Course includes block diagram, study of receivers, computers, and peripheral equipment; also includes approximately 35 hours of alignment procedures for receivers, computers, data processors, and peripheral equipment. Remainder of course time is devoted to troubleshooting equipment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics technology (9/77).

NV-1715-0916

Ship's Inertial Navigation System (SINS) Mk 2 Mod 6 Selectric Typewriter, Class F1
(Ship's Inertial Navigation System (SINS) Mk 2 Mod 6 Selectric Typewriter Advanced Maintenance)

Course Number: A-193-0266.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Submarine School, New London, CT.

Length: 2 weeks (60 hours).

Exhibit Dates: 1/75-1/88.

Objectives: To provide theory of operation of a selectric typewriter and to teach fault isolation, adjustment, and repair of the equipment.

Instruction: Course teaches theory of operation of a selectric typewriter, including controls, clutches, gears, cams, latches, linkages and springs. Students will perform fault isolation and make adjustments and repairs to the equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electromechanical technology (9/77).

NV-1715-0917

Launcher Mk 21 Mod 2 Advanced Training, Class F1

Course Number: A-121-0272.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: 7/74-1/88.

Objectives: To study electrical, mechanical, pneumatic and hydraulic theory and to learn to troubleshoot and maintain special military equipment utilizing these components.

Instruction: Course presents a study of dehumidifier systems, including heating and cooling, pneumatic relays, and electronic monitoring equipment. Course includes theory of operation and maintenance of high-pressure air, nitrogen and hydraulic valve systems; electronic environmental monitoring equipment, including moisture and humidity detection; electrical control systems utilizing relay logic, and performance of fault isolation tests and repair of equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electromechanics (9/77).

NV-1715-0918

6L16 Oxygen Generator Electrical Technician
(Oxygen Generator Technician 6L16)

Course Number: A-623-0039.

Location: Submarine Training Facility, Norfolk, VA; Submarine Training Facility, San Diego, CA; Trident Training Facility, Bangor, WA; Submarine Training Center, Kings Bay, GA; Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine School, Groton, CT; Fleet Ballistic Missile Submarine Training Center, Charleston, SC.

Length: 3 weeks (90-120 hours).

Exhibit Dates: *Version 1:* 12/79-Present. *Version 2:* 1/74-11/79.

Objectives: To provide training in the electrical maintenance of an oxygen generator.

Instruction: Approximately one-third of the course provides instruction in power supplies, contact annunciators, magnetic amplifier annunciators, readout circuits, and pressure controller systems. The balance of the course is devoted to troubleshooting and calibration.

Credit Recommendation: *Version 1:* Credit is not recommended because of the limited, specialized nature of the course (10/89). *Version 2:* In the vocational certificate category, 1 semester hour in electronics technology (9/77).

NV-1715-0919

Ship's Inertial Navigation System (SINS) Mk 2 Mods 1 and 4 Theory and Maintenance I

Course Number: A-193-0294.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: 1/75-1/88.

Objectives: To provide the theory of operation of specific military equipment and to enable the student to perform fault isolation on the equipment.

Instruction: Course offers a study of the theory of operation of specialized military equipment, with limited instruction on fault isolation and repair.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (9/77).

NV-1715-0920

Ship's Inertial Navigation System (SINS) Mk 2 Mods 1 and 4 Theory and Maintenance II

Course Number: A-193-0295.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60 hours).
Exhibit Dates: 1/75-1/88.
Objectives: Provides advanced training (follow-on) for operation and fault isolation of the ships inertial navigation system (SINS) Mk 2 Mods 1 and 4 systems.
Instruction: Offers quantitative theory related to maintenance and repair of logic circuits and specialized mechanical components unique to specialized equipment.
Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics technology (9/77).

NV-1715-0921

Ship's Inertial Navigation System (SINS) Mk 2 Mod 3 Theory and Maintenance I

Course Number: A-193-0292.
Location: Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 2 weeks (60 hours).
Exhibit Dates: 1/75-1/88.
Objectives: To teach theory of operation and fault isolation performance on specific military equipment.
Instruction: Course presents theory of operation of specialized military equipment in the pre-navigate mode, including caging loops, torquing loops, alignment loops, and alarm circuitry, and the performance of fault isolation and repair on the equipment.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (9/77).

NV-1715-0922

Ship's Inertial Navigation System (SINS) Mk 2 Mod 3 Theory and Maintenance II

Course Number: A-193-0293.
Location: Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 2 weeks (60 hours).
Exhibit Dates: 1/75-1/88.
Objectives: To study the theory of operation and maintenance of specialized military equipment.
Instruction: The study of temperature control, monitors, data transmission, and the performance of fault isolation and repair on specialized military equipment are covered.
Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics (9/77).

NV-1715-0923

Verdan Computer Theory and Maintenance I
(Verdan Theory and Maintenance I, Class F1)

Course Number: A-193-0290.
Location: Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 2 weeks (60 hours).
Exhibit Dates: 1/75-1/88.
Objectives: To teach the theory of operation of a special-purpose digital computer and performance of fault isolation and repair on the equipment.
Instruction: Course offers a study of the functional operation of a special-purpose digital computer to include the following topics: control, indicators, modes, sequence of operations, input/output, timing relationships, loop functions, power supplies, coding, instructions and data format, and registers; fault isolation and repair on the Universal section, GP (non-compute) section, and the DDA section of the Verdan computer.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronics technology (9/77).

NV-1715-0924

Verdan Computer Theory and Maintenance II
(Verdan Theory and Maintenance, Class F1)

Course Number: A-193-0291.
Location: Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 2 weeks (60 hours).
Exhibit Dates: 1/75-1/88.
Objectives: To teach the theory of operation of a special-purpose digital computer and performance of fault isolation and repair on the equipment.
Instruction: Course covers theory of operation of the I/O section of a digital computer including input and output logic and coding, I/O diagnostic tests, control panel switches and diagrams, keyboard, displays, and typewriter buffer circuitry, and teaches performance of fault isolation and equipment repair. As conducted after 10/77 course includes functional description and operation of tape reader, including amplifiers, solenoid drivers, photodiode sensors and control signals.
Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics (9/77).

NV-1715-0925

Radio Navigation Set AN/BRN-3/3A Computer Advanced Training
(AN/BRN-3 Computer Advanced Training)

Course Number: A-193-0271.
Location: Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 2 weeks (60 hours).
Exhibit Dates: 1/75-1/88.
Objectives: To present the theory of operation of a digital data processing computer with tape reader/punch and to perform fault isolation, corrective maintenance, and repairs on the equipment.
Instruction: Course presents a study of digital data processing computer using block, logic, and schematic diagrams of the control and state counters, memory access, memory selection, and registers for shift, hold, add, increment, decrement, complement, merge, and extract operations. Interface circuitry for the tape reader and tape punch, and perform fault isolation, mechanical adjustment, and repairs on the equipment.
Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics technology (9/77).

NV-1715-0926

Naval Data Automated Computer (NAVDAC) Advanced Training

Course Number: A-193-0282.
Location: Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 4 weeks (120 hours).
Exhibit Dates: 1/75-1/88.
Objectives: To teach theory of operation and performance of fault isolation, and to teach repair on specialized military equipment.
Instruction: Course includes study of logic circuits and elements as they relate to timing, storage, control, input/output, arithmetic and power supplies for specific military equipment. Students will learn to perform fault analysis and make repairs on the equipment.
Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics (9/77).

NV-1715-0927

Submarine Communication Application and Theory Module 1
(SCATMOD 1)

Course Number: A-100-0035.
Location: Submarine School, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 4 weeks (120 hours).
Exhibit Dates: 3/75-1/88.
Objectives: To review basic arithmetic and algebra, including linear equations, and to introduce electricity and the study of DC circuits.
Instruction: Course presents an introduction to the structure of matter and a study of electrostatics, magnetism, EMF, current, resistance, cells, and batteries, DC series circuits and applications, parallel DC circuits and applications of parallel circuits, equivalent circuits and applications.
Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics, 1 in mathematics (9/77).

NV-1715-0928

Submarine Communication Application and Theory Module 2
(SCATMOD 2)

Course Number: A-100-0036.
Location: Submarine School Groton, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 4-5 weeks (120 hours).
Exhibit Dates: 3/75-1/88.
Objectives: Course provides training in the fundamentals of electronics and electronic circuitry.
Instruction: Course provides a study of trigonometry, including right triangles, trigonometric tables and vectors (including addition and subtraction), theory of AC circuits, inductance, inductive reactance, capacitive reactance, series RL and RLC circuits, impedance, Q, parallel RL and RLC circuits, series and parallel resonance. A study of solid-state diodes and power supplies, transistors and amplifiers, multi-element tubes and amplifiers, tuned circuits, amplifier distortion and coupling.
Credit Recommendation: In the vocational certificate category, 5 semester hours in electronics (9/77)

NV-1715-0929

Submarine Communication Application and Theory Module 3, Class A-1
(SCATMOD 3)

Course Number: A-100-0050.
Location: Submarine School, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 2-3 weeks (90 hours).
Exhibit Dates: 11/75-1/88.
Objectives: Course presents a study of electronics circuits and applications, including oscillators, pulse and wave shaping, RF power amplifiers, CW keying and transmitters, modulation, AM transmitters, FSK, single sideband, transmission lines, antennas and waveguides.
Instruction: Course covers theory of operation of oscillators, including Armstrong, Hartley, TPTG, crystal controlled, Colpitts, electron-coupled, blocking, and RC. A

study of RC shaping circuits and applications; astable, monostable, distable multivibrators; Schmidt triggers; clamping and limiting; switching; gating and applications, and frequency compensation are presented. Also presented are theory of RF power amplifiers and applications, CW keying and applications, CW transmitters, modulation, AM transmitters, frequency shift keying, single sideband, transmission lines, antennas, and wave propagation.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics (9/77).

NV-1715-0930

Submarine Communication Application and Theory Module 4
(SCATMOD 4)

Course Number: A-100-0051.

Location: Submarine School, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: 3/75–1/88.

Objectives: To present a study of the theory of superheterodyne receivers, including CW and SSB, and to teach students to perform troubleshooting on the equipment with the use of oscilloscopes and signal generators.

Instruction: An introduction to basic superheterodyne receivers, CW and SSB receivers, control circuits, and applications of receiver control circuits. In-depth study of a six-step troubleshooting procedure with laboratory application, using oscilloscopes and signal generators, is presented.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics (9/77).

NV-1715-0931

Submarine Communication Application and Theory Module 5
(SCATMOD 5)

Course Number: A-100-0052.

Location: Submarine School, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: 3/75–1/88.

Objectives: To familiarize the individual with military procedures for documenting faulty equipment and technical manual layout, and to permit the individual to develop skills in using hand tools and soldering equipment and to perform adjustments, alignment, and calibration procedures on equipment.

Instruction: The course presents a study of military procedures and technical manual layouts and the use of hand tools and soldering irons to develop skills to disassemble, repair, reassemble, solder, and splice cables and perform adjustments, alignments, and calibration procedures on military equipment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics (9/77).

NV-1715-0932

Submarine Communication Application and Theory Module 6
(SCATMOD 6)

Course Number: A-100-0053.

Location: Submarine School, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 3–4 weeks (90 hours).

Exhibit Dates: 11/75–1/88.

Objectives: To introduce digital principles, number systems, logic circuits, Boolean algebra, functional operation of computers, programming, concepts and systems applications.

Instruction: Course presents a study of number systems, including binary and octal, conversions between ranixes, arithmetic operations, and components; logic circuits, including and, or, nand, nor, exors, and inverters; introduction to Boolean algebra and use of the Veitch diagram; study of flip-flops, registers, encoding, decoding, counting, arithmetic, control, memory, I/O, programming, and system applications.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics technology (9/77).

NV-1715-0933

Interrogator Set AN/TPX-42A(V)8 CATOC DAIR Class C1

Course Number: C-103-2033.

Location: Naval Air Technical Training Center, Memphis, TN.

Length: 9 weeks (360 hours).

Exhibit Dates: 6/79–4/88.

Objectives: To train electronic technicians in the maintenance and repair of computer based air traffic control equipment at the organizational level.

Instruction: For this course after 4/88 see NV-1715-1434. Classroom and laboratory instruction in logic and number systems, digital computer fundamentals, machine language programs; interface logic to air traffic control equipment and alignment and maintenance procedures.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in minicomputers (2/81).

NV-1715-0934

SSN/SSBN Electronic Hovering and Depth Control Combined Maintenance
(Electronic Hovering and Depth Control Combined Maintenance)
(Electronic Hovering and Missile Compensation)

Course Number: A-623-0041.

Location: Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine School, Groton, New London, CT.

Length: 2 weeks (63–80 hours).

Exhibit Dates: 2/75–Present.

Objectives: To train technicians to operate, align, repair, and perform preventive maintenance on equipment to stabilize a submarine during missile launch.

Instruction: Operating stabilization equipment and performing preventive maintenance, alignment, and repair on the electronic aspects of the equipment. Troubleshooting of the system covers controls, indicators, transducers, and operational amplifiers.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (6/81).

NV-1715-0935

AN/ALR-45 Countermeasures Receiving Set Intermediate Maintenance

Course Number: C-102-3093.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA; Naval Air Maintenance Training Detachment, Miramar, CA; Naval Air Maintenance Training Detachment, Oceana, VA; Naval Air Maintenance Training Detachment, LeMoore, CA; Naval Air Maintenance Training Detachment, Cecil Field, FL.

Length: 4–5 weeks (152 hours).

Exhibit Dates: 7/80–Present.

Objectives: To provide experienced maintenance personnel with instruction in the maintenance of an electronic countermeasures receiving set by using appropriate circuit analysis and troubleshooting techniques and applicable test equipment.

Instruction: Lectures and practical laboratory work in maintenance and troubleshooting the electronic countermeasures test set, circuit analysis techniques, video circuit analysis, digital filtering analysis and associated test equipment. There is also a review of transistor fundamentals and basic digital logic circuits.

Credit Recommendation: In the vocational certificate category, 3 semester hours in digital fundamentals (7/80); in the lower-division baccalaureate/associate degree category, 1 semester hour in digital fundamentals laboratory (7/80).

NV-1715-0936

AN/ALM-163 Digital Module Test Console Intermediate Maintenance

Course Number: C-102-3965.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 3 weeks (120 hours).

Exhibit Dates: 3/78–Present.

Objectives: To provide fleet aviation electronic technicians training in the maintenance and repair of a digital module test console.

Instruction: Lectures and laboratory instruction covering the functions and operation of a digital module test console including the power supply, power distribution control systems, logic board operation and the mechanical and electrical interface for a card reader. The student uses specialized test equipment to maintain, troubleshoot and repair console components.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (7/80).

NV-1715-0937

A-6E (M1-M120 and 158041-1595079) and KA-6D Aircraft Communication, Navigation, Identification (CNI) and Intercommunication and Related Systems Organizational Maintenance

Course Number: C-102-3969.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA; Naval Air Maintenance Training Detachment, Oceana, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/80–Present.

Objectives: To train experienced maintenance personnel in the organizational maintenance of a sophisticated communication, navigation, identification and intercommunication system and its associated equipment as used on a naval aircraft.

Instruction: Lectures and practical exercises in the operation, maintenance, testing, troubleshooting and repair of communication, radar altimeter, and navigation systems, and the necessary specialized test equipment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in avionic maintenance technology(7/80).

NV-1715-0938

AN/ALR-50(V) Radar Receiver Intermediate Maintenance

Course Number: C-102-3095.

Location: Naval Air Maintenance Training Detachment, Lemoore, CA; Naval Air Maintenance Training Detachment, Whidbey Island, WA; Naval Air Maintenance Training Detachment, Oceana, CA; Naval Air Maintenance Training Detachment, Cecil Field, FL; Naval Air Maintenance Training Detachment, Cherry Point, NC.

Length: 3 weeks (110 hours).

Exhibit Dates: 3/76–Present.

Objectives: This course provides experienced personnel with training in intermediate level maintenance and repair of a specialized radar receiver.

Instruction: Lectures and laboratory instruction on both block and detailed theory levels of operation and maintenance of an RF/Video receiver. Some time is spent on identifier and processor logic theory.

Credit Recommendation: In the vocational certificate category, 3 semester hours in computer servicing (7/80); in the lower-division baccalaureate/associate degree category, 1 semester hour in digital fundamentals laboratory (7/80).

NV-1715-0939

AN/ALE-41 Dispensing System and Associated Peculiar Ground Support Equipment Intermediate Maintenance

Course Number: C-102-3115.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA; Naval Air Maintenance Training Detachment, Cecil Field, FL; Naval Air Maintenance Training Detachment, Le Moore, CA; Naval Air Maintenance Training Detachment, Cherry Point, NC.

Length: 2 weeks (60 hours).

Exhibit Dates: 2/78–Present.

Objectives: Provides trained personnel with information at the block level to maintain and troubleshoot specialized chaff dispensing equipment.

Instruction: Lectures and laboratory training at the intermediate or systems level in such topics as basic concepts of major assemblies and subassemblies, and system/aircraft interface and structural considerations. Some time is spent on electronic system theory including power distribution/control, circuit card assembly, converters and drive motors.

Credit Recommendation: In the vocational certificate category, 1 semester hour in avionics maintenance technology (7/80); in the lower-division baccalaureate/associate degree category, 1 semester hour in electromechanical laboratory (7/80).

NV-1715-0940

A-6E Target Recognition Attack MultiSensor Aircraft Communication, Navigation, Identification (CNI) and Intercommunication Systems Organizational Maintenance

Course Number: C-102-3967.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA; Naval Air Maintenance Training Detachment, Oceana, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/78–Present.

Objectives: To train experienced maintenance personnel to maintain and troubleshoot a particular target recognition, communication navigation and identification system.

Instruction: Instruction in the operation, block diagram analysis, troubleshooting and maintenance of a particular target recognition system including some radar fundamentals, UHF principles and communication systems.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (7/80).

NV-1715-0941

AN/APM-375 Mini-SACE Search Radar Test Console Intermediate Maintenance

Course Number: C-104-3764.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA; Naval Air Maintenance Training Detachment, Oceana, VA.

Length: 8 weeks (320 hours).

Exhibit Dates: 12/75–Present.

Objectives: To train experienced maintenance personnel to operate, maintain, troubleshoot and repair a specialized radio console.

Instruction: Lectures and practical exercises in the operation maintenance, troubleshooting and repair procedures for a semi automatic test system including block diagram analysis, selection of program mo[illegible] signal tracing and analysis, microwave circuit tracing, logic signals and timing, and equipment calibration procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics maintenance (7/80).

NV-1715-0942

A-6E TRAM Weapons System Technician Organizational Maintenance

Course Number: C-102-3971.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA, Naval Air Maintenance Training Detachment, Oceana, VA.

Length: 8 weeks (320 hours).

Exhibit Dates: 5/79–Present.

Objectives: To provide trained personnel with instruction on organizational maintenance of ballistics computer, search radar, inertial navigation, and TRAM armament system equipment.

Instruction: Lectures and laboratory instruction at the basic block diagram level on the operation, troubleshooting, repair and alignment of specialized electronic equipment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics laboratory (7/80).

NV-1715-0943

AN/ALM-117 Digital Test Station Operator

Course Number: C-102-3973.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 3 weeks (120 hours).

Exhibit Dates: 11/79–Present.

Objectives: To train experienced maintenance personnel in the operation of a specialized digital test station.

Instruction: Lectures and practical exercises in the operation of a digital test station including magnetic tape drives, video terminal, interface adaptors, and special alignment procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in computer operations, 1 semester hour in maintenance and repair laboratory (7/80).

NV-1715-0944

AN/AMP-225 Module Analyzer Test Console Intermediate Maintenance

Course Number: C-104-3762.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA; Naval Air Maintenance Training Detachment, Oceana, VA.

Length: 12 weeks (468 hours).

Exhibit Dates: 3/79–Present.

Objectives: This course provides trained personnel with instruction on the maintenance and repair of a module analyzer test console and peripheral equipment.

Instruction: Lecture and laboratory instruction at the block diagram level in signal, sweep and gate generators, basic logic circuits and functions, electronics circuitry, digital timers, and related circuitry including troubleshooting and repair procedures using an oscilloscope, multimeter and frequency counter.

Credit Recommendation: In the vocational certificate category, 3 semester hours in computer maintenance (7/80); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (7/80).

NV-1715-0945

AN/APQ-148/156 Search Radar Intermediate Maintenance

Course Number: C-104-3763.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 6 weeks (248 hours).

Exhibit Dates: 5/79–Present.

Objectives: To provide experienced personnel with instruction to the block diagram level in fundamental analysis, maintenance, troubleshooting and repair of a search radar system.

Instruction: Lectures and laboratory instruction on radar set control, antenna receiver, radar transmitter, signal data converter, radar data error computer, video processor and azimuth-range indicator for a specific search radar system.

Credit Recommendation: In the vocational certificate category, 1 semester hour in systems maintenance laboratory (7/80).

NV-1715-0946

AN/ARM-155 and AN/ARM-156 TACAN Test Equipment Intermediate Maintenance

Course Number: C-102-3089.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA; Naval Air Maintenance Training Detachment, Oceana, VA; Naval Air Maintenance Training Detachment, Miramar, CA; Naval Air Maintenance Training Detachment, LeMoore, CA; Naval Air Maintenance Training Detachment, Cecil Field, FL; Naval Air Maintenance Training Detachment, Cherry Point, NC.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/78–Present.

Objectives: The course provides trained personnel with fundamental procedures used to maintain, troubleshoot, and repair a specialized piece of equipment.

Instruction: Lectures and laboratory instruction in power requirements, signal flow and basic operation theory applicable to specialized test equipment.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (7/80).

NV-1715-0947

AN/ARN-84(V) TACAN Receiver
Intermediate Maintenance

Course Number: C-102-3090.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA; Naval Air Maintenance Training Detachment, Miramar, CA; Naval Air Maintenance Training Detachment, Moffett Field, CA; Naval Air Maintenance Training Detachment, LeMoore, CA; Naval Air Maintenance Training Detachment, Oceana, VA; Naval Air Maintenance Training Detachment, Cecil Field, FL; Naval Air Maintenance Training Detachment, Cherry Point, NC.

Length: 2 weeks (96 hours).

Exhibit Dates: 2/77–Present.

Objectives: The course provides fleet maintenance personnel with knowledge of the theory, operation and troubleshooting of an aircraft receiver.

Instruction: The student gains an understanding of the receiver operation and signal flow path so as to identify defective components or subsystems using a fault free troubleshooting procedure provided in the maintenance manuals.

Credit Recommendation: In the vocational certificate category, 1 semester hour in repair and maintenance laboratory (7/80).

NV-1715-0948

AN/ASM 459 Mini-SACE Flight
System Test Console
Intermediate Maintenance

Course Number: C-104-3769.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA; Naval Air Maintenance Training Detachment, Oceana, VA.

Length: 6 weeks (226 hours).

Exhibit Dates: 6/78–Present.

Objectives: To train experienced maintenance personnel to maintain and troubleshoot a semi-automatic checkout equipment system test console.

Instruction: Lectures and practical exercises in the operation, programming and program interpretation of the mini-SACE flight system test console including block diagram analysis, parts location and self testing procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics maintenance technology (7/80).

NV-1715-0949

AN/ASM-461 Mini-SACE Display Test
Console Intermediate
Maintenance

Course Number: C-104-3768.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA; Naval Air Maintenance Training Detachment, Oceana, VA.

Length: 6 weeks (230 hours).

Exhibit Dates: 12/76–Present.

Objectives: To train experienced maintenance personnel to maintain and repair a specialized test set.

Instruction: The course includes instruction in the operation and maintenance of a specialized test set, including effects of malfunctions, signal tracing schematics and block diagrams, and maintenance and repair procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in maintenance procedures (7/80).

NV-1715-0950

AN/ASQ-155 and AN/ASQ-133
Ballistics Computer Set

Course Number: C-150-3770.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA; Naval Air Maintenance Training Detachment, Oceana, VA.

Length: 11 weeks (438 hours).

Exhibit Dates: 9/78–Present.

Objectives: To train experienced personnel in the maintenance and repair of a ballistic computer, utilizing test consoles and appropriate test equipment.

Instruction: Lectures and laboratory instruction in the use and operation of the ballistic computer set, including software and hardware aspects such as assembly language, power supplies input-output sequences, tape drives, logic analysis, diagnostics fault isolation and repair of all aspects of the computer set.

Credit Recommendation: In the vocational certificate category, 3 semester hours in digital fundamentals and 3 in computer operations (7/80); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer maintenance (7/80); in the upper-division baccalaureate category, 3 semester hours in computer systems (7/80).

NV-1715-0951

AN/USH-17(V-3)(V-7) Mission Recorder
Set and AN/UPQ-5 Display Set
with Ground Support Equipment
Intermediate Maintenance

Course Number: C-102-3962.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA; Naval Air Maintenance Training Detachment, Oceana, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 2/75–Present.

Objectives: The course provides experienced personnel with instruction in the maintenance of a video recorder applied to radar systems.

Instruction: Lectures and laboratory instruction in the functional analysis at the block diagram level and the theory of operation including maintenance procedures, the alignment and troubleshooting of a video recorder system.

Credit Recommendation: In the vocational certificate category, 1 semester hour in audio-visual electonics (7/80).

NV-1715-0952

Automatic Flight Control System
AN/ASW-40, AN/ASW-41 and
AN/ASW-42 Intermediate
Maintenance

Course Number: C-602-3941.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA; Naval Air Maintenance Training Detachment, Oceana, VA.

Length: 3 weeks (136 hours).

Exhibit Dates: 4/78–Present.

Objectives: To provide trained personnel with information necessary to maintain and troubleshoot three related automatic flight systems.

Instruction: Lectures and laboratory instruction at the block diagram level in such topics as pitch, roll and heading computers, command couplers, rate gyroscopes, normal and lateral accelerometers and various interlocking modes as related to specific specialized electronic systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in avionics maintenance technology (7/80).

NV-1715-0953

Test Bench Intermediate
Maintenance AQQ
(A-6 Terrain Clearance Test Bench Intermediate Maintenance)

Course Number: C-104-3765.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA; Naval Air Maintenance Training Detachment, Oceana, VA.

Length: 5 weeks (205 hours).

Exhibit Dates: 1/76–Present.

Objectives: To provide trained personnel with instruction in the maintenance of a terrain clearance test bench and modules of a multimode radar system associated with it.

Instruction: Instruction covers the theory of operation, the function of each circuit component, the characteristics and application of operational and differential amplifiers, wave shaping circuits and filters for the purpose of maintaining, troubleshooting, calibrating and aligning a terrain clearance test bench.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems (7/80).

NV-1715-0954

CU-1768A Computer Data Coupler
and CP-926A Digital Data
Computer Intermediate
Maintenance

Course Number: C-102-3975.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 4 weeks (160 hours).

Exhibit Dates: 6/78–Present.

Objectives: To train experienced personnel in the maintenance and repair of a digital data computer and computer interface adaptor.

Instruction: Lectures and laboratory instruction in basic computer fundamentals such as input/output operation, interrupt registers and control, central processor unit, store operations, memory addressing, timing sequences and other basic computer operations including maintenance and troubleshooting techniques and procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer systems (7/80).

NV-1715-0955

EA-6B ICAP Electronic
Countermeasures Analyst
Organizational Maintenance

Course Number: C-102-3968.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide personnel with instruction in operation and maintenance of a defensive electronic countermeasure and tactical jamming system.

Instruction: Lectures and laboratory instruction at the systems level in such areas as surveillance receivers, encoders, various display procedures, digital recording systems, receivers and practical troubleshooting.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics systems maintenance laboratory (7/80).

NV-1715-0956

Subassembly Test Console (SATC) Intermediate Maintenance
(AN/ALM-138, AN/ALM-143, AN/ALM-155 Subassembly Test Console T, S, and C Intermediate Maintenance)

Course Number: C-102-3956.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 8-10 weeks (320-400 hours).

Exhibit Dates: 2/76-Present.

Objectives: To provide electronic maintenance personnel with instruction in the maintenance and operation of a contained test console.

Instruction: Lectures and laboratory instruction in the theory and operation of the test console and how to interpret its results. Instruction includes signal flow, correct voltage and logic levels as well as the function of each component and the effect its failure has on the circuit. The function and operating techniques of oscilloscopes, spectrum analyzers, pulse and sweep generators counters and other test equipment is presented. The course presumes prior knowledge of circuit analysis and transistor and logic theory.

Credit Recommendation: In the vocational certificate category, 3 semester hours in radio frequency circuits (7/80); in the lower-division baccalaureate/associate degree category, 2 semester hours in radio frequency circuits laboratory and circuit troubleshooting techniques (7/80); in the upper-division baccalaureate category, credit in radio frequency circuit test laboratory on the basis of institutional evoluation (7/80).

NV-1715-0957

A-6E Automatic Carrier Loading System Organizational Maintenance

Course Number: C-102-3966.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA; Naval Air Maintenance Training Detachment, Oceana, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/77-Present.

Objectives: Personnel are provided with training in the analysis, troubleshooting and basic maintenance of an automatic carrier landing system and its related equipment.

Instruction: Lectures and laboratory instruction, at the block diagram level, in a radar beacon and augmentation system including decoding, data linkage and interfacing peculiar to a specific and specialized electronic system.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (7/80).

NV-1715-0958

AN/GYK-3 Computer Maintenance
(Bullseye Net Control Computer Maintenance)

Course Number: A-102-0059.

Location: Naval Security Group Activity, Skaggs Island, Sonoma, CA.

Length: 28-45 weeks (846 hours).

Exhibit Dates: 1/70-Present.

Objectives: To train maintenance personnel to operate, maintain, troubleshoot and repair computer systems.

Instruction: Lectures and practical exercises in the operation, maintenance, repair and troubleshooting of a Burroughs 5000 computer and its associated systems. The repair operations are to component level for all portions of this system. The student is taught and expected to apply concepts of Burroughs assembly language, addressing, word formats, timing and program modification to accomplish the repair of this system. After 1/81 course includes working with the Burroughs 5000 digital computer and its associated core memory, power units, control and storage units for a disc memory system and controller unit by using diagnostic routines, block diagram tracing, signal tracing and input/output analysis. From 7/78-12/80 course includes the Burroughs 5000 and DEC 11/40 computer systems and their associated core memory, magnetic drum memory, power and control units, and storage unit for a disk memory system, tektronix to 14 display terminal, asynchronous line interface, asynchronous multiplexer and programable switch. Students use diagnostic routines, block diagrams tracing, signal tracing and input/output analysis to troubleshoot the system. From 1/70-6/78 course includes working with the Burroughs 5000 digital computer and its associated core memory, magnetic drum memory, status display console, teleprinter, high speed line printer, the power units, control and storage units for a disk memory system and magnetic tape units. The student uses diagnostic routines, block diagram tracing, signal tracing and input/output analysis to troubleshoot the system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer systems, 3 in computer systems operations, and 6 in computer systems maintenance (7/80).

NV-1715-0959

Air Traffic Control Maintenance, Interrogator Set AN/TPX-42A BASIC DAIR, Class C1

Course Number: C-103-2034.

Location: Naval Air Technical Training Center, Memphis, TN.

Length: 7 weeks (280 hours).

Exhibit Dates: 6/79-2/84.

Objectives: To train electronics technicians who have had previous training in digital fundamentals and solid state theory to perform preventive and corrective maintenance on the AN/TPX-42A radar system.

Instruction: For this course after 2/84 see NV-1715-1432. Lectures and practical exercises in the operation and maintenance of selected functions of the AN/TPX42(A) radar system including: interrogator, antenna system, test equipment and radar signal processor components, digital theory and devices and operational amplifiers.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic maintenance and repair and 1 in digital principles (2/81).

NV-1715-0960

Air Traffic Control Maintenance AN/FPN-63(V) Precision Approach Radar, Class C1

Course Number: C-103-2037.

Location: Naval Air Technical Training Center, Memphis, TN.

Length: 7 weeks (280 hours).

Exhibit Dates: 9/80-12/87.

Objectives: To prepare electronics technicians to maintain the AN/FPN-63(V) precision approach radar system.

Instruction: Classroom and laboratory instruction in solid state devices, digital circuits, integrated circuits and A/D convertors. Applications of the devices in radar systems is included as well as troubleshooting and maintenance of the AN/FPN-63 radar sets.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in solid state devices and 3 in digital integrated circuits (2/81).

NV-1715-0961

Air Traffic Control Maintenance, Radar Set AN/CPN-4A

Course Number: C-103-2015.

Location: Naval Air Technical Training Center, Memphis, TN.

Length: 5-6 weeks (200 hours).

Exhibit Dates: 12/74-3/86.

Objectives: To familiarize the student with the theory of operation, alignment and troubleshooting techniques of an air traffic control radar set.

Instruction: Lectures and laboratories in the theory and operation of transmitter and receiver circuits used in a radar system. The student performs alignment of both receiver and transmitter circuits, and diagnoses, insulates, troubleshoots to the component level using schematic diagrams.

Credit Recommendation: In the vocational certificate category, 3 semester hours in radar systems (2/81).

NV-1715-0962

Marine Air Traffic Control Navigational Aids Technician Class C1

Course Number: C-103-2030.

Location: Naval Air Technical Training Center, Millington, Memphis, TN.

Length: *Version 1:* 37 weeks (1488 hours). *Version 2:* 30 weeks (1200 hours).

Exhibit Dates: *Version 1:* 10/84-5/89. *Version 2:* 7/79-9/84.

Objectives: To train technical personnel in the theory and maintenance of digitally controlled navigational aids equipment.

Instruction: *Version 1:* Classroom and laboratory instruction in DC circuit fundamentals including Kirchoff's law series and parallel circuits, network theorems, fundamental AC theory, resonance and filter characteristics, semiconductor physics, solid state devices and vacuum tube characteristics, power supply circuits, and the operational theory of audio, RF, IF and multistage amplifiers, pulse shaping circuits, microwave tube characteristics, AM, PM and SSM theory, fundamentals of transmission lines and antennas, number systems and conversions, does, logic gates, flip-flops, simple logic functions, flowcharting, memory devices, and functional operation of a microcomputer. The course also covers the functional operation, alignment, maintenance and troubleshooting of a navigational radar system including transponders, control/indicators antenna interface and logic circuits to the board level. *Version 2:*

Classroom and laboratory instruction in basic electricity/electric circuits; familiarization with radar, communications and navigational systems including mantenance concepts; introduction to the troubleshooting of solid state circuits, digital logic principles, minicomputer architecture, programming and peripheral devices; theory and maintenance of aircraft navigational aids equipment.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in basic circuit analysis, 1 in basic circuit analysis laboratory, 3 in electronic devices, 3 in electronic circuits and troubleshooting, 1 in electronic circuits and troubleshooting laboratory, 1 in digital circuit fundamentals, 1 in digital circuit fundamentals laboratory (2/85). *Version 2:* In the vocational certificate category, 20 semester hours (lecture) and 10 semester hours (laboratory) in aircraft navigational aids theory and maintenance (2/81); in the lower-division baccalaureate/associate degree category, 4 semester hours in digital logic, 3 in electricity/electric circuits and 1 in solid state electronics (2/81); in the upper-division baccalaureate category, 4 semester hours in minicomputers (2/81).

NV-1715-0963

Marine Air Traffic Control Communications Technician Class C1

Course Number: C-103-2032.

Location: Naval Air Technical Training Center, Millington, Memphis, TN.

Length: *Version 1:* 34 weeks (1000 hours). *Version 2:* 30 weeks (1200 hours).

Exhibit Dates: *Version 1:* 10/84-5/89. *Version 2:* 10/80-9/84.

Objectives: To train technical personnel in the theory and maintenance of computer-based communications equipment.

Instruction: *Version 1:* Classroom and laboratory instruction in DC circuit fundamentals including Kirchhoff's Law series and parallel circuits, network theorems, inductance and capacitance, fundamental AC circuit theory, resonance and filter characteristics, semiconductor physics, solid state devices, and vacuum tube characteristics, power supply circuits, regulators, oscillators, transistor and FET biasing and the operational theory of audio, RF, IF and multistage amplifiers. The course also includes knowledge of pulse shaping circuits, microwave tube characteristics, AM, PM and SSM theory, modulation circuits, fundamentals of transmission lines and antennas, number systems and conversions, codes, logic gates, flip-flops, simple logic functions, flowcharting, memory devices and functional operation of a microcomputer, theory and maintenance of radios, recorders, and display systems used in air traffic control communications. *Version 2:* Classroom and laboratory instruction in basic electricity/electric circuits; familiarization with radar, communications and navigational systems including maintenance concepts; introduction to the troubleshooting of solid state circuits; digital logic principles; minicomputer architectures, programming and peripheral devices; theory and maintenance of communications equipment.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in basic DC circuit analysis, 1 in basic DC circuit analysis laboratory, 3 in electronic devices, 3 in electronic circuits and troubleshooting, 1 in electronic circuits and troubleshooting laboratory, 1 in digital circuit fundamentals, 1 in digital circuit fundamentals laboratory (2/85). *Version 2:* In the vocational certificate category, 20 semester hours (lecture) and 10 semester hours (laboratory) in communications systems theory and maintenance (2/81); in the lower-division baccalaureate/associate degree category, 4 semester hours in digital logic, 3 in electricity/electric circuits and 1 in solid state electronics (2/81); in the upper-division baccalaureate category, 4 semester hours in minicomputers (2/81).

NV-1715-0964

Marine Corps Surveillance Radar, Class C1

Course Number: C-103-2040.

Location: Naval Air Technical Training Center, Memphis, TN.

Length: 8 weeks (320 hours).

Exhibit Dates: 11/79-Present.

Objectives: To provide military personnel with the knowledge and skills to inspect, test, and repair surveillance radar.

Instruction: Lectures and practical exercises in transmitter and receiver alignment and troubleshooting on the AN/TPS-63 radar system including the synchronizer and frequency generator, transmitter systems, and antenna, cooling systems and RF/IF receivers.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic and digital system troubleshooting and repair (2/81).

NV-1715-0965

Marine Air Traffic Control Radar Technician Class C1

Course Number: C-103-2031.

Location: Naval Air Technical Training Center, Millington, Memphis, TN.

Length: *Version 1:* 39 weeks (1549 hours). *Version 2:* 22 weeks (876 hours).

Exhibit Dates: *Version 1:* 10/84-2/89. *Version 2:* 7/79-9/84.

Objectives: To train technical personnel in the theory and maintenance of computer-based radar systems equipment.

Instruction: *Version 1:* Classroom and laboratory instruction in the following subject areas: DC circuit fundamentals, including Kirchoff's law, series and parallel circuits, network theorems, inductance and capacitance, fundamentals of AC circuit theory, semiconductor physics, solid state devices and vacuum tube characteristics, power supply circuits, operational theory of audio, RF, IF and multistage amplifiers, pulse shaping circuits, microwave tube characteristics, AM, PM and SSBM theory, fundamentals of transmission lines and antennas, number systems and conversions, codes, logic gates, flip-flops, simple logic functions, functional operation of a microcomputer, operational theory and maintenance of two radar transmitters and receivers and their interface and display equipment, maintenance of a control computer including machine language instructions and computer aided diagnostic techniques to facilitate repair. *Version 2:* Classroom and laboratory instruction in basic electricity/electric circuits; familiarization with radar, communications and navigational systems including maintenance concepts. Introduction to the troubleshooting of solid state circuits, digital logic principles, minicomputer architecture, programming and peripheral devices and the theory and maintenance of radar receiver/transmitter equipment.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in DC circuit analysis, 1 in DC circuit analysis laboratory, 3 in electronic devices, 3 in electronic circuits and troubleshooting, 2 in electronic circuits and troubleshooting laboratory, 2 in digital circuit fundamentals, 1 in digital circuit fundamentals laboratory, 2 in microcomputer maintenance (2/85). *Version 2:* In the vocational certificate category, 10 semester hours (lecture) and 10 semester hours (laboratory) in radar systems theory and maintenance (2/81); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity/electric circuits, 1 in solid state electronics and 4 in digital logic (2/81); in the upper-division baccalaureate category, 4 semester hours in minicomputers (2/81).

NV-1715-0966

Submarine Electronics Technical Training Modules 1-12

Course Number: A-101-0202.

Location: Naval Submarine School, Groton, New London, CT.

Length: 24 weeks (960 hours).

Exhibit Dates: 7/80-3/89.

Objectives: To provide further electronics training for submarine radiomen.

Instruction: This course is composed of 12 2-week modules (A-101-0190 thru A-101-0201) covering the theory and application of mathematics, electronic circuits, power supplies, devices and circuits, special circuits, modulation techniques, troubleshooting techniques and radio wave propagation, basic digital concepts, arithematic techniques, sequential systems, A/D and D/A conversion, advanced digital concepts and digital computers, computer programming, microprocessors, micropreccessor systems and the 8080A microprocessor.

Credit Recommendation: In the vocational certificate category, 4 semester hours in technical mathematics, 3 in AC/DC circuitry, 2 in test equipment laboratory and 1 in electronic signal generation (3/81); in the lower-division baccalaureate/associate degree category, 2 semester hours in mathematics on the basis of institutional evaluation, 1 in power supply and diodes, 2 in basic electronics, 1 in electronic oscillators, 1 in electronics measurements lab, 1 in communications circuits, 1 in radio electronics, 2 in introduction to digital logic circuits (3/81); in the upper-division baccalaureate category, 2 semester hours in digital computer organization, 2 in introduction to microprocessor programming and 1 in microcomputers (3/81).

NV-1715-0967

Submarine Electronics Technical Training Module 1

Course Number: A-101-0190.

Location: Naval Submarine School, Groton, New London, CT.

Length: 2 weeks (80 hours).

Exhibit Dates: 7/80-3/89.

Objectives: To provide training in the application of mathematics.

Instruction: Classes include instruction in arithmetic, basic algebra including polynomials and linear equations, elements of plane trigonometry, functions, logarithms and use of tables and db calculations.

Credit Recommendation: In the vocational certificate category, 4 semester hours in technical mathematics (3/81); in the lower-division baccalaureate/associate degree category, 2 semester hours in mathematics on the basis of institutional evaluation (3/81).

NV-1715-0968

Submarine Electronics Technical Training Module 2

Course Number: A-101-0191.
Location: Naval Submarine School, Groton, New London, CT.
Length: 2 weeks (80 hours).
Exhibit Dates: 7/80–3/89.
Objectives: To train personnel in basic AC/DC circuit theory.
Instruction: Classes and laboratory exercises including application of Ohm's and Kirchhoff's laws to series, parallel and series parallel circuits with one source. Characteristics of alternating current wave forms, inductors, capacitors and their series of parallel combinations are included as well as impedance and reactance calculations, RL and RC time constants, resonance, basic filter concepts, RL and RC circuit inpedance.
Credit Recommendation: In the vocational certificate category, 3 semester hours in AC/DC circuit theory (3/81).

NV-1715-0969

Submarine Electronics Technical Training Module 3

Course Number: A-101-0192.
Location: Naval Submarine School, Groton, New London, CT.
Length: 2 weeks (80 hours).
Exhibit Dates: 7/80–3/89.
Objectives: To provide entry level technical personnel with an introduction to basic electron devices and their applications to power supplies.
Instruction: Lectures and laboratory exercises in transformers, vacuum diodes, PN junctions theory, biasing, solid-state diodes, rectifiers, power supplies and associated filters. Basic concepts of Dorton and Thevenin equivalent circuits and the theory of junction diodes are also presented.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in power supplies and diodes (vacuum and semiconductor) (3/81).

NV-1715-0970

Submarine Electronics Technical Training Module 4

Course Number: A-101-0193.
Location: Naval Submarine School Groton, New London, CT.
Length: 2 weeks (80 hours).
Exhibit Dates: 7/80–3/89.
Objectives: To provide training in electronics amplifying devices and amplifier circuits.
Instruction: Lectures and laboratory exercises in the basic operation and characteristics of bipolar transistors and field effect transistors, optollectronics devices and vacuum tubes. Transistor biasing basic amplifier types, and amplifier circuits are also covered.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electronics (3/81).

NV-1715-0971

Submarine Electronics Technical Training Module 5

Course Number: A-101-0194.
Location: Naval Submarine School, Groton, New London, CT.
Length: 2 weeks (80 hours).
Exhibit Dates: 7/80–3/89.
Objectives: To train entry level technical personnel in basic electronic oscillators.
Instruction: Lectures and laboratory exercises in basic oscillators and transistorized multivibrators. Concepts of astable, bistable and monostable devices are also covered.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic oscillators (3/81).

NV-1715-0972

Submarine Electronics Technical Training Module 6

Course Number: A-101-0195.
Location: Naval Submarine School Groton, New London, CT.
Length: 2 weeks (80 hours).
Exhibit Dates: 7/80–3/89.
Objectives: To train personnel in the concepts of waveshaping and time circuits with an introduction to signal generators, vacuum tubes, volt meters and oscilloscopes.
Instruction: Lectures and laboratory exercises in waveshaping techniques such as diode limiting and clamping time delay circuit theory, use of signal generators, oscilloscopes and VTVM's. Basic six-step troubleshooting philosophy is used.
Credit Recommendation: In the vocational certificate category, 2 semester hours in test equipment laboratory, 1 in electronic signal generation (3/81); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronic measurements laboratory (3/81).

NV-1715-0973

Submarine Electronics Technical Training Module 7

Course Number: A-101-0196.
Location: Naval Submarine School, Groton, New London, CT.
Length: 2 weeks (80 hours).
Exhibit Dates: 7/80–3/89.
Objectives: To train personnel in the knowledge of AM, FM, phase and single sideband modulation theory and associated circuitry.
Instruction: Lectures and laboratory exercises in the characteristics of modulated wave forms, block diagrams of transmitter circuits with emphasis on various types of transistor and modulator circuits, their operation and wave forms.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in communications circuits (3/81).

NV-1715-0974

Submarine Electronics Technical Training Module 8

Course Number: A-101-0197.
Location: Naval Submarine School, Groton, New London, CT.
Length: 2 weeks (80 hours).
Exhibit Dates: 7/80–3/89.
Objectives: To train entry level technicians in the fundamentals of radio propagation and receiving systems.
Instruction: Lectures and laboratory exercises in transmission lines, radio antennas and propagation, radio receivers, superheterodyne techniques, AM, FM, and SSB receivers.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in radio electronics (3/81).

NV-1715-0975

Submarine Electronics Technical Training Module 9

Course Number: A-101-0198.
Location: Naval Submarine School, Groton, New London, CT.
Length: 2 weeks (80 hours).
Exhibit Dates: 7/80–3/89.
Objectives: To train personnel in basic digital systems and operational amplifier circuits.
Instruction: Lectures and laboratory exercises in number systems, logical operators, DeMorgan's Theorems, Boolean expressions; digital logic gates, BCD, gray and ASCII codes; flip-flops, registers, counters and ALU's; D/A and A/D converters and operational amplifier circuits such as differentiators, integrators and comparitors.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in introduction to digital logic circuits (3/81).

NV-1715-0976

Submarine Electronic Technical Training Module 10

Course Number: A-101-0199.
Location: Naval Submarine School, Groton, New London, CT.
Length: 2 weeks (80 hours).
Exhibit Dates: 7/80–3/89.
Objectives: To train personnel in the basic concepts of digital computers.
Instruction: Lectures and laboratory in the register transfer organization of small digital computers, instruction set interpretation, memory read/write cycles and instruction execution.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in digital computer organization (3/81).

NV-1715-0977

Submarine Electronics Technical Training Module 11

Course Number: A-101-0200.
Location: Naval Submarine School, Groton, New London, CT.
Length: 2 weeks (80 hours).
Exhibit Dates: 7/80–3/89.
Objectives: To train personnel to program an 8080 microprocessor.
Instruction: The student is introduced to programming concepts of low charting techniques. The course includes address modes, instruction set and characteristics of the 8080A microprocessor, arithmetic/logic and control circuits, tri state devices and the 8080A bus structure. Half the course is devoted to practical exercises in flow charting and programming.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in introduction to microprocessor programming (3/81).

NV-1715-0978

Submarine Electronics Technical Training Module 12

Course Number: A-101-0201.
Location: Naval Submarine School, Groton, New London, CT.
Length: 2 weeks (80 hours).
Exhibit Dates: 7/80–3/89.

Objectives: To provide further training in programming an 8080 microprocessor and experience with the Z80.

Instruction: Lectures and classroom exercises in the programming of I/O and memory mapped I/O on the 8080A microprocessor including interface and memory timing, introduction to the Z80 microprocessor and comparison with the 8080A, advanced microcomputer programming concepts and practice and peripheral devices.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in microcomputers (3/81).

NV-1715-0979

Navigation Technician Type I SSN637

Course Number: A-193-0022.

Location: Submarine School, Groton, New London, CT.

Length: 24 weeks (960 hours).

Exhibit Dates: 8/78–Present.

Objectives: To provide the skills necessary to operate and maintain the navigation system of an SSN-637 class submarine.

Instruction: This pipeline course is composed of the following courses: AN/WRN-5 Combined Maintenance (A-193-0054) and Ship's Inertial Navigation System MK3 Mod 4 Combined Maintenance (A-193-0356). Please use our index to refer to the individual exhibits for the course's credit recommendations.

Credit Recommendation: Please refer to the individual exhibits as noted above for the credt recommendation (3/81).

NV-1715-0980

Radio Receiving Set AN/WRR-7
Verdin Combined Maintenance

Course Number: A-101-0068.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine School, Groton, New London, CT.

Length: 6 weeks (240 hours).

Exhibit Dates: 11/74–6/85.

Objectives: To train technical personnel in the maintenance, repair, and operation of a computer driven digital data communications receiver.

Instruction: For this course after 6/85 see NV-1715-1470. Lectures and laboratory exercises in digital data communications receivers, support computer circuits, crypto devices, frequency standards and operations theory, maintenance and repair down to the board/component level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital computer maintenance and repair laboratory, 1 in communications receiver (digital) maintenance and repair laboratory (3/81); in the upper-division baccalaureate category, 1 semester hour in computer organization (3/81).

NV-1715-0981

Submarine Digital Communications
Equipment Combined
Maintenance

Course Number: A-101-0133.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine School, Groton, New London, CT.

Length: 21 weeks (824 hours).

Exhibit Dates: 4/78–3/89.

Objectives: To train personnel to operate and maintain submarine digital communications equipment.

Instruction: For this course after 3/89 see NV-1715-1477. This pipeline course is composed of the following 3 courses; Radio Receiving Set AN/WRR-7 Verdin Combined Maintenance (A-101-0068); Submarine Satellite Information Exchange System Maintenance-Shipboard (A-101-0083) and AN/UGC-20B/25 Teletypewriter Combined Maintenance (A-160-0064). Please use our index to refer to each course individually for the credit recommendation.

Credit Recommendation: Please refer to the individual exhibits as noted above for the credit recommendation (3/81).

NV-1715-0982

Special Communications Equipment
Combined Maintenance

Course Number: A-101-0136.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine School, Groton, New London, CT.

Length: 8 weeks (316 hours).

Exhibit Dates: 10/79–11/85.

Objectives: To train men to operate and maintain a particular MF/HF radio system.

Instruction: For this course after 11/85 see NV-1715-1475. Lectures and laboratory sessions in the operation and maintenance of a communication subsystem including transmitter, antenna tuner and auxiliary equipment. Maintenance is done to the module level.

Credit Recommendation: In the vocational certificate category, 3 semester hours in radio communication system maintenance (3/81); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics technology laboratory (3/81).

NV-1715-0983

Antennas and Coupler Combined
Maintenance

Course Number: A-101-0137.

Location: Naval Submarine Training Center, Pacific, Pearl Harbor, HI; Naval Submarine School, Groton, New London, CT.

Length: 7 weeks (280 hours).

Exhibit Dates: 7/72–Present.

Objectives: To provide knowledge and skills necessary to operate and maintain two submarine floating antennas and coupler systems.

Instruction: The course covers the functional characteristics and operations of two floating antenna systems and couplers including procedures to maintain, repair, align, adjust and calibrate these systems using specialized tools and test equipment to component and subassembly level.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/81).

NV-1715-0984

Receiver Combined Maintenance

Course Number: A-101-0135.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Naval Submarine School, Groton, New London, CT.

Length: 2-3 weeks (80-81 hours).

Exhibit Dates: 10/79-Present.

Objectives: To provide knowledge and skills necessary to operate and maintain a low frequency submarine radio receiver.

Instruction: Lectures and laboratory exercises in the operation and functional block diagram analysis of a low frequency radio to the subassembly level. Also included is maintenance and corrective maintenance procedures to isolate faults down to the modular level.

Credit Recommendation: In the vocational certificate category, 1 semester hour in communication receivers and maintenance laboratory (10/89).

NV-1715-0985

Ship's Inertial Navigation System
(SINS) Mk 3 Mod 6 Combined
Maintenance

Course Number: A-193-0357.

Location: Naval Submarine School, Groton, New London, CT.

Length: 20 weeks (800 hours).

Exhibit Dates: 1/77–11/85.

Objectives: To train electronics technicians to operate, evaluate and maintain the Mk 3 Mod 6 ship's inertial navigation system.

Instruction: For this course after 11/85 see NV-1715-1461. Lectures and practical exercises in basic electronics, logic circuits, computer mathematics, principles of inertial navigation and programming, system maintenance and repair, organization of the processor and instruction set implementation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in digital logic fundamentals (with laboratory), 2 in machine language instructions and test loops, and 2 in computer maintenance and repair laboratory (3/81); in the upper-division baccalaureate category, 2 semester hours in computer organization (3/81).

NV-1715-0986

Subsystem Interface Fire Control
System (FCS) Mk 88 MOD 1

Course Number: A-121-0286.

Location: Fleet Ballistic Missile Training Center, Charleston, SC; Naval Submarine School, Groton, New London, CT.

Length: 2 weeks (70 hours).

Exhibit Dates: 2/79–Present.

Objectives: To provide training in the functional theory of the operation and maintenance of a missile control system.

Instruction: Lectures and laboratory exercises in the functional operation of the missile control subsystems including power supplies, analog and digital converters, display systems and built-in test equipment to the block diagram level. Maintenance procedures, fault isolation and diagnostic techniques are also covered.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronics maintenance and repair laboratory (3/81).

NV-1715-0987

Sonar Sounding Set AN/BQN-3
Maintenance
(AN/BQN-3 Sonar Sounding Set Advanced Training)

Course Number: A-193-0254.

Location: Naval Submarine Training Center Pacific, Pearl Harbor, HI; Naval Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Naval Submarine School, Groton, New London, CT.

Length: 2 weeks (60-71 hours).

Exhibit Dates: 11/79-Present.

Objectives: To train technicians to operate, maintain and calibrate a particular sonar system.

Instruction: Classroom and laboratory instruction in the operation and maintenance of the BQN-3 sonar sounding set. Coverage includes system timing, transmitter, transducer, receiver and auxiliary units of this vacuum-tube system and fault isolation and repair procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronics maintenance and repair laboratory (vacuum tubes) (10/89).

NV-1715-0988

Periscope Type 15 Combined Maintenance
(Periscope Set Type 15 Electronics Combined Maintenance)

Course Number: A-233-0048.

Location: Naval Submarine Training Center Pacific, Pearl Harbor, HI; Submarine Training Facility, San Diego, CA; Naval Submarine School, Groton, New London, CT.

Length: 2 weeks (50-76 hours).

Exhibit Dates: 11/79-Present.

Objectives: To train technical personnel in the operation and maintenance of a periscope.

Instruction: Lectures and laboratory practice in the operation and maintenance of periscope electromechanical systems.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (11/85).

NV-1715-0989

AN/WLR-8(V)2 Basic Operation
(Electronic Surveillance Maintenance (ESM) AN/WLR-8(V)2 Basic Operator)

Course Number: A-233-0027.

Location: Trident Training Facility, Bangor, WA; Trident Training Facility, Kings Bay, GA; Naval Submarine Training Center, Pacific, Pearl Harbor, HI; Naval Submarine School, Groton, New London, CT.

Length: 2 weeks (70-80 hours).

Exhibit Dates: 6/77-Present.

Objectives: To train personnel in the operation of electronic warfare support equipment.

Instruction: Classroom instruction and laboratory exercises in the operation of specialized military equipment.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (10/89).

NV-1715-0990

Sonar Receiving Set AN/BQR-19 Combined Maintenance

Course Number: A-130-0211.

Location: Naval Submarine School, Groton, New London, CT; Fleet Ballistic Missile Training Center, Charleston, SC; Naval Submarine Training Center Pacific, Pearl Harbor, HI.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/79-Present.

Objectives: To train sonar technicians in the basic operation and maintenance of the AN/BQR-19 sonar receiving set.

Instruction: Lectures and practical exercises in the theory, operation and maintenance at board/module level of the BQN-19 sonar receiving system and major subsystems, including receiver, beam-forming array, and control and logic functions. A review of basic digital logic functions such as adders and counters is also included.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic troubleshooting and maintenance laboratory (12/89).

NV-1715-0991

Enlisted Sonar Principles

Course Number: F-130-0199.

Location: Naval Submarine School, Groton, New London, CT.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/80-Present.

Objectives: To provide sonar operators with further knowledge of mathematics, acoustics and sonar principles needed to qualify as sonar supervisors.

Instruction: Lectures and problem solving exercises in mathematics (algebra, trigonometry, exponents/logarithems/decibels), underwater acoustics, sonar system principles including transducers, arrays, signal processors and performance predictions and tactical maneuvering problems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in sonar system principles (3/81).

NV-1715-0992

Sonar Receiving Set AN/BQR-21(V) Combined Maintenance

Course Number: A-130-0184.

Location: Naval Submarine School, Groton, New London, CT; Fleet Ballistic Missile Training Center, Charleston, SC.

Length: 5 weeks (200 hours).

Exhibit Dates: 11/78-Present.

Objectives: To train personnel in the operation and maintenance of specific equipment and its associated digital data processor and display unit.

Instruction: Lectures and laboratory practice on the operation of sonar amplifiers, data processors, and digital display consoles and indicators. Preventive and corrective maintenance, alignment and adjustment techniques are also covered.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic maintenance laboratory and 1 in digital system maintenance laboratory (3/81).

NV-1715-0993

Mk 117 All Mods Combined Maintenance

Course Number: A-130-0191.

Location: Naval Submarine School, Groton, New London, CT.

Length: 14-15 weeks (600 hours).

Exhibit Dates: 7/77-Present.

Objectives: To train personnel to operate and maintain a computer controlled missile firing system.

Instruction: Lectures and laboratory exercises covering all operating modes of a computer controlled missile firing system including command logic, timing diagrams and circuit diagnostics for major subsystems including the control console, interface multiplexers and the program controller. Digital, analog and synchros converters are studied to enable the student to perform maintenance, fault isolation and repair to the module level.

Credit Recommendation: In the vocational certificate category, 5 semester hours in computer maintenance and repair; in the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to computer principles and operation and 1 in digital troubleshooting (3/81).

NV-1715-0994

Dual Miniature Inertial Navigation System (DMINS) AN/WSN-1(V)2 Combined Maintenance
(AN/WSN-1(V)2 Combined Maintenance)

Course Number: A-102-0253.

Location: Naval Submarine School, Groton, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 7-10 weeks (277-400 hours).

Exhibit Dates: 6/75-Present.

Objectives: To enable technicians to operate and maintain an inertial navigation system.

Instruction: Lectures and laboratory exercises on the operation of a navigation computer system including principles of inertial navigation, integrated circuits, operation and maintenance of the dual miniature inertial navigation system. (DMINS).

Credit Recommendation: In the vocational certificate category, 3 semester hours in computer operator; in the lower-division baccalaureate/associate degree category, 3 semester hours in electromechanical systems technology with laboratory (10/89).

NV-1715-0995

Electronic Surveillance Measures (ESM) AN/WLR-1G Combined Maintenance

Course Number: A-230-0030.

Location: Fleet Ballistic Missile Training Center, Charleston, SC; Naval Submarine School, Groton, New London, CT; Naval Training Center, Pacific, Pearl Harbor, HI.

Length: 4 weeks (129 hours).

Exhibit Dates: 8/72-Present.

Objectives: To train technicians in the operation and maintenance of specialized electronic equipment.

Instruction: Classroom and laboratory instruction in the operation, maintenance and alignment of specialized electronic equipment. Both discrete transistor and vacuum tube technologies are covered including theory of operation and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electromechanical equipment maintenance (3/81); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics troubleshooting and maintenance laboratory (3/81).

NV-1715-0996

Multiplexed Equipment Fire Control System (FCS) Mk 88 MOD 1

Course Number: A-121-0294.

Location: Fleet Ballistic Missile Training Center, Charleston, SC; Naval Submarine School, Groton, New London, CT.

Length: 2 weeks (52 hours).

Exhibit Dates: 9/79-Present.

Objectives: To provide the knowledge and skills necessary to maintain a multiplexer and interfacing servo system.

Instruction: Lectures and laboratory exercises in the operation of a multiplexer including control logic signal flow, input and output signal format, and maintenance and repair procedures. The operation of a servo system as it relates to the multiplexer is also covered.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electromechanical laboratory (3/81).

NV-1715-0997

Platform Positioning Subsystem Fire Control System (FCS) Mk 88 MOD 1

Course Number: A-121-0287.
Location: Fleet Ballistic Missile Training Center, Charleston, SC; Naval Submarine School, Groton, New London, CT.
Length: 3 weeks (105 hours).
Exhibit Dates: 11/77-Present.
Objectives: To train personnel in the theory of operations, testing and maintenance of a servo positioning subsystem.
Instruction: Lectures and laboratory instruction on accelerometers, integrating gyros, control logic, printers, A/O converters and maintenance procedures of an inertial servo positioning subsystem.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electromechanical maintenance and repair laboratory (3/81).

NV-1715-0998

Missile Test and Readiness Equipment (MTRE) Mk 7 Mod 2 Advanced Maintenance (Theory)

Course Number: A-121-0256.
Location: Fleet Ballistic Missile Training Center, Charleston, SC; Naval Submarine School, Groton, New London, CT.
Length: 2 weeks (64 hours).
Exhibit Dates: 6/80-Present.
Objectives: To provide knowledge needed to repair missile test equipment.
Instruction: Lectures and laboratory exercises in the functional operation to the block diagram logic level of specialized missile equipment. Topics include power supplies, display and panel controls, system verification tests, paper tape input and printer operation and maintenance.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital equipment theory (3/81).

NV-1715-0999

Missile and Guidance System Testing, Fire Control System (FCS) Mk 88 MOD 1

Course Number: A-121-0296.
Location: Fleet Ballistic Missile Training Center, Charleston, SC; Naval Submarine School, Groton, New London, CT.
Length: 3 weeks (103 hours).
Exhibit Dates: 12/79-Present.
Objectives: To train technical personnel in the theory of operations and maintenance of guided missile text equipment.
Instruction: Lectures and laboratory exercises in the functional description, use and maintenance of specialized missile and guidance control test equipment.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/81).

NV-1715-1000

Magnetic Tape Unit Advanced Training

Course Number: A-193-0251.
Location: Fleet Ballistic Missile Training Center, Charleston, SC; Naval Submarine School, Groton, New London, CT.
Length: 2 weeks (76 hours).
Exhibit Dates: 11/74-Present.
Objectives: To train technical personnel in the theory and maintenance of a digital computer magnetic tape drive.
Instruction: Classroom and laboratory instruction in magnetic tape transports, read write amplifiers, signal formats, computer interface control logic, EOT and EOB tape marks, parity, motion control registers and recording modes. Corrective maintenance procedures are covered in laboratory format.
Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in digital computer peripherals (3/81).

NV-1715-1001

Magnetic Disk File Theory and Electrical Maintenance Fire Control System Mk 88 MOD 1

Course Number: A-121-0292.
Location: Fleet Ballistic Missile Training Center, Charleston, SC; Naval Submarine School, Groton, New London, Ct.
Length: 3 weeks (120 hours).
Exhibit Dates: 1/79-1/82.
Objectives: To train personnel in the theory and maintenance of magnetic disk file memories and controllers.
Instruction: For this course after 1/82 see NV-1715-1464. Lectures and laboratory exercises covering the theory of magnetic disk interfaces, controllers, addressing, seek and interrupt logic, read write logic and timing, disk organization and compare and transfer logic. Block identifiers maintenance procedures are presented in laboratory format.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in computer peripherals (disk systems) (3/81).

NV-1715-1002

Ship's Inertial Navigation System (SINS) Mk 2 Mod 6 Theory and Maintenance II

Course Number: A-193-0297.
Location: Fleet Ballistic Missile Training Center, Charleston, SC; Naval Submarine School, Groton, New London, CT.
Length: 2 weeks (60 hours).
Exhibit Dates: 2/78-Present.
Objectives: To train technical personnel in the maintenance of a specific navigational system.
Instruction: Classroom and laboratory instruction in temperature monitoring and control circuits, fault indicators, A/D and D/A conversions, gyro circuitry and data transmission circuits as they apply to navigational systems.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic maintenance and repair laboratory (3/81).

NV-1715-1003

AN/BQN-17 Combined Maintenance (Sonar Sounding Set AN/BQN-17 Combined Maintenance)

Course Number: A-130-0169.
Location: Naval Submarine School, Groton, New London, CT; Fleet Training Center, Pacific, San Diego, CA.
Length: 2-3 weeks (47-120 hours).
Exhibit Dates: 4/78-Present.
Objectives: To train sonar technicians in the basic operation and maintenance of the AN/BQN-17 Sonar sounding set.
Instruction: Lectures, demonstrations and laboratory exercises in the theory, operation and maintenance at board/module level of the BQN-17 sonar system and major subsystems including tranmitter, receiver, signal processors and auxiliary units. Also included is a review of basic digital logic functions such as counters, multiplexers and PROMS.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic systems troubleshooting and maintenance (10/89).

NV-1715-1004

Underwater Fire Control Technician, Class A

Course Number: A-130-0138.
Location: Naval Submarine School, Groton, New London, CT.
Length: 12 weeks (420 hours).
Exhibit Dates: 10/78-10/88.
Objectives: To provide students with a basic knowledge of the fundamental areas of electronics.
Instruction: For this course after 10/88 see NV-1715-1473. Lectures and practical exercises in the use and operation of basic test equipment. Included is the theory and maintenance procedures for electromechanical components and servo systems, basic semi-conductor theory, bipolar transistors, FET transistors, analog circuits including power supplies, oscillators and operational amplifiers, digital electronics including number systems, logic gates, Boolean algebra, flip flops, counters, regulators, memories, adders and analog digital conversions. Also covered is computer organization and machine language programming.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in electromechanical control systems and 4 in digital logic circuits and computer concepts (6/81).

NV-1715-1005

Mk 81 Analyzer Basic Maintenance

Course Number: A-130-0196.
Location: Naval Submarine School, Groton, Ct; Naval Submarine School, New London, CT.
Length: 6 weeks (240 hours).
Exhibit Dates: 7/73-7/80.
Objectives: To train skilled submarine sonar technicians to operate and maintain a sonar display console.
Instruction: Lectures and practical exercises in the functional operation of each subsection of a sonar display console and all operating test modes. The signal level at each subsystem interface is described, both digital and analog and, using an oscilloscope and multimeter, fault isolation procedures following prescribed maintenance instructions are given. The student also learns to align the CRT, troubleshoot, and diagnose equipment faults to the board level.
Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory testing and troubleshooting (6/81).

NV-1715-1006

Fire Control System (FCS) Mk 113 All Models Common Equipment Combined Maintenance

Course Number: A-130-0146.
Location: Naval Submarine School, Groton, CT; Naval Submarine School, New London, CT.
Length: 15-18 weeks (600-720 hours).
Exhibit Dates: 6/80-Present.
Objectives: To train personnel to maintain and repair a specific fire control system for torpedos.
Instruction: Lectures and practical exercises in the operation and maintenance pro-

cedures of the system. Circuitry is studied in detail with emphasis on fault isolation and repair. The system contains analog, digital and electrical/mechanical circuitry.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems troubleshooting and maintenance (10/89).

NV-1715-1007

FIRE CONTROL SYSTEM (FCS) MK 113 MODS 6/8 MK 130 DIGITAL COMPUTER MAINTENANCE

Course Number: A-130-0148.

Location: Naval Submarine School, New London, CT; Naval Submarine School, Groton, Ct.

Length: 12 weeks (440 hours).

Exhibit Dates: 11/74–Present.

Objectives: To train qualified technicians in the theory, operation and maintenance of a small digital computer-based system.

Instruction: Classroom, laboratory instruction and practical exercises covering the computer architecture from the register down to the component level and analysis of the computer circuits with emphasis on maintenance and fault isolation.

Credit Recommendation: In the vocational certificate category, 6 semester hours in small computer maintenance (6/81); in the lower-division baccalaureate/associate degree category, 2 semester hours in digital computer circuits (6/81).

NV-1715-1008

FIRE CONTROL SYSTEM (FCS) MK 113 MOD 9 MK 78 ANALYZER MAINTENANCE

Course Number: A-130-0149.

Location: Naval Submarine School, Groton, CT; Naval Submarine School, New London, CT.

Length: 9 weeks (320 hours).

Exhibit Dates: 11/74–Present.

Objectives: To train technical personnel in the operational maintenance and troubleshooting of the Mk 113 fire control system using standard test equipment.

Instruction: Classroom and laboratory instruction covering the troubleshooting of a specific fire control system. Topics include digital and analog interfaces, digital to syncro converters, syncro to digital converters and functional organization of memory and associated support circuits.

Credit Recommendation: In the vocational certificate category, 3 semester hours in digital/analog equipment maintenance (6/81).

NV-1715-1009

TELEPHONE DIAL-X SYSTEM COMBINED MAINTENANCE

Course Number: A-623-0058.

Location: Fleet Ballistic Missile School, Charleston, SC; Naval Submarine Training Center, Pearl Harbor, HI: Naval Submarine School, Groton, New London, CT.

Length: 2-3 weeks (56-80 hours).

Exhibit Dates: 5/79–Present.

Objectives: To train personnel in the preventive and corrective maintenance of a dial telephone system.

Instruction: Lectures and practical exercises in the fault isolation, preventive maintenance, troubleshooting and corrective maintenance of a dial telephone system.

Credit Recommendation: In the vocational certificate category, 2 semester hours in dial telephone system maintenance and repair (10/89).

NV-1715-1010

ELECTRONICS TECHNICIAN MAINTENANCE

Course Number: L-191-0010;; F-191-0010.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Naval Submarine School, New London, CT; Fleet Ballistic Missile Submarine Training Facility, Charleston, SC; Trident Training Facility, Bangor, Bremerton, WA; Naval Reactor Facility, Idaho Falls, ID; Naval Reactor Facility, Ballston Spa, NY.

Length: 5-6 weeks (200-240 hours).

Exhibit Dates: 9/80–Present.

Objectives: To train personnel in soldering, PC board repair, connector makeup and troubleshooting techniques.

Instruction: Lectures and practical exercises in soldering and desoldering techniques, PC card repair, makeup and installation of electrical connectors, cable lacing and assembly, crimped connectors and clamps. Also covered is the use of test equipment, dual trace scopes, time domain reflectometers, meggers and resistance bridges, capacitance inductance bridges and general troubleshooting techniques.

Credit Recommendation: In the vocational certificate category, 4 semester hours PC board soldering and repair, 4 in electronic equipment troubleshooting techniques (8/84); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronic test equipment, 1 in electrical maintenance laboratory (8/84).

NV-1715-1011

ENCAPSULATED HARPOON COMMAND AND LAUNCH SUBSYSTEM COMBINED MAINTENANCE

Course Number: A-130-0197.

Location: Naval Submarine School, New London, CT; Naval Submarine School, Groton, CT.

Length: 4 weeks (160 hours).

Exhibit Dates: 10/77–Present.

Objectives: To train personnel in the operation and maintenance of the control and launch subsystem of a short ranged missile system.

Instruction: Lectures and practical exercises in the general physical and operational modes of a weapon control system including the functional operation of each subsystem, interface, and preventive maintenance procedures. The major emphasis of the course is on recognizing and interpreting malfunctions using prescribed procedures to isolate and repair faults in the system. A knowledge of basic digital logic gates and flip flops is required.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronic laboratory troubleshooting (6/81).

NV-1715-1012

DEWEY UNDERWATER LOG COMBINED MAINTENANCE

(Dewey U/W Log Combined Maintenance)

Course Number: A-623-0062.

Location: Naval Submarine School, Groton, CT; Naval Submarine School, New London, CT.

Length: 2 weeks (80 hours).

Exhibit Dates: 6/76–Present.

Objectives: To train students to operate and maintain an electro magnetic underwater speed sensor.

Instruction: Classroom and laboratory instruction in the operation of the Dewey underwater speed sensor equipment including alignment, adjustment, calibration, fault isolation and repair of the equipment.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (6/81).

NV-1715-1013

MK 113 MOD 10 DIGITAL DISPLAY SUBSYSTEM

Course Number: A-130-0150.

Location: Naval Submarine School, Groton, CT; Naval Submarine School, New London, CT.

Length: 10 weeks (400 hours).

Exhibit Dates: 7/73–Present.

Objectives: To train personnel to properly maintain a computer controlled missile firing system.

Instruction: Lectures and practical exercises in the functional description, maintenance and fault isolation procedures for a missile firing system. The control console, interface connections, display units and control computer and power supplies are examined.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital equipment maintenance and repair laboratory (3/81).

NV-1715-1014

AN/ARN-52 (V), AN/ARN-105 AND AN/ARN-86 TACAN NAVIGATION SETS INTERMEDIATE MAINTENANCE

Course Number: C-102-3034.

Location: Naval Air Station, Oceana, VA; Naval Air Station, Chase Field, TX; Naval Air Station, Jacksonville, FL; Naval Air Station, Moffett Field, CA; Naval Air Station, Miramar, CA; Naval Air Station, LeMoore, CA; Naval Air Station, Cecil Field, FL; Naval Air Station, Cherry Point, NC; Naval Air Station, Tustin, CA; Naval Air Station, New River, NC; Naval Air Station, Beaufort, SC.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/81–Present.

Objectives: To provide fleet aviation electronics technicians with training in the operation, repair and maintenance of three TACAN navigation sets.

Instruction: Lectures and laboratory exercises in the operation, repair and troubleshooting of TACAN sets including a review of vacuum tubes, transistors and theoretical troubleshooting; video decoding, channel servo, air-to-air, suppression and antenna select circuits as related to the care and maintenance of air navigation equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory (7/81).

NV-1715-1015

AN/ARC-101 VHF COMMUNICATIONS SYSTEM INTERMEDIATE MAINTENANCE

Course Number: C-102-3023.

Location: Naval Air Station, Patuxent River, MD; Naval Air Station, Moffett Field, CA; Naval Air Station, North Island, CA.

Length: 2 weeks (56 hours).

Exhibit Dates: 12/73–Present.

Objectives: To provide fleet maintenance personnel with instruction at the block diagram level in the analysis, maintenance and repair of a VHF receiver and transmitter.

Instruction: Lectures and laboratory exercises at the block diagram level in the analysis of RF/IF circuits, audio circuits, AVC and sensitivity circuits; frequency synthesis, modulators oscillators and related circuitry pertinent to alignment troubleshooting and repair of VHF transmitters and receivers.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics or communications laboratory (7/81).

NV-1715-1016

AN/ULA-2 Pulse Analyzer Group Intermediate Maintenance

Course Number: C-102-3532.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, Moffett Field, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 8/76–Present.

Objectives: To train experienced maintenance personnel to maintain, troubleshoot and repair a pulse analyzer.

Instruction: Lectures and practical exercises in the operation and repair of a pulse analyzer using block diagrams and circuit schematics to troubleshoot power supplies, video amplifiers, sweep circuits, audio circuits and associated circuitry using some standard electronics repair equipment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics laboratory (7/81).

NV-1715-1017

AN/AQA-7(V)4 and AN/AQA-7(V)5 Sonar Computer Recorder Group Difference Data Intermediate Maintenance

Course Number: C-102-3570.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, Moffett Field, CA.

Length: 5 weeks (224 hours).

Exhibit Dates: 4/79–Present.

Objectives: To train experienced technicians in the maintenance and repair of a sonar computer-recorder group and a sonar computer-recorder group test control.

Instruction: Lectures and practical exercises in the operation, troubleshooting and repair of sonar computer recorder and its associated test set including digital sweep frequency generators, analog and digital displays, power supplies, regulator assemblies, spectrum analyzers and related electronic repair equipment.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics maintenance (7/81).

NV-1715-1018

AN/ASW-31 Automatic Flight Control System Intermediate Maintenance

Course Number: C-102-3604.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, Moffett Field, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 7/80–Present.

Objectives: To train experienced maintenance personnel in the component level maintenance of an automatic flight control system.

Instruction: Instruction and practical exercises in the operation, maintenance, troubleshooting and repair of an automatic flight control system including block diagram analysis, schematic diagram analysis, power supply analysis and troubleshooting techniques utilizing some standard electronics repair equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in avionics systems (7/81).

NV-1715-1019

AN/UYQ-8 Data Processing Set Intermediate Maintenance

Course Number: C-102-3605.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, Moffett Field, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 7/75–Present.

Objectives: To provide fleet maintenance personnel with knowledge to operate, analyze, troubleshoot and maintain the AN/UYQ-8 data processing set equipment.

Instruction: Lectures and laboratory exercises including functional analysis at the block diagram level of a central indicator, a converter, and a power supply. Approximately one half of student's time is devoted to operation, repair and maintenance of the equipment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics maintenance laboratory (7/81).

NV-1715-1020

CU-2070/ARC Automatic Antenna Coupler Intermediate Maintenance

Course Number: C-102-3562.

Location: Naval Air Station, Moffett Field, CA; Naval Air Station, Patuxent River, MD; Naval Air Station, Jacksonville, FL.

Length: 2 weeks (64 hours).

Exhibit Dates: 9/74–Present.

Objectives: To train maintenance personnel to maintain an automatic antenna coupler.

Instruction: Class instruction in the maintenance of an automatic antenna coupler including RF circuit analysis, and repair techniques.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics laboratory (7/81).

NV-1715-1021

Electronic Assembly Repair

Course Number: C-100-3182.

Location: Naval Air Station, Miramar, CA; Naval Air Station, Norfolk, VA; Naval Air Station, Beaufort, SC; Naval Air Station, Cecil Field, FL; Naval Air Station, Jacksonville, FL; Naval Air Station, Kingsville, TX; Naval Air Station, Whidbey Island, WA; Naval Air Station, Moffett Field, CA; Naval Air Station, LeMoore, CA; Naval Air Station, El Toro, CA. Naval Air Station, Atsugi, Japan. Naval Air Station, Rota, Spain. Naval Air Station, Brunswick, MI.

Length: 4 weeks (160 hours).

Exhibit Dates: 12/78–Present.

Objectives: To train experienced maintenance personnel in techniques, methods, tools and procedures used to maintain and repair miniature electronic modules.

Instruction: Lectures and practical exercises in the techniques and procedures for miniature electronic circuit board repair including soldering/desoldering of components, connector pin, coaxial connectors and terminals, conformal coating removal and application, repair of board laminates, conductors, pods and eyelets and evaluation criteria for repaired items.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic circuit board soldering and repair techniques (7/81).

NV-1715-1022

Integrated Circuit Components (Microelectronics) Intermediate Maintenance

Course Number: C-102-3110.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, Moffett Field, CA.

Length: 4 weeks (144 hours).

Exhibit Dates: 11/77–Present.

Objectives: To provide fleet electronic maintenance personnel with basic theory and practical troubleshooting methods for circuit components.

Instruction: Lectures and laboratory exercises in integrated circuits (microelectronics) component identification, basic theory of operational amplifiers, transistor-transistor logic gates, multiplexers, flip-flop counters, shift registers, memories, including component analysis, fault isolation and repair.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer or electronics engineering technology and 2 in computer laboratory (7/81).

NV-1715-1023

0A-8962/ASH Recording Group Intermediate Maintenance

Course Number: C-102-3571.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, Moffett Field, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 10/80–Present.

Objectives: To provide fleet maintenance personnel with training in the maintenance and repair of the 0A-8962/ASH recording group equipment.

Instruction: Lectures and practical exercises in the block diagram, analysis, module analysis, and control analysis of specific military equipment. Approximately one third of the student's time is devoted to testing and troubleshooting the video recording system.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics repair/maintenance laboratory (7/81).

NV-1715-1024

P-3A/B (DIFAR) Weapons Systems Technician Organizational Maintenance

Course Number: C-102-3561.

Location: Naval Air Station, Moffett Field, CA; Naval Air Station, Patuxent River, MD; Naval Air Station, Jacksonville, FL.

Length: 8 weeks (320 hours).

Exhibit Dates: 4/75–Present.

Objectives: To provide maintenance personnel with instruction in the avionics systems of the P-3A/B aircraft.

Instruction: Lectures and practical exercises in the operation, components, maintenance and troubleshooting of radar, IFF, ECM, MAD and sonar systems including power, system block diagrams and signal flow, interface characteristics, recording and display.

Credit Recommendation: In the vocational certificate category, 5 semester hours in electronics and avionics system maintenance (7/81).

NV-1715-1025

P-3C Integrated Avionics System (Update I) Organizational Maintenance

Course Number: C-102-3607.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, Moffett Field, CA.

Length: 18-19 weeks (740-745 hours).

Exhibit Dates: 12/79-Present.

Objectives: To provide fleet personnel with training in maintenance and repair of a P-3C UPDATE I avionics system.

Instruction: Lectures and practical exercises in the following areas: computer structure, instructions, addressing, programming memory, input/output, fault isolation techniques and operation of the system. Also included is magnetic tape, multiplexers, display and drum memory operation and troubleshooting; operation and interfacing of radar, communication/navigation, sonar, magnetic anomaly detectors, inertial navigation, Doppler radar, Omega navigation and instruments and flight controls. Approximately one half of the student's time is spent in practical, equipment oriented, activities.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic maintenance, 3 in computer maintenance (7/81); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer organization and functions, 3 in avionics technology and 2 in computer laboratory (7/81).

NV-1715-1026

AD "A" (P-3) Power Plant System Class A1

(P-3 Aviation Machinist's Mate (AD) Entry Level)

Course Number: C-601-3572.

Location: Naval Air Station, Moffett Field, CA.; Naval Air Station, Jacksonville, FL..

Length: 3 weeks (119 hours).

Exhibit Dates: 3/80-Present.

Objectives: To train enlisted personnel in turbine engine maintenance.

Instruction: Lectures on turbine engine theory including applicable aircraft nomenclature, theory of flight, mathematics, hydraulics, electricity and tool selection and use.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in theory of turbine engine maintenance (7/81).

NV-1715-1027

AN/AAM-60(V)2 Electro-Optical Systems Test Set Intermediate Maintenance

Course Number: C-102-3572.

Location: Naval Air Station, Moffett Field, CA; Naval Air Station, Jacksonville, FL.

Length: 5 weeks (200 hours).

Exhibit Dates: 1/80-Present.

Objectives: To provide fleet maintenance personnel with training at the block diagram level in the operation, testing, troubleshooting, repair and maintenance of an electro-optical systems test set.

Instruction: Lectures and practical exercises in the use of basic electronic test instruments, TV monitor repair, digital devices, numbering systems and logic gates as they pertain to the operation care and maintenance of a specialized electro-mechanical device.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics troubleshooting laboratory (7/81).

NV-1715-1028

Advanced Electronic Assembly Repair Intermediate Maintenance

Course Number: C-100-3187.

Location: Naval Air Station, Atsugi, Japan; Naval Air Station, Whidbey Island, WA; Naval Air Station, Jacksonville, FL; Naval Air Station, Moffett Field, CA; Naval Air Station, Kingsville, TX; Naval Air Station, El Toro, CA; Naval Air Station, Miramar, CA; Naval Air Station, Norfolk, VA; Naval Air Station, LeMoore, CA; Naval Air Station, Cecil Field, FL; Naval Air Station, Beaufort, SC.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/79-Present.

Objectives: To train experienced maintenance personnel to repair electronic circuit sub-assemblies.

Instruction: Instruction in the techniques and procedures used to repair electronic circuit boards including selection of proper tools, flexible conductor repair, static sensitive device replacement, electroplating, encapsulation and evaluation of repair techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic circuit board repair techniques (7/81).

NV-1715-1029

AN/AAS-36 Infrared Detecting System (IRDS) and AN/AAS-371R/LORTS Common Infrared Detection System Intermediate Maintenance

Course Number: C-198-3571.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, Moffett Field, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 2/80-Present.

Objectives: To provide fleet maintenance personnel with the knowledge at the block diagram level to operate, troubleshoot, align and repair the AN/AAS-36 infrared detecting system.

Instruction: Lectures and laboratory exercises in the fundamentals of wave length measurements, temperature conversions, black bodies, receiver-converter video characteristics and other topics related to infrared detection. Approximately two thirds of the student's time is devoted to practical application.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics troubleshooting laboratory (7/81).

NV-1715-1030

AN/ALD-2B Direction Finder System Intermediate Maintenance

Course Number: C-102-3042.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, Moffett Field, CA.

Length: 2 weeks (56 hours).

Exhibit Dates: 8/78-Present.

Objectives: To train maintenance personnel to maintain, troubleshoot, and repair a specific direction finder system.

Instruction: Lectures in the operation, troubleshooting and repair of a direction finder including electronic circuit tracing, troubleshooting to the component level, repair techniques and alignment of video circuitry, audio circuitry, pulse amplifiers, power supplies and related circuits.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics maintenance laboratory (7/81).

NV-1715-1031

AN/APN-141(V) Radar Altimeter Intermediate Maintenance

Course Number: C-102-3033.

Location: Naval Air Station, Miramar, CA, Naval Air Station, Jacksonville, FL; Naval Air Station, Moffett Field, CA; Naval Air Station, LeMoore, CA; Naval Air Station, Cherry Point, NC.

Length: 2 weeks (56 hours).

Exhibit Dates: 12/73-Present.

Objectives: To train maintenance personnel in the maintenance and operational procedures of a radar altimeter.

Instruction: Lectures and exercises in system operation and components, use of test equipment, testing, alignment and troubleshooting techniques.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics laboratory (7/81).

NV-1715-1032

Walleye II Extended Range Data Link Intermediate Maintenance

Course Number: C-121-3781.

Location: Naval Air Station, Cecil Field, FL; Naval Air Station, LeMoore, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/78-Present.

Objectives: To train maintenance personnel to maintain the Walleye II extended range data link system using appropriate test equipment.

Instruction: Lectures and laboratory exercises in the use of electronic test equipment to check, troubleshoot and adjust hardware related to the Walleye missile guidance and control system.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronic laboratory (3/82).

NV-1715-1033

OA-9008 Magnetic Tape Control Unit and Magnetic Tape Transport

Course Number: A-150-0235.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/79-Present.

Objectives: To train data systems technicians in the operation and maintenance of a magnetic tape transport unit.

Instruction: The course covers the theory of operation of a magnetic tape drive unit, the manner in which data is stored on the tape and the operation of the tape controller. Also included are the mechanical systems, the electronics used in the controller and the maintenance procedures used on the drive unit.

Credit Recommendation: In the vocational certificate category, 1 semester hour in computer I/O equipment operation and repair (11/81).

NV-1715-1034

Operations Summary Console Difference Maintenance

Course Number: A-150-0088.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 4 weeks (160 hours).
Exhibit Dates: 5/76–Present.
Objectives: To train students in theory, operation, and maintenance of shipboard equipment used to display navigational information received from the ship's radars, sonars and other sensors.
Instruction: Lectures and practical exercises familiarizing the student with electronic circuitry of the systems including digital memory, video circuitry, video display, transfer of digital data to and from a computer, and signal processing. Emphasis is placed on fault isolation using a system technical manual.
Credit Recommendation: In the vocational certificate category, 3 semester hours in digital systems theory and troubleshooting (11/81); in the lower-division baccalaureate/associate degree category, 1 semester hour in digital systems troubleshooting laboratory (11/81).

NV-1715-1035

Radar Set AN/SPG-51D Gun and Guided Missile Director Mk 73 Mod 2 and Ancillary Equipments Operation and Maintenance

Course Number: A-104-0127.
Location: Combat Systems Technical Schools Command, Mare Island, CA.
Length: 31 weeks (1200 hours).
Exhibit Dates: 1/80–Present.
Objectives: To train fire control technicians to maintain a AN/SPG-51D gun and guided missile radar director and ancillary equipment.
Instruction: Lectures and practical exercises in the operation, maintenance, and repair of a fire control system which includes a pulse radar system, radar test set, gun and guided missile director, A/D and D/A signal data converter, television monitor, and control console. Emphasis is on a functional understanding of signal flow of sufficient depth both analog and digital to apply troubleshooting procedures to isolate faults to the board or component level.
Credit Recommendation: In the vocational certificate category, 3 semester hours in radar operating system and maintenance, 1 in television monitor maintenance (11/81); in the lower-division baccalaureate/associate degree category, 1 semester hour in digital equipment troubleshooting laboratory, 1 in electronic systems troubleshooting laboratory (11/81).

NV-1715-1036

Guided Missile Frigate (FFG-7) Combat Systems Maintenance

Course Number: A-121-0408.
Location: Combat Systems Technical Schools Command, Mare Island, CA.
Length: 5 weeks (190 hours).
Exhibit Dates: 1/80–Present.
Objectives: To train personnel to maintain combat system equipment aboard the FFG-7 class ship.
Instruction: Lectures and practical exercises covering the mission, physical characteristics, operating modes, capabilities and limitations of a search radar, data processing subsystem and a data display anti-sub and anti-aircraft system. Data signal flow and block diagram description are given to teach fault isolation to a specific sub-system using reference documentation, test programs, and general purpose test equipment following established troubleshooting procedures.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic systems troubleshooting (11/81).

NV-1715-1037

Mk 23 Mod 0/1 Target Acquisition System (TAS) Maintenance

Course Number: A-121-0471.
Location: Combat Systems Technical Schools Command, Mare Island, CA.
Length: 24 weeks (1156 hours).
Exhibit Dates: 10/81–Present.
Objectives: To provide selected fire control technicians with the training required to maintain a shipboard target acquisition system (TAS).
Instruction: Lectures and practical exercises in the operation and purpose of a target acquisition system including a UNIVAC 1616 computer system and its memory, tape and I/O devices, the system power distribution, the radar system and its transmitter, antenna, receiver, signal processor, and display console and the troubleshooting procedures to be used with each.
Credit Recommendation: In the vocational certificate category, 3 semester hours in computer systems operation and maintenance (11/81); in the lower-division baccalaureate/associate degree category, 3 semester hours in radar systems operation and maintenance, 1 in computer system operations (11/81).

NV-1715-1038

Mk-25 Guided Missile Launching System (GMLS)

Course Number: A-121-0124.
Location: Combat Systems Technical Schools Command, Mare Island, CA.
Length: 6 weeks (240 hours).
Exhibit Dates: 1/75–Present.
Objectives: To provide the student with skills and knowledge necessary to operate and maintain a guided missile launching system.
Instruction: Lectures and practical exercises to familiarize the student with the operation and major subassemblies of the missile launcher including mechanical characteristics, generators, motors, solenoids, and vacuum tube circuitry.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (11/81).

NV-1715-1039

MK-29 Mod 0 Guided Missile Launching System (GMLS) Maintenance

Course Number: A-121-0041.
Location: Combat Systems Technical Schools Command, Mare Island, CA.
Length: 9 weeks (360 hours).
Exhibit Dates: 9/81–Present.
Objectives: To provide the technical knowledge and skills necessary to repair, maintain and operate a specific guided missile launching system.
Instruction: Lectures and practical exercises covering the physical characteristics, major components, controls, indicators and operation of each part of the launch system including basic digital electronics and computer troubleshooting.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in basic digital electronics, 1 in computer troubleshooting (11/81).

NV-1715-1040

NATO Seasparrow Surface Missile System Mk 57 Mod 0/1/2/3 Maintenance

(Mk 91 Mod 0/1 NATO Seasparrow Guided Missile Fire Control System) (FCS))

Course Number: A-121-0240.
Location: Combat Systems Technical Schools Command, Dam Neck, VA; Combat Systems Technical Schools Command, Mare Island, CA.
Length: *Version 1:* 29 weeks (1100 hours). *Version 2:* 28 weeks (1040 hours). *Version 3:* 23 weeks (920 hours).
Exhibit Dates: *Version 1:* 1/84–2/88. *Version 2:* 6/82–12/83. *Version 3:* 1/76–5/82.
Objectives: To provide personnel with the knowledge and skill to maintain and operate a missile fire control system.
Instruction: This course was replaced by A-104-0203 and A-104-0204. Please see those exhibits. *All Versions:* The operation and the digital and analog data flow between various components of a missile fire control system are presented. These units consist of a computer, an A/D-D/A signal data converter, radar target data processor, control consoles, and video display monitors. Functional operation of each unit and subsystem is presented to sufficient detail so that appropriate documentation and procedures can be followed to maintain, troubleshoot and isolate faults usually to a circuit board level. *Version 1:* Includes the missile launch system, and launch system controller.
Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in radar system operation and maintenance (11/83); in the lower-division baccalaureate/associate degree category, 3 semester hours in advanced digital systems troubleshooting, 3 in computer systems operation (11/83). *Version 2:* In the vocational certificate category, 3 semester hours in radar system operation and maintenance (11/83); in the lower-division baccalaureate/associate degree category, 3 semester hours in digital systems troubleshooting, 3 in computer system operation and maintenance (11/83). *Version 3:* In the vocational certificate category, 3 semester hours in radar system operation and maintenance (11/81); in the lower-division baccalaureate/associate degree category, 3 in computer system operation and maintenance (11/81).

NV-1715-1041

Basic FFG-7 Class AN/UYA-4(V) Equipment Maintenance

Course Number: A-150-0244.
Location: Combat Systems Technical Schools Command, Mare Island, CA.
Length: 12 weeks (480 hours).
Exhibit Dates: 8/80–Present.
Objectives: To train personnel in the theory of operation and the maintenance procedures for a ship-board combat system consisting of all systems associated with detection, evaluation, acquisition, engagement or deception of enemy air, surface or subsurface targets.
Instruction: Lectures and practical exercises covering the theory of operation, use and maintenance of a combat weapon support system including operation of the display console, classification of scope presentations, symbol identification, display system troubleshooting and repair, radar azimuth converter repair (component level),

power system repair, radar data distribution switchboard fault analysis and repair, pulse amplifier and symbol generator fault isolation and alignment, radar display console fault isolation, test set use, analysis and repair and general testing procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic system troubleshooting (11/81); in the lower-division baccalaureate/associate degree category, 3 semester hours in radar systems (operation and maintenance), 1 in electronic systems laboratory (11/81).

NV-1715-1042

Dewey Underwater Log Maintenance C-1

Course Number: A-623-0096.

Location: Service School Command, Great Lakes, IL.

Length: 2 weeks (60 hours).

Exhibit Dates: 6/79–Present.

Objectives: To train personnel in the operation and maintenance of an electromagnetic log (speed monitor).

Instruction: Instruction and practical exercises in the theory of operation, maintenance and troubleshooting of a Mock 6 Dewey Electromagnetic Log.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic equipment maintenance and repair (10/83).

NV-1715-1043

Combat Systems Maintenance Management for the CGN-38

Course Number: A-121-0404.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 12/80–Present.

Objectives: To train personnel to manage maintenance of combat systems aboard a CGN-38 surface combatant ship.

Instruction: Students learn the mission, physical characteristics, operating modes, capabilities, and limitations of combat systems on a surface combatant ship. Procedures to effectively manage combat system level maintenance is given through a systematic diagnosis using applicable documentation to detect, isolate, and evaluate the impact of a fault on the combat capability of the system. The troubleshooting, maintenance and repair is specialized to specific military equipment.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (11/81).

NV-1715-1044

CP-789(V)/UYK Computer

Course Number: A-150-0242.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide students with the theory of operation and the skills necessary to maintain a specific general purpose digital computer (UNIVAC 12/80).

Instruction: Lectures and practical exercises designed to familiarize the student with the computer hardware and software including the power supply, memory, input and output circuitry, control circuitry, arithmetic circuitry, and computer instruction set. Writing of diagnostic programs to detect and locate faults is also covered.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer operation and real time processing, 1 in computer diagnostics and repair (11/81).

NV-1715-1045

CV-2036 Analog Digital Converter (KCMX) Maintenance

Course Number: A-150-0100.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/76–Present.

Objectives: To train personnel in the theory, operation, and maintenance of a multiplexer handling both digital and analog signals.

Instruction: Lectures and practical exercises to familiarize the student with the circuitry which performs analog to digital conversion, digital to analog conversion, digital decoding and encoding, synchro to digital conversion, digital to digital formating, and multiplexing. The course emphasizes fault isolation and repair.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital computer interfacing, 1 in digital systems troubleshooting (11/81).

NV-1715-1046

DD-963 Combat System Maintenance Management

Course Number: A-121-0406.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 3/80–Present.

Objectives: To train personnel to manage maintenance of combat systems aboard a DD-963 class surface ship.

Instruction: Students learn the mission, physical characteristics, operating modes, capabilities, and limitations of combat systems and how to effectively manage maintenance operations including data signal flow and block diagram discription of radar transmitters, receivers, antennas, sonar and their associated subsystems and principles of digital logic and programming concepts. Systematic diagnosis using applicable documentation to detect, isolate, and repair equipment is also covered.

Credit Recommendation: In the vocational certificate category, 3 semester hours in radar system maintenance and repair, 3 in computer system maintenance and repair (11/81).

NV-1715-1047

AN/USQ-59 Data Terminal Set Maintenance

Course Number: A-150-0099.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 2 weeks (66 hours).

Exhibit Dates: 4/81–Present.

Objectives: To provide selected personnel with knowledge in the theory of operation and maintenance of an AN/USQ-59 (a specialized digital-to-analog and analog-to-digital signal converter) data terminal set.

Instruction: Lectures and practical exercises covering the theory of operation of a specialized digital-to-analog and analog-to-digital signal converter which takes a 24 bit input word and converts it to an analog signal suitable for radio transmission or accepts signals for conversion to digital information. Also covered is the theory of maintaining this equipment including block diagram analysis, AC/DC power distribution, A/D and D/A conversion, phase shift modulation, parallel to serial and serial to parallel data conversion, and fault isolation to the module level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital communication practices (11/81).

NV-1715-1048

AN/UYK-7 Digital Computer Maintenance

Course Number: A-150-0095.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 10 weeks (400 hours).

Exhibit Dates: 12/80–12/86.

Objectives: To provide personnel with the training and skills necessary to perform preventive and corrective maintenance on a general purpose UNIVAC computer.

Instruction: An in-depth understanding of the computer operation, instruction repertoire, signal flow, and sub-system logic is presented. The course emphasizes fault isolation to the circuit board or component level using diagnostic programs and basic test equipment. Topics include function of front panel controls, word format, internal timing and control signals, interrupt processing, theory of instruction execution and register status, input and output timing sequence and interface characteristics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer operation and real time processing, 1 in computer diagnostics and repair (11/81).

NV-1715-1049

Basic AN/UYA-4 Display Equipment Maintenance

Course Number: A-150-0022.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 17 weeks (680 hours).

Exhibit Dates: 12/80–Present.

Objectives: To provide selected personnel with the theory of operation and maintenance of a data display subsystem such that they will be able to operate, test and perform corrective and preventive maintenance on this system.

Instruction: Lectures and practical exercises covering the operation and function of many subsystems used within a complex target identification, weapon coordination and communications system including computer interface procedures and circuitry, symbol generators, pulse amplifiers (dual/four channel types), amplifier alignment, refresh memory units (operation, use and fault isolation), radar range detection procedures (theory and troubleshooting), digital converters for radar data analysis, sonar azimuth converters for digital analysis, radar video display circuit analysis and repair procedures and video signal simulation.

Credit Recommendation: In the vocational certificate category, 3 semester hours in digital troubleshooting theory and techniques, 3 in electronic systems troubleshooting (11/81); in the lower-division baccalaureate/associate degree category, 3 semester hours in radar systems (operation and maintenance), 1 in digital systems laboratory, 1 in electronic systems laboratory (11/81).

NV-1715-1050

AN/SRC-23 HF Transceiver AN/SRA-34 Coupler Maintenance

Course Number: A-101-0043.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 6 weeks (221 hours).

Exhibit Dates: 6/80–Present.

Objectives: To train students to repair a specific naval radio receiver, transmitter, and antenna coupler.

Instruction: Lectures and practical exercises covering single sideband transmission theory, operation, circuit details, and troubleshooting of the radio receiver-transmitter and antenna coupler systems. Emphasis is placed on fault isolation techniques to the subassembly level using available technical manuals.

Credit Recommendation: In the vocational certificate category, 2 semester hours in troubleshooting techniques (11/81).

NV-1715-1051

AN/SRC-31 A/B UHF Transceiver and CU-1559 Coupler Maintenance

Course Number: A-101-0045.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 3 weeks (108 hours).

Exhibit Dates: 8/75–Present.

Objectives: To train students to repair a specific naval radio receiver-transmitter and its antenna coupling system.

Instruction: Lectures and practical exercises covering the detailed familiarization of all electronic circuitry of the receiver-transmitter and its antenna coupler. Emphasis is placed on fault isolation and repair of the system using available technical manuals.

Credit Recommendation: In the vocational certificate category, 1 semester hour in troubleshooting techniques (11/81).

NV-1715-1052

AN/SSQ-29 Data Terminal Set Maintenance-Difference

Course Number: A-150-0062.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 2 weeks (106 hours).

Exhibit Dates: 2/81–Present.

Objectives: To provide selected personnel with knowledge in the theory of operation and maintenance of an AN/SSQ-29 (a specialized digital-to-analog and analog-to-digital signal converter) data terminal set.

Instruction: Lectures and practical exercises covering the theory of operation of a specialized digital-to-analog and analog-to-digital signal converter which takes a 24 bit input word and converts it to an analog signal suitable for radio transmission and visa versa and the theory of maintaining this equipment including AC/DC power distribution, transmit and receive control, troubleshooting and fault isolation, A/D and D/A conversion procedures, test set utilization, and repair to the component level.

Credit Recommendation: In the vocational certificate category, 1 semester hour in digital communications system troubleshooting procedures (11/81).

NV-1715-1053

AN/SSW-1 Data Terminal Set Maintenance

Course Number: A-150-0064.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 2 weeks (74 hours).

Exhibit Dates: 12/80–Present.

Objectives: To provide selected personnel with the theory of operation and maintenance of an AW/SSW-1 data terminal set.

Instruction: The course covers the theory of operation and maintenance of a specialized military data terminal set including the AC/DC power distribution, digital-to-digital converter, block diagram analysis and troubleshooting procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital communications systems troubleshooting procedures (11/81).

NV-1715-1054

AN/URC-85 UHF Transceiver Maintenance

Course Number: A-101-0072.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 2 weeks (68 hours).

Exhibit Dates: 12/80–Present.

Objectives: To train students to repair a specific naval radio receiver and transmitter.

Instruction: Detailed familiarization with all electronic circuitry of the receiver-transmitter system including power distribution, power amplification, modulation, IF amplifier and filters. Emphasis is placed on fault isolation and repair of the system using available technical manuals.

Credit Recommendation: In the vocational certificate category, 1 semester hour in troubleshooting techniques (11/81).

NV-1715-1055

AN/USQ-36 Data Terminal Set Maintenance

Course Number: A-150-0063.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 4 weeks (183 hours).

Exhibit Dates: 2/81–Present.

Objectives: To provide select personnel with knowledge in the theory of operation and maintenance of an AN/SSQ-36 (a specialized digital-to-analog and analog-to-digital signal converter) data terminal set.

Instruction: Lectures and practical exercises covering the theory of operation of a specialized digital-to-analog and analog-to-digital signal converter which takes a 24 bit input word and converts it to an analog signal suitable for radio transmission or visa versa and the theory of maintaining this equipment including power distribution, self-check failure methods, timing sequences, transmit and receiver timing and control, A/D and D/A conversion, and fault isolation procedures to the component level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in digital communications systems troubleshooting procedures (11/81).

NV-1715-1056

AN/SPS-48(V) Radar Maintenance

Course Number: A-104-0155.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 28 weeks (975 hours).

Exhibit Dates: 6/77–Present.

Objectives: To provide trained personnel with the knowledge needed to perform maintenance and repair on a specialized radar system.

Instruction: Covers the operation and maintenance of a specialized radar system including theory of operation of the radar system using block diagrams and schematics, the computer controller and its operation, the transmitter and receiver systems, the console operation and the signal tracing needed to troubleshoot these systems. Topics include number systems, conversions, arithmetic operation in binary including square roots and 3-D inertial coordinate equations.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics troubleshooting (11/81); in the lower-division baccalaureate/associate degree category, 3 semester hours in radar system operations and maintenance, 2 in digital logic systems maintenance (11/81).

NV-1715-1057

AN/SPS-58A Radar Maintenance

Course Number: A-104-0145.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/79–Present.

Objectives: To provide students with the knowledge and skills necessary to operate and maintain a radar system.

Instruction: Students learn the purpose of, and physical location of major sub-assemblies of the radar system including the location and purpose of controls and indicators and use of built in test equipment to align and maintain the system within specifications.

Credit Recommendation: In the vocational certificate category, 2 semester hours in radar systems maintenance (11/81).

NV-1715-1058

AN/SRC-16, AN/SRC-13 Transceiver Maintenance Differences

Course Number: A-101-0044.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 3 weeks (111 hours).

Exhibit Dates: 12/80–Present.

Objectives: To train students in the theory of operation and maintenance of a specific naval radio receiver-transmitter.

Instruction: The course provides a detailed familiarization of all electronic circuitry of the receiver transmitter. Emphasis is placed on fault isolation and repair of the system using available technical manuals.

Credit Recommendation: In the vocational certificate category, 1 semester hour in troubleshooting techniques (11/81).

NV-1715-1059

AN/SPS-48C Radar Difference

Course Number: A-104-0175.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 10 weeks (400 hours).

Exhibit Dates: 1/79–Present.

Objectives: To provide radar technicians with the skills and knowledge to operate and maintain a search radar system used in an automatic target detection system.

Instruction: Lectures and practical exercises covering the operation and maintenance of a specialized search radar system including a UNIVAC 1616 computer system and its memory, tape and I/O devices; the target processor operations and the interface systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in

computer systems operation and maintenance (11/81); in the lower-division baccalaureate/associate degree category, 1 semester hour in computer system operations (11/81).

NV-1715-1060

AM-2310-ASQ AM-2349-ASQ-19 Amplifier (Power Supply) Receiver Intermediate Maintenance

Course Number: C-102-3099.

Location: Naval Air Station, Miramar, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 2/77–Present.

Objectives: To provide training in the operation, testing, and maintenance of a communication unit comprised of power supply, receiver and amplifier units.

Learning Outcomes: Upon completion of the course, the student will be able to test, analyze, troubleshoot and repair communications circuits which include a power supply unit, a UHF receiver and automatic direction finding circuitry.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic communication and 1 in electronic communication laboratory (5/85).

NV-1715-1061

Mk 3 Mod 7 Ship's Navigation and Aircraft Inertial Alignment Systems (SNAIAS) Operation and Maintenance

(Ship's Navigation and Aircraft Inertial Alignment Systems Maintenance)

Course Number: A-193-0040.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 26 weeks (1040 hours).

Exhibit Dates: 5/72–Present.

Objectives: To train personnel in the operation, calibration, and maintenance of an inertial navigational system.

Instruction: Personnel are given in-depth instruction in the theory, operation, and maintenance of an inertial navigational system. The course includes review of algebra, trignometry, and vector algebra; physics of linear and rotational motion, principles of gyroscope operation and basic inertial system dynamics; number systems, BCD codes and conversions including fractions, logic gates and flip-flops and program flow charts. Operation and functional characteristics of a navigational computer and its peripherals including paper tape reader, paper tape punch, teletype terminal, CRT display, and power supplies is also covered. Repertoire of the computer instruction set and programming applications including bootstrap and dump routines as well as basic theory, electrical and mechanical characteristics of servo systems, use of differential voltmeters, and oscilloscopes to calibrate, align and troubleshoot equipment, in some cases, to the component level.

Credit Recommendation: In the vocational certificate category, 2 semester hours in applied mathematics, 2 in applied physics (11/81); in the lower-division baccalaureate/associate degree category, 6 semester hours in electromechanical systems (11/81).

NV-1715-1062

AN/ALR-45 Countermeasures Receiving Set Intermediate Maintenance

Course Number: C-102-3093.

Location: Naval Air Maintenance Training Detachment, NAS Miramar, CA; Naval Air Maintenance Training Detachment, NAS Oceana, VA; Naval Air Maintenance Training Detachment, NAS Lemoore, CA; Naval Air Maintenance Training Detachment, NAS Cecil Field, FL; Naval Air Maintenance Training Detachment, NAS Whidbey Island, WA.

Length: 5 weeks (152 hours).

Exhibit Dates: 6/74–6/80.

Objectives: To provide instruction in the maintenance of the specific countermeasures receiving set consisting of a pulse analyzer, an amplifier detector, azimuth indicator, and peripheral equipment.

Instruction: Instruction includes circuit analysis and troubleshooting using applicable test equipment, and instruction in publications and safety procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics laboratory (2/78); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (2/78).

NV-1715-1063

Harpoon Ship Command Launch Control Set Maintenance

Course Number: J-113-0127.

Location: Fleet Training Center, Pearl Harbor, HI; Fleet Training Center, San Diego, CA; Fleet Training Center, Dam Neck, VA; Fleet and Mine Warfare Training Center, Charleston, SC.

Length: 6 weeks (210 hours).

Exhibit Dates: 10/77–Present.

Objectives: To provide fire control technicians with the knowledge and skills necessary to operate and maintain the Harpoon Ship Command Launch Control Set AN/SWG-1(V).

Instruction: Lectures and practical exercises in the operation and maintenance of the Harpoon Ship Command Launch Control Set AN/SWG-1(V) with emphasis on fault isolation and repair at the system and component level and/or preventive maintenance of the system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours of technical elective credit in electrical or electronic associate degree programs (11/81).

NV-1715-1064

AN/SRN-12/12A Omega Receiving Set Maintenance

Course Number: A-102-0077.

Location: Fleet Training Center, Norfolk, VA; Service School Command, Dan Diego, CA; Fleet and Mine Warfare Training Center, Charleston, SC.

Length: 2 weeks (48 hours).

Exhibit Dates: 1/78–Present.

Objectives: To train enlisted personnel to operate, maintain and repair the Omega Receiving AN/SRN-12/12A and to operate and use associated test equipment.

Instruction: Lecture and practical experience in the maintenance, operation and repair of the AN/SRN-12/12A Omega Receiving set. Proper utilization of test equipment is taught. Includes signal characteristics, initializing, chart operational checks, symbolic integrated maintenance, troubleshooting and computer interface.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in a technical elective in electrical or electronics technology (11/81).

NV-1715-1065

Submarine Periscope Repair Class C1

Course Number: A-670-0019.

Location: Service School Command, Great Lakes, IL.

Length: 12 weeks (480 hours).

Exhibit Dates: *Version 1:* 8/85–Present. *Version 2:* 1/75–7/85.

Objectives: To provide opticalmen with additional technical skills and knowledge to more effectively perform their duties.

Instruction: *All Versions:* Lecture and practical exercises in the repairing and overhauling of submarine periscopes, including inspection, replacing defective parts, refinishing surfaces, cleaning, reassembling, collimating, adjusting optical elements, sealing, drying and charging of optical assemblies. *Version 1:* Includes a review of basic electricity, electronics, motors, synchrons, torque motors, and heaters. Included is operation and maintenance of the electromechanical systems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electromechanical technology; In the lower-division baccalaureate/associate degree category, 1 semester hour in electromechanical technology(1/86). *Version 2:* In the vocational certificate category, 3 semester hours in electromechanical technology (1/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in physics of optics (1/82).

NV-1715-1066

AN/SPG-53F Modified Radar Maintenance

Course Number: A-113-0093.

Location: Service School Command, Great Lakes, IL.

Length: 16 weeks (640 hours).

Exhibit Dates: 2/81–Present.

Objectives: To train technicians in the maintenance of an AN/SPG-53F radar set.

Instruction: Lectures and practical exercises in the operation and maintenance of power supplies, synchronizer circuits, antenna scanners, video circuits, ranging circuits, D/S converter circuits, modulation circuits, jamming circuits, and display circuits.

Credit Recommendation: In the vocational certificate category, 6 semester hours in radar electronic maintenance (1/82).

NV-1715-1067

AN/WSN-2 Stabilized Gyrocompass Maintenance Class C1

Course Number: A-670-0048.

Location: Service School Command, Great Lakes, IL.

Length: 3 weeks (120 hours).

Exhibit Dates: 6/79–Present.

Objectives: To provide technical knowledge and skills required to operate, maintain, and repair the AN/WSN-2 stabilized gyrocompass.

Instruction: Lecture and laboratory exercises in operation, alignment, troubleshooting and maintenance of the gyrocompass system.

Credit Recommendation: In the vocational certificate category, 2 semester hours in gyrocompass principles and maintenance (10/83).

NV-1715-1068

Close-In Weapons System 15-1, Class C1

Course Number: A-113-0078.

Location: Guided Missile School, Dam Neck, VA; Naval Training Center, San Diego, CA; Service School Command, Great Lakes, IL.

Length: 27 weeks (1080 hours).

Exhibit Dates: 12/80–Present.

Objectives: To train technicians in the operation, maintenance, and repair of electronically controlled weapon systems.

Instruction: Lectures and practical exercises in the operation, maintenance and repair of power supplies, environmental control systems, remote and local computer driven display and control systems, operation and loading of receivers, and servocontrol systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in servo systems maintenance, 3 in radar circuits maintenance (1/82); in the lower-division baccalaureate/associate degree category, 4 semester hours in computer interface maintenance operation (1/82).

NV-1715-1069

Electronics Technician Advanced Electronics Field/ Marine Corps/Foreign Class A1

Course Number: A-100-0062.

Location: Service School Command, Great Lakes, IL.

Length: 28 weeks (1120 hours).

Exhibit Dates: 8/80–Present.

Objectives: To develop the skills and knowledge necessary to perform basic maintenance on a variety of electronic equipment.

Instruction: An introductory level presentation on the principles of digital circuits including number systems, number conversion techniques, logic concepts, logic gates, Boolean expressions, logic diagrams, magnetic storage devices, display devices, flip-flops, counters, registers, encoders and decoders, basic communication principles, AM and FM waveforms and frequency spectra, decibels, operation of a spectrum analyzer and its application to a signal flow analysis to the component level of a SSB receiver, FM transceiver, and high frequency transmitter/receiver including RLC filter circuits, mechanical filters, modulator and demodulator circuits, oscillators, RF, IF, and audio circuits with 50% of the time devoted to signal tracing, alignment, maintenance and troubleshooting techniques in the laboratory. Introduction to radar and microwave circuits including microwave propagation, characteristics of waveguides, chokes, dummy loads, directional couplers, resonant cavities, stub tanners, CRT characteristics, klystrons, magnetrons, traveling wave tubes, microwave measurements, and synchros. Operation, alignment, fault isolation, and repair of an AN/SPS-10 and AN/SPA-25 radar sets.

Credit Recommendation: In the vocational certificate category, 2 semester hours in introduction to digital circuits, 4 in electronic equipment repair (1/82); in the lower-division baccalaureate/associate degree category, 3 semester hours in communication systems, 1 in microwave systems (1/82).

NV-1715-1070

Electronics Technician Nuclear Field Class A1

Course Number: A-100-0064.

Location: Service School Command, Great Lakes, IL.

Length: 19 weeks (760 hours).

Exhibit Dates: 8/80–Present.

Objectives: To develop the skills and knowledge necessary to perform basic maintenance on a variety of electronic equipment.

Instruction: An introductory level presentation on the principles of digital circuits including number systems, number conversion techniques, logic concepts, logic gates, Boolean expressions, logic diagrams, magnetic storage devices, display devices, flip-flops, counters, registers, encoders and decoders, basic communication principles, AM and FM waveforms and frequency spectra, decibels, operation of a spectrum analyzer and its application to a signal flow analysis to the component level of a SSB receiver and FM transceiver including RLC filter circuits, mechanical filters, modulator and demodulator circuits, oscillators, RF, IF, and audio circuits with 50% of the time devoted to signal tracing, alignment, maintenance and troubleshooting techniques in the laboratory. Use of basic test equipment, characteristics of diodes and transistors, simple transistor circuits, dc biasing and load line development. Vacuum tube characteristics and operation, turled circuits, loading, Q, rf coupling techniques, Class A and Class C amplifiers, rf oscillators, multipliers, types of modulation and detection, distortion and characteristics of antennas. Introduction to radar and microwave circuits including microwave propagation, characteristics of waveguides, chokes, dummy loads, directional couplers, resonant cavities, stub tanners, CRT characteristics, klystrons, magnetrons, traveling wave tubes, microwave measurements, and synchros. Operation, alignment, fault isolation, and repair of an AN/SPS-10 radar set.

Credit Recommendation: In the vocational certificate category, 2 semester hours in introduction to digital circuits, 3 in electronic equipment repair (1/82); in the lower-division baccalaureate/associate degree category, 3 semester hours in communication systems, 1 in microwave systems (1/82).

NV-1715-1071

Electronics Technician Submarine/Reserve Class A1

Course Number: A-100-0063.

Location: Service School Command, Great Lakes, IL.

Length: 19 weeks (760 hours).

Exhibit Dates: 8/80–Present.

Objectives: To develop the skills and knowledge necessary to perform basic maintenance on a variety of electronic equipment.

Instruction: An introductory level presentation on the principles of digital circuits including number systems, number conversion techniques, logic concepts, logic gates, Boolean expressions, logic diagrams, magnetic storage devices, display devices, flip-flops, counters, registers, encoders and decoders, basic communication principles, AM and FM waveforms and frequency spectra, decibels, operation of a spectrum analyzer and its application to a signal flow analysis to the component level of a SSB receiver, FM transceiver, and high frequency transmitter/receiver including RLC filter circuits, mechanical filters, modulator and demodulator circuits, oscillators, RF, IF, and audio circuits with 50% of the time devoted to signal tracing, alignment, maintenance and troubleshooting techniques in the laboratory.

Credit Recommendation: In the vocational certificate category, 2 semester hours in introduction to digital circuits, 3 in electronic equipment repair (1/82); in the lower-division baccalaureate/associate degree category, 3 semester hours in communication systems (1/82).

NV-1715-1072

Electronics Technician Air Force Class A1

Course Number: A-100-0065.

Location: Service School Command, Great Lakes, IL.

Length: 10 weeks (400 hours).

Exhibit Dates: 8/80–Present.

Objectives: To develop the skills and knowledge necessary to perform basic maintenance on a variety of electronic equipment.

Instruction: An introductory level presentation on the principles of digital circuits including number systems, number conversion techniques, logic concepts, logic gates, Boolean expressions, logic diagrams, magnetic storage devices, display devices, flip-flops, counters, registers, encoders and decoders, basic communication principles, AM and FM waveforms and frequency spectra, decibels, operation of a spectrum analyzer and its application to a signal flow analysis to the component level of a SSB receiver and FM transceiver including RLC filter circuits, mechanical filters, modulator and demodulator circuits, oscillators, RF, IF, and audio circuits with 50% of the time devoted to signal tracing, alignment, maintenance and troubleshooting techniques in the laboratory.

Credit Recommendation: In the vocational certificate category, 2 semester hours in introduction to digital circuits, 2 in electronic equipment repair (1/82); in the lower-division baccalaureate/associate degree category, 3 semester hours in communication systems (1/82).

NV-1715-1073

FFG-7 Auxiliary Mechanical Subsystem Technician Class C1

Course Number: A-652-0158.

Location: Service School Command, Great Lakes, IL.

Length: 3–5 weeks (120–175 hours).

Exhibit Dates: 3/80–Present.

Objectives: To train enginemen to operate and maintain auxiliary mechanical subsystems.

Instruction: Lectures and practical exercises that provide the knowledge and skills necessary to operate and maintain the mechanical components of high and low air pressure systems, electronic equipment cooling water system and incinerator equipment on a FFG-7 class ship.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in mechanical engineering technology (10/83).

NV-1715-1074

FFG-7 Central Control Station Maintenance Class C1

Course Number: A-652-0155.

Location: Service School Command, Great Lakes, IL.

Length: 16 weeks (640 hours).
Exhibit Dates: 9/79–Present.

Objectives: To train technicians in the theory, maintenance and repair of a computer based shipboard control system.

Instruction: Lectures, laboratory work, and practical exercises in digital logic from basic TTL gates to memories and counters, basic computer mathematics, troubleshooting of electronics control systems and computer circuits, machine language programming, minicomputer organization and I/O.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronic troubleshooting techniques, 2 in electronic troubleshooting laboratory (1/82); in the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to minicomputers and machine language programming, 2 in digital logic (1/82).

NV-1715-1075

FFG-7 Class Ship Interior Communications (IC) Subsystems Technician

Course Number: A-623-0099.
Location: Service School Command, Great Lakes, IL.
Length: *Version 1:* 6 weeks (240 hours). *Version 2:* 9 weeks (360 hours).
Exhibit Dates: *Version 1:* 1/83–Present. *Version 2:* 6/79–12/82.

Objectives: To provide technical knowledge and skills required to perform organizational level maintenance of navigation systems.

Instruction: *Version 1:* Lectures and laboratory exercises in the theory of operation, circuitry, use of technical manuals and schematics in the operation, troubleshooting and maintenance of electromechanical navigation equipment, including servo controlled gyroscopes. *Version 2:* Lectures and laboratory exercises in the theory of operation and preventive and corrective maintenance down to the component level for Dewey log, AN/WSN-2 stabilized gyrocompass and IMV, Mk-g Dead Reckoning System, Mk-I stabilized glide scope system and the Sperry Mk-27 gyrocompass.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electromechanical system maintenance and 1 in electronic system maintenance (1/86). *Version 2:* In the vocational certificate category, 3 semester hours in electromechanical system maintenance (1/82).

NV-1715-1076

Gun Fire Control System (GFCS) Mk 86 Mod 3 Maintenance Class C

Course Number: A-113-0066.
Location: Service School Command, Great Lakes, IL.
Length: 23 weeks (920 hours).
Exhibit Dates: 12/73–Present.

Objectives: To train technicians in the maintenance, fault isolation and repair of electronic fire control systems.

Instruction: Group-paced lectures and practical demonstrations in the maintenance and repair of computer input buffer systems, radar video displays, CRT's, video circuits, pulse compression circuits, frequency selective circuits, S/D and D/S converters, video monitors and cameras, transmitters, receivers, A/D converters and power supplies.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronic equipment maintenance and repair, 3 in video equipment maintenance and repair (1/82).

NV-1715-1077

Guided Missile Launching System (GMLS) Mk 13 Mod 4 Maintenance

Course Number: A-121-0474.
Location: Service School Command, Great Lakes, IL.
Length: 17 weeks (680 hours).
Exhibit Dates: 9/80–Present.

Objectives: To train technicians in the operation, maintenance and repair of the Mk 13 Mod 4 guided missile launching system.

Instruction: Lectures and hands-on experience in the operation and maintenance of the Mk 13 Mod 4 guided missile launching system. Areas covered include system controls and operation, electro-hydraulic-mechanical components and servos, power supplies and distribution, pneumatic-mechanical systems, and the associated electronics for the system and subsystems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electromechanical maintenance (1/82).

NV-1715-1078

Gun Mount 5"/54 Mk 42 Mods 9 and 10 Maintenance Class C1

Course Number: A-113-0044.
Location: Service School Command, Great Lakes, IL.
Length: 21 weeks (840 hours).
Exhibit Dates: 1/81–Present.

Objectives: To train personnel in the maintenance of a gun mount and associated equipments.

Instruction: Lectures and demonstrations in the operation and maintenance of power distribution systems, control and firing circuits, mechanical linkages, hydraulic systems, and operational testing.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electromechanical maintenance (1/82).

NV-1715-1079

Gunner's Mate Class A Phase II

Course Number: A-041-0016.
Location: Service School Command, Great Lakes, IL.
Length: 9 weeks (360 hours).
Exhibit Dates: 8/81–Present.

Objectives: To train technicians in the theory and maintenance of power supplies, digital circuits and hydraulic controls for gun and missile launching systems.

Instruction: Lectures and exercises in the theory and practices of AC/DC motors and generators; solid state power supplies; number systems, logic gates, digital arithmetic and circuits, counters, registers; syncro servos and hydraulic controls.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in digital logic, 3 in electromechanical system controls (1/82).

NV-1715-1080

Gun Mount 5"/54 Mk 45 Maintenance Class C1

Course Number: A-113-0054.
Location: Service School Command, Great Lakes, IL.
Length: 17 weeks (680 hours).
Exhibit Dates: 7/72–Present.

Objectives: To train personnel in the maintenance of a gun mount and associated equipment.

Instruction: Group-paced lectures and demonstrations in the operation and maintenance of power distribution systems, PC cards, control and arming circuits, mechanical linkages, hydraulic systems and operational testing.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electromechanical maintenance (1/82).

NV-1715-1081

Tartar Guided Missile Launching System (GMLS) Mk 11 Maintenance Class C1

Course Number: A-121-0043.
Location: Service School Command, Great Lakes, IL.
Length: 23–24 weeks (920–960 hours).
Exhibit Dates: 7/74–Present.

Objectives: To train personnel in the maintenance of a guided missile launching system.

Instruction: Lectures and demonstrations in the operation and maintenance of power devices, magnetic amplifiers, firing circuits, mechanical linkages, hydraulic systems, and operational testing.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electromechanical maintenance (1/82).

NV-1715-1082

Tartar Guided Missile System Mk 13 Maintenance Class C1

Course Number: A-121-0044.
Location: Service School Command, Great Lakes, IL.
Length: 24 weeks (960 hours).
Exhibit Dates: 3/80–Present.

Objectives: To train personnel in the maintenance of a guided missile launching system.

Instruction: Lectures and demonstrations in the operation and maintenance of train and elevation circuits, hoist equipment, hydraulic and lubrication systems, sensor and control systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electromechanical maintenance (1/82).

NV-1715-1083

Terrier Guided Missile Launching System (GMLS) Mk 10 Maintenance Class C1

Course Number: A-121-0046.
Location: Service School Command, Great Lakes, IL.
Length: 20–22 weeks (800–880 hours).
Exhibit Dates: 7/74–Present.

Objectives: To train personnel in the maintenance of a guided missile launching system.

Instruction: Lectures and demonstrations in the operation and maintenance of power distribution systems, PC cards, control and arming circuits, mechanical linkages, hydraulic systems, and operational testing.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electromechanical maintenance (1/82).

NV-1715-1084

Type 18 Submarine Periscope Repair Class C1

Course Number: A-670-0047.
Location: Service School Command, Great Lakes, IL.

Length: *Version 1:* 14 weeks (504 hours) *Version 2:* 12 weeks (480 hours).

Exhibit Dates: *Version 1:* 10/85–Present *Version 2:* 10/80–9/85

Objectives: To train personnel in the overhaul, maintenance and repair of type 18 periscopes.

Instruction: *Version 1:* Lectures and laboratory exercises covering the basic fundamentals of electricity, electronics, digital terms, and electromechanical systems used in the type 18 periscope. *Version 2:* Lectures and exercises in the theory of digital circuits including number systems, Boolean algebra, gates, counters, flip-flops. (No electrical specifications or Karneough maps) and electronic devices such as FET's, bipolar transistors, LED's and opto-isolators. Repair and maintenance of submarine periscope and electromechanical systems is also covered.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in electromechanical maintenance (1/86); in the lower-division baccalaureate/associate degree category, 4 semester hours in basic electricity and electronics and 1 in electromechanical laboratory (1/86). *Version 2:* In the vocational certificate category, 4 semester hours in electromechanical maintenance (1/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in digital logic, 3 in electronic devices (1/82).

NV-1715-1085

Data Systems Technician Class C

Course Number: A-150-0066.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 11–15 weeks (440–600 hours).

Exhibit Dates: 12/77–Present.

Objectives: To provide students with skills and knowledge necessary to maintain two versions of a general purpose UNIVAC computer.

Instruction: The course offers an in-depth study of both versions of the UNIVAC general purpose computer including control, arithmetic, memory and input/output circuitry. Study of the instruction repertoire including detailed operating sequences for each instruction is included. Troubleshooting exercises are used throughout the course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer troubleshooting, 2 in computer organization (11/81).

NV-1715-1086

Mk 152 Digital Computer Complex

Course Number: A-150-0079.

Location: Command Systems Technical School Command, Mare Island, CA; Naval Guided Missile School, Dam Neck, VA.

Length: 19 weeks (760 hours).

Exhibit Dates: 4/75–Present.

Objectives: Provides training in the knowledge and skills necessary to operate and maintain a digital computer and its peripheral equipment.

Instruction: A detailed study of a digital computer including maintenance and repair of its power supply, clocks, memory, logic and control. Emphasis on computer instruction sets with detailed study on how each instruction is performed. Study of peripheral equipment operations, maintenance and repair including paper tape reader, paper tape punch, keyboard, printer, and magnetic tape and analog-to-digital and digital-to-analog data converter.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer systems, 1 in computer troubleshooting laboratory (11/81).

NV-1715-1087

Fire Control System (FCS) Mk 92 Mod 2 Maintenance

Course Number: A-113-0080.

Location: Fleet Training Center, San Diego, CA; Fleet Training Center, Dam Neck, VA.

Length: 29 weeks (1087 hours).

Exhibit Dates: 5/82–Present.

Objectives: To train technicans in operation and maintenance of computer controlled gun/missile firing systems.

Instruction: Operation, functional analysis, maintenance and troubleshooting of: gyrostablized search and track antenna groups, controls and displays; radar signal generation and processing; 32 bit computer operation and I/O including: ASCII data terminal, tape reader/punch, mag tape, and interfaces. Other subjects include: servo operation, antenna drive and tracking system, A-D/D-A and synchro/digital signal processing, and use of computer words for troubleshooting and maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in digital laboratory, 2 in electronic/digital troubleshooting, 2 in digital servo systems (5/82); in the upper-division baccalaureate category, 2 semester hours in digital computer systems (5/82).

NV-1715-1088

Basic Solid State Devices Class F1

Course Number: A-662-0019.

Location: Fleet Training Center, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 2 weeks (60 hours).

Exhibit Dates: 8/76–Present.

Objectives: To provide fundamentals of solid-state theory and basic testing of components.

Instruction: Coverage of basic solid-state devices and circuits in a classroom environment including demonstrations and laboratory exercises. Diodes, bipolar transistors, UJT's and thyristors are studied as well as conventional circuits such as CE, CB, CC.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic devices (5/82).

NV-1715-1089

Gyro Compass Technician Mk 27 Maintenance Class C1

Course Number: K-670-2152.

Location: Fleet Training Center, San Diego, CA.

Length: 3 weeks (90 hours).

Exhibit Dates: 3/79–Present.

Objectives: To provide personnel with theory and maintenance of the Mk 27 gyro compass.

Instruction: Gyro compass theory, operation modes, auxiliary circuits and gyro compass maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours in gyro compass theory and laboratory (5/82).

NV-1715-1090

Mechanical Gyro Maintenance and Repair C1

Course Number: A-670-0038.

Location: Fleet Training Center, San Diego, CA.

Length: 4 weeks (120 hours).

Exhibit Dates: 7/74–Present.

Objectives: To provide personnel with theory of operation and practical training in maintenance and repair of the Mk 14 mechanical gyro compass.

Instruction: Lectures, demonstrations, and laboratory work covering gyro compass theory of operation including errors and methods of compensation and the maintenance, calibration and troubleshooting of mechanical and electrical components.

Credit Recommendation: In the vocational certificate category, 1 semester hour in gyro compass maintenance and repair (5/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in gyro compass theory and operation (5/82).

NV-1715-1091

Integrated Voice Communication System AN/STC-1 Maintenance

Course Number: A-623-0042.

Location: Service School Command, San Diego, CA.

Length: 19 weeks (722 hours).

Exhibit Dates: 4/74–Present.

Objectives: To train personnel to operate and maintain the AN/STC-1 integrated voice communication system.

Instruction: Group instruction in voice communication system operation, maintenance, and troubleshooting including oscilloscope use, digital fundamentals, computer basics, teleprinter operation, tape reader operation, and interfacing.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic system troubleshooting, 2 in digital electronics (5/82).

NV-1715-1092

Surface Microcomponent Repair Course

Course Number: A-100-0056.

Location: Fleet Training Center, Mayport, FL; Fleet Training Center, Pearl Harbor, HI; Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA; Fleet Mine Warfare Training Center, Charleston, SC.

Length: 2 weeks (80 hours).

Exhibit Dates: 7/81–Present.

Objectives: To prepare personnel to repair circuit laminates, encapsulated circuits and shaft encoders, welded lead devices, multilayer devices and electroplated circuits.

Instruction: Practical training in repairing printed circuit board laminates, conductors; flexible circuits; plastic electronic panels; encapsulated circuits; shafter encoders; static-sensitive devices; welded lead devices; high density multilayer devices; electroplated materials. Includes preventive maintenance of repair station as required for Navy certification.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic repair laboratory (5/82).

NV-1715-1093

AN/SPS-49(V) Radar Set Maintenance

Course Number: A-104-0176.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 12 weeks (480 hours).

Exhibit Dates: 10/78-Present.

Objectives: To provide trained personnel to operate and maintain, with no supervision, the AN/SPS-49(V) radar set, using built-in test equipment and other associated test equipment.

Instruction: Instruction includes lectures, practical demonstrations and hands-on operation, maintenance and troubleshooting of shop mockups of the radar systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in radar or electronic systems, troubleshooting and maintenance (5/82).

NV-1715-1094

AN/SPA-66 Radar Indicator Maintenance

Course Number: A-104-0178.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 8/79-Present.

Objectives: To provide the skills and knowledge necessary to maintain AN/SPA-66 radar indicators.

Instruction: Course includes operation and maintenance of the AN/SPA-66 radar indicator including regulated power supplies, DC to DC converters, digital devices for timing, sweep generation and troubleshooting to the component and system level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in troubleshooting and maintenance (5/82).

NV-1715-1095

AN/SPS-55 Radar Set Maintenance

Course Number: A-104-0162.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 4/82-Present.

Objectives: To provide the skills and knowledge necessary to operate and maintain the AN/SPS-55 radar set.

Instruction: Course includes operation an maintenance of the AN/SPS-55 radar set including power distribution; timing and frequency generation; receiving and video systems; antenna system; and system troubleshooting and repair to the lowest repairable or replaceable component level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in circuit and system troubleshooting (5/82).

NV-1715-1096

AN/SPA-50, AN/SPA-50B Radar Indicator Maintenance

Course Number: A-104-0156.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 6/81-Present.

Objectives: To provide electronic technicians with the knowledge and skill necessary to maintain specific radar indicators.

Instruction: Lectures, practical demonstrations, and laboratory work in digital devices including A/D conversion, operational amplifiers; circuit operation of power supply, timing, sweep and display circuits; and operation of controls, required to maintain and troubleshoot specific radar indicators.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic system maintenance and troubleshooting (5/82).

NV-1715-1097

AN/SPS-65(V)1 Radar Set Maintenance

Course Number: A-104-0179.

Location: Service School Command, San Diego, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 2/82-Present.

Objectives: To provide electronic technicians with technical skills and knowledge to operate and perform preventive and corrective maintenance on the AN/SPS-65(V)1 radar equipment.

Instruction: Lectures, practical demonstrations, and laboratory work involving circuit tracing, functional analysis, and fault/failure finding on AC and DC power supplies, transmitters, receiver-processors, and controls of a radar set.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic equipment maintenance and troubleshooting (5/82).

NV-1715-1098

AN/SRN-9/18 Satellite Radio Navigation Sets Combined Maintenance

Course Number: A-102-0267.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 2/79-Present.

Objectives: To provide the skills and knowledge needed to perform corrective and preventive maintenance on the AN/ARN-9 and AN/SRN-18 satellite radio navigation sets.

Instruction: Provides instruction on the repair and preventive maintenance on the AN/SRN-9 and AN/SRN-18 satellite radio navigation sets. Coverage includes basic digital components, number conversions, computer fundamentals, mneumonic instruction sets, phase modulation, voltage controlled oscillators, Doppler effect, character generators and application of the SIMM (Symbolic Integrated Maintenance Manual) in performing maintenance on the equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in equipment troubleshooting and repair (5/82).

NV-1715-1099

Fleet Satellite Communications Spectrum Monitor System Equipment

Course Number: A-101-0188.

Location: Fleet Training Center, San Diego, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 2/80-Present.

Objectives: To train personnel in the operation and maintenance of an HP 2100 and HP 8500 series minicomputer system and console.

Instruction: Provides instruction in the HP2100 minicomputer with cassette and mag tape loader subsystems. Included are subsystems for interfacing, display and control.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in minicomputer systems (5/82); in the upper-division baccalaureate category, 1 semester hour in minicomputer systems for engineering majors (5/82).

NV-1715-1100

Narrow Band Secure Voice Stand Alone Maintenance
(Narrowband Secure Voice Stand Alone Maintenance)

Course Number: A-101-0156.

Location: Fleet Training Center, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 4/81-Present.

Objectives: To provide electronic technicians with the skills and knowledge to maintain specialized communication equipment.

Instruction: Lectures, practical demonstrations, and laboratory work in security and classification procedures; voice to digital encoding and decoding; modems; transmitting and receiving of digital signals; and maintenance and troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electrical technology communication systems maintenance and troubleshooting (5/82).

NV-1715-1101

ASROC Missile Intermediate Maintenance

Course Number: A-121-0146.

Location: Service School Command, Orlando, FL.

Length: 3 weeks (120 hours).

Exhibit Dates: 3/81-Present.

Objectives: To train enlisted personnel in the operation and maintenance procedures for the ASROC missile.

Instruction: Lectures and practical exercises in understanding the performance of the ASROC missile including its physical description, interfacing, functional and operational description, installation procedures and preventive and corrective maintenance.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (4/83).

NV-1715-1102

Torpedoman's Mate Basic Class A1

Course Number: A-123-0127.

Location: Service School Command, Orlando, FL.

Length: 6 weeks (240 hours).

Exhibit Dates: 6/77-10/86.

Objectives: To train personnel selected as torpedomen with the knowledge and skill required for ship or shore activities.

Instruction: For this course after 10/86 see NV-1715-1488. Lectures and practical exercises in explosives, underwater sound, hydraulics and pneumatics, neucleonics, planned maintenance and safety as they relate to a variety of torpedos and torpedo related units.

Credit Recommendation: Credit is not recommended due to the military-specific nature of the course (4/83).

NV-1715-1103

Torpedo Mk 46 Mod 5 Intermediate Maintenance

Course Number: A-123-0174.
Location: Service School Command, Orlando, FL.
Length: 12 weeks (420 hours).
Exhibit Dates: 1/83–Present.
Objectives: To train enlisted personnel in the maintenance of the Mk 46 torpedo and its accessories.
Instruction: Lectures and practical experiences in the maintenance of the Mk 46 torpedo including a functional description of each system, assembly, inspection, performance testing, troubleshooting and repair.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in systems maintenance and troubleshooting or as a technical elective (4/83).

NV-1715-1104

Torpedo Mk 46 Mod 5 Test Equipment Intermediate Maintenance

Course Number: A-123-0175.
Location: Service School Command, Orlando, FL.
Length: 13 weeks (500 hours).
Exhibit Dates: 10/82–Present.
Objectives: To train personnel in intermediate level maintenance for torpedo Mk 46 test equipment.
Instruction: Lectures and practical exercises in the theory of operation, preventive and corrective maintenance of test sets for exploder wells, gyroscope, cable, afterbodies and exercise heads. The course includes a great deal of practical electronic troubleshooting.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in maintenance and electronic troubleshooting (4/83).

NV-1715-1105

Torpedo Mk 48 Mods 1 and 3 Intermediate Maintenance

Course Number: A-123-0140.
Location: Service School Command, Orlando, FL.
Length: 15 weeks (650 hours).
Exhibit Dates: 3/75–Present.
Objectives: To train fleet personnel in the theory of operation and maintenance procedures for torpedo Mk 48 Mod 1.
Instruction: Lectures and practical exercises in equipment maintenance including logistics, safety, troubleshooting, fault isolation and repair or replacement of parts.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in system maintenance and troubleshooting or as a technical elective (4/83).

NV-1715-1106

Torpedo Mk 48 Mods 1 and 3 Test Equipment Intermediate Maintenance

Course Number: A-123-0141.
Location: Service School Command, Orlando, FL.
Length: 26 weeks (1040 hours).
Exhibit Dates: 1/79–Present.
Objectives: To provide personnel with knowledge to perform intermediate level maintenance and calibration on test equipment for the torpedo Mk 48.
Instruction: Instruction includes the theory of operation and laboratory applications of electronic test equipment including oscilloscope, counter-timer, frequency synthesizer, phasemeter; digital devices including A-D converters, decoders, multiplexors, RAM, PROM, tri-state devices, 8080A microprocessor, 8228 controller; special devices and circuits including OP-amps, UJT, SCR, LED, and opto-isolators; application of ATLAS programming language; simple binary and BCD arithmetic; study of Honeywell 6/43 minicomputer system; study of 8" flexible disk drive; study of synchro-digital interface equipment. Laboratory work also includes troubleshooting of electronic assemblies.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to microprocessors, 2 in electronic troubleshooting (4/83).

NV-1715-1107

Torpedo Technician Advanced

Course Number: A-123-0147.
Location: Service School Command, Orlando, FL.
Length: Self-paced 5 weeks (180 hours).
Exhibit Dates: 1/83–1/89.
Objectives: To train enlisted personnel in digital circuits and proper soldering techniques.
Instruction: For this course after 1/89 see NV-1715-1492. Lectures and practical exercises in digital circuits including number systems, logic gates, Boolean algebra, counters and registers. The soldering portion of the course includes study of solderless wrapped connections, soldering tools, flux and making connections to a variety of terminals.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic shop practices and 3 in digital fundamentals (4/83).

NV-1715-1108

Mineman Test Set Repair and Maintenance Training

Course Number: J-647-0018.
Location: Fleet and Mine Warfare Training Center, Charleston, NC.
Length: 12 weeks (360 hours).
Exhibit Dates: 9/81–Present.
Objectives: To provide senior minemen with the necessary skills and knowledge to enable them to perform maintenance of mine test equipment.
Instruction: Lectures and practical laboratory exercises in basic electricity/electronics including series, parallel and series-parallel AC and DC circuits, bridge circuits and active circuits using tubes and solid state devices. Troubleshooting and calibrating specific test equipment is also included.
Credit Recommendation: In the vocational certificate category, 6 semester hours in basic electricity/electronics (3/83).

NV-1715-1109

Mineman Supervisory and Advanced Technical Training

Course Number: J-647-0017.
Location: Fleet and Mine Warfare Training Center, Charleston, SC.
Length: 19 weeks (617 hours).
Exhibit Dates: 1/82–Present.
Objectives: To provide selected senior enlisted personnel with the necessary skills, related administration and technical knowledge to perform mine readiness and maintenance.
Instruction: Lectures and laboratory exercises in the intermediate maintenance of a variety of weapons. Included are exercises in basic electricity and electronics covering series, parallel and series parallel, AC and DC circuitry, bridge circuits, rectifiers and active circuits using tubes and solid state devices. Lectures are conducted on the administration, logistics, safety, quality assurance, workload management, operations and readiness policies and procedures required by mine shop supervisors and middle managers.
Credit Recommendation: In the vocational certificate category, 3 semester hours in basic electricity/electronics (3/83); in the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to management (3/83).

NV-1715-1110

Fully Automatic Switching Terminal

Course Number: A-130-0267.
Location: Fleet Anti-Submarine Warfare Training Center, Atlantic, Norfolk, VA.
Length: 5 weeks (160 hours).
Exhibit Dates: 10/82–Present.
Objectives: To train experienced electronic technicians to perform circuit adjustments, hardware and software maintenance, troubleshooting and repair an automatic switching terminal.
Learning Outcomes: Upon completion of this course, the student will be able to: (1) understand the functions and subsystems of an automatic switching terminal, (2) perform maintenance on digital systems, (3) isolate faults and repair digital systems.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in digital equipment maintenance and repair (8/83).

NV-1715-1111

Passive Equipment Cabinet Operation and Maintenance

Course Number: A-130-0263.
Location: Fleet Anti-Submarine Warfare Training Center, Atlantic, Norfolk, VA; Fleet Anti-Submarine Warfare Training Center, Pacific, San Diego, CA.
Length: 3 weeks (120 hours).
Exhibit Dates: 8/82–9/86.
Objectives: To provide experienced personnel with the knowledge to operate, maintain and repair the passive equipment cabinet system to the component level.
Learning Outcomes: Upon completion of the course, the student will be able to perform preventive and/or corrective maintenance on a selected group of analog and digital equipment including replacement of modules, printed circuit boards and/or discrete chassis mounted components.
Credit Recommendation: In the vocational certificate category, 2 semester hours in digital equipment maintenance and repair (8/83).

NV-1715-1112

Synchronous Distributed Processor II

Course Number: A-130-0250.
Location: Fleet Anti-Submarine Warfare Training Center, Atlantic, Norfolk, VA.
Length: 4 weeks (160 hours).
Exhibit Dates: 4/81–Present.

Objectives: To train experienced electronic technicians to perform preventive and corrective maintenance on synchronous distributed processor systems.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) understand the function of a data processor and distribution subsystem, (2) perform maintenance on digital systems, (3) isolate faults and repair digital systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in digital equipment maintenance, troubleshooting and repair (8/83).

NV-1715-1113

Time Series Acoustic Recall System Maintenance

Course Number: A-130-0246.

Location: Fleet Anti-Submarine Warfare Center, Atlantic, Norfolk, VA.

Length: 4 weeks (130 hours).

Exhibit Dates: 1/83–Present.

Objectives: To provide experienced electronic technicians with the necessary background to perform preventive and corrective maintenance on selected digital signal processing units.

Learning Outcomes: Upon completion of the course the student will be capable of performing safely all necessary preventive and corrective maintenance on selected digital signal processing units and their associated power supplies using the necessary test equipment and technical manuals.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic circuit repair and maintenance (8/83).

NV-1715-1114

Ocean Systems Technician Electronic

Course Number: A-130-0114.

Location: Fleet Anti-Submarine Warfare Training Center, Atlantic, Norfolk, VA.

Length: 19 weeks (760 hours).

Exhibit Dates: 8/81–Present.

Objectives: To provide technicians with the necessary prerequisite subject matter for entrance into specialized equipment courses.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) use algebra to solve electric and electronic circuit problems, (2) understand the concepts of Ohm's and Kirchhoff's Laws in series and parallel DC and AC circuits, (3) apply digital theory to computer circuits, (4) apply electronic solid state and vacuum tube theory to functional circuits.

Credit Recommendation: In the vocational certificate category, 4 semester hours in fundamentals of DC and AC circuit analysis, 3 in fundamentals of electronics and 2 in algebra and trigonometry (8/83); in the lower-division baccalaureate/associate degree category, 4 semester hours in digital circuits and computer fundamentals, 2 in algebra and trigonometry for non-technology majors (8/83).

NV-1715-1115

Aegis Display System Operation and Maintenance

Course Number: A-150-0238.

Location: Naval Systems Department, Moorestown, NJ.

Length: 22 weeks (880 hours).

Exhibit Dates: 10/82–12/85.

Objectives: To train technicians to operate and perform maintenance on two display systems of a complex radar system.

Instruction: For this course after 12/85 see NV-1715-1301. Lectures and practical exercises in the operation, maintenance and repair, to the component level, of two video display systems including word format, test messages for fault isolation, RAM troubleshooting, symbol generator, I/O lines, video controls, signal tracing, alignment and troubleshooting procedures. Also included is the operation, maintenance and troubleshooting of auxiliary equipment such as pulse amplifiers, radar and sonar azimuth converters, data distribution switchboards, printers and equipment water cooling. There is a brief review of soldering techniques and use of test equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in video display system maintenance and repair and 1 in electronic shop practices (7/83).

NV-1715-1116

Aegis Weapon System Mk 7 Operation and Maintenance

Course Number: A-104-0190.

Location: Naval Systems Department, Moorestown, NJ.

Length: 19 weeks (760 hours).

Exhibit Dates: 5/82–12/85.

Objectives: To train experienced technicians to direct the maintenance operations of a phase array radar system including computers and terminals with which it interfaces.

Instruction: For this course after 12/85 see NV-1715-1302. Lectures and practical exercises in the operation and maintenance of the subsystems comprising the Aegis Weapons system including AN/UYK-7 and AN/UYK-20 computers and their attendant disk drives, tape drives and line printers; the AN/SPY-1A radar system and AN/SPG-62 radar set; Mk 99 fire control system and the Operational Readiness Test System (ORTS Mk 1). Instruction also includes manually initiated fault detection and isolation tests, evaluation and analysis of test results and direct calibration and alignment verification procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic system maintenance and troubleshooting or as a technical elective (7/83).

NV-1715-1117

Aegis Combat System Maintenance Supervisor

Course Number: S-121-0483; A-121-0483.

Location: Aegis Training Center, Wallops Island, VA; Naval Systems Department, Moorestown, NJ.

Length: 7–13 weeks (228–520 hours).

Exhibit Dates: 10/82–Present.

Objectives: To provide senior fire control technicians with the knowledge to coordinate repairs, manage system maintenance and administer system reports.

Instruction: Lectures and practical exercises in familiarization with the documentation and capabilities of a phase array radar and sonar system including the computers, consoles, weapon systems, operator duties and equipment configuration.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (12/88).

NV-1715-1118

Aegis Radar System AN/SPY-1A Operation and Maintenance

Course Number: A-104-0191.

Location: Naval Systems Department, Moorestown, NJ.

Length: 19 weeks (760 hours).

Exhibit Dates: 12/82–12/85.

Objectives: To train personnel in the knowledge and skills required to operate and perform maintenance tasks on a radar system.

Instruction: For this course after 12/85 see NV-1715-1303. Lectures and practical exercises in the operation and maintenance of a phase array radar system. The course includes stimulus processing and RF signal generation, transmitters, antennas, signal processing, operating modes, console operations and system maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in digital signal processing circuits, 4 in radar systems and 2 in communication system maintenance and troubleshooting (7/83).

NV-1715-1119

AN/WSN-5 Inertial Navigation System Maintenance

Course Number: A-670-0049.

Location: Service School Command, Great Lakes, IL.

Length: 3 weeks (120 hours).

Exhibit Dates: 4/82–Present.

Objectives: To train personnel to operate, maintain and troubleshoot an inertial navigation system.

Instruction: Lectures and practical exercises in the operation, maintenance and troubleshooting of an inertial navigation system to the circuit card level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic troubleshooting laboratory or 1 in gyrocompass repair (10/83).

NV-1715-1120

Mk 23 Gyrocompass Systems Maintenance

Course Number: A-670-0056.

Location: Service School Command, Great Lakes, IL.

Length: 5 weeks (200 hours).

Exhibit Dates: 5/82–Present.

Objectives: To train personnel in the operation, maintenance and troubleshooting of a gyrocompass system.

Instruction: Lectures and practical exercises in the theory and operation of a gyrocompass system including synchro signal amplifier, gyro principles, AC/DC power supplies and distribution, gravity reference systems, azimuth control, leveling control, compass control, damping control, alarm systems, and course indicators.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in synchro and servo control systems, 1 in servo controls laboratory (10/83). NOTE: Credit in this course duplicates that found in A-670-0055 (NV-1715-1141). Students should receive credit for one or the other of the courses, but not both.

NV-1715-1121

Tartar Weapons Direction System (WDS) Mk 4 WDE Mk 1

Course Number: A-121-0029.

Location: Guided Missiles School, Dam Neck, VA; Combat Systems Technical School Command, Mare Island, CA.

Length: 16 weeks (639 hours).

Exhibit Dates: 9/73–8/88.

Objectives: To train enlisted personnel to maintain the Mk 4 weapons direction system.

Instruction: For this course after 8/88 see NV-1715-1391. Lectures and practical exercises in the equipment operation, tests, alignment and troubleshooting, to the component level, of a weapons direction system using scopes, meters, signal generators, power supplies and a variety of specialized equipment. Circuitry experience includes vacuum tube amplifiers, relay switching circuits, power supplies, CRT and video systems, and other specialized circuits.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in electronics troubleshooting, 3 in analog circuits (11/83).

NV-1715-1122

Terrier AN/SPG-55B Mod 9 Radar Maintenance

Course Number: A-104-0197.

Location: Combat Systems Technical Schools Command, Mare Island, CA; Naval Guided Missiles School, Dam Neck, VA.

Length: 29–30 weeks (1160–1200 hours).

Exhibit Dates: 10/83–Present.

Objectives: To provide naval personnel with the technical knowledge and skill necessary to operate and maintain a radar system.

Instruction: Lectures and practical exercises in the operation, maintenance and troubleshooting, to the component level, of the AN/SPG-55B radar system including ship's power distribution, Doppler techniques/systems, servos and test equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in electronic troubleshooting, 3 in radar fundamentals (11/83).

NV-1715-1123

Replacement Navigation Tender Technician

Course Number: A-193-0310.

Location: Guided Missile School, Dam Neck, VA.

Length: 3–4 weeks (120–160 hours).

Exhibit Dates: 4/79–Present.

Objectives: To provide naval personnel with the skills and knowledge to perform intermediate level maintenance on navigation subsystems.

Instruction: Lectures and practical exercises in the appropriate procedures for maintenance of a navigation test set including the correct printed circuit soldering techniques, the use of test equipment including distortion analyzers, wave analyzers, strip chart recorders, voltmeters, computers and specialized test sets; the correct repair and maintenance procedures for a sonar navigation set.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic equipment maintenance laboratory (11/83).

NV-1715-1124

Radar Set AN/SPG-55B Terrier Operation and Maintenance

Course Number: A-104-0169.

Location: Naval Guided Missiles School, Dam Neck, VA.

Length: 29–30 weeks (1160-1200 hours).

Exhibit Dates: 2/80–Present.

Objectives: To provide naval personnel with the technical knowledge and skill necessary to operate and maintain a radar system.

Instruction: Lectures and practical exercises in the operation, maintenance and troubleshooting, to the component level, of the AN/SPG-55B radar system including ship's power distribution, Doppler techniques/systems, servos and test equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in electronic troubleshooting, 3 in radar fundamentals (11/83).

NV-1715-1125

Poseidon Intermediate Level Missile Maintenance Technician

Course Number: A-121-0252.

Location: Guided Missiles School, Dam Neck, VA.

Length: 16 weeks (640 hours).

Exhibit Dates: 7/78–1/89.

Objectives: To train electronic technicians in the theory and maintenance of intermediate level Poseidon missile systems.

Instruction: Lectures and practical exercises in the theory and maintenance of FBM weapon systems including the missile handling system, the missile tactical readiness test set, digital logic systems pertaining to the readiness test set, control systems, hydraulics, tape reader, counter timer, DMM and power supplies.

Credit Recommendation: In the vocational certificate category, 2 semester hours in digital troubleshooting (11/83); in the lower-division baccalaureate/associate degree category, 3 semester hours in advanced digital circuitry (11/83).

NV-1715-1126

Navigational Aids (NAVAIDS) Technician Replacement

Course Number: A-193-0034.

Location: Guided Missiles School, Dam Neck, VA.

Length: 20 weeks (800 hours).

Exhibit Dates: 5/78–1/89.

Objectives: To provide training in the operation and repair of navigational aids related to the Poseidon navigation system with ESGM's.

Instruction: Lectures and practical exercises in LORAN C navigational system theory, operation and maintenance; electronic repair of navigation communication circuitry and digital logic; theory and troubleshooting of a particular radio receiver as it relates to navigation; and sonar system theory, operation and maintenance procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic troubleshooting/maintenance, 3 in radio receiver maintenance procedures (11/83); in the upper-division baccalaureate category, 3 semester hours in electronic communication theory for non-engineering majors (11/83).

NV-1715-1127

Missile Technician Poseidon

(Missile Technician Poseidon Replacement)

Course Number: A-121-0250.

Location: Naval Guided Missiles School, Dam Neck, VA.

Length: 18–22 weeks (760–872 hours).

Exhibit Dates: 11/74–Present.

Objectives: To provide the skills necessary to troubleshoot and repair a Poseidon missile system.

Instruction: Lectures and practical exercises in Fleet Ballistic Missile (FBM) weapon system familiarization including calibration, preventive maintenance of hydraulic, pneumatic and hydrostatic systems, computer and electromechanical launch systems and troubleshooting to the modular level.

Credit Recommendation: In the vocational certificate category, 1 semester hour in hydraulics; in the lower-division baccalaureate/associate degree category, 2 semester hours in electromechanical maintenance, 3 in computer/control systems troubleshooting (6/89).

NV-1715-1128

Fire Control Technician Mk 88 Mod 2 Replacement

Course Number: A-121-0316.

Location: Naval Guided Missiles School, Dam Neck, VA.

Length: 19 weeks (760 hours).

Exhibit Dates: 11/77–Present.

Objectives: To provide naval personnel with the skills and knowledge to perform the correct procedures to operate, maintain and repair a missile fire control system and its support equipment.

Instruction: Lectures and practical exercises in the operation, fault isolation and repair, to the module level, of a computer controlled fire control system including the power distribution system, the operation, maintenance and repair of magnetic disk drives, the digital computer network, magnetic tape units, keyboard and display units and the servicing and repair of the environmental systems for the missile and its equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in industrial/commercial wiring practices (11/83); in the lower-division baccalaureate/associate degree category, 3 semester hours in data processing equipment maintenance, 2 in digital systems and 3 in electronic maintenance laboratory (11/83).

NV-1715-1129

Poseidon Trident 1 Backfit Intermediate Level Fire Control Technician FCS 88 Mod 1/2

(Fire Control Technician Mk 88 Intermediate Level Maintenance)

Course Number: A-121-0317.

Location: Guided Missiles School, Dam Neck, VA.

Length: 19–20 weeks (800–804 hours).

Exhibit Dates: 4/82–Present.

Objectives: To provide electronic technicians with the necessary training to operate and maintain test sets and guidance simulators.

Instruction: Lectures and practical exercises in the areas of digital electronics, optics, printers, tape readers, wirewrap operations, power supplies and general control wiring.

Credit Recommendation: In the vocational certificate category, 2 semester hours in optical system maintenance, 1 in wirewrap techniques; in the lower-division baccalaureate/associate degree category, 3 semester hours in digital electronic troubleshooting, 2 in digital electronic circuitry (6/89).

NV-1715-1130

Electrostatically Supported Gyro Monitor (ESGM) Backfit Ship's Inertial Navigation System (SINS) Technician Conversion

Course Number: A-193-0316.

Location: Naval Guided Missiles School, Dam Neck, VA.

Length: 3 weeks (83 hours).

Exhibit Dates: 1/79-1/84.

Objectives: To provide advanced training in the repair of a ESGM backfit ships inertial navigation system.

Instruction: Lectures and laboratory exercises in the advanced maintenance and repair of the backfit navigation subsystem including theory, calibration, operation and fault isolation.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronic troubleshooting (11/83).

NV-1715-1131

Electrostically Supported Gyro Monitor (ESGM) Backfit Central Navigation Computer Technician Conversion

Course Number: A-193-0315.

Location: Naval Guided Missiles School, Dam Neck, VA.

Length: 4 weeks (96 hours).

Exhibit Dates: 1/81-Present.

Objectives: To train electronic technicians in the repair of navigation computers associated with ESGM backfit navigation systems.

Instruction: Lectures and laboratory exercises in the technical maintenance of a central navigation computer including tape equipment, core memories, D/D converters and navigation systems.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronic troubleshooting (11/83).

NV-1715-1132

Electrostatically Supported Gyro Monitor (ESGM) Backfit Navigation Aids Technician Conversion

Course Number: A-193-0314.

Location: Naval Guided Missiles School, Dam Neck, VA.

Length: 19 weeks (760 hours).

Exhibit Dates: 10/82-Present.

Objectives: To provide advanced training in the theory and maintenance of extraordinary faults associated with the ESGM backfit navigation system.

Instruction: Lectures and practical exercises in the advanced theory of electrostatic gyro design principles using fundamentals of physics and mathematics. Electronic and digital troubleshooting of advanced digital systems related to the ESGM is an integral part of the course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic and digital troubleshooting, 1 in physics (11/83); in the upper-division baccalaureate category, 2 semester hours in the theory of gyro mechanisms for non-engineering majors (11/83).

NV-1715-1133

AN/SPS-48C Radar

Course Number: A-104-0188.

Location: Naval Guided Missiles School, Dam Neck, VA.

Length: 26 weeks (1040 hours).

Exhibit Dates: 8/82-Present.

Objectives: To provide radar technicians with the skills and knowledge to operate, maintain and repair a search radar system used in an automatic target detection system.

Instruction: Lectures and practical exercises in the operation and maintenance of a specialized search radar system including op code and assembly language programming of a UNIVAC 1616 computer system with the inclusion of memory transfers, tape and I/O devices.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic troubleshooting, 3 in computer science or assembly language, 2 in microwave fundamentals (11/83).

NV-1715-1134

Trident 1 Backfit Missile Technician (MT) Conversion

Course Number: A-121-0326.

Location: Guided Missiles School, Dam Neck, VA.

Length: 8 weeks (320 hours).

Exhibit Dates: 6/80-3/89.

Objectives: To teach the skills necessary to troubleshoot and repair the Trident 1 backfit missile system.

Instruction: Lectures and practical exercises in the operation, maintenance and repair, to the module level, of the Trident 1 missile system including a review of strategic weapons systems, missile launch systems and subsystems, support systems and mechanical systems including hydrostatic, hydraulic and pneumatic systems and complete coverage of the missile's digital controls and computer control system.

Credit Recommendation: In the vocational certificate category, 1 semester hour in hydraulics (11/83); in the lower-division baccalaureate/associate degree category, 2 semester hours in electromechanical maintenance, 3 in computer/control system troubleshooting (11/83).

NV-1715-1135

Trident 1 Backfit Missile Technician (MT) Replacement

Course Number: A-121-0329.

Location: Guided Missile School, Dam Neck, VA.

Length: 17-18 weeks (696-750 hours).

Exhibit Dates: 6/82-Present.

Objectives: To provide naval personnel with the skills necessary to troubleshoot and repair the Trident backfit missile system.

Instruction: Lectures and practical exercises in the operation, maintenance and repair, to the module level, of the Trident missile system including strategic weapons system familiarization, missile launch systems and subsystems, support systems, mechanical systems including hydrostatic, hydraulic and pneumatic systems, guidance systems, electronic control systems and the missile control computer.

Credit Recommendation: In the vocational certificate category, 1 semester hour in hydraulics; in the lower-division baccalaureate/associate degree category, 2 semester hours in electromechanical maintenance, 3 in computer/control system troubleshooting (6/89).

NV-1715-1136

Plotting System PT-512/S Tactical Display Maintenance

Course Number: A-623-0037.

Location: Fleet Training Center, Norfolk, VA.

Length: 5 weeks (200 hours).

Exhibit Dates: 8/73-Present.

Objectives: To train students to maintain, troubleshoot and repair a tactical display plotting system.

Instruction: Lectures and practical exercises in a review of basic electronics and servo systems; full coverage of an electromechanical system including plotting table, data converter, dead reckoning indicator and troubleshooting.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electromechanical systems (9/83); In the lower-division baccalaureate/associate degree category, 2 semester hours in electromechanical systems (9/83).

NV-1715-1137

AN/URN-25 Afloat TACAN Maintenance

Course Number: A-102-0239.

Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 10/82-Present.

Objectives: To train personnel to maintain and repair a specific navigational set, antenna and antenna group.

Instruction: Lectures and laboratory exercises in operation, maintenance and repair of the AN/URN-25 navigational set including AC/DC power supplies, coder-keyer circuits, receiver transmitter circuits, control indicator circuits, and FSK circuits; the power and monitoring circuits of the OE-273/URN antenna group and the power, monitoring and modulation generator circuits of the OE-258/URN antenna.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic troubleshooting (9/83).

NV-1715-1138

Broadcast Control Authority (BCA) Operational Control Center Operator

Course Number: A-260-0031.

Location: Fleet Training Center, Norfolk, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 5/80-Present.

Objectives: To train radiomen to operate a data processing system and maintain submarine broadcast equipment at SSIXS shore sites under all operating conditions of readiness without supervision.

Instruction: Lectures and practical exercises in the hardware configuration and software functions of the AN/USQ-64(V) data processing system and its peripherals, their operation in various modes and differing conditions and failure handling procedures to above equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in communications equipment operation

(9/83); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronic equipment operation for broadcast communications (9/83).

NV-1715-1139

Dead Reckoning Analyzer Indicator Mk 10 Mod 0/Dead Reckoning Tracer Mk 6 Mod 4B (DRAI/DRT) Maintenance

Course Number: A-623-0069.

Location: Fleet Training Center, Norfolk, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/81-Present.

Objectives: To provide Naval personnel with the technical knowledge and skill necessary to operate and maintain a dead reckoning analyzer and tracer.

Instruction: Lectures and practical exercises in the fundamentals of electronics including AC/DC circuits, electronic devices, digital logic devices; the fundamentals of control transformers, synchros, resolvers and the operational procedures, calibration and circuit checks of both the Mk 10 and Mk 6 equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic devices and 2 in electronic circuit troubleshooting (9/83).

NV-1715-1141

Mk 19 Gyrocompass Systems Maintenance

Course Number: A-670-0055.

Location: Service School Command, Great Lakes, IL.

Length: 10 weeks (400 hours).

Exhibit Dates: 5/82-Present.

Objectives: To train personnel in the operation, maintenance, troubleshooting and repair of a shipboard gyrocompass system.

Instruction: Lectures and laboratory exercises in the theory and operation of a gyrocompass system including principles of synchros, servos, and gyros; synchro signal amplifiers, synchro testers, course indicator, electronic sub-assemblies gyro trainers, DC power supplies (using 3 phase AC sources), roll/pitch follow up, fast erect systems, gyro computer control systems, integrators, damping, accelerometers, speed/tilt systems, system alarms, electronic power supplies and special test equipment including the operation of a phase-sensitive voltmeter and a dual channel recorder. Extensive troubleshooting and repair of the system is also included.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in synchro and servo control systems, 1 in electronic maintenance and troubleshooting laboratory (10/83). NOTE: Credit in this course duplicates A-670-0056 (NV-1715-1120). Students should receive credit for one or the other of the courses, but not both.

NV-1715-1142

ESGM/NAVAIDS Intermediate Level Maintenance Technician

Course Number: A-193-0037.

Location: Naval Guided Missiles School, Dam Neck, VA.

Length: 4 weeks (120 hours).

Exhibit Dates: 2/82-Present.

Objectives: To provide trainees with the skills and knowledge to perform intermediate level maintenance on a navigation system test set.

Instruction: Lectures and practical exercises in the operation, maintenance and repair of a sonar test set including block diagram analysis, systematic fault isolation techniques, the use of standard electronic test equipment and optical alignment equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic equipment maintenance laboratory (11/83).

NV-1715-1143

Advanced Electronic Warfare Applications

Course Number: A-230-0018.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 8 weeks (320 hours).

Exhibit Dates: 8/82-Present.

Objectives: To provide training to senior personnel in electronic detection and coordination of equipment.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) detect, classify and track targets; (2) coordinate integration of electronic warfare equipment with other weapons systems; (3) originate correspondence to obtain support resources and services and; (4) organize maintenance and training support.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/87).

NV-1715-1144

AN/SLQ-32(V) Presail/Underway Operations
(Electronic Warfare Technician AN/SLQ-32 Operator)

Course Number: A-102-0210.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/82-Present.

Objectives: To provide personnel with the skills to operate a specific piece of military equipment.

Learning Outcomes: Upon completion of the course, the student will be able to perform electronic warfare presail and underway watch duties aboard an AN/SLQ-32 equipped ship.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/87).

NV-1715-1145

AN/SLQ-32(V)3 ECM Maintenance

Course Number: A-102-0216.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: 10/83-Present.

Objectives: To provide knowledge and skills required to perform preventive and corrective maintenance on a specific piece of electronic warfare equipment.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) describe the operation, signal flow and interconnects of the antenna, power supplies, signal processing analog/digital conversion, system controls, receiver/transmitter, and computer of a receiver/transmitter system using digital control and signal processing; (2) perform preventive maintenance, alignment, troubleshooting, and repair and; (3) use general and special purpose test equipment including computer generated diagnostic tests.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in receiver/transmitter digital system maintenance (7/87).

NV-1715-1146

Aviation Electronics Warfare Fundamentals

Course Number: A-102-0301.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/82-Present.

Objectives: To provide the student knowledge of radar, general aircraft maintenance, aircraft electronic warfare systems, and general purpose test equipment.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) demonstrate a fundamental knowledge of digital circuits; (2) demonstrate a fundamental knowledge of radar and electronic warfare concepts and; (3) demonstrate a fundamental knowledge of corrosion control, aircraft electrical maintenance, electronic warfare test equipment, transmission lines and antenna concepts, and tangential sensitivity for electronic warfare systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in an electronic elective (7/87).

NV-1715-1147

Aviation Electronics Warfare O Level Maintenance

Course Number: A-102-0299.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 5 weeks (200 hours).

Exhibit Dates: 1/82-Present.

Objectives: To provide instruction on a system representative of a countermeasures weapon system.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) demonstrate a basic knowledge of VHF/LF/HF receivers, frequency measurements, pulse analyzer indicators, direction finding indicators, video and audio recorders, frequency distribution systems and antenna selection and; (2) demonstrate skill in testing procedures and maintenance techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems maintenance (7/87).

NV-1715-1148

Aviation Electronic Warfare Intelligence Operator
(Aviation Electronics Warfare Tactical Operator)

Course Number: A-233-0022.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 6 weeks (240 hours).

Exhibit Dates: 8/82-Present.

Objectives: To provide the student with background skills in generic ESM equipment required to begin operational training in the squadron.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) intercept and recognize specific signals on a generic intercept trainer and; (2) use the intercepted signals data such as NATO name, associated threat and frequency range.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/87).

NV-1715-1149

Aviation Electronic Warfare, Receivers, Analyzer, Recorder and Display Intermediate Level Maintenance

(Aviation Electronics Warfare Intermediate Level Maintenance)

Course Number: A-102-0300.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 8 weeks (320 hours).

Exhibit Dates: 1/82–Present.

Objectives: To provide intermediate level maintenance instruction on various items of equipment that comprise an electronics warfare weapons system.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) demonstrate fundamental knowledge of VHF/UHF/IFM receivers, pulse analyzer indicators and XYZ displays; (2) demonstrate fundamental knowledge of video recorder and recorder/reproducers and; (3) demonstrate appropriate testing and maintenance procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in radar systems maintenance (1/84).

NV-1715-1150

Countermeasures Set AN/ULQ-6C Maintenance

Course Number: A-102-0233.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/77–Present.

Objectives: To provide skill to perform preventive and corrective maintenance on a countermeasures set.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) describe operation and signal flow of antenna, power supplies, modulators, RF circuits, video circuits, amplifiers, pulse generators, controls, system interconnects of a radar system and; (2) use standard test equipment to maintain, align, troubleshoot and repair circuits and subsystems of a receiver/transmitter system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in receiver/transmitter system troubleshooting maintenance (1/84).

NV-1715-1151

Electronic Warfare Technician AN/SLQ-17 Maintenance

Course Number: A-102-0218.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 18 weeks (720 hours).

Exhibit Dates: 1/83–12/86.

Objectives: To enable the student to perform preventive maintenance on a countermeasures set using appropriate procedures, test equipment and tools.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) perform preventive maintenance on the AN/SLQ-17A(V)2;(2) align and adjust the AN/SLQ-17A(V)2; (3) troubleshoot to the lowest replaceable module and; (4) remove and replace defective modules.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (1/84).

NV-1715-1152

Tactical Intelligence Subsystem Maintenance

Course Number: A-102-0237.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 10 weeks (400 hours).

Exhibit Dates: 10/83–1/87.

Objectives: To train cryptologic maintenance personnel to perform maintenance on a complex computer based system.

Learning Outcomes: Upon completion of the course, the student will be able to operate, functionally analyze and perform corrective and preventive maintenance including troubleshooting to the module/card/component level on the Tacintel system. For the course after 1987, see NV-1715-1247.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in digital computer system troubleshooting and maintenance (1/84).

NV-1715-1153

Trident Electrostatically Supported Gyro Monitor ESGM/NAVAIDS Technician Conversion

Course Number: A-193-0306.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 18 weeks (700 hours).

Exhibit Dates: 9/79–8/83.

Objectives: To train experienced technicians in the operation, testing and calibration of marine vessel control systems.

Instruction: Lectures and demonstrations on marine vessel control systems including ventilation, power distribution, navigation, electronic gyro monitor sonar, radio navigation, optical equipment and computer/digital interfacing and operation. Laboratory exercises include gyro and sonar computer maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in navigation systems technology and 1 in electronics application laboratory (8/84) OR; in the upper-division baccalaureate category, 2 semester hours in gyro control systems technology for non-engineering majors (8/84).

NV-1715-1154

Trident Exterior Communication System Level II

Course Number: A-101-0157.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 20 weeks (800 hours).

Exhibit Dates: 3/84–1/85.

Objectives: To provide experienced radiomen with the knowledge and skills necessary to perform basic corrective maintenance on radio room equipment.

Instruction: Lectures and laboratory exercises on the functions of radio room equipment and its inter-relationship with other shipboard equipment. Approximately one-half the course is devoted to maintenance and troubleshooting procedures to the component level on the following equipment: teleprinter, teletypewriter, minicomputer, antennacouplers, radio buoys, power supplies, crypto equipment and HF/UHF and VLF/LF communications equipment. After 1/85, this pipeline/combination course becomes NV-1715-1354–1359.

Credit Recommendation: In the vocational certificate category, 6 semester hours in communications equipment maintenance (8/84); in the lower-division baccalaureate/associate degree category, 1 semester hour in digital systems laboratory and 1 in communication equipment troubleshooting laboratory (8/84) OR; in the upper-division baccalaureate category, 1 semester hour in digital communications system applications for non-engineering majors (8/84).

NV-1715-1155

Trident Fire Control Technician Replacement C1

Course Number: A-121-0412.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 16 weeks (628 hours).

Exhibit Dates: 2/84–Present.

Objectives: To prepare students to operate and maintain a weapons fire control system.

Instruction: Lectures and laboratory exercises on the Mk 98 fire control system including maintenance on the following subsystems: clock and timer systems, digital computer network, magnetic tape, disk systems keyboard and display, data base, optical alignment, control, temperature guidance, equipment test and readiness and launcher equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electromechanical system applications and 1 semester hour in digital troubleshooting laboratory (8/84) OR; in the lower-division baccalaureate/associate degree category, 2 semester hours in computer controlled electromechanical systems for non-engineering majors (8/84).

NV-1715-1156

AN/WLR-8(V)5 Basic Operator Class C

Course Number: A-102-0250.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 3 weeks (119 hours).

Exhibit Dates: 3/84–Present.

Objectives: To provide the student with the knowledge and proficiency to operate a radar receiver.

Instruction: Lectures and practical exercises in the operation of a radar receiving set.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (8/84).

NV-1715-1157

Electrostatically Supported Gyro Monitor (ESGM) Duplex Platform Interface Buffer

Course Number: A-193-0435; A-193-0335.

Location: FBM Training Center, Charleston, SC; Navy Submarine School, Groton, New London, CT; Trident Training Facility, Bangor, Bremerton, WA.

Length: 3 weeks (120 hours).

Exhibit Dates: 12/80–Present.

Objectives: To provide advanced training for technicians in the theory and maintenance of a multiplexer interface buffer.

Instruction: Lectures and laboratory exercises covering the functional description and operation of a computer-controlled multiplexer interface buffer. Clock circuitry, computer interfacing, registers and counters operation, multiplexer operation, RAM memory unit and signal tracing are examined. Laboratory exercises cover troubleshooting and corrective maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in multiplexer/buffer theory and digital circuits laboratory (10/89).

NV-1715-1158

Electrostatically Supported Gyro
Monitor (ESGM) Theory and
Maintenance

Course Number: A-193-0330.

Location: Trident Training Facility, Bangor, Bremerton, WA; Fleet Ballistic Missile Training Center, Charleston, SC; Navy Submarine School, Groton, New London, CT.

Length: 3 weeks (120 hours).

Exhibit Dates: 11/80–Present.

Objectives: To provide technicians training in the theory and maintenance of an analog/digital monitor.

Instruction: Lectures and laboratory exercises cover the physical and functional areas of the equipment which monitors the operating of an electrostatically supported gyro. The student learns the operating characteristics of electromagnetic accelerometers, gyro torque directors, servos, attitude read out circuits, and computer programs for operation and gyro maintenance. Maintenance and troubleshooting procedures are emphasized.

Credit Recommendation: In the vocational certificate category, 2 semester hours in servo control systems and maintenance; in the lower-division baccalaureate/associate degree category, 1 semester hour in servo control laboratory (10/89).

NV-1715-1159

Mk 118 Fire Control System (FCS)
Advanced Maintenance

Course Number: A-130-0233.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 3 weeks (101 hours).

Exhibit Dates: 11/82–Present.

Objectives: To prepare experienced electronic technicians to operate and maintain a defensive weapons system.

Instruction: Lectures and laboratory exercises in the theory, operation and troubleshooting of computer controlled digital/analog peripheral equipment. Troubleshooting exercises include fault isolation down to the board and component level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer control applications and troubleshooting (8/84).

NV-1715-1160

Mk 118 Fire Control System (FCS)
Basic Maintenance

Course Number: A-130-0232.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (75 hours).

Exhibit Dates: 10/82–Present.

Objectives: To train experienced electronics technicians in basic maintenance procedures for a defensive weapons system.

Instruction: Lectures and laboratory exercises in the theory, operation and troubleshooting of bi-directional data transfer and signal interfacing between control processor and external systems including basic operation of the external systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer/control interfacing techniques laboratory (8/84).

NV-1715-1161

Ship's Inertial Navigation System
(SINS) Mk 2 Mod 7 Technician
Conversion

Course Number: A-193-0304.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 4 weeks (160 hours).

Exhibit Dates: 10/82–Present.

Objectives: To prepare technicians to operate, maintain and troubleshoot the Trident inertial navigation system.

Instruction: Lectures and laboratory exercises in the theory, operation, maintenance and troubleshooting of power supplies/distribution, electrostatically supported gyros, and computer operation, interfacing and test modes.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in inertial navigation system maintenance (8/84).

NV-1715-1162

Ship's Interial Navigation System
(SINS) Mk 2 Mod 7 Technician
Replacement

Course Number: A-193-0307.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 22 weeks (800 hours).

Exhibit Dates: 7/83–Present.

Objectives: To prepare inexperienced electronics technicians to perform operational maintenance and testing on a computer interfaced inertial navigation system.

Instruction: Lectures and laboratory exercises in the theory, operation, maintenance and troubleshooting of an inertial navigation system including alignment, servo loops, errors, gyros, resolvers, and multispeed operations; power supplies/distribution; printer interfacing and operation; and computer operation, interfacing and test modes. The student will troubleshoot down to the board level.

Credit Recommendation: In the vocational certificate category, 4 semester hours in inertial navigation systems maintenance (8/84); in the lower-division baccalaureate/associate degree category, 2 semester hours in inertial navigation systems laboratory (8/84).

NV-1715-1163

Trident Central Navigation
Computer Technician Conversion

Course Number: A-193-0305.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 8 weeks (314 hours).

Exhibit Dates: 9/82–Present.

Objectives: To train experienced technicians in the operation, testing and maintenance of a navigation computer and its associated peripheral equipment.

Instruction: Lectures and laboratory exercises in the operation, testing and maintenance of a navigation computer system including the digital-digital converter, analog-digital converter, interfacing, flat panel display terminal and related power distribution equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in applications of digital display systems, 1 in electronic troubleshooting laboratory (8/84).

NV-1715-1164

Trident Central Navigation
Computer Technician
Replacement

Course Number: A-193-0308.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 23 weeks (1036 hours).

Exhibit Dates: 2/83–Present.

Objectives: To provide training in the operation, testing and maintenance of a navigation computer and its associated peripheral equipment.

Instruction: Lectures and laboratory exercises in the operation, testing and maintenance of the navigation computer system (CP-890B) including the digital-digital converter, analog-digital converter, interfacing, terminal equipment, X-Y plotter and related power distribution equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in the applications of digital computer control systems, 2 in the digital electronics application laboratory (8/84).

NV-1715-1165

Trident Command and Control
System (CCS) Electronics
Technician Conversion, Class C

Course Number: A-102-0249.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 8 weeks (315 hours).

Exhibit Dates: 1/83–8/84.

Objectives: To train experienced technicians to operate and maintain electronic equipment unique to Trident submarines.

Instruction: Lectures and practical exercises in the operation and maintenance of a radar transmitter/receiver, radio transponder, and periscope subsystem. Major emphasis is given to troubleshooting and repairing the radar transmitter/receiver and the antenna subsystem. After 8/84, see exhibit NV-1715-1362.

Credit Recommendation: In the vocational certificate category, 3 semester hours in the operation and maintenance of radar systems (8/84); in the lower-division baccalaureate/associate degree category, 1 semester hour in radar system maintenance laboratory (8/84).

NV-1715-1166

Trident Electrostatically Supported
Gyro Monitor (ESGM) NAVAIDS
Technician Replacement

Course Number: A-193-0309.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 16–17 weeks (640–680 hours).

Exhibit Dates: 4/82–3/83.

Objectives: To train technicians to operate, maintain and test navigational equipment.

Instruction: Lectures and laboratory exercises in the operation, maintenance and troubleshooting, using a diagnostic flow chart as an aid, of navigation equipment including familiarization with manuals, power distribution equipment, navigational control console, navigation computer I/O ports, gyro monitor frequency standards, Loran receiving set, radio navigation set, sonar sounding set and other subsystems. After 3/83, see NV-1715-1370.

Credit Recommendation: In the vocational certificate category, 6 semester hours in navigation systems maintenance (8/84).

NV-1715-1167

TRIDENT EXTERIOR COMMUNICATION SYSTEM LEVEL I

Course Number: A-101-0168.
Location: Trident Training Facility, Bangor, Bremerton, WA.
Length: 10 weeks (400 hours).
Exhibit Dates: 5/84–10/88.
Objectives: To provide submarine radiomen with the knowledge and skills necessary to operate and maintain a Trident submarine radio room.
Instruction: Lectures and laboratory exercises in the theory, basic operation and preventive maintenance of various radioroom equipment such as power distribution panels, teleprinters, teletypewriters, antenna systems, radio buoys, HF/UHF subsystems, and ULF/LF subsystems. After 10/88, see NV-1715-1361.
Credit Recommendation: In the vocational certificate category, 3 semester hours in communication systems operation (8/84).

NV-1715-1168

TRIDENT EXTERIOR COMMUNICATION SYSTEM LEVEL III

Course Number: A-101-0169.
Location: Trident Training Facility, Bangor, Bremerton, WA.
Length: 10 weeks (400 hours).
Exhibit Dates: 7/84–6/85.
Objectives: To train submarine radiomen to operate and maintain a digital communication system.
Instruction: Lectures and laboratory exercises in the operation and maintenance of a digital communication system covering the capability and functions of the central communications software program including loading procedures, inserting authorized software patches and re-boot procedures in the event of a software error. The digital message interface unit and disk drive memory system is described. Approximately one half the course is devoted to maintenance procedures and troubleshooting techniques. After 6/85, see exhibit NV-1715-1360.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in digital computer operation and maintenance (8/84).

NV-1715-1169

TRIDENT MISSILE TECHNICIAN CONVERSION

Course Number: A-121-0440.
Location: Trident Training Facility, Bangor, Bremerton, WA.
Length: 22 weeks (902 hours).
Exhibit Dates: 3/82–5/84.
Objectives: To train missile technicians to perform operational maintenance and testing functions on a Trident missile launching system.
Instruction: Lectures and laboratory exercises on the theory, operation and troubleshooting of a missile launching system including the use of computer aided diagnostics and troubleshooting flow charts to the board level; pneumatic, hydraulic and electric power conversion subsystems and digital/computer components. The ability to use basic digital/computer theory and systems knowledge to troubleshoot to the component level is also emphasized. After 5/84, see NV-1715-1378.
Credit Recommendation: In the vocational certificate category, 4 semester hours in electromechanical systems (8/84); in the lower-division baccalaureate/associate degree category, 2 semester hours in digital systems troubleshooting (8/84).

NV-1715-1170

TRIDENT MISSILE TECHNICIAN REPLACEMENT

Course Number: A-121-0441.
Location: Trident Training Facility, Bangor, Bremerton, WA.
Length: 21 weeks (659 hours).
Exhibit Dates: 12/83–Present.
Learning Outcomes: Upon conmpetion of the course, the student will be able to perform routine check-out procedres on Trident Missile laundry systems, and perform routine maintenance procedures on missile laundry system, and troubleshoot and isolate missile laundry system faults to the board or module level.
Instruction: Lectures and laboratory exercises in the operation, maintenance and repair, to the module level, of a missle launch system including its launching equipment, hydraulic systems, power supplies, radiation monitoring equipment and heating, cooling and ventilation equipment. The student is given a functional description of the equipment and trained to recognize and interpret faults using flow charts and computer aided diagnostics to isolate the fault to the board or module level.
Credit Recommendation: In the vocational certificate category, 4 semester hours in electromechanical systems technology (3/89).

NV-1715-1171

TRIDENT SHIP'S CONTROL LEVEL I/ATMOSPHERE SUPPORT

Course Number: A-623-0080.
Location: Trident Training Facility, Bangor, Bremerton, WA.
Length: 8 weeks (320 hours).
Exhibit Dates: 7/83–10/84.
Objectives: To prepare inexperienced communication electricians to qualify as operator/electrician on specific equipment.
Instruction: Lectures and laboratory exercises on the operation and functional theory of: a) temperature salinity, position, pressure, airflow, liquid flow, magnetic, differential pressure and depth sensor and indicating systems; b) ships control for hovering, steering, diving, alarms, power, and atmosphere support.
Credit Recommendation: In the vocational certificate category, 4 semester hours in electromechanical controls (8/84).

NV-1715-1172

TRIDENT SHIP CONTROL AND ATMOSPHERE SUPPORT TECHNICIAN LEVEL II
(Trident Ship's Control Level II)

Course Number: A-623-0081.
Location: Trident Trainiong Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.
Length: *Version 1:* 8 weeks (397 hours). *Version 2:* 8 weeks (320 hours).
Exhibit Dates: *Version 1:* 11/84–Present. *Version 2:* 9/83–10/84.
Objectives: To prepare communication electricians to qualify as maintenance electricians on specific equipment.
Instruction: *Version 1:* This is a pipeline course. See NV-1715-1305 (A-623-0084), NV-1715-1306 (A-623-0083), NV-1715-1307 (A-623-0085), and NV-1715-1308 (A-623-0086). *Version 2:* Lectures and laboratory exercises on the operation and maintenance of: a) temperature, salinity, position, pressure airflow, liquid flow, magnetic, differential pressure and depth sensor and indicating systems; b) ships control for hovering, steering, diving, alarms, power and atmosphere support.
Credit Recommendation: *Version 1:* See individual exhibits for credit recommendation (2/89). *Version 2:* In the vocational certificate category, 4 semester hours in electromechanical maintenance (8/84); in the lower-division baccalaureate/associate degree category, 1 semester hour in electromechanical laboratory (8/84).

NV-1715-1173

TRIDENT SHIP CONTROL AND ATMOSPHERE SUPPORT TECHNICIAN LEVEL III
(Trident Ship's Control Level III)

Course Number: A-623-0082.
Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.
Length: *Version 1:* 8 weeks (432 hours). *Version 2:* 8 weeks (320 hours).
Exhibit Dates: *Version 1:* 6/85–Present. *Version 2:* 7/84–5/85.
Objectives: To prepare experienced communication electricians to maintain and repair specific equipment.
Instruction: *Version 1:* This is a pipeline course. See NV-1715-1310 (A-623-0093), NV-1715-1311 (A-623-0114), and NV-1715-1312 (A-623-0113). *Version 2:* Lectures and laboratory exercises in the theory, maintenance and troubleshooting of electromechanical systems controlling ships ballast and trim, weight distribution/compensation, hovering, steering and diving, announcing and control systems. Troubleshooting down to the component level on sensors/transducers, signal processing, control devices, computer diagnostic operation and design is also covered.
Credit Recommendation: *Version 1:* See individual exhibits for credit recommendation (2/89). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electromechanical controls application, 2 in electromechanical controls laboratory (8/84).

NV-1715-1174

ANTISUBMARINE WARFARE (ASW) MODULE ACOUSTIC SYSTEMS

Course Number: J-102-0360.
Location: Fleet Combat Training Center, Dam Neck, Virginia Beach, VA.
Length: 14 weeks (490 hours).
Exhibit Dates: 1/83–Present.
Objectives: Provide students training in the operation and repair of submarine detection gear and associated peripheral equipment.
Learning Outcomes: Upon completion of the course, the student will be able to: (1) use test equipment and operation procedures to isolate faults and repair equipment; (2) repair equipment to the module level; (3) repair some equipment to the component level; (4) use oscilloscopes, digital voltmeters and specialized test equipment and; (5) understand and use factory technical literature and diagrams for troubleshooting purposes.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic equipment maintenance or instrumentation repair (9/84); in the upper-division baccalaureate

category, 2 semester hours in advanced digital systems for non-engineering majors (9/84).

NV-1715-1175

Antisubmarine Warfare (ASW)
Support Communications
Maintenance Technician

Course Number: J-101-0817.

Location: Fleet Combat Training Center, Dam Neck, Virigina Beach, VA.

Length: 13 weeks (520 hours).

Exhibit Dates: 1/84–Present.

Objectives: To train personnel in the operation and maintenance of an ASW communications system.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) use the following equipment: teletypewriter, voice security systems, tape recorders, modems, remote antenna control systems and a communications console; (2) operate the ASW communications system; (3) troubleshoot multi-channel tape recording system; (4) troubleshoot HF/UHF security communications systems; (5) troubleshoot communications data link systems and; (6) troubleshoot ASW support communications systems. All troubleshooting is done to the component level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in data communications, 2 in digital systems analysis and 3 in electronic equipment maintenance/instrumentation (troubleshooting) (9/84).

NV-1715-1176

Antisubmarine Warfare (ASW)
Support Communications
Operator

Course Number: J-201-0816.

Location: Fleet Combat Training Center, Dam Neck, Virginia Beach, VA.

Length: 6 weeks (210 hours).

Exhibit Dates: 6/82–Present.

Objectives: To train radio personnel to operate and coordinate various subsystems of the ASW support communications platform.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) understand the principles of high frequency and ultrahigh frequency communications procedures; (2) be familiar with data link and teletype circuits and voice communication systems and; (3) perform as an operator of the various subsystems of the antisubmarine warfare support communications platform.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in a survey of electronic communications (9/84).

NV-1715-1177

Force High Level Terminal Data
Systems Maintenance Technician

Course Number: J-221-0389.

Location: Fleet Combat Training Center, Dam Neck, Virginia Beach, VA.

Length: 19 weeks (760 hours).

Exhibit Dates: 6/84–Present.

Objectives: To provide personnel with the technical knowledge and skills necessary to maintain data entry and display equipment for a computer system.

Learning Outcomes: Upon completion of the course, the student will be able to operate, maintain, troubleshoot and repair the following AN/UYK-7 peripheral equipment: UNIVAC 2000 data terminal, three types of CRT display terminals, disk storage unit and its controller, data network controller, magnetic tape drive and controller, digital communication interface equipment, digital plotter and printers, and data entry equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in digital equipment troubleshooting and repair (8/84).

NV-1715-1178

Gun 5"/54 Mk 45 Mod 0 Operational
Maintenance

Course Number: J-041-0130.

Location: Fleet Combat Training Center, Dam Neck, Virginia Beach, VA.

Length: 3 weeks (105 hours).

Exhibit Dates: 7/77–Present.

Objectives: To provide the knowledge and skills required to perform supervised maintenance on a gun mount and its associated equipment.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) be familiar with the function and location of the component parts of the Mk 45 gun mount; (2) maintain oil levels and nitrogen pressures; (3) perform prefire and postfire checks; (4) observe all safety precautions and; (5) inspect and maintain all parts (6) demonstrate smoothness of operation during active firing.

Credit Recommendation: Credit is not recommended due to the limited, specialized nature of the course (9/84).

NV-1715-1179

76mm/62 Caliber Mk 75 Mods 0/1 Gun
Operation and Maintenance

Course Number: J-113-0040.

Location: Fleet Combat Training Center, Dam Neck, Virginia Beach, VA;

Length: Fleet Training Command, San Diego, CA. 10 weeks (350 hours).

Exhibit Dates: 10/79–Present.

Objectives: To provide the knowledge and skills required to operate, maintain and repair the 76MM/62 caliber gun mount.

Learning Outcomes: Upon completion of the course, the student will be able to operate, maintain and repair the Mk 75 Mods 0/1 gun including the following equipment: mounting systems, barrel cooling system, anti-icing system, weapons control console, hydraulic positioning systems, and electrical/servo systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electromechanical laboratory (9/84).

NV-1715-1180

Radar Set AN/SPG-53F (Modified)
Operational Maintenance

Course Number: J-113-0108.

Location: Fleet Combat Training Center, Dam Neck, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 4/82–Present.

Objectives: To train personnel to operate, perform preventive maintenance, isolate faults and repair a radar set.

Learning Outcomes: Upon completion of the course the student will be able to: (1) operate the radar set without supervision (2) be familiar with the subsystems of the radar set (3) recognize a malfunction and perform troubleshooting procedures to isolate a fault (4) use tools and test equipment to perform adjustments or to replace parts (5) perform preventive maintenance of the radar set (6) perform turn-on and check-out procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electromechanical circuits analysis and troubleshooting/maintenance (9/84).

NV-1715-1181

EC-130 Electrical and Instruments
Maintenance

Course Number: D-602-0451.

Location: Naval Air Station, Patuxent River, MD.

Length: 12 weeks (480 hours).

Exhibit Dates: 1/84–Present.

Objectives: To provide personnel with the knowledge and skills necessary to maintain and troubleshoot the aircraft's electrically operated instruments systems.

Instruction: Lectures and laboratory application in AC and DC power sources and distribution related to fuel quantity indicating systems, anticing, air conditioning and pressurization, propeller, landing gear, brakes, antiskid and flight control warning systems. Student also learns to understand, operate and maintain electrically related instruments including flight director, altitude heading, automatic pilot, inertial navigation, altimeter and pitot-static system.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electrical fundamentals, 3 in instrument familiarization (11/84); in the lower-division baccalaureate/associate degree category, 5 semester hours in electrical systems (11/84).

NV-1715-1182

TACAMO Communication and
Avionics System Operation

Course Number: D-050-0412.

Location: Naval Air Station, Patuxent River, MD.

Length: 7 weeks (280 hours).

Exhibit Dates: 1/84–Present.

Objectives: To provide skills and training necessary to operate the EC-130 TACAMO communications system.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) properly operate, under normal conditions, EC-130 TACAMO communications equipment including VLF, HF, and UHF receivers and transmitters (2) operate teletype equipment including a printer, tape reader and a Baudot-Morse converter (3) make normal adjustments to the frequency-time standard (4) operate AC power distribution systems.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (11/84).

NV-1715-1183

TACAMO Communications System
Maintenance

Course Number: D-102-0422.

Location: Naval Air Station, Patuxent River, MD.

Length: 18 weeks (720 hours).

Exhibit Dates: 8/84–Present.

Objectives: To provide knowledge and skills necessary to troubleshoot and maintain the TACAMO equipment and flight deck avionics.

Learning Outcomes: Upon completion of the course, the student will be able to perform nominal check-out procedures and troubleshoot to the system level, the following equipment: TACAMO communication systems and EC-130G/Q avionics systems including power distribution, ULF, HF, VHF and UHF communications, teletype equipment and system switching.

Credit Recommendation: In the vocational certificate category, 2 semester hours in introduction to troubleshooting of communications receiver/transmitter systems (11/84).

NV-1715-1184

TACAMO UHF/HF COMMUNICATIONS SYSTEM INTERMEDIATE MAINTENANCE

Course Number: D-102-6144.

Location: Naval Air Station, Patuxent River, MD.

Length: 19 weeks (760 hours).

Exhibit Dates: 1/84–Present.

Objectives: To provide electronic technicians with training in maintenance and repair of communications equipment, including troubleshooting, using specialized equipment.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) troubleshoot and repair to the board level, the following equipment: AN/ARC-132 HF receiver/transmitter, AN/ARC-138 UHF transceiver and AM-658 RF drives (2) describe the functional operation of, and troubleshoot to the board level, the following digital computer subsystems: CP-970/USQ (8311-13) computer; 7404A data converters, USC-11A data converter, USC-11A data modem and USC-14 teletype adapter.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in digital system troubleshooting, 2 in RF signal processing and signal tracing, 2 in introduction to digital logic systems (11/84).

NV-1715-1185

TACAMO VLF COMMUNICATIONS AND VERDIN SYSTEM INTERMEDIATE MAINTENANCE

Course Number: D-102-6145.

Location: Naval Air Station, Patuxent River, MD.

Length: 19 weeks (760 hours).

Exhibit Dates: 1/84–Present.

Objectives: To provide training in the maintenance and repair of a particular communications system.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) properly adjust and operate the two specific pieces of equipment and; (2) troubleshoot to a board level using typical electronic test equipment - both analog and digital.

Credit Recommendation: In the vocational certificate category, 2 semester hours in schematic reading and electronic systems (2/85); in the lower-division baccalaureate/associate degree category, 2 semester hours in troubleshooting of power supplies, 2 in introduction to digital computers, I/O and programming (2/85).

NV-1715-1186

15G20 SIMULATOR MAINTENANCE CLASS C1

Course Number: C-103-2041.

Location: Naval Air Technical Training Center, Millington, Memphis, TN.

Length: 3 weeks (120 hours).

Exhibit Dates: 3/81–Present.

Objectives: To provide the skills necessary to perform maintenance, preventive and corrective, on a radar approach control simulator.

Instruction: Lectures and practical exercises in the operation of a radar approach control simulator and its various input channels, including a very cursory review of microprocessor basics. A majority of the class time is devoted to testing, troubleshooting, to a faulty circuit card or chassis mounted component, and alignment of equipment.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (2/85).

NV-1715-1187

15G21 CARRIER AIR TRAFFIC CONTROL SIMULATOR MAINTENANCE CLASS C1
(15G21 Simulator Maintenance Class C1)

Course Number: C-103-2042.

Location: Naval Air Technical Training Center, Millington, Memphis, TN.

Length: 2-3 weeks (104-120 hours).

Exhibit Dates: 3/81–Present.

Objectives: To provide skills necessary to perform maintenance, both preventive and corrective, on a radar air traffic control shipboard target simulator system.

Instruction: Lectures and practical exercises in the operation of a radar traffic control shipboard target simulator system and its various input channels, including a cursory review of microprocessor basics. A majority of the class time is devoted to testing, troubleshooting, to a faulty circuit card or chassis mounted component, and alignment of equipment.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (9/89).

NV-1715-1188

AN/GPN-27 AIRPORT SURVEILLANCE RADAR MAINTENANCE CLASS C

Course Number: C-103-2036.

Location: Naval Air Technical Training Center, Millington, Memphis, TN.

Length: 8 weeks (300 hours).

Exhibit Dates: 1/84–5/87.

Objectives: To provide the skills necessary to perform system trouble analysis to the board component level and perform preventive maintenance on airport surveillance radar systems.

Instruction: Lectures and practical training in the calibration and maintenance of a computer controlled airport surveillance radar system, including transmitters and receivers, system processors and memory control. Heavy use of logic diagrams is required.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in advanced digital maintenance, 2 in advanced radar equipment maintenance (2/85).

NV-1715-1189

MARINE AIR TRAFFIC CONTROL ADVANCED TECHNICIAN, CLASS C1

Course Number: C-103-2047.

Location: Air Technical Training Center, Millington, Memphis, TN.

Length: 14 weeks (560 hours).

Exhibit Dates: 10/83–3/88.

Objectives: To provide the necessary knowledge and skills to install and maintain air traffic control equipment and to train personnel in maintenance management and supervision.

Instruction: Lectures and practical exercises in management consideration of marine air traffic control facilities, including system siting, maintenance and supply; computer basics including formats and languages; and radar equipment used in air traffic control communications, navigational aids and radar. A majority of the time is devoted to alignment augmentation and maintenance of receivers, radars, transmitters, display indicators and microcomputer and related equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in microcomputer maintenance laboratory and 1 in electronic equipment maintenance laboratory (2/85).

NV-1715-1190

AN/AAM-60(V)6 ELECTRO-OPTICAL TEST SET INTERMEDIATE

Course Number: C-102-4016.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 10 weeks (400 hours).

Exhibit Dates: 12/82–Present.

Objectives: To train technicians in the repair and maintenance of an electro-optical systems tester.

Learning Outcomes: Upon completion of the course, the student will be able to troubleshoot, repair and maintain the following aspects of an electro-optical system test set at the circuit board and component level: logic devices, including gates, multiplexers, decoders, line-drivers, phase-locked loops, CRT display electronics, servo system electronics and a H/P 2108B 16 bit microcomputer.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in digital systems applications, 2 in electronic systems laboratory, and 1 in servo control applications laboratory (4/85).

NV-1715-1191

AN/APS-116 SEARCH RADAR AND PECULIAR GROUND SUPPORT EQUIPMENT INTERMEDIATE MAINTENANCE

Course Number: C-102-3679.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 13 weeks (520 hours).

Exhibit Dates: 9/80–Present.

Objectives: To provide training in the operation and maintenance of search radar and ground support equipment.

Learning Outcomes: Upon completion of the course the student will be able to: (1) demonstrate an understanding of the theory of operation of search radar and its ground support equipment; (2) perform circuit analysis, testing and fault isolation of a radar system and its associated ground support systems including power supplies, transmitter and receiver systems, antenna systems, discrete digital circuits, linear integrated circuits, video processing circuits, oscilloscopes, frequency meters, function generators, and signal simulators.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in digital electronics systems, 2 in digital electronics laboratory, 2 in linear electronics systems, 2 in linear electronics laboratory, 3 in radar systems, 2 in radar systems laboratory (4/85).

NV-1715-1192

AN/AQS-13E Sonar Organizational Maintenance

Course Number: C-130-3401.

Location: Naval Air Station, North Island, San Diego, CA; Naval Air Station, Jacksonville, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 5/82–Present.

Objectives: To train electronics technicians to troubleshoot, repair, and maintain the AN/AQS-13E sonar set at the block diagram level.

Learning Outcomes: Upon completion of the course, the student will be able to service a military sonar system at the block diagram level, be familiar with sonar fundamentals, sonar hydrophones and projectors, reeling machines, dome control, azimuth and range indicators, and system power distribution.

Credit Recommendation: In the vocational certificate category, 1 semester hour in sonar repair and maintenance, 1 in sonar repair and maintenance laboratory (4/85).

NV-1715-1193

AN/USM-403 Hybrid Automatic Test Set (HATS) Operator

Course Number: C-198-3676.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 10/82–Present.

Objectives: To train personnel in the operation of a hybrid automatic test set and to isolate and repair faults to the board level.

Learning Outcomes: Upon completion of the course the student will be able to operate and maintain the following aspects of a hybrid automatic test set at the block level: programmable power supplies, CRT display, thermal printer, Diablo disk drive, and atlas analog.

Credit Recommendation: In the vocational certificate category, 3 semester hours in introduction to computer system repair and maintenance (4/85).

NV-1715-1194

S-3A Computer System Specialist Organizational Maintenance

Course Number: C-102-3681.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 8–9 weeks (340 hours).

Exhibit Dates: 9/84–Present.

Objectives: To train personnel in the maintenance of a general purpose digital computer system.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) describe the operation of a general purpose digital computer system in terms of the main function of the CPU, I/O and memory subsystem; (2) identify the main functional unit in each subsystem and describe how they interact with other hardware and system software and; (3) load and run system diagnostic software and interpret diagnostic results to isolate system faults.

Credit Recommendation: In the vocational certificate category, 6 semester hours in digital computer maintenance (4/85); in the lower-division baccalaureate/associate degree category, 2 semester hours in digital computer system theory, 2 in digital systems maintenance laboratory (4/85).

NV-1715-1195

SH-3 Communications/Navigation Systems Organizational Maintenance

Course Number: C-102-3403.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, North Island, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/81–Present.

Objectives: To familiarize avionics personnel in the principles of operation and repair of communications, navigation and radar systems of a helicopter.

Learning Outcomes: Upon completion of the course, the student will be able to maintain, repair and troubleshoot to the block diagram level the following systems of a rotary wing aircraft: UHF communications system, search radar system, radar altimeter system, doppler, interface and automatic navigation systems.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (4/85).

NV-1715-1196

S-3A Electronic Systems Organizational Maintenance

Course Number: C-102-3676.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 7 weeks (272 hours).

Exhibit Dates: 5/79–Present.

Objectives: To train aviation technicians to maintain an aviation electronic system.

Learning Outcomes: Upon completion of the course, the student will be able to demonstrate a working knowledge of the system operation together with the ability to troubleshoot and repair, to the block diagram level, the following components: HF/UHF communications systems, sonar, radar and infrared detection systems, instrument landing systems, electronics countermeasures and inter-aircraft interrogation systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in communications sytems, 3 in communications systems laboratory (4/85).

NV-1715-1197

SH-60B Automatic Flight Control System Organizational Maintenance

Course Number: C-602-4407.

Location: Naval Air Station, Mayport, FL; Naval Air Station, North Island, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/84–Present.

Objectives: To train aviation electricians to operate, troubleshoot, repair and maintain the electrical systems of a helicopter.

Learning Outcomes: Upon completion of the course, the student will be able to test, troubleshoot, repair and maintain the following systems of the SH-60B aircraft: the automatic flight control, stability augmentation, digital automatic flight control and stabilization.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electromechanical laboratory, 1 in digital circuit repair (4/85).

NV-1715-1198

SH-60B Light Airborne Multipurpose System (LAMPS) Mk III Weapons System Technician Organizational Maintenance

Course Number: C-646-4406.

Location: Naval Air Station, Mayport, FL; Naval Air Station, North Island, San Diego, CA.

Length: 10 weeks (384 hours).

Exhibit Dates: 7/85–Present.

Objectives: To train aviation electronics and anti-warfare technicians to analyze, troubleshoot and maintain a weapons system.

Learning Outcomes: Upon completion of the course, the student will be able to perform maintenance and troubleshooting tests to the functional unit level for the SH-60B system including data handling/data display subsystem, communication/navigation subsystem and a mission equipment subsystem to the functional unit level.

Credit Recommendation: In the vocational certificate category, 2 semester hours in spectrum analyzer servicing, 1 in spectrum analyzer applications in circuit analysis, 2 in electronic navigation operation principles and maintenance and 1 in computer aided testing techniques (4/85).

NV-1715-1199

Dynamics Alignment Test Set (DATS) Intermediate Maintenance

Course Number: C-198-3680.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 7 weeks (280 hours).

Exhibit Dates: 7/83–Present.

Objectives: To provide personnel with the skills necessary to maintain and repair a dynamic alignment test set.

Learning Outcomes: Upon completion of the course, the student will be able to analyze, troubleshoot, and repair the following radar related components: 5-15 volt power supplies, 5 IPS read/write assemblies, cassette tube transport modules, and control, memory, counter and I/O printed circuit boards.

Credit Recommendation: In the vocational certificate category, 6 semester hours in radar maintenance and repair (4/85).

NV-1715-1200

Dynamics Alignment Test Set (DATS) Operator

Course Number: C-198-3679.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 9/81–Present.

Objectives: To provide electronics and ASW technicians the necessary skills to operate and maintain a dynamic alignment test set.

Learning Outcomes: Upon completion of the course, the student will be able to perform the following tasks at the block diagram level: DATS automatic testing, software analysis, tactical display system alignment, functional testing and integrated system troubleshooting.

Credit Recommendation: In the vocational certificate category, 3 semester hours in radar maintenance and repair (4/85).

NV-1715-1201

IP-1214/AA Infrared Viewer Intermediate Maintenance

Course Number: C-102-3683.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 9/84–Present.

Objectives: To train personnel to perform component level maintenance on an infrared viewer.

Learning Outcomes: Upon completion of the course, the student will be able to demonstrate competency in the operation and maintenance to the board level, of the IP-1214/AA infrared viewer and associated test set AN/AAM-60(V)6.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electro-optic applications (4/85).

NV-1715-1202

LN-66HP Radar Intermediate Maintenance

Course Number: C-102-3388.

Location: Naval Training Center, Norfolk, VA, Naval Air Station, North Island, San Diego, CA.

Length: 2 weeks (76 hours).

Exhibit Dates: 4/75–Present.

Objectives: To train aviation electronics and ASW technicians to repair and maintain a radar set.

Learning Outcomes: Upon completion of the course, the student will be able to troubleshoot, repair and maintain the following elements of a radar set to the circuit board level: power supply, transmitter/receiver, antenna, and all related circuit boards.

Credit Recommendation: In the vocational certificate category, 2 semester hours in radar repair and maintenance (4/85).

NV-1715-1203

E-2B AN/APS-96 Radar Organizational Maintenance

Course Number: C-104-3475.

Location: Naval Air Station, Miramar, CA.

Length: 3 weeks (hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide training in the operation and maintenance, at the functional system level, of the AN/APS-96 Radar System.

Learning Outcomes: Upon completion of the course, the student will be able to (1) demonstrate an understanding of the operation of the functional units of a radar system, and (2) operate, align and maintain a radar system to the functional units level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in radar systems laboratory (5/85).

NV-1715-1204

AN/ASN-39/39A and AN/ASN-41 Navigational Computer Systems Intermediate Maintenance

Course Number: C-102-3040.

Location: Naval Air Station, Miramar, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/80–Present.

Objectives: To provide training in the alignment, troubleshooting and repair of electromechanical navigational computer systems at the module and component level.

Learning Outcomes: Upon completion of the course, the student will be able to: 1) demonstrate an understanding of th fundamentals principles of aircraft navigation, and 2) align, test, maintain and repair, at the module and component level, electromechanical navigational computing systems using synchros, servar, electronic amplifiers and various mechanical linkages.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electromechanical laboratory (5/85).

NV-1715-1205

Semi-Automatic Checkout Equipment (SACE) with INS/AFCS/ADC/UE Test Benches Intermediate Maintenance

Course Number: C-102-3084.

Location: Naval Air Station, Miramar, CA.

Length: 7 weeks (280 hours).

Exhibit Dates: 2/77–Present.

Objectives: To provide training in the operation and maintenance of electronic automatic test equipment.

Learning Outcomes: Upon completion of the course, the student will be able to (1) operate, align and calibrate semi-automatic test equipment needed for testing various avionics systems, (2) construct test programs to automate a sequence of tests to be performed, and (3) troubleshoot, repair, and maintain such equipment at the module and component levels.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in logic circuits, 2 in digital circuits laboratory, and 2 in electronic circuits laboratory (5/85).

NV-1715-1206

TS-2109/ASA-48 Semi-Automatic Checkout Equipment (SACE) Programmer Intermediate Maintenance

Course Number: C-102-3088.

Location: Naval Air Station, Miramar, CA.

Length: 10 weeks (400 hours).

Exhibit Dates: 1/74–Present.

Objectives: To provide training in maintenance, troubleshooting, and repair at semi-automatic test equipment.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) construct programs for automatic test equipment to generate specific test sequences, (2) understand functional operation and circuits of computer operated equipment interfaced to analog peripherals including scaling, decoding, comparators, ADC, and counter/timers,and (3) use self test procedures to isolate faults down to the component level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in digital circuit laboratory maintenance/troubleshooting of computerized control equipment and 3 in digital circuits (5/85).

NV-1715-1207

Inertial Platform Test Station (IPTS) Intermediate Maintenance

Course Number: C-102-3096.

Location: Naval Air Station, Miramar, CA.

Length: 67 weeks (264 hours).

Exhibit Dates: 12/82–Present.

Objectives: To train electronic technicians to perform intermediate level maintenance of the Inertial Platform Test Station.

Learning Outcomes: Upon completion of the course, the student will be able to perform the following on a computer controlled inertial platform test station: (1) demonstrate understanding of computer modes, register functions, control words, and instructions, (2) write simple machine language programs, (3) perform diagnostic tests and troubleshooting of subassemblys, and (4) understand and describe function and operation of logic, ADC, power, data entry, interrupts, and inertial measuring units circuits.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer controlled test equipment maintenance and operation, and 1 in computer controlled testing laboratory (5/85).

NV-1715-1208

AN/USM-402(V) Swept Frequency Measurement (SEFT Cart) Test Set Intermediate Maintenance

Course Number: C-102-3108.

Location: Naval Air Station, Miramar, CA.

Length: 5 weeks (185 hours).

Exhibit Dates: 10/79–Present.

Objectives: To provide fleet aviation electronic, antisubmarine and fire control technicians the basic maintenance skills needed in the alignment, calibration and repair for the SWFT Cart (Swept Frequency) Test Set.

Learning Outcomes: Upon completion of the course, the student will be able to perform the following objectives: 1) use schematic diagrams, logic drawings and maintenance instruction man- uals to identify and correct circuit problems, 2) perform preventive maintenance and calibration on power supplies, frequency analyzers, marker generators, oscilloscopes and recorders, 3) use standard tests equipment to troubleshoot circuits, 4) troubleshoot solid state and logic circuits.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours (3 in lecture, 1 in laboratory) in electronic systems (5/85).

NV-1715-1209

TS-2109/OA-3739/OA-ASA 48 Semi-Automatic Checkout Equipment (SACE) Operator Intermediate Maintenance

Course Number: C-104-3476.

Location: Naval Air Station, Miramar, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 2/85–Present.

Objectives: To provide instruction in the operation of automatic test equipment used for testing avionics systems.

Learning Outcomes: Upon completion of this course, the student will be able to demonstrate an understanding of theory and actual operating procedures for several test consoles used for the semi-automatic testing of avionics systems.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (5/85).

NV-1715-1210

ASM-144 On Board Memory Tester Digital Volt Ohmmeter Intermediate Maintenance

Course Number: C-150-3488.

Location: Naval Air Station, Miramar, CA.
Length: 6 weeks (240 hours).
Exhibit Dates: 9/79–Present.
Objectives: To provide electronic technicians with training in testing and troubleshooting of an on board memory tester.
Learning Outcomes: Upon completion of the course, the student will be able to: (1) understand purpose, characteristics, operation and maintenance of memory tester including component parts (i.e., core memory, digitizer, stimuli generator, power supplies, DVOM and interfacing/switching circuits), (2) demonstrate understanding of circuit theory/operation and testing of above components through laboratory assignments.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital test equipment laboratory and 3 in digital circuits laboratory (5/85).

NV-1715-1211

AN/ASM-33B AN/ASM-122 Portable Module Test (PMT) Intermediate Maintenance

Course Number: C-150-3489.
Location: Naval Air Station, Miramar, CA.
Length: 4 weeks (160 hours).
Exhibit Dates: 7/83–Present.
Objectives: To provide instruction on the operation and maintenance of electronic test equipment at the board/component level.
Learning Outcomes: Upon completion of the course, the student will be able to maintain and repair at the board/component level electronic test equipment circuitry including oscilloscope, power supplies, horizontal sweep circuits and vertical deflection circuits.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics laboratory (5/85).

NV-1715-1213

AN/USM-467 RADCOM Test Station Intermediate Maintenance Course

Course Number: C-198-3030.
Location: Naval Air Station, Miramar, CA.
Length: 8 weeks (320 hours).
Exhibit Dates: 9/84–Present.
Objectives: To provide the student training in the start up, self test and operation of the AN/USM-467 RADCOM Test Station.
Learning Outcomes: Upon completion of this course, the student will be able to 1) perform language programming, 2) boot strap start up, 3) use diagnostic and self certification programs, 4) perform the necessary maintenance procedures for testing of airborne equipment which are tested by the AN/USM-467, and (5) demonstrate a detailed understanding of hardware components function and operation including waveforms, signal levels.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer repair laboratory and 3 in digital computer principles (5/85).

NV-1715-1214

AN/ASN-31/36/92 Inertial Platform Maintenance Technician Intermediate Maintenance

Course Number: C-602-3017.
Location: Naval Air Station, Miramar, CA.
Length: 4 weeks (184 hours).
Exhibit Dates: 9/79–Present.
Objectives: To train electronic technicians in the operation and preventive maintenance of a computerized inertial platform test station and its use in the testing and repair of inertial platforms.
Learning Outcomes: Upon completion of the course, the student will be able to: 1) operate the testing platform in both self testing modes and testing at inertial platforms, 2) understand principles of inertial navigation, inertial platforms, accelerometors, gyroscopes, resolvers, synchros and other sensors used on inertial platforms including analog and digital circuit operation, 3) use diagnostic test programs to identify faults and perform alignments/calibrations on both the platform tester and inertial platforms, and 4) remove and replace failed components such as gyros, and resolvers.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in avionics maintenance and testing (5/85).

NV-1715-1215

E-2B Navigational Systems Organizational Maintenance

Course Number: C-602-3487.
Location: Naval Air Station, Miramar, CA.
Length: 2 weeks (80 hours).
Exhibit Dates: 8/79–Present.
Objectives: To provide the student training in the maintenance and operation, at the organizational level, of the E-2B Navigational Systems.
Learning Outcomes: Upon completion of the course, the student will be able to perform the following objectives: (1) utilize publications/ diagrams in maintaining and troubleshooting systems, (2) perform operational test noting all indications for accuracy in accordance with E-2B manual of operation.
Credit Recommendation: In the vocational certificate category, 2 semester hours in avionics laboratory (5/85).

NV-1715-1216

TS-2109/OA-3742/OA-6672 Semi-Automatic Checkoput Equipment (SACE) Intermediate Operators

Course Number: C-104-3477.
Location: Naval Air Station, Miramar, CA.
Length: 2 weeks (80 hours).
Exhibit Dates: 3/85–Present.
Objectives: To familiarize the student with the operation and maintenance of the TS-2109/OA-3742/OA-6672 Semi-Automatic test benches.
Learning Outcomes: Upon completion of the course the student will be able to perform the following objectives: (l) understand the theory and operation of the Programming Test Console, Inertial Navigation Test Console, and Universial Encoder Test Console, (2) perform under close supervision, the operation of the above mentioned test benches in the intermediate maintenance working environment.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/85).

NV-1715-1217

C-2A Avionics Systems Organizational Maintenance

Course Number: C-102-3493.
Location: Naval Air Station, Miramar, CA.
Length: 2 weeks (hours).
Exhibit Dates: 12/79–Present.
Objectives: To provide training in the operation and system level maintenance of avionics systems.
Learning Outcomes: Upon completion, the student will be able to demonstrate knowledge of component characteristics, operational checks, block diagram analysis and troubleshooting techniques for communication systems (intercom, UHF, HF), navigational systems (UHF radio, TACAN, LF/AF Direction finder, UHF/ADF, LORAN, OMEGA) and special systems (IFF, Radar altimeter, aircraft approach control, flight recorder-locator, weather radar).
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in avionics systems (5/85).

NV-1715-1218

RT-542/ASQ, RT-546/ASQ-19, AN/ARC-52 Receiver Transmitter Intermediate Maintenance

Course Number: C-102-3079.
Location: Naval Air Station, Miramar, CA; Marine Corps Air Station, El Toro, CA.
Length: 3 weeks.
Exhibit Dates: 4/77–Present.
Objectives: To provide maintenance personnel with theory of operation, shop test and system troubleshooting procedures on the transmitter/receivers.
Learning Outcomes: Upon completion of the course, the student wil be able to (1) describe the operation of the RT-542/ASQ, RT-546/ASQ-19, AN/ARC-52 Receiver/Transmitter, (2) signal trace the overall schematic of the system, and (3) align and perform intermediate maintenance on the system.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic communications systems (5/85).

NV-1715-1219

Mk 117 Fire Control System (FCS) Basic Operation

Course Number: A-4E-0059.
Location: Submarine Training Center, Pacific Pearl Harbor, HI.
Length: 2 weeks (59 hours).
Exhibit Dates: 4/81–Present.
Objectives: To give a detailed review of the operation and employment of the Mk-117 fire control system.
Instruction: Course covers operation and employment of the Mk 81 weapon control consoles information supplied for the Mk 92 attack control systems, system theory and software interface.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer systems interfacing (11/85).

NV-1715-1220

An/BRT-2 Subsystem Refresher

Course Number: A-101-0141.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 2 weeks (70 hours)
Exhibit Dates: 5/85–10/88.
Objectives: Upon completion of this course experienced submarine radio operators will be requalified in the theory, basic operation, and corrective maintenance of several communications subsystems.
Instruction: Lectures and laboratory exercises in the theory or operation, and corrective and preventive maintenance at the block diagram level of specialized antennas, receivers, and transmitters.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (11/85).

NV-1715-1221

Periscope Type 18 Combined Maintenance

Course Number: A-102-0157.
Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine School, Groton, CT.
Length: 3 weeks (117 hours).
Exhibit Dates: 1/76–Present.
Objectives: To provide training in functional checkout, operation and maintenance and repair of the type 18 periscope system.
Instruction: Lecture and laboratory instruction in the theory of operation, functional analysis and description, logic flow and maintenance concepts of type 18 periscope system.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (11/85).

NV-1715-1222

Mk 9 MOD-4 Dead Reckoning Analyzer Indicator (DRAI) Combined Maintenance.

Course Number: A-623-0108.
Location: Submarine Training Center, Pacific Pearl Harbor, HI.
Length: 2 weeks (65 hours).
Exhibit Dates: 7/84–Present.
Objectives: To provide training in functional check out, operation, maintenance and repair of the Mk 9 MOD 4 dead reckoning analyzer indicator.
Instruction: Lecture and laboratory instruction on synchros, resoivers, control transformers and servo loops found in the MK-9 MOD 4 dead reckoning analyzer indicator.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester credit hour in electro/mechanical technology lab (11/85).

NV-1715-1223

Mk 19/27 Gyro Operator

Course Number: A-670-0050.
Location: Submarine School, Groton, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 2 weeks (78 hours).
Exhibit Dates: 4/84–Present.
Objectives: To provide training in the functional checkout and operation of the Mk 19/27 Gyro Operator. Students will be instructed in the proper methods of troubleshooting utilizing necessary test equipment.
Instruction: Lecture and laboratory instructions, flow diagrams and test equipment stressed throughout.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electrical/electronic lab (11/85).

NV-1715-1224

Mk 27 Mod 1 Mk 19 Gyrocompass Systems Advanced Theory and Maintenance.

Course Number: A-670-0051.
Location: Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 4 weeks (140 hours).
Exhibit Dates: 4/83–8/89.
Objectives: To provide advanced training in the functional check out and operation of the Mk 19/27 Gyrocompass system.
Instruction: For this course after 8/89 see NV-1715-1450. Lecture and laboratory exercises in the theory of operation, preventive and corrective maintenance at the component level of two gyrocompass systems. This training is provided under class room conditions with skill training on operational and simulated systems.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electromechanical engineering technology/laboratory (11/85).

NV-1715-1225

Mk 63 Torpedo Tube Basic Maintenance

Course Number: L-123-0014.
Location: Submarine Training Facility, San Diego, CA.
Length: 2 weeks (70 hours).
Exhibit Dates: 11/84–Present.
Objectives: Upon completion of this course the student will be versed in the operational characteristics and maintenance requirements for the Mk 63 torpedo tube.
Instruction: Lectures on the theory of operation and routine maintenance of the Mk 63/65 torpedo tube. Included topics are air, hydraulic, and ejection systems, safety precautions, troubleshooting, firing procedures and record keeping. No actual hands-on training is provided due to lack of a trainer.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (11/85).

NV-1715-1226

AN/UYK-7 Computer - Diagnostic Maintenance

Course Number: L-150-0002.
Location: Submarine Training Facility, Pacific, Pearl Harbor, HI.
Length: 4–5 weeks (175 hours).
Exhibit Dates: 10/81–Present.
Objectives: To train personnel to repair, troubleshoot, and maintain the AN/UYK-7 computer utilizing diagnostic test and procedure guides.
Instruction: The course provides an introduction to AN/UYK-7 computer, functional characteristics of the central processor unit, and functional characteristics of input/output peripherals.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer operation theory, 1 in computer operation laboratory (11/85).

NV-1715-1227

FFG-7 Electrical Maintenance

Course Number: A-652-0248.
Location: Naval Training Center, Great Lakes, IL.
Length: 18 weeks (720 hours).
Exhibit Dates: 12/83–6/86.
Objectives: To enable the student to acquire the knowledge and skills required to maintain propulsion control and monitoring equipment.
Instruction: Indepth review of digital circuits including numbering systems and codes, IC characteristics, flip flops, registers, AD and DA converters, OP-amps, and signal conditioners, operation, maintenance, and repair of control circuits which include resistance temperature detectors, therocouplers, pressure, and thermostat transducers. Course covers the operation of a micro computer processor which includes registers, instruction set, addressing nodes, interfacing techniques, and use of micro program diagnostic routines.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in lecture, 1 in laboratory in process control systems, and 3 in digital logic (1/86).

NV-1715-1228

Gun Fire Control System (GFCS) Mk 86 Mods 8,9,10 Radar

Course Number: A-113-0098.
Location: Naval Training Center, Great Lakes, IL.
Length: 17 weeks (680 hours).
Exhibit Dates: 10/84–Present.
Objectives: To provide selected trainees who have completed Fire Control A school with the skills and knowledge to perform intermediate level maintenance on GFCS Mk 86 Radar.
Instruction: The trainee will be able to use tools and test equipment required for alignment and maintenance of Mk 86 radar; perform operational and diagnostic testing; disassemble, repair, and reassemble; perform alignment adjustment and calibration procedures; describe the operation and mechanization of the antenna azimuth drive function.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in radar system maintenance (1/86).

NV-1715-1229

CV Air Operations Closed Circuit Television (ILARTS) Maintenance

Course Number: A-191-0011.
Location: Naval Training Center, Great Lakes, IL.
Length: 21 weeks (630 hours).
Exhibit Dates: 10/85–Present.
Objectives: Provide interior communications electricians with the knowledge and skills to perform maintenance in low light level television systems.
Instruction: Lecture and practical exercises in the maintenance of shipboard television equipment. Upon successful completion of this course, the student will be able to identify electronic circuit symbols, measure current voltage and resistance, use function generator, DVM, and oscilloscope to isolate a circuit board malfunction down to the component level, analyze resistive/reactive and tuned circuits, and troubleshoot low light level B/W video cameras, video monitors, video cassette recorders and reel-to-reel recorders.
Credit Recommendation: In the vocational certificate category, 4 semester hours in TV/VCR servicing (1/86).

NV-1715-1230

Ships Information, Training and Entertainment (SITE II) Closed Circuit Television Maintenance

Course Number: A-191-0010.

Location: Naval Training Center, Great Lakes, IL.

Length: 25 weeks (752 hours).

Exhibit Dates: 10/85–Present.

Objectives: To provide interior communication electronics with the knowledge and skills necessary to perform maintenance on training and entertainment systems.

Instruction: Lecture (420 hours) and practical exercises (312 hours) in the maintenance of shipboard A/V equipment. Upon successful completion of this course, the student will be able to identify electronic circuit systems, measure current, voltage, and resistance; use the function generators, DVM and oscilloscope to isolate a circuit board malfunction down to the component level; analyze resistive and reactive circuits; troubleshoot color video cameras, video cassette recorders, and reel-to-reel audio recorders.

Credit Recommendation: In the vocational certificate category, 6 semester hours in television/VCR servicing (1/86).

NV-1715-1231

FFG-7 Replacement Crew Training (FFG-7 Class Ship Replacement Crew Training)

Course Number: J-113-0162.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 4/84–Present.

Objectives: To train enlisted personnel to understand the interface between the system and its components, and to operate display and weapons control consoles of a FFG-7 class guided missile frigate.

Instruction: Lectures and laboratory exercises on the limitations, capabilities, and operation of a Naval Tactical Data System (NTDS) which includes such subsystems as a weapons control console, search radars, sonar, and weapon systems.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-1715-1232

FFG-7 Class Combat System Officer (FFG-7 Weapons System Officer)

Course Number: J-2E-0155.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 11/84–Present.

Objectives: To train officers in the characteristics, operation, and deployment of a Naval tactical data system (NTDS) multiple weapon combat system for the FFG-7 class guided guided missile frigate.

Instruction: Classroom lectures and laboratory exercises on the limitations, capabilities, and operation of subsystems comprising the weapon system, which utilizes radar, sonar, and magnetic inputs, radio communications, and computer control. Laboratory exercises in operation of all system components in engagement and deployment modes are included.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-1715-1233

Antisubmarine Warfare (ASW) Operations Center (ASWOC) System Operator

Course Number: J-210-0363.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA.

Length: 7 weeks (280 hours).

Exhibit Dates: 1/86–Present.

Objectives: To train experienced personnel to operate tactical data processing equipment used in antisubmarine warfare.

Instruction: Training in various operating modes of data communications video console including data entry, recall, modify, print, plot, and transfer. Power up/down procedures and operation of a XEBEC disk operating system, Nova 2000 computer, Hazeltine 2000 plotter, and magnetic tape transport are all included. Proper use of software, drafting standard Naval messages in correct format and analyzing acoustical data are also covered in this course.

Credit Recommendation: In the vocational certificate category, 3 semester hours in computer operator/data processor (6/86).

NV-1715-1234

Antisubmarine Warfare (ASW) Module Operator

Course Number: J-210-0368.

Location: Fleet Combat Training Center, Dam Neck, VA.

Length: 7–8 weeks (280 hours).

Exhibit Dates: 9/85–Present.

Objectives: To train experienced personnel to operate tactical data processing equipment used in antisubmarine warfare.

Instruction: Operator training on an antisubmarine warfare system including such subsystems as video console, tape transport teletype terminal, XEBEC disk operating system, magnetic tape transport, and control panels. Also included are message format procedures, radio telephone operation, procedures, software management using utility programs, display aids and interface characteristics.

Credit Recommendation: In the vocational certificate category, 3 semester hours in computer operations (6/86).

NV-1715-1235

Naval Tactical Data System Input

Course Number: J-221-0094.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 10/81–Present.

Objectives: To train selected naval enlisted personnel in skills related to tactical data collection, system execution procedures, and interpretation of information unique to the mode of operation.

Instruction: Instruction includes lecture and practical applications in a laboratory mock-up environment. Console operations, systems monitoring, tracking, and the duties of the various systems operators are the major areas of concentration.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-1715-1236

CV Naval Tactical Data System Input Basic

Course Number: K-221-0092.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA; Fleet Combat Training Center, Pacific, San Diego, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 7/84–Present.

Objectives: To provide junior and middle grade enlisted personnel with training in the operating procedures, capabilities and limitations of the CV/CVN class ship naval tactical data system.

Instruction: Classroom lectures and laboratory exercises that provide the student with a basic knowledge of duties, purposes of various controls and subsystems, modes of operation and practical applications with a system mockup of target tracking equipment.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-1715-1237

Electronic Warfare Watch Supervisor-Surface

Course Number: J-233-0211.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA; Fleet Combat Training Center, Pacific, San Diego, CA; Fleet Training Center, Mayport, FL; Fleet and Mine Warfare Training Center, Charleston, SC; Fleet Training Group, Pearl Harbor, HI; Fleet Training Group, Western Pacific, Yokosuka, Japan.

Length: 3–4 weeks (140 hours).

Exhibit Dates: 1/85–Present.

Objectives: To train senior enlisted personnel in the concepts and operational applications of electronic warfare.

Instruction: Lectures on a broad range of electronic warfare topics which includes a subject overview, assisting the electronic warfare officer, a working knowledge of soviet naval command, communications and weapons, allied naval forces weapon capabilities, U.S. naval forces and weapon capabilities, electronic warfare organization and planning. Laboratory exercises assisting the electronic warfare in a simulated tactical warfare game.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-1715-1238

Antisubmarine Warfare (ASW) Operations Center Data Processing Technician

Course Number: J-531-0365.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA.

Length: 10 weeks (400 hours).

Exhibit Dates: 11/84–Present.

Objectives: To train data processing technicians in the operation of the tactical data processing system utilized by the antisubmarine warfare operations center.

Instruction: Instruction includes formal classroom work and laboratory practice utilizing current publications and equipment. The following topics related to antisubmarine warfare operations are covered: operation of the UNIVAC 1830A(CP901) computer system (CPU, disk, tape, printer, monitor), software, data bases, mission support operations, and basic system performance checks.

Credit Recommendation: In the vocational certificate category, 2 semester hours in computer systems operation (6/86).

NV-1715-1239

Weapon Direction System (WDS) MK-14 Terrier Console Operator

Course Number: J-113-0134.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA.
Length: 2-3 weeks (133 hours).
Exhibit Dates: 3/85-Present.
Objectives: To train officers, warrant officer and selected naval enlisted personnel in the efficient operation of the MK-14 weapon direction system (WDS).
Instruction: Lecture and practical exercises in common console operations to control a terrier weapon system and the weapons/missile engagement controller under simulated warfare conditions in which equipment capability is reduced.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-1715-1240

Optical Landing System Maintenance

Course Number: C-670-2010.
Location: Naval Air Technical Training Center, Lakehurst, NJ.
Length: 8 weeks (312 hours).
Exhibit Dates: 1/87-Present.
Learning Outcomes: Upon completion of the course, the student will be able to operate, maintain, and repair the Fresnel Lens Optical Landing Mk 6 Mod 1 and the manually operated visual landing systems Mk 1 Mod 1, 2, and 3 or Mk II with minimum supervision above introductory level.
Instruction: Lectures and practical exercises in the troubleshooting and maintenance of the Fresnel Lens Optical Landing System Mk 6 Mod 1 and the manually operated visual landing aid system Mk I Mod 1, 2, and 3, or Mk II, including electrical and solid-state devices, component identification, test equipment, indicator assembly stabilization, stabilization control equipment, reference lighting circuits, and lighting assembly.
Credit Recommendation: In the vocational certificate category, 2 semester hours in electricity or electronics theory (6/87); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity/electronic circuit theory and 3 in troubleshooting procedures (6/87).

NV-1715-1241

OUTBOARD Maintenance Direction Finding (DF) Technician

Course Number: A-102-0327.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: 18 weeks (720 hours).
Exhibit Dates: 3/86-Present.
Learning Outcomes: Upon completion of the course, the student will be able to maintain, troubleshoot and service to the modular level OK-324/SYQ computer with video display and teleprinter, AN/SLR-23 receiver, and AN/SRD-19A receiver.
Instruction: Illustrated lectures, laboratory exercises and troubleshooting problems are used to teach preventative maintenance, troubleshooting and corrective maintenance to the modular level of the OUTBOARD II receiver system.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in system troubleshooting and 2 in system operation (7/87).

NV-1715-1242

Communications Technical Controller

Course Number: A-260-0044.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: 12 weeks (480 hours).
Exhibit Dates: 4/86-Present.
Learning Outcomes: Upon completion of the course, the student will be able to operate a communications technical control facility which includes organization, administration, reporting, quality control administration, testing and troubleshooting.
Instruction: Lecture with A/V aids, skilled exercises and supervised laboratory exercises are used to teach the student the operating procedures of a communication technical control facility.
Credit Recommendation: In the vocational certificate category, 2 semester hours in office procedures, and 2 in communications theory (7/87).

NV-1715-1243

Basic Non-Morse Operator

Course Number: A-231-0045.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: 22 weeks (880 hours).
Exhibit Dates: 6/86-Present.
Learning Outcomes: Upon completion of the course, the student will be able to transcribe international Morse Code at a rate of 16 groups/minute using a keyboard device and pencil. He will also be familiar with basic concepts and terminology used in electronic communication and be able to apply these to radio printers, graphical analysis, target analysis and identification.
Instruction: Includes laboratory instruction in Morse Code and classroom instruction covering basic concepts, definitions, terminology, and simple calculations used in electronic communications. Subjects presented include band width, frequency allocation, types of modulation, multiplexing, and antennae. For earlier versions of this course, see NV-1715-0837.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic communication principles, and 1 in Morse Code (7/87).

NV-1715-1244

Telecommunications Operations Specialist

Course Number: A-260-0043.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: 6 weeks (233 hours).
Exhibit Dates: 2/86-Present.
Learning Outcomes: Upon completion of the course, the student will be able to apply the concepts and principles of effective writing to improved writing style and office administration practices.
Instruction: Group-paced lecture, practical exercises, seminar and skill exercise. Topics covered in this course include budget management, manning requirements, security management, emergency planning, enlisted evaluations and training.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing and 3 in office management (7/87).

NV-1715-1245

Narrowband System Operator (NBS OPS) Class C School

Course Number: A-231-0056.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: 7 weeks (200 hours).
Exhibit Dates: 10/83-Present.
Learning Outcomes: Upon completion of the course, the student will be able to operate a computer controlled narrowband HFDF system utilizing a PDP 11/34, several microcomputers, and associated receiving, display and control equipment.
Instruction: Classroom instruction and laboratory assignments utilizing the system. Subjects include subsystem function/operation, specific computer coding, syntax, loading, error messages, etc., and operation of the system in normal and emergency modes.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, and 2 in system operation (7/87).

NV-1715-1246

OUTBOARD Maintenance Acquisition Technician

Course Number: A-102-0326.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: 18 weeks (720 hours).
Exhibit Dates: 3/86-Present.
Learning Outcomes: Upon completion of the course, the student will be able to maintain, troubleshoot and service to modular level AN/SYQ-8 signal processing system and AN/SLR-16A computerized receiver.
Instruction: Illustrated lectures, laboratory exercises and troubleshooting problems are used to teach preventative maintenance, troubleshooting and corrective maintenance to the modular level of the OUTBOARD II receiver system.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in system troubleshooting and 2 in system operation (7/87).

NV-1715-1247

Tactical Intelligence (TACINTEL) System Maintenance

Course Number: A-102-0237.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: 12 weeks (473 hours).
Exhibit Dates: 2/87-Present.
Learning Outcomes: Upon completion of the course, the student will be able to perform preventative and corrective maintenance on computer-controlled tape recording and reproducing equipment (RD-397/U Recorder-Reproducer) and troubleshoot the system to the modular level.
Instruction: Group-paced lectures, demonstrations and lab exercises supported by audio/visual presentations are used to prepare the student to perform corrective and preventative maintenance on a tape recorder/reproducer and troubleshoot the system to the modular level.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in magnetic recording devices maintenance (7/87).

NV-1715-1248

Intermediate Non-Morse Analyst

Course Number: A-232-0060.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: 12 weeks (480 hours).
Exhibit Dates: 4/86-Present.
Learning Outcomes: Upon completion of the course, the student will be able to use various display and measuring devices including oscilloscopes, spectrum analyzers, other visual display instruments, frequency counters, multiplexers, receiver and magnetic recording devices. A fundamental knowl-

edge of AC and communications is also a required part of the outcomes.

Instruction: Group-paced course with a presentation format using lecture, slides, video cassettes and lab exercises to instruct the student in the use of oscilloscopes and other display devices used in the reception, processing and analysis of non-Morse Code signals.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in theory of electronic communications (7/87).

NV-1715-1249

AN/UYK-20 Maintenance

Course Number: A-102-0307.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 12/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform diagnostic tests on AN/UYK-20 data processing set, isolate a malfunction to a faulty PC board without technical assistance and use system block diagrams to trace flow.

Instruction: Group-paced lectures, practical demonstrations and laboratory work. Includes the discussion of number system, micro program analysis, I/O concepts (serial-parallel), use of diagnostics and power distribution.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics maintenance laboratory (7/87).

NV-1715-1250

Electronic Warfare Technician WLR-1H Maintenance

Course Number: A-102-0217.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 10 weeks (355 hours).

Exhibit Dates: 10/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate, calibrate, analyze failures, troubleshoot and repair electronic warfare equipment (WLR-1H) using functional diagrams, schematics, built-in test equipment and standard test equipment such as VOMS, oscilloscopes, etc.

Instruction: Classroom instruction and supervised laboratory, activities, covering the functional description and operation of controls, displays and indicators, functional description of system, subsystems, and interfaces, including antennae, built-in test equipment, video displays, amplifiers, power supplies, etc., and preventive and corrective maintenance with fault identification through situational questions and laboratory exercises.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic system operation and maintenance (7/87).

NV-1715-1251

Fleet Electronic Support Maintenance, Class C1

Course Number: A-102-0285.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 6 weeks (177 hours).

Exhibit Dates: 10/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform maintenance to the board level on an electronic system (AN/SSQ-80V), trace signal flow using functional block diagrams, identify circuit card functions, set up and operate system, and explain operation of systems and components.

Instruction: Computer assisted instruction and laboratory exercises. System includes MF/LF and VHF/LUHF receivers, memory handoff unit, audio control unit, signal display unit, and associated controls. Troubleshooting is a combination of hypothetical, where symptoms settings and readouts are described, and actual troubleshooting, where the instructor implements problems such as erroneous switch settings (on cards as well as front panels), wrongly connected cables, and missing cards. Operation of individual cards and other system components are studied including purpose/function and signal tracing.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic system maintenance (7/87).

NV-1715-1252

Electronic Technology, Class A1

Course Number: A-102-0214.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 19 weeks (1024 hours).

Exhibit Dates: 1/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to maintain specialized electronic equipment.

Instruction: Classroom instruction and laboratory exercises concerning basic soldering and connector repair, DC and AC circuits, linear power supplies, transistor amplifiers, super heterodyne receivers, timing and display circuits, RF transmission and antenna control systems, and digital logic and computer fundamentals.

Credit Recommendation: In the vocational certificate category, 3 semester hours in solid state electronics, 3 in digital electronics (7/87); in the lower-division baccalaureate/associate degree category, 1 semester hour in soldering and connector repair, 3 in DC circuits, 3 in AC circuits, 3 in electronic communication fundamentals, and 3 introduction to microcomputers (7/87).

NV-1715-1253

Electronic Technology, Class A1

Course Number: A-102-0224.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 19 weeks (1152 hours).

Exhibit Dates: 1/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to maintain specialized electronic equipment.

Instruction: Classroom instruction and laboratory exercises concerning basic soldering and connector repair, DC and AC circuits, linear power supplies, transistor amplifiers, super heterodyne receivers, timing and display circuits, RF transmission and antenna control systems, and digital logic and computer fundamentals.

Credit Recommendation: In the vocational certificate category, 3 semester hours in solid state electronics, 3 in digital electronics (7/87); in the lower-division baccalaureate/associate degree category, 1 semester hour in soldering and connector repair, 3 in DC circuits, 3 in AC circuits, 3 in electronic communication fundamentals, and 3 in introduction to microcomputers (7/87).

NV-1715-1254

Electronic Technology, Class A1

Course Number: A-102-0234.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 19 weeks (1096 hours).

Exhibit Dates: 1/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to maintain specialized electronic equipment.

Instruction: Classroom instruction and laboratory exercises concerning basic soldering and connector repair, DC and AC circuits, linear power supplies, transistor amplifiers, super heterodyne receiver, timing and display circuits, RF transmission and antenna control systems, and digital logic and computer fundamentals.

Credit Recommendation: In the vocational certificate category, 3 semester hours in solid state electronics, 3 in digital electronics (7/87); in the lower-division baccalaureate/associate degree category, 1 semester hour in soldering and connector repair, 3 in DC circuits, 3 in AC circuits, 3 in electronic communication fundamentals and 3 in introduction to microcomputers (7/87).

NV-1715-1255

AN/ULQ-6B Maintenance

Course Number: A-102-0232.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: 9/85–Present.

Learning Outcomes: Upon completion of the course, the student, given the appropriate test equipment, schematic diagrams and technical documentation, will be able to operate, perform alignments, identify and correct malfunctions in the AN/ULQ-6B countermeasures set and the AN/SLA antenna group.

Instruction: Group-paced lecture exercises and lab performance using chalk board, overhead and slide projectors. Lecture material cover HV power supplies, RF circuits, video circuits, testing and alignment and AN/ULQ-6B troubleshooting.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronic troubleshooting laboratory (7/87).

NV-1715-1256

High Frequency Direction Finding (HFDF) Maintenance

Course Number: A-102-0305.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 20 weeks (800 hours).

Exhibit Dates: 10/84–Present.

Learning Outcomes: Upon completion of the course, the student, with access to reference material, tools and test equipment, will be able to power up, tune up and troubleshoot the narrowband system.

Instruction: Group-paced lecture, practical exercises and laboratory performance using chalk board and standard AV equipment covering the power and timing distribution, boot-verification and reload procedures and power up/down procedures.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics maintenance laboratory (7/87).

NV-1715-1257

Master Cryptologic Systems Technician

Course Number: A-230-0019.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: 2/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform effectively at the mid-management level as a supervisor of technical operations.

Instruction: Group instruction and laboratory assignments concerning office management, report preparations, safety, budgets, supply, manning, change proposals, security, etc., as required for/at cryptologic facilities.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/87).

NV-1715-1258

Senior Non-Morse Analysis

Course Number: A-232-0058.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 24 weeks (960 hours).

Exhibit Dates: 3/87-Present.

Learning Outcomes: Upon completion of the course, the student will be able to use spectrum analyzers, receivers, demodulators, narrow and wide band recording equipment in the collection of non-morse signal search and analysis.

Instruction: Group-paced lecture, practical exercises and laboratory performance using chalk board or VAP lecture and AV equipment. Includes the study of basic algebra, trigonometry, number systems, Boolean algebra, AC/DC theory, inductive and capacitive reactance, antenna systems, AM and FM modulation and waveform analysis.

Credit Recommendation: In the vocational certificate category, 3 semester hours in technical mathematics, 4 in electronic laboratory (7/87); in the lower-division baccalaureate/associate degree category, 3 semester hours in communications theory (7/87).

NV-1715-1259

AN/UYA-4 Display Maintenance
Includes Beacon Video Processor

Course Number: A-150-0139.

Location: Combat Systems Technical School, Mare Island, CA.

Length: 23 weeks (920 hours).

Exhibit Dates: 2/80–Present.

Learning Outcomes: Upon completion of the course, the student will be able to isolate malfunctions and perform preventive and corrective maintenance on display subsystems equipment and componenets including power supplies and video processors at the lowest component replacement level; apply the theory of logic gates, amplifiers, waveform generators and counters to troubleshooting and diagnosis of malfunctions.

Instruction: Classroom lectures and discussions on the display system components, block diagrams and circuits; practical exercises using electronic diagnostic instruments for finding and replacing defective parts and for checking the proper operation of the system. The course is a combination of several discrete courses involving various display systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in electronic systems troubleshooting (7/87).

NV-1715-1260

CGN/SM-2 Medium Range Missile
System Technician

Course Number: A-121-0508.

Location: Combat Systems Technical School, Mare island, CA.

Length: 11 weeks (440 hours).

Exhibit Dates: 9/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to prepare a shipboard missile system for operation; operate the system; test the system for faults; maintain the system including system troubleshooting and repair.

Instruction: Includes classroom lectures and practical exercises on the missile system. Topics covered include data entry of combat information, operation of test control station, signal flow tracing, fault isolation procedures, and software diagnostic aids.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems troubleshooting (7/87).

NV-1715-1261

AN/UYK-7 DD 963
Computer/Peripheral Technician

Course Number: A-150-0109.

Location: Combat Systems Technical School, Mare Island, CA.

Length: 25 weeks (1000 hours).

Exhibit Dates: 8/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate an AN/UYK-7 computer; write machine language programs for the computer; use software diagnostic aids; troubleshoot and repair computer; troubleshoot and repair specific digital data converters, I/O control consoles, magnetic tape units, digital to analog converters, and data display equipment.

Instruction: Lectures and practical exercises on the theory and troubleshooting of a general purpose computer and its peripherals. An in-depth understanding of the computer operation, instruction repertoire, signal flow, and subsystem logic is presented. The course emphasizes fault isolation to the circuit board or component level using diagnostic programs and basic test equipment. Course also includes topics pertaining to digital data converters, I/O control consoles, magnetic tape units, digital to analog converters, and data display equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer organization and architecture, 3 in computer troubleshooting and 2 in computer peripherals troubleshooting (7/87).

NV-1715-1262

AN/UYK-7 Digital Computer
Maintenance

Course Number: A-150-0095.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 8 weeks (320 hours).

Exhibit Dates: 1/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate the AN/UYK-7 computer; write machine language programs on the computer; discuss interrupt concepts; troubleshoot and repair all parts of computer; use software diagnostic tape to locate faults.

Instruction: Lectures and practical exercises in the theory of operation and the maintenance of a general purpose UNIVAC computer. An in-depth understanding of the computer operation, instruction repertoire, signal flow, and sub-system logic is presented. The course emphasizes fault isolation to the circuit board or component level using diagnostic programs and basic test equipment. Topics include function of front panel controls, word format, internal timing and control signals, interrupt processing, theory of instruction execution and register status, input and output timing sequence and interface characteristics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer troubleshooting and 1 in computer organization and architecture (7/87).

NV-1715-1263

Data Systems Technician Class A

Course Number: A-150-0025.

Location: Combat Systems Technical School, Mare Island, CA.

Length: 32 weeks (1280 hours).

Exhibit Dates: 10/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to analyse basic series/parallel circuits both AC and DC; analyse RC and RL circuits including time constants; understand resonance and oscillator circuits; identify logic gates and related circuitry; understand memory theory and computer block diagrams; perform basic programming functions; identify logic functions such as AND, OR, NAND etc.; understand I/O concepts, basic block diagrams chaining and I/O instruction execution; perform basic troubleshooting diagnostics; understand transistor and diode theory and function, oscillator circuits, silicon control rectifiers, unijuction and field effect transistors, and operational amplifiers.

Instruction: Includes lectures and laboratory exercises in basic AC/DC theory; solid state circuitry: rectifiers, amplifiers, and oscillators; number systems; logic circuits; memory theory; and computer programming. This comprehensive course also includes extensive training in the use of laboratory test instruments, troubleshooting to the component level, and soldering techniques.

Credit Recommendation: In the vocational certificate category, 3 semester hours in soldering techniques; in the lower-division baccalaureate/associate degree category, 4 semester hours in AC/DC theory, 4 in digital electronics, 2 in electronics laboratory techniques; 3 in solid state circuits, and 2 in electronic systems troubleshooting (7/87).

NV-1715-1264

Tartar Weapons Direction System Mk
13 Mod 4

Course Number: A-121-0493.

Location: Combat Systems Technical School, Mare Island, CA.

Length: 7 weeks (280 hours).

Exhibit Dates: 12/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform preventive or corrective maintenance on the Mk 13 Tartar Weapons Direction System; operate the system or an individual piece of equipment in the system; conduct daily system operability tests and identify the computer complex in the system; and use electronic equipment such as frequency counters, differential voltmeter, multimeter, and oscilloscope for troubleshooting.

Instruction: Lectures (50%) and laboratory exercises (50%) covering a description of the equipment, methods of operation, and troubleshooting using electronic test equipment; preventive maintenance exercises using maintenance requirement cards and technical manuals; laboratory exercises on detecting, isolating, and correcting simulated system malfunctions.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic instruments or measurements laboratory and 2 in electronic systems troubleshooting (7/87).

NV-1715-1265

SHIPBOARD NON-TACTICAL AUTOMATED DATA PROCESSING (SNAP)

Course Number: A-150-0250.

Location: Combat Systems Technical School, Mare Island, CA.

Length: 15 weeks (600 hours).

Exhibit Dates: 10/82–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate and prepare for operation the mainframe computer and peripheral equipment comprising the SNAP system including printers, terminals, and disk and tape drive subsystems; troubleshoot, detect, and isolate faults of items at the field (shipboard) replacable item parts list level, replace and make appropriate adjustments within specified time periods; rapidly identify critical part numbers; restore the system to operational status; and use specialized electronic test equipment such as digital volt meters and dual trace oscilloscopes as well as small hand tools.

Instruction: Classroom instruction (55%) and laboratory exercise (45%) on identifying the elements in the SNAP system; running system electrical checks, running special diagnostic tests on subsystems, and making adjustments or corrections to simulated malfunctions at the parts level. Students perform test and maintenance tasks in the laboratory within time limits and produce error-free results. Students also interpret error messages resulting from the malfunctions in order to restore the equipment to error-free operation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic measurement and instrumentation laboratory and 3 in computer peripheral troubleshooting and maintenance (7/87).

NV-1715-1266

WDS MK 14 COMMUNICATIONS TRACKING SET SYR-1 MAINTENANCE TARTAR

Course Number: A-150-0254.

Location: Combat Systems Technical School, Mare Island, CA.

Length: 21 weeks (840 hours).

Exhibit Dates: 9/85–Present.

Learning Outcomes: Upon completion of the course, student will be able to write machine language programs for the system computer; use software diagnostics on computer; understand I/O techniques; discuss computer interrupts; troubleshoot and repair computers; troubleshoot and repair antenna systems; and troubleshoot and repair UHF and RF detectors.

Instruction: Lectures and practical exercises in maintenance and repair of a missile tracking system. Theory and repair techniques of the system components including antenna, UHF and RF detectors, and computer.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer organization and architecture, 3 in computer system troubleshooting, and 2 in electronic systems troubleshooting (7/87).

NV-1715-1267

NAVAL TACTICAL DATA SYSTEMS (NTDS) DATA LINK TERMINAL MAINTENANCE CLASS C

Course Number: A-150-0017.

Location: Combat Systems Technical School, Mare Island, CA.

Length: 2-3 weeks (117 hours).

Exhibit Dates: 7/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate, perform system maintenance and repair at the radio frequency and terminal equipment level on the data link terminal using technical manuals, troubleshooting techniques, panel meters and light indicators; identify and record the correct shipboard sequence for loading diagnostic software into the computers; and understand the functional elements of the data link system.

Instruction: Classroom instruction and laboratory exercises on correcting malfunctions introduced in a simulated operational environment using documented troubleshooting techniques manuals and meters. Check lists of multiple choices are used to guide the operator through these repair and maintenance exercises.

Credit Recommendation: Credit is not recommended due to the limited, specialized nature of the course (7/87).

NV-1715-1268

AN/SPS-52C RADAR SET MAINTENANCE

Course Number: A-104-0181.

Location: Combat Systems Technical School, Mare Island, CA.

Length: 27 weeks (1080 hours).

Exhibit Dates: 10/82–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate the radar in all modes; perform preventive maintenance, align and adjust using standard procedures; remove/replace assemblies, modules, or components, as required to pass appropriate operational check-out procedures; repair in place selected modules, assemblies, and subassemblies as required to pass appropriate operational check-out procedures; locate and correct malfunctions at the lowest possible replacement unit for shipboard repair as per current maintence philosophy; set up and operate general and specialized test equipment; repair and troubleshoot standard Navy minicomputer.

Instruction: Lectures and practical exercises in the servicing, maintenance and modification of the radar set including processor/emulator block diagrams, memory diagnostics, I/O diagnostics, AC/DC distribution, macrocomponent functions, and maintenance and repair philosophy.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer organization and architecture, 3 in computer troubleshooting, and 3 in electronic systems troubleshooting (7/87).

NV-1715-1269

SSBN SONAR COMBINED MAINTENANCE

Course Number: A-130-0203.

Location: Fleet Antisubmarine Training Center, Pacific, San Diego, CA.

Length: 15 weeks (597 hours).

Exhibit Dates: 6/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate, troubleshoot and repair to the component level as well as perform preventive maintenance on submarine sonar equipment.

Instruction: Includes lecture, demonstration and laboratory performance in safety devices, test equipment, vacuum tubes, solid state analog and digital subsystems of submarine sonar equipment, AM modulation and detection, logic circuits, numbering systems, memory devices, counters, registers, and servo systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital electronics, 2 in analog electronics, and 3 in electronic systems troubleshooting (7/87).

NV-1715-1270

SONAR AUXILIARY EQUIPMENT COMBINED MAINTENANCE REVISION A

Course Number: A-130-0172.

Location: Fleet Antisubmarine Training Center, Pacific, San Diego, CA.

Length: 21 weeks (840 hours).

Exhibit Dates: 6/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform maintenance on various sonar auxiliary equipment including communication, receiving, recording, classification, and performance measurement devices.

Instruction: A nonmathematical review of fundamentals of vacuum tubes, solid state devices, amplifier circuits, oscillators, modulation and demodulation, basic servo systems, fundamental digital numbering systems, digital circuits, common test equipment, as well as procedures used to troubleshoot, to a limited degree, various sonar equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital electronics, 2 in analog electronics, and 3 in electronic systems troubleshooting (7/87).

NV-1715-1271

SONAR DETECTING/RANGING SETS, AN/BQQ-5 SERIES COMBINED BASIC MAINTENANCE

(AN/BQQ-5 Combined Basic Maintenance Revision A)

Course Number: A-130-0208.

Location: Fleet Antisubmarine Training Center, Pacific, San Diego, CA.

Length: 16 weeks (475 hours).

Exhibit Dates: 5/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the theory of operation of the sonar system, perform routine preventive maintenance, operate the sonar system, and perform documented fault isolation procedures.

Instruction: Information presented by group-paced instruction utilizing the lecture method. Lab exercises used for skill learning. Topics in the operation and maintenance of sonar system, basic corrective maintenance without going into detailed logic, circuit analysis or detailed mechanical breakdown of equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic systems troubleshooting (7/87).

NV-1715-1272

Sonar AN/SQS-35 (V) Maintenance

Course Number: K-130-0069.

Location: Fleet Antisubmarine Training Center, Pacific, San Diego, CA.

Length: 17 weeks (680 hours).

Exhibit Dates: 1/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform preventive and corrective maintenance on Sonar AN/SQS-35(V) system under limited supervision.

Instruction: Lectures, demonstration and performance exercises on the AN/SQS-35(V) sonar systems using the correct troubleshooting techniques, technical manuals and test equipment to perform maintenance to the component level. For earlier version of the course, see NV-1715-0866.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting (7/87).

NV-1715-1273

Sonar AN/SQS-53B Maintenance
Level 2

Course Number: K-130-0282.

Location: Fleet Antisubmarine Training Center, Pacific, San Diego, CA.

Length: 29 weeks (1040 hours).

Exhibit Dates: 8/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform preventive and corrective maintenance on the Sonar AN/SQS-53B system and associated power supply.

Instruction: Lecture and laboratory instruction in theory of operation, maintenance to module level, review of circuitry, system alignment and calibration of Sonar AN/SQS-53B system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics systems troubleshooting (7/87).

NV-1715-1274

Sonar Technician Submarine STS
Class A

Course Number: A-130-0029.

Location: Fleet Antisubmarine Training Center, Pacific, San Diego, CA.

Length: 10 weeks (394 hours).

Exhibit Dates: 8/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate the Navy submarine sonar systems, recognize and classify sonar targets, and perform fire control plotting procedures, and perform submarine noise reduction procedures.

Instruction: Lectures and practical exercises on topics of underwater acoustics, submarine sonar systems, sonar watchstanding procedures and underwater fire control. For previous version of this course, see NV-1715-0040.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in fundamentals of underwater acoustics (7/87).

NV-1715-1275

Sonar AN/SQS-26 AXR/CX
Maintenance

Course Number: K-130-0047.

Location: Fleet Antisubmarine Training Center, Pacific, San Diego, CA.

Length: 38 weeks (1512 hours).

Exhibit Dates: 5/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate, maintain, troubleshoot and repair Sonar AN/SQS-26 CX system.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/SQS-26CX and the AN/SQS-53 sonar detecting-ranging set, including binary mathematics and logic, test equipment, modes of operation, sound propagation, primary power distribution, sonar monitor, block diagrams, fault-locating monitor, mode selection and generation, simulated targets and target control, surface duct programmer and transmitter, B-scan receiver and display, various circuits, variable depression components, range measuring and servos.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in electronic systems troubleshooting (7/87).

NV-1715-1276

Sonar AN/SQS-53 Maintenance

Course Number: K-130-0102.

Location: Antisubmarine Warfare Training Center, San Diego, CA.

Length: 34 weeks (1356 hours).

Exhibit Dates: 1/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate, maintain, troubleshoot, and repair a sonar ranging detecting set.

Instruction: Lectures and practical exercises in the operation and maintenance of the sonar set. Includes binary mathematics and logic, test equipment, modes of operation, sound propagation, power distribution, sonar monitor, block diagrams, fault-locating monitor, mode selection and generation, simulated target and target control, surface duct programmer, transmitter, B-scan receiver and display, various circuits, range measuring, and servos.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in electronic systems troubleshooting (7/87). For earlier versions of this course see NV-1715-0405.

NV-1715-1277

Sonar AN/SQS-26 BX Maintenance

Course Number: K-130-0046.

Location: Fleet Antisubmarine Training Center, Pacific, San Diego, CA.

Length: 27 weeks (1076 hours).

Exhibit Dates: 1/82–Present.

Learning Outcomes: Upon completion of the course, the student will be able to troubleshoot to the component level and repair the sonar system equipment, align and calibrate the sonar system, and perform preventive maintenance on sonar systems.

Instruction: Lectures and practical exercises in the theory of operation, preventive and corrective maintenance, repair and system alignment of sonar system and associated power supply. Also includes a review of solid state circuitry and digital logic. For previous version of this course see NV-1715-0863.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in electronic systems troubleshooting (7/87).

NV-1715-1278

Sonar AN/SQR-17(V)/17A(V) Series
Maintenance

Course Number: K-130-0275.

Location: Fleet Antisubmarine Training Center, Pacific, San Diego, CA.

Length: 18 weeks (720 hours).

Exhibit Dates: 3/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to isolate faults in the sonar system, repair and replace defective parts, and perform preventive maintenance.

Instruction: Lectures and practical exercises over the theory of operation and maintenance of a number of surface sonar equipments.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting (7/87).

NV-1715-1279

Sonar AN/SQQ-23A PAIR
Organizational Maintenance

Course Number: K-130-0096.

Location: Fleet Antisubmarine Training Center, Pacific, San Diego, CA.

Length: 29 weeks (1145 hours).

Exhibit Dates: 10/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform preventive maintenance on the sonar equipment, troubleshoot to the component level and repair faults in the sonar equipment.

Instruction: Lectures and practical exercises in the theory of operation of the sonar equipment, a review of solid state circuitry and basic digital electronics, fault isolation, alignment and calibration of equipment. For previous version of this course, see NV-1715-0859.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting (8/87).

NV-1715-1280

Sonar AN/SQQ-28(V) Maintenance

Course Number: K-130-0265.

Location: Fleet Antisubmarine Training Center, Pacific, San Diego, CA.

Length: 16 weeks (638 hours).

Exhibit Dates: 3/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform diagnostic tests, preventive and corrective maintenance on the AN/SQQ-28 Sonar Signal Processing System using specialized test equipment.

Instruction: Lecture, demonstration and laboratory exercises in theory of operation, specialized test equipment, diagnostics, preventive and corrective maintenance procedures. Review of microprocessor fundamentals, data recording, interfacing, logic analyzing, and computer display.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic data processing systems troubleshooting (7/87).

NV-1715-1281

Sonar Detecting/Ranging Sets,
AN/BQQ-5 Series Combined
Advanced Maintenance
(Sonar Detecting-Ranging Sets
AN/BQQ-5 Advanced Maintenance
Revision A)

Course Number: A-130-0209.

Location: Fleet Antisubmarine Training Center, Pacific, San Diego, CA.

Length: 30 weeks (895 hours).

Exhibit Dates: 4/83–Present

Learning Outcomes: Upon completion of the course, the student will be able to operate and perform advanced maintenance on the Sonar AN/BQQ systems.

Instruction: Lecture, demonstration and laboratory exercises in the theory of operation, preventive maintenance procedures, fault isolation and repair procedures of the AN/BQQ-5 sonar systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting (7/87).

NV-1715-1282

Sonar AN/SQS-38 Maintenance

Course Number: K-130-0071.

Location: Fleet Antisubmarine Training Center, Pacific, San Diego, CA.

Length: 17 weeks (670 hours).

Exhibit Dates: 5/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to troubleshoot and repair a sonar system and an underwater telephone to the component level, align equipment, and perform preventive maintenance on equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/SQS-38 sonar set, WQC2 underwater telephone, and built-in test equipment, including special circuits, power supplies and distribution, transmission signal development; transmitter modules, transducers and transducer switching; and receiving subsystem, including classification, position-indicator system timing and deflection circuitry, primary cursor generation, and servos. For previous version, see NV-1715-0404.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting (7/87).

NV-1715-1283

Sonar AN/SQR-19(V) Maintenance

Course Number: K-130-1108.

Location: Fleet Antisubmarine Training Center, Pacific, San Diego, CA.

Length: 12 weeks (460 hours).

Exhibit Dates: 2/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to troubleshoot and repair the AN/SQR-19 sonar system and perform preventive maintenance on system.

Instruction: Lectures and practical exercises in the theory of operation of the sonar system, fault isolation, repair procedures, alignment and calibration of equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting (7/87).

NV-1715-1284

Sonar AN/SQR-18A(V)1 Maintenance

Course Number: K-130-1107.

Location: Fleet Antisubmarine Training Center, Pacific, San Diego, CA.

Length: 18 weeks (606 hours).

Exhibit Dates: 1/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform preventive maintenance on, troubleshoot, repair, align and calibrate sonar system.

Instruction: Classroom and practical exercises including digital logic, operational amplifiers, and a thorough study of the particular sonar system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital electronics and 3 in electronic systems troubleshooting (7/87).

NV-1715-1285

Independent Variable-Depth Sonar Hoist AN/SQA-13(V) Maintenance

Course Number: K-041-2019.

Location: Fleet Antisubmarine Training Center, Pacific, San Diego, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 5/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate, maintain, and repair a hydraulic hoist mechanism.

Instruction: Lectures and practical exercises over the electronic circuitry and hydraulic mechanisms of the hoist system. A detailed study of all parts of the system. For previous version of this course, see NV-1715-0772.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in hydraulic systems maintenance (7/87).

NV-1715-1286

AN/WLR-1H(V)1 Combined Maintenance

Course Number: A-233-0061.

Location: Submarine School, Groton/New London, CT; Submarine Training Facility, San Diego, CA.

Length: 5 weeks (201 hours).

Exhibit Dates: 5/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate, checkout, maintain, troubleshoot, and repair specific Navy submarine electronic equipment.

Instruction: Instruction includes lectures and practical exercises over the theory of operation, functional analysis, logic flow, and maintenance procedures. Includes radar, super heterodyne receivers, digital electronics, and microprocessors.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting (7/87).

NV-1715-1287

1. LAMPS Mk 3 Recovery Assist Securing and Traversing (RAST) Maintenance Technician
2. Recovery Assist Securing and Traversing (RAST) A/W 42U-1(V) Maintenance (Electrical)

Course Number: *All Versions:* K-652-2204.

Location: *Version 1:* Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA. *Version 2:* Fleet Training Center, San Diego, CA.

Length: *Version 1:* 4 weeks (159 hours). *Version 2:* 3–4 weeks (97 hours).

Exhibit Dates: *Version 1:* 8/87–Present. *Version 2:* 12/86–7/87.

Learning Outcomes: Upon completion of the course, the student will be able to perform electrical/electronic maintenance, troubleshooting, and repair to the component level on a shipboard system used to land helicopters.

Instruction: *Version 1:* Lectures and practical exercises on the electrical/electronic troubleshooting and maintenance of the helicopter landing system. The electrical/electronic circuitry primarily concerns motor control and power. *Version 2:* Lectures and practical exercises on the electrical/electronic maintenance of the helicopter landing system. The electrical/electronic circuitry primarily concerns motor control and power.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electrical/electronic troubleshooting and 1 in electrical control systems laboratory (3/89). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in electrical/electronic troubleshooting (7/87).

NV-1715-1288

1. LAMPS Mk 3 Recovery Assist Securing and Traversing (RAST) Maintenance
2. Recovery Assist Securing and Traversing (RAST) (A/W42U-1(V)) Maintenance (Mechanical)

Course Number: K-652-2205.

Location: *Version 1:* Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA. *Version 2:* Fleet Training Center, San Diego, CA.

Length: *Version 1:* 5 weeks (153 hours). *Version 2:* 4 weeks (157 hours).

Exhibit Dates: *Version 1:* 8/87–Present. *Version 2:* 12/86–7/87.

Learning Outcomes: *Version 1:* Upon completion of the course the student will be able to perform operational tasks, preventive and corrective maintenance, and troubleshoot the mechanical components of a shipboard system used to land helicopters. *Version 2:* Upon completion of the course, the student will be able to perform operational tasks, preventive maintenance, and basic corrective maintenance of the Recovery Assist Securing and Traversing (RAST) system.

Instruction: *Version 1:* Lectures, demonstrations and practical exercises on theory, maintenance and operation of the system. *Version 2:* Instruction includes lecture and laboratory instruction on theory maintenance and operation of the RAST system.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in principles of mechanical systems, 1 in principles of hydraulic systems, and 1 in hydro-mechanical laboratory (3/89). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in principles of mechanical systems, 1 in principles of hydraulic systems, 1 in mechanical troubleshooting, and 1 in hydraulic troubleshooting (7/87).

NV-1715-1289

(GFCS) Mk 86 Radar Group Equipment Maintenance

Course Number: A-113-0098.

Location: Fleet Training Center, San Diego, CA; Service School Command, Great Lakes, IL. Fleet Combat Training Center, Dam Neck, VA.

Length: 17 weeks (623 hours).

Exhibit Dates: 5/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to maintain the GFCS MK 86 (Gun Fire Control System) Radar Group, including the primary power controllers, the SPG-60 Air Action Radar, the SPQ-9A Surface Search Radar, the MK-2 system as well as the digital control and interface systems.

Instruction: Students shall have completed Fire Control A school and shall receive instruction in theory and practice in the principles of search and tracking radars, the use of tools and proper test instruments necessary to perform operational and diagnostic testing, disassemble, repair, reassemble and calibration of the GFCS MK 86 Radar Group. For previous version of this course, see NV-1715-1228.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems maintenance (7/87).

NV-1715-1290

MK 38 GUN FIRE CONTROL SYSTEM (FCS)

Course Number: K-113-1185.
Location: Fleet Training Center, San Diego, CA.
Length: 7-8 weeks (320 hours).
Exhibit Dates: 1/84-Present.
Learning Outcomes: Upon completion of the course, the student will be able to operate and perform planned maintenance on the MK 38 Gun Fire Control System.
Instruction: Instruction includes lecture and laboratory experiences on all aspects of the MK 38 Gun Fire Control System. This includes theory, operation, maintenance, and repair using tools and test equipment.
Credit Recommendation: In the vocational certificate category, 2 semester hours in principles of radar (7/87); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical/electronic systems troubleshooting, and 2 in principles of hydraulic control (7/87).

NV-1715-1291

MK 37 GUN FIRE CONTROL SYSTEM (FCS)

Course Number: A-113-0109.
Location: Fleet Training Center, San Diego, CA.
Length: 7-8 weeks (320 hours).
Exhibit Dates: 1/84-Present.
Learning Outcomes: Upon completion of the course, the student will be able to operate and perform planned maintenance on the MK 37 Gun Fire Control System.
Instruction: Instruction includes lecture and laboratory experiences in all aspects of the MK 37 Gun Fire Control System. This includes theory, operation, maintenance and repair using tools and test equipment.
Credit Recommendation: In the vocational certificate category, 2 semester hours in fundamentals of radar (7/87); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical/electronic system troubleshooting and 2 in principles of hydraulic control (7/87).

NV-1715-1292

5"38 CALIBER GUN SYSTEM

Course Number: K-113-0108.
Location: Fleet Training Center, San Diego, CA.
Length: 7-8 weeks (320 hours).
Exhibit Dates: 4/84-Present.
Learning Outcomes: Upon completion of the course, the student will be able to operate and perform planned maintenance on the 5"8 MK 28 Gun System.
Instruction: Instruction includes lecture and laboratory practice on all aspects of the MK 28 Gun and hydraulic control system. This includes theory, operation, maintenance, and repair using tools and test equipment.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in principles of hydraulic control (7/87).

NV-1715-1293

16"/50 CALIBER GUN SYSTEM

Course Number: A-113-0111.
Location: Fleet Training Center, San Diego, CA.
Length: 7-8 weeks (320 hours).
Exhibit Dates: 1/84-Present.
Learning Outcomes: Upon completion of the course, the student will be able to operate and perform planned maintenance on operational gun turrets under limited supervision.
Instruction: Group-paced instruction including lecture and laboratory experiences on the gun turret system utilizing both trainers and live equipment. This includes theory, operation, maintenance, and repair using tools and test equipment.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in principles of electrical systems maintenance, 2 in principles of mechanical systems, and 2 in principles of hydraulic systems (7/87).

NV-1715-1294

BASIC CIRCUIT CONCEPTS

Course Number: A-652-0134.
Location: Service Schools Command, Great Lakes, IL.
Length: 1 week (40 hours).
Exhibit Dates: 9/87-Present.
Learning Outcomes: Upon completion of the course, the student will be able recognize safe electrical practice, analyze AC and DC circuits, interpret circuit diagrams pertaining to solid state devices, analyze operating conditions of simple digital logic circuits, and use the multimeter and oscilloscope for measurements.
Instruction: Classroom and practical exercises covering electrical safety, basic AC and DC circuits, solid state devices, digital logic circuits and test equipment.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electrical/electronic technology (6/88).

NV-1715-1295

ELECTRICIAN'S MATE ADVANCED MAINTENANCE TRAINING

Course Number: A-662-0017.
Location: Service Schools Command, Great Lakes, IL.
Length: 20 weeks (800 hours).
Exhibit Dates: 6/87-Present.
Learning Outcomes: Upon completion of the course, the student will have a fundamental understanding of: how to operate and maintain a 100KW motor-generator and the generator frequency and voltage controller, basic electricity and electronics, solid state theory and application, digital logic theory and application, test equipment application, single and multiphase motors, servo systems, degaussing system operation and maintenance.
Instruction: Multimedia, group-paced learning system incorporating extensive use of laboratories in AC/DC circuits, semiconductor theory and application, digital logic and logic circuits, AC and DC motor and generator operation and maintenance, 100KW generator frequency and voltage controller operation and maintenance, degaussing systems operations and testing, maintenance and material managment, servo system operation and testing.
Credit Recommendation: In the vocational certificate category, 3 semester hours in solid state electronics and 3 in technical mathematics (6/88); in the lower-division baccalaureate/associate degree category, 3 semester hours in electro-mechanical control, 4 in DC circuits, 4 in AC circuits, and 2 in digital logic (6/88).

NV-1715-1296

INTERIOR COMMUNICATIONS ELECTRICIAN ADVANCED MAINTENANCE TRAINING

Course Number: A-623-0013.
Location: Service Schools Command, Great Lakes, IL.
Length: 20 weeks (800 hours).
Exhibit Dates: 6/87-Present.
Learning Outcomes: Upon completion of the course, the student will be able to perform maintenance, calibration, troubleshooting, and repair of shipboard electrical equipment, such as communication systems, wind measuring systems, and shift, temperaturing, monitoring, salinity measuring systems, and ships logging system using basic electricity/electronics, solid state theory and application, digital logic theory and application, test equipment application, single and multiphase motors, and servosystems.
Instruction: Multimedia, group-paced learning system incorporating extensive use of laboratories in AC/DC circuits, semiconductor theory and application, digital logic and logic circuits, AC and DC motor and generator operation, servomechanism components and systems, and a review of basic algebra and trigonometry.
Credit Recommendation: In the vocational certificate category, 3 semester hours in solid state electronics and 3 in technical math (6/88); in the lower-division baccalaureate/associate degree category, 4 semester hours in DC circuits, 4 in AC circuits, 3 in servomechanism, and 2 in digital logic (6/88).

NV-1715-1297

GUN MOUNT 5"/54 MK 45 MOD 1

Course Number: A-113-0115.
Location: Service Schools Command, Great Lakes, IL.
Length: 4 weeks (160 hours).
Exhibit Dates: 10/84-Present.
Learning Outcomes: Upon successful completion of the course, the student will have developed the fundamental electromechanical-hydraulic skill and knowledge to operate, maintain, isolate and repair mechanical, electrical and electronic faults for a computer controlled gun mount.
Instruction: Classroom instruction and laboratory exercises covering system operation, controls, indicators/readouts, electrical/hydraulic/electronic circuits, mechanical structures/linkages, computer codes, and diagnostic procedures, and basic safety.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electromechanical system operation, troubleshooting, and maintenance (6/88).

NV-1715-1298

GUIDED MISSILE LAUNCHING SYSTEM MK 10 SOLID STATE CONTROL SYSTEM DIFFERENCE

Course Number: A-121-0499.
Location: Service Schools Command, Great Lakes, IL.

Length: 6 weeks (240 hours).
Exhibit Dates: 4/87–Present.
Learning Outcomes: Upon successful completion of the course, the student will have developed the fundamental skills and knowledge to operate and maintain a computer controlled guided missile launching system. The student will be able to identify and correct system faults down to the subsystem (module) level using flow charts, logic drawings, schematic diagrams and coded visual display fault indicators.
Instruction: Classroom instruction and laboratory exercises, covering system operation, controls, indicators/readouts, electrical/electronic/hydraulic circuits, mechanical structures/linkages, computer codes, diagnostic procedures, and basic safety.
Credit Recommendation: In the vocational certificate category, 6 semester hours in electronic systems troubleshooting and maintenance (6/88).

NV-1715-1299

U.S. Marine Corps Remote Sensor Operator Reserve (Phases 1 and 2)

Course Number: J-243-2014.
Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.
Length: 4 weeks (80 hours).
Exhibit Dates: 7/88–Present.
Learning Outcomes: Upon completion of the course, the student will be able to operate and employ ground-based remote sensor equipment.
Instruction: Lectures and demonstrations in operations, employment, and maintenance of remote sensors, preparation of plans, documents, reports, and messages associated with remote sensor operations.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic security systems and 3 in electronic security implementation, operation, and management; in the lower-division baccalaureate/associate degree category, 2 semester hours in basic map reading (7/88).

NV-1715-1300

U.S. Marine Corps Remote Sensor Operator

Course Number: J-243-0941.
Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.
Length: 5–6 weeks (204 hours).
Exhibit Dates: 11/87–Present.
Learning Outcomes: Upon completion of the course, the student will be able to operate and employ ground-based remote sensor equipment.
Instruction: Lectures, demonstrations, and practical exercises in the operation, employment, and maintenance of remote sensors, map reading and interpretation, preparation of plans, documents, reports and messages associated with remote sensor operations.
Credit Recommendation: In the vocational certificate category, 3 semester hour in electronic security systems and 3 in electronic security implementation, operation, and management (7/88); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic map reading (7/88).

NV-1715-1301

Aegis Display System Operation and Maintenance

Course Number: S-150-0238; A-150-0238.
Location: Aegis Training Center, Dahlgren, VA.
Length: 22 weeks (876 hours).
Exhibit Dates: 1/86–Present.
Learning Outcomes: Upon completion of the course the student will be able operate, maintain, and repair a computer-based video signal processing system including displays, computers, communications, power supplies, and cooling equipment; use general purpose and specialized test equipment to isolate system problems to the component and connector pin level; understand the function of subsystems which make up the system including digital computer organization, power supplies, CRT circuits, radar circuits, data conversion circuits, and liquid cooling systems.
Instruction: Half classroom and half laboratory instruction on the above topics. For this course before 1/86 see NV-1715-1115.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer systems and organization, 3 in electronic systems troubleshooting and maintenance, and 3 in computer systems troubleshooting and maintenance (12/88).

NV-1715-1302

Aegis Weapon System Operation and Maintenance (AN/SPY-1A/B)

Course Number: S-121-0551; A-121-0551; A-104-0190.
Location: Aegis Training Center, Dahlgren, VA.
Length: 17 weeks (678 hours).
Exhibit Dates: 1/86–Present.
Learning Outcomes: Upon completion of the course the student will be able to direct the maintenance operations of a phased array radar system; be familiar with the Aegis weapon system and all of its subsystems, the radar system, radar set, fire control system, and the operational readiness test system; be able to manually initiate fault detection and isolation tests, and evaluate and analyze test results.
Instruction: Classroom lectures and practical exercises on the above topics. For this course before 1/86 see NV-1715-1116.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance and 2 in computer system troubleshooting and maintenance (12/88).

NV-1715-1303

Aegis Radar System AN/SPY-1A Operation and Maintenance

Course Number: S-104-0191; A-104-0191.
Location: Aegis Training Center, Dahlgren, VA.
Length: 24 weeks (908 hours).
Exhibit Dates: 1/86–Present.
Learning Outcomes: Upon completion of the course the student will be able to operate and maintain a phased array radar system including high voltage power supplies, cooling systems, computerized control and signal processing systems, microwave transmitter/receivers, and antenna/waveguide structures; use standard and RF-specific test equipment to test, troubleshoot, align, and maintain radar; understand the function of system components including power, computer controls, RF signal generation and detection, digital signal processing, and cooling/conditioning equipment.
Instruction: Half classroom lecture half practical excercises on the above topics. For this course before 1/86 see NV-1715-1118.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer systems and organization, 4 in radar systems, and 6 in electronic systems troubleshooting and maintenance (12/88).

NV-1715-1304

Aegis Fire Control System/ORTS Operation and Maintenance

Course Number: S-104-0192; A-104-0192.
Location: Aegis Training Center, Dahlgren, VA.
Length: 25 weeks (907 hours).
Exhibit Dates: 1/86–Present.
Learning Outcomes: Upon completion of the course the student will be able to operate and maintain a complex computer-based weapons control system; troubleshoot computer-based equipment including interfaces (analog and digital), peripherals, printer, and displays; understand technical manuals incorporating schematics, wiring diagrams, logic charts; perform alignment procedures using test equipment such as oscilloscopes; use diagnostic computer programs to localize equipment faults.
Instruction: For this course before 1/86 see NV-1402-0058. Lecture and laboratory exercises involving theory, operation, routine maintenance, and troubleshooting of a computer-based weapons system.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in computer systems troubleshooting and maintenance, 4 in electronic systems troubleshooting and maintenance, and 4 in computer interface and peripheral systems (12/88).

NV-1715-1305

Remote Pressure/Tank Level/Liquid Airflow Indicating Equipment Maintenance

Course Number: A-623-0084.
Location: Trident Training Facility, Kings Bay GA; Trident Training Facility, Bangor, Bremerton, WA.
Length: 2 weeks (77 hours).
Exhibit Dates: 11/84–Present.
Learning Outcomes: Upon completion of the course, the student will be able to describe the theory needed to support all corrective journeyman level maintenance on electronic and mechanical components of the remote pressure, tank level, liquid flow and pneumatic systems using authorized fault isolation and repair procedures.
Instruction: Group paced lecture and laboratory exercises on the operation and maintenance of A) remote pressure indicating equipment, B) differential pressure tank level indicator, C) magnetic tank level indicator, D) airflow indicator equipment, E) liquid flow indicator equipment.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in industrial instrumentation laboratory (2/89).

NV-1715-1306

Common Alarm, Temperature Monitoring and Salinity Systems Equipment Maintenance

Course Number: A-623-0083.
Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.
Length: 1 week (56 hours).

Exhibit Dates: 11/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the theory to support corrective maintenance using all authorized fault isolation and repair procedures on the temperature monitoring, salinity and common alarm systems found on the trident submarine.

Instruction: Group paced lecture and laboratory exercises on the operation and maintenance of A) alarm systems, B) temperature monitoring equipment, C) salinity equipment. Maintenance is at the journeyman level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in instrumentation mechanics (2/89).

NV-1715-1307

ATMOSPHERE SUPPORT EQUIPMENT MAINTENANCE

Course Number: A-623-0085.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 1 week (44 hours).

Exhibit Dates: 11/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform documented corrective maintenance on the Trident control atmosphere monitoring system and the hydrogen detector.

Instruction: Group paced journeyman level instruction and laboratory exercises on the operation and maintenance of A) hydrogen detector, B) atmosphere monitoring system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in instrumentation laboratory (2/89).

NV-1715-1308

SHIP CONTROL SYSTEM MAINTENANCE

Course Number: A-623-0086.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 5 weeks (158 hours).

Exhibit Dates: 12/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform documented corrective maintenance on the ship control system and associated systems. Students can use the necessary test equipment to isolate and correct equipment faults at the journeyman level.

Instruction: Group paced lecture and laboratory exercises at the journeyman level on the operation and maintenance of A) multiplexer, B) ship control system, C) steering and diving control equipment, D) hovering equipment, E) missile compensating equipment, F) variable ballast and trim equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electromechanical laboratory (2/89).

NV-1715-1309

TRIDENT SHIP CONTROL AND ATMOSPHERE SUPPORT TECHNICIAN LEVEL I

Course Number: A-623-0080.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 9 weeks (372 hours).

Exhibit Dates: 11/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to do preventive maintenance at the apprentice level on specific atmosphere support equipment on board a Trident submarine. Technician will be able to give a general, physical and documentation description of specific equipment on board the Trident submarine for which that student is responsible.

Instruction: Lectures and laboratory exercises on the theory, maintenance and operation of the following equipment: a) power distribution system, b) alarm system, c) valve control equipment, d) position indication equipment, g) liquid flow indicator equipment, h) level indicator, i) salinity equipment, j) temperature monitoring equipment, k) depth detector, l) public address system, m) ballast and trim equipment, n) position control system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electromechanical controls and 3 in industrial instrumentation (mechanical) (2/89).

NV-1715-1310

INTEGRATED ANNOUNCING SYSTEM

Course Number: A-623-0093.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (69 hours).

Exhibit Dates: 6/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the theory to support advanced detailed corrective maintenance using all authorized fault isolation, test equipment and repair procedures on the integrated announcing system.

Instruction: Group paced lectures and advanced laboratory exercises on the operation and maintenance of the integrated announcing system. The advanced laboratory exercises include the use of special tools and test equipment used in the alignment and calibration after fault identification and correction.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting (2/89).

NV-1715-1311

HOVERING AND MISSILE COMPENSATION AND ASSOCIATED POSITION CONTROL UNITS (PCU'S) ELECTRICAL MAINTENANCE

Course Number: A-623-0114.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (72 hours).

Exhibit Dates: 6/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to provide advanced electromechanical maintenance and undocumented troubleshooting for the hovering and missile compensation systems and associated position control units.

Instruction: Group paced lecture and advanced laboratory exercises on the operation and maintenance of hovering equipment and position control unit, missile compensating equipment and position control unit.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electromechanical systems laboratory (2/89).

NV-1715-1312

STEERING/DIVING SHIP'S CONTROL STATION AND VARIABLE BALLAST AND TRIM ELECTRICAL MAINTENANCE

Course Number: A-623-0113.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 2–3 weeks (110 hours).

Exhibit Dates: 6/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to provide advanced maintenance and undocumented troubleshooting for steering/diving, ship control station and variable ballast and trim associated position control units.

Instruction: Group paced lecture and advanced laboratory exercises on the operation and maintenance of ship control station, ballast and trim equipment, steering and diving control equipment, and position control equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electromechanical control laboratory (2/89).

NV-1715-1313

TRIDENT SONAR SUBSYSTEM OPERATION AND MAINTENANCE LEVEL I

Course Number: A-130-0126.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 24 weeks (956 hours).

Exhibit Dates: 9/77–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform alignment, operational test, corrective maintenance, disassembly, repair, reassembly and/or replace/remove units during basic corrective maintenance to the authorized maintenance level on sonar subsystems. Involves apprentice level skills.

Instruction: Group paced lectures and laboratory exercises on the operation, maintenance and reconfigeration of the following sonar subsystems: A) Command and Control System, B) Detection-Tracking Group, C) Broadband Detection Spherical Array, D) Broadband Detection Towed Array, E) Passive Broadband Tracking Array, F) Torpedo Detection and Classification Communications.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in electronic communications systems laboratory (2/89).

NV-1715-1314

TRIDENT SONAR SUBSYSTEM OPERATION AND MAINTENANCE LEVEL III

Course Number: A-130-0129.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 8 weeks (288 hours).

Exhibit Dates: 9/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform all authorized fault isolation and repair/corrective maintenance at the advanced journeyman level. Technician will be able to describe all major and associated components of the Sonar Subsystem Group,and to describe the functional interface between the AGC and related external equipment, describe signal flow, frequencies, input/output, frequencies, power supplies and protection devices.

Instruction: Group paced lecture and advanced laboratory exercises on the operation and maintenance on the following sonar subsystems: A) Acoustic Communication Group, B) Depth/Sound Speed Group, C) Depth Sounding Group, D) Bathytheormograph Group E) Recorder-Reproduce Group.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems laboratory (2/89).

NV-1715-1315

Trident Sonar Subsystem Operation and Maintenance Level II

Course Number: A-130-0127.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 9 weeks (330 hours).

Exhibit Dates: 9/80–Present.

Learning Outcomes: See individual exhibits for learning outcomes. This is a pipeline course.

Instruction: See exhibits NV-1715-1316 (A-130-0131), NV-1715-1319 (A-130-0132), NV-1715-1318 (A-130-0307), NV-1715-1317 (A-130-0305), and NV-1715-1320 (A-130-0306).

Credit Recommendation: See individual exhibits for credit recommendation (2/89).

NV-1715-1316

AN/BQQ-6 Group A Preamplifier, Filter, Equalizer, Clipper (PFEC)/Spherical Array, Passive Beamforms (SAPB) Maintenance

Course Number: A-130-0131.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (62 hours).

Exhibit Dates: 9/80–Present.

Learning Outcomes: Upon completion of the course, the student will be able to adhere to personnel and equipment safety precautions which are to be observed while performing corrective maintenance, recognize and interpret all malfunction indications while performing corrective maintenance, use advanced techniques taught in this course to isolate faults/failures which cannot be located using prescribed maintenance documentation.

Instruction: Group-paced lecture and advanced laboratory exercises on the functional operation and maintenance of the spherical array passive beamforms (SAPB) preamplifier, filter, equalizer, clipper (PFEC) spherical array hydrophone (SAH).

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic communications laboratory (2/89).

NV-1715-1317

AN/BQQ-6 Group A Primary Power Control (PCC)/SSDC Advanced Maintenance

Course Number: A-130-0305.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 1 week (52 hours).

Exhibit Dates: 9/80–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe authorized techniques to isolate faults/failures which cannot be located using standard procedures contained in presribed maintenance documentation and/or with performance monitoring/fault localization; describe the recognition and interpretation of all malfunction systems.

Instruction: Group paced lecture and advanced laboratory exercises on the functional operation of the primary power control and units of the detection-tracking group.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic troubleshooting laboratory (2/89).

NV-1715-1318

AN/BQQ-6 Group A Multipurpose Interface Unit (MIU) Digital Spectrum Analyzer (DSA) Advanced Maintenance

Course Number: A-150-0307.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 1 week (56 hours).

Exhibit Dates: 9/80–Present.

Learning Outcomes: Upon completion of the course, the student will be able to recognize and interpret all malfunction indications, use authorized techniques to isolate faults/failures which cannot be located using procedures contained in prescribed maintenance documentation and/or with performance monitoring/fault localization.

Instruction: Group paced lecture and advanced laboratory exercises on the functional operation and maintenance of the multipurpose interface unit (MIU), digital spectrum analyzer (DAS).

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic communications laboratory (2/89).

NV-1715-1319

AN/BQQ-6 Sonar Set Detection Tracking

Course Number: A-130-0132.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (80 hours).

Exhibit Dates: 9/80–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the authorized techniques to isolate faults/failures which cannot be located using procedures contained in prescribed maintenance documentation and/or with performance monitoring/fault localization.

Instruction: Group paced lecture and advanced laboratory exercises on the fault isolation and repair procedures on the AN/BQQ-6 Sonar Detection-Tracking Group A Control Display Console.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic troubleshooting laboratory (2/89).

NV-1715-1320

AN/BQQ-6 Group A Interference Rejection Processor (IRP)/Spherical Array, Passive Processor (SAPP)/Precision Data Recorder (PDR) Advanced Maintenance

Course Number: A-130-0306.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (80 hours).

Exhibit Dates: 9/80–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe authorized techniques to isolate faults/failures which cannot be located using standard procedures contained in prescribed maintenance documentation and/or with performance monitoring/fault localization; and describe the recognition and interpretation of all malfunction indications to support all corrective maintenance.

Instruction: Group paced lecture and advanced laboratory exercises on the Spherical Array Passive Processor (SAPP), Interference Rejection Processor (IRP), Detection-Tracking Group (DTG), and Precision Data Recorder (PDR).

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic troubleshooting laboratory (2/89).

NV-1715-1321

Fire Control System Mk 98 Mod O Maintenance Procedures

Course Number: A-121-0436.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (65 Hours).

Exhibit Dates: 5/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform documented repair procedures on weapons system interconnections, troubleshoot and repair fire control system faults.

Instruction: Lecture and laboratory exercises in non-routine maintenance of fire control system software and hardware.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in industrial electronics laboratory (2/89).

NV-1715-1322

Fire Control System Mk 98 Mod O Rev A Advanced Operations

Course Number: A-121-0431.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 3 weeks (76 hours).

Exhibit Dates: 4/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe characteristics, capabilities, and functional operation(s) and interface(s) of all subsystems of the Mk 98, Mod O fire control system, and perform all operational procedures with respect to the Mk 98 Mod 0 fire control system.

Instruction: Lecture and laboratory exercises in the description and operation of the Mk 98 Mod O fire control system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in industrial electronics laboratory (2/89).

NV-1715-1323

Launcher Control Group Mk 13 Mod O Advanced

Course Number: A-121-0452.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (52 weeks).

Exhibit Dates: 12/82–Present.

Learning Outcomes: Upon completion of the course, the student will be able to use special tools to identify and perform fault isolation and corrective maintenance to the equipment or program of the Launcher Control Group.

Instruction: Lecture and laboratory activities on basic theory, functions, operation, and maintenance procedures of the Launcher Control Group. Instruction covers topics on schematic diagrams, system test modes, control logic, signal flew, and sequential operation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic technology (2/89).

NV-1715-1324

Controllers and Circuit Breakers Combined Maintenance

Course Number: A-662-0108.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform preventive and corrective maintenance on electrical controllers and circuit breakers used on submarines.

Instruction: Lectures and laboratory instruction on the operation, maintenance, and fault detection for high voltage circuit breakers, motor controllers, and switchgear.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electrical technology laboratory (2/89).

NV-1715-1325

Basic Electronic Test Equipment

Course Number: A-198-0054.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (57 hours).

Exhibit Dates: 5/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate basic electronic test equipment to measure electrical valves.

Instruction: Theory and laboratory exercises on basic electronic test equipment with topics on analog and digital multimeters, oscilloscopes, power supplies, transistor testers, generators, impedance meters, and AC/DC differential voltmeters.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic instruments laboratory (2/89).

NV-1715-1326

Mk 118 Fire Control System Basic Maintenance

Course Number: A-130-0232.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 3 weeks (99 hours).

Exhibit Dates: 8/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform basic preventive/corrective maintenance on the fire control system.

Instruction: Lectures and laboratory exercises in the theory, operation, and maintenance of power supplies and power distribution, and firing circuits.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer control/interfacing techniques laboratory (2/89).

NV-1715-1327

Ocean Systems Technician Maintainer Class A

Course Number: J-130-0295.

Location: Fleet Anti-Submarine Warfare Training Center, Norfolk, VA.

Length: 31–32 weeks (1223 hours).

Exhibit Dates: 8/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to solve algebra and trigonometric problems, solve AC and DC passive circuits and devices, analyze solid state circuits and devices, analyze digital circuits and devices, use basic laboratory instruments, and troubleshoot electronic systems.

Instruction: Lectures and practical exercises on basic electronics and specific military systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in DC circuits, 2 in AC circuits, 2 in basic electronics laboratory, 3 in solid state electronics, 2 in digital principles, and 3 in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1328

AN/SRQ-4 Light Airborne Multipurpose System (LAMPS) Mk3 Maintenance

Course Number: A-101-0209.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 4/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to test, operate, and maintain a data link transceiver under operational conditions at the organizational level.

Instruction: Instructional methods include lectures and supporting laboratories in analyzing, locating, and correcting faults using such equipment as spectrum analyzers, oscilloscopes, and digital multimeters.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1329

Communications Maintenance Class C

Course Number: J-130-0267.

Location: Fleet Anti-Submarine Training Center, Norfolk, VA.

Length: 7–8 weeks (288 hours).

Exhibit Dates: 10/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to maintain and repair at the board level a secure data relay system, an automatic switching terminal and teletype equipment.

Instruction: Instruction includes lectures and supporting laboratories in analyzing, locating, and repairing faults at the board level on several complex electronic systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1330

Microminiature Electronics Repair

Course Number: A-100-0073.

Location: Fleet Training Center, Norfolk, VA; Fleet Mine Warfare Training Center, Charleston, SC; Fleet Training Center, Mayport, FL; Fleet Training Center, Pearl Harbor, HI; Service School Command, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to repair and replace components on rigid and flexible printed circuit boards.

Instruction: Lectures, demonstrations, and practical experience in the techniques of printed circuit board repair, including component handling precautions.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic fabrication techniques (3/89).

NV-1715-1331

General Purpose Electronic Test Equipment Functional and Operational Use

Course Number: J-100-0707.

Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, Mayport, FL.

Length: 1–2 weeks (68 hours).

Exhibit Dates: 7/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate test equipment (meters, signal generators, frequency counters, oscilloscopes, spectrum analyzers, and power meters) and perform routine maintenance on that equipment.

Instruction: Lectures and practical exercises on electronic test equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronics laboratory (3/89).

NV-1715-1332

AN/SPS-67(V)1 Radar Set Maintenance

Course Number: A-104-0177.

Location: Fleet Training Center, Norfolk, VA; Advanced Electronics School, San Diego, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 8/85–Present.

Learning Outcomes: Upon completion of the course the student will be able to identify, analyze, locate, and correct malfunctions occurring in a specific military radar set.

Instruction: Lectures and laboratory exercises related to maintenance and repair of the radar set. Subject matter includes electronic circuitry, troubleshooting techniques, test equipment, and maintenance methods.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1333

AN/SPS-64(V)9 Radar Set Maintenance

Course Number: A-104-0195.

Location: Fleet Training Center, Norfolk, VA; Advanced Electronics School, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 9/83–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and repair a specific shipboard radar set.

Instruction: Lectures and practical exercises related to maintaining a shipboard radar set. Emphasis is on the ability to identify, analyze, locate, and correct malfunctions in the radar set.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1334

Surface Electronic Warfare Operations Intermediate

Course Number: K-233-0022.

Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, Mayport, FL; Fleet Combat Training Center, San Diego, CA; Fleet Training Group, Pearl Harbor, HI; Fleet Training Group WESTPAC, Japan.

Length: 3 weeks (116 hours).

Exhibit Dates: 5/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to describe principles of electronic warfare, warfare systems, detection, classification and targeting.

Instruction: Lectures and classroom exercises on topics in electronic warfare.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/89).

NV-1715-1335

AN/SPS-40E Air Search Radar Set Maintenance

Course Number: A-104-0199.

Location: Fleet Training Center, Norfolk, VA.

Length: 8 weeks (320 hours).

Exhibit Dates: 1/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, troubleshoot, and maintain air search radar equipment using built-in and other laboratory test equipment under operational conditions with no supervision.

Instruction: Instructional methods include lectures and supporting laboratories in analyzing, locating, and correcting malfunctions in radar equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1336

AN/SPS-49(V)5 ATD Operation and Maintenance

Course Number: A-104-0209.

Location: Fleet Training Center, Norfolk, VA, Service School Command, San Diego, CA.

Length: 16 weeks (640 hours).

Exhibit Dates: 4/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate and maintain the radar system under all shipboard readiness conditions using built-in and other associated laboratory test equipment with no supervision.

Instruction: Lectures and supporting laboratories in operational set-up procedures and the use of built-in test equipment to maintain and troubleshoot the radar system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1337

AN/SPA-25G Radar Indicator Group Maintenance

Course Number: A-104-0205.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to maintain, troubleshoot and repair a specific radar system.

Instruction: Lectures and practical exercises on the major functions of the equipment, operating procedures, adjustments, troubleshooting procedures, and removal and replacement procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1338

AN/USQ-74 Link Data Terminal Maintenance

Course Number: A-101-0222.

Location: Fleet Training Center, Norfolk, VA; Advanced Electronics School, San Diego, CA.

Length: 4 weeks (152 hours).

Exhibit Dates: 9/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and maintain data terminals using diagnostic tests and measurement equipment.

Instruction: Lectures and laboratory exercises in the operation and maintenance procedures of keyboards, teletypes, tape readers, and associated equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer systems troubleshooting and maintenance (3/89).

NV-1715-1339

Mk NC-2 Mod 2/2A Plotting System Maintenance

Course Number: J-623-0016.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: 5 weeks (200 houts).

Exhibit Dates: 11/84–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, troubleshoot, and repair a shipboard navagational plotting system.

Instruction: For this course before 11/84 see NV-1715-0076. Lectures and laboratories in solid state devices, voltage networks, transistors, synchro/servo systems, dead reckoning analyzer-indicator, plotting table and troubleshooting procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1340

High Frequency Systems Technician Maintenance

Course Number: A-101-0258.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: 11 weeks (440 hours).

Exhibit Dates: 10/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and perform corrective and preventive maintenance on high frequency shipboard communication systems.

Instruction: Lectures and practical exercises to isolate and repair equipment malfunctions as well as perform preventive maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1341

AN/SRN-19(V)2 Radio Navigation Set Maintenance

Course Number: A-102-0266.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/80–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and repair a specific military radio navigation set.

Instruction: Lectures and practical exercises specific to the radio navigation set with emphasis on isolation and correction of malfunctions.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1342

TSEC/KY-65A/75A AN/USC-43 ANDVT Limited Maintenance

Course Number: A-160-0087.

Location: Fleet Training Center, Norfolk, VA; Combat Systems Training School, Mare Island, CA.

Length: 1-2 weeks (56 hours).

Exhibit Dates: 11/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform limited maintenance on a specific cryptographic set.

Instruction: Lectures and practical exercises focused on the maintenance of the cryptographic set.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/89).

NV-1715-1343

Officer in Tactical Command Information Exchange System

Course Number: A-101-0221.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: 2-3 weeks (96 hours).

Exhibit Dates: 1/85–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot, repair, and maintain crypto equipment and peripherals.

Instruction: Lectures and practical exercises on the operation, troubleshooting, and repair of the electronic system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1344

AN/WSC-6(V)2 Maintenance

Course Number: A-101-0149.

Location: Fleet Training Center, Norfolk, VA.

Length: 8 weeks (320 hours).

Exhibit Dates: 10/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate and maintain specific satellite communications modems.

Instruction: Lectures and practical exercises on theory of operation preventive maintenance, and alignment procedures of specific satellite communications data links (modems).

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1345

MINIATURE ELECTRONICS REPAIR

Course Number: A-100-0072.

Location: Fleet Training Center, Norfolk, VA; Fleet Mine Warfare Training Center, Charleston, SC; Fleet Training Center, Mayport, FL; Fleet Training Group, Pearl Harbor, HI; Service School Command, San Diego, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to repair two-sided printed circuit boards to original specifications and maintain the repair station equipment without supervision.

Instruction: Instructional methods include lectures and supporting laboratories in disassembling and replacing or repairing connectors and components.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic fabrication (3/89).

NV-1715-1346

OM-55/USC SUPER HIGH FREQUENCY SATELLITE COMMUNICATION MODULAR DEMODULATOR GROUP MAINTENANCE

Course Number: A-101-0244.

Location: Fleet Training Center, Norfolk, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 10/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, maintain, and repair specific satellite communications modems.

Instruction: Lectures and practical exercises in operation, fault isolation, repair, and preventive maintenance of specific communication system modem.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1347

ULTRA HIGH FREQUENCY-DEMAND ASSIGNED MULTIPLE ACCESS (DAM-A)

Course Number: A-101-0164.

Location: Fleet Training Center, Norfolk, VA; Advanced Electronics School, San Diego, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 10/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to maintain a multiplexer set and related rack equipment under limited supervision.

Instruction: Instructional methods include lecture and supporting laboratories in analyzing, locating, and correcting faults using such test equipment as frequency counters, oscilloscopes, and digital voltmeters.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1348

HIGH FREQUENCY SURFACE COMMUNICATIONS SYSTEM OPERATOR

Course Number: A-260-0063.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: 6 weeks (236 hours).

Exhibit Dates: 6/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate and maintain several specific radio and satellite communications systems.

Instruction: Lectures and practical exercises which provide comprehensive systems-level training for operating and isolating faults on communications systems found on surface ships.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1349

ELECTROMAGNETIC COMPATABILITY TECHNICIAN

Course Number: A-101-0250.

Location: Fleet Training Center, Norfolk, VA.

Length: 2-3 weeks (115 hours).

Exhibit Dates: 10/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform electromagnetic interference surveys, and correct interference.

Instruction: Instructional methods include lectures and supporting laboratories in detecting and correcting electromagnetic interference. Training in the use of spectrum analyzers, an antenna test set, a time domain reflectometer, a broadband radition monitor, a thruline wattmeter, a megohmmeter, and an RF burn meter are emphasized.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic communication (3/89).

NV-1715-1350

AN/USQ-74 LINK SYSTEM MAINTENANCE

Course Number: A-101-0264.

Location: Fleet Training Center, Norfolk, VA; Advanced Electronics School, San Diego, CA.

Length: 10 weeks (400 hours).

Exhibit Dates: 3/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate and maintain a computer system at the user level under all operational conditions with no supervision.

Instruction: Instructional methods include lectures and supporting laboratories in basic digital theory, computer systems and organization, and system troubleshooting and maintenance. Major topics include number systems, Boolean algebra, logic gates, macro and micro instructions, I/O and memory.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital principles, 3 in computer systems and organization, and 3 in computer systems troubleshooting and maintenance (3/89).

NV-1715-1351

AN/SPS-40B/C/D DMTI RADAR SET MAINTENANCE

Course Number: A-104-0183.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: 9 weeks (344 hours).

Exhibit Dates: 12/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate and maintain specific radar equipment under shipboard operational conditions with no supervision.

Instruction: Instructional methods include lectures and supporting laboratories in analyzing, locating, and correcting various malfunctions in radar equipment using the associated test equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1352

AN/TRQ-35(V) TACTICAL FREQUENCY MANAGEMENT SYSTEM

Course Number: A-101-0225.

Location: Fleet Training Center, Norfolk, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform preventive and corrective maintenance on a specific receiver subsystem.

Instruction: Lectures and practical experience in preventive maintenance and isolation and correction of system malfunctions.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems troubleshooting and maintenance (3/89).

NV-1715-1353

TRIDENT EXTERIOR COMMUNICATIONS SYSTEM (ECS) LEVEL II BASIC MAINTENANCE

Course Number: A-101-0157.

Location: Trident Training Facility, Bangor, Bremerton, WA; Kings Bay GA.

Length: 26 weeks.

Exhibit Dates: 3/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform corrective maintenance on the AN/BSC-2 except the OJ-326 SIDS console.

Instruction: This course is composed ofA-150-0228 (NV-1715-1354), A-101-0170 (NV-1715-1355), A-101-0175 (NV-1715-1359), A-101-0172 (NV-1715-1357), A-101-0173 (NV-1715-1358), A-101-0171, (NV-1715-1356), A-101-0256.

Credit Recommendation: See individual exhibits for credit recommendations.

NV-1715-1354

TRIDENT EXTERIOR COMMUNICATIONS SYSTEM (ECS) AN/UYY-20X(V) DATA PROCESSING SET/CONTROL, MONITOR AND TEST SUBSYSTEM MAINTENANCE

Course Number: A-150-0228.

Location: Trident Training Facility, Bangor, Bremerton, WA; Trident Training Facility, Kings Bay, GA.

Length: 6 weeks (260 hours)

Exhibit Dates: 1/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to define the abbreviations and terms associated with the control, monitor and test (CMT) subsystem, state the operational characteristics of the subsystem, describe all major components of the subsystem and use all technical documentation required to support basic corrective maintenance of the CMT subsystem.

Instruction: Lecture and hands on laboratory exercises in operation and fault isolation and corrective maintenance of the following electronic equipment: 1) Indicator Processor ID-2156, 2) Interface unit J-3565, 3) Power Supplies, 4) Recorder-Reproducer Control C-10447, and 5) Demodulater Group OM-56/BSC-1.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronics laboratory (3/89).

NV-1715-1355

Trident Exterior Communications System (ECS) Level II VLF/LF Subsystem

Course Number: A-101-0170.

Location: Trident Training Facility, Bangor, Bremerton, WA Trident Training Facility, Kings Bay, GA.

Length: 5 weeks (208 Hours).

Exhibit Dates: 3/87–Present.

Learning Outcomes: Upon successful completion of the course, the trainee will be able to state the operational characteristics of the VLF/LF Subsystem, define the abbreviations and terms used in the system documentation, describe the organization and content of all technicial documentation used in the support of basic preventive/corrective maintenance at the component level.

Instruction: Laboratory and hands on laboratory exercises in diagnostic procedures, disassembly, repair, and reassembly of the VLF/LF communication system and subsystems to include demodulators, power supplies, radio receivers and teletypes. Test equipment used includes digital multimeters, oscilloscopes and frequency meters.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in digital communications laboratory (3/89).

NV-1715-1356

Trident Exterior Communications System (ECS) Data Switching Subsystem Basic Maintenance

Course Number: A-101-0171.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 4 weeks (152 hours).

Exhibit Dates: 3/86–Present.

Learning Outcomes: Upon successful completion of this course the level I Radioman will have the necessary skills to perform basic corrective maintenance on Data Switching devices.

Instruction: Lecture and hands on laboratory exercises in the fault isolation and repairs of the following equipment: 1. Switch Interconnect, 2. Crypto Set TSEC/KL-51, 3. Demodulator MD-1044/Convertor CV2460, 4. Power Switchboard, and 5. Power Supplies.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electro/mechanical systems laboratory (3/89).

NV-1715-1357

Trident Exterior Communications System (ECS) Support Subsystem Basic Maintenance

Course Number: S-101-0172.

Location: Trident Training Facility, Bangor, Bremerton, WA; Kings Bay, GA.

Length: 3 weeks (110 hours).

Exhibit Dates: 8/87–Present.

Learning Outcomes: Upon successful completion of this course the Level I Radioman will have the necessary skills to perform basic corrective maintenance on the Trident ECS support system, to include: power and control units and high speed printers.

Instruction: Lecture and Hands on laboratory exercise in the fault isolation and repair of the following equipment: Teleprinter TT-624, Teleprinter AN//UGC-136, Power switchboard, and electronic equipment air coolers.

Credit Recommendation: In the vocational certificate category, 2 semester hours in teletype repair (3/89).

NV-1715-1358

Trident Exterior Communications System (ECS) Antennas/Antenna Interface System

Course Number: A-101-0173.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 4 weeks (160 hours).

Exhibit Dates: 4/87–Present.

Learning Outcomes: Upon successful completion of the course the level I Radioman will have the necessary skills to perform basic corrective maintenance on antennas, antenna couples, and antenna switches.

Instruction: Lecture and hands on laboratory exercises in the fault isolation and corrective maintenance of Antennas/Antenna Interface system to include: 1. Antenna coupler CU-2197, 2. Antenna Control Indicator C-10257, 3. Towed Buoy Antenna, and 4. Antenna Interconnect Box.

Credit Recommendation: In the vocational certificate category, 2 semester hours in antenna systems laboratory (3/89).

NV-1715-1359

Trident Exterior Communications System (ECS) Level II HF/VHF

Course Number: A-101-0175.

Location: Trident Training Facility, Bangor, Bremerton, WA; Kings Bay, GA.

Length: 3 weeks (128 hours).

Exhibit Dates: 12/86–Present.

Learning Outcomes: Upon completion of this course the trainee will be able to state the operational characteristics of the VHF/HF subsystem, define the abbreviations and terms used in the system documentation, describe the organization and content of all technical documentation used in the support of basic preventive/corrective maintenance at the component level.

Instruction: Lecture and hands on laboratory exercises in diagnostic procedures, disassembly, repair and reassembly of the VHF/HF communication system and subsystems to include radio transmitters/receivers, RF amplifers, Audio-Digital (A/D) converters, voice switch and power supplies. Test equipment used includes oscilloscopes, digital multimeter frequency meters an alignment tools.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in analog communications laboratory (3/89).

NV-1715-1360

Trident Exterior Communications Subsystem Advanced Maintenance Level III

Course Number: A-101-0169.

Location: Trident Training Facility, Bangor, Bremerton, WA; Trident Training Facility, Kings Bay, GA.

Length: 9 weeks (357 hours).

Exhibit Dates: 7/85–Present.

Learning Outcomes: Upon successful completion of this course the senior Trident radioman will have the necessary skills to perform advanced corrective maintenance on critical equipment used in the Trident Exterior Communications Subsystems using both documented and undocumented procedures.

Instruction: Laboratory exercises and lectures in the operation and maintenance of a digital communication systems covering the capability and functions of the central communications software program including loading procedures, inserting authorized software patches and re-boot procedures in the event of a software error are all covered. The digital message interface unit and disk drive memory system is described. Approximately half of the course is devoted to maintenance procedured and troubleshooting techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in digital computer operation and maintenance (3/89).

NV-1715-1361

Trident Exterior Communication System, Level I

Course Number: A-101-0168.

Location: Trident Training Facility, Bangor, Bremerton, WA; Trident Training Facility, Kings Bay, GA.

Length: 11 weeks (448 weeks).

Exhibit Dates: 11/88–Present.

Learning Outcomes: Upon successful completion of this course the trainee will have acquired the knowledge and developed the neccessary skills to: 1) state the purpose, function and location of Trident Submarine Exterior Communications Systems (ECS), 2) Perform, with supervision preventive maintenance at the systems level on ECS, 3) Describe the theory necessary to understand and support the normal operation of communications equipment found on Trident Submarines.

Instruction: Lecture and hands-on laboratory exercises in the basic theory, operation and preventive maintenance at the systems level on power distribution panels, teleprinters/typewriters, antennae systems, radio buoys, and HF/UHF and LF/ULF Subsystems.

Credit Recommendation: In the vocational certificate category, 4 semester hours in communications laboratory systems (3/89).

NV-1715-1362

Trident (ECS) Electronics Command and Control System Technician Conversion

Course Number: A-102-0249.

Location: Trident Training Facility, Bangor, Bremerton, WA; Trident Training Facility, Kings Bay, GA.

Length: 6 weeks.

Exhibit Dates: 9/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to oper-

ate and maintain electronic equipment unique to the Trident submarine.

Instruction: This is a composite course consisting of A-100-0077, A-102-0251 (NV-1715-1364), A-102-0252 (NV-1715-1363) and A-102-0261. See individual exhibits.

Credit Recommendation: See individual exhibits.

NV-1715-1363

AN/BPS Radar Combined Maintenance

Course Number: A-102-0252.

Location: Trident Training Facility, Bremerton, Bangor, WA. Trident Training Facility, Kings Bay, GA.

Length: 3 weeks (119 hours).

Exhibit Dates: 10/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform preventive maintenance and all authorized fault isolation and repair procedures in Trident Radar Subsystem

Instruction: Laboratory and hands on laboratory exercises in the operation and preventive maintenance on AN/BPS-15B Radar and DWS/CS Display Radar.

Credit Recommendation: In the vocational certificate category, 2 semester hours in radar maintenance laboratory (3/89).

NV-1715-1364

Trident Command and Control System (CCS) Electronics Technician Conversion

Course Number: A-102-0251.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (56 hours).

Exhibit Dates: 9/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the theory necessary to support the normal operation and mechanical component breakdown on Trident Radar Subsystems.

Instruction: Laboratory and hands on laboratory exercises in the operation and preventive maintenance on Transponder Test Set AN/UPM-136 and IFF equipment AN/UPX-28 (V).

Credit Recommendation: In the vocational certificate category, 1 semester hour in radar laboratory (12/89).

NV-1715-1365

Trident Defensive Weapons Ordinance Subsystem (DWOS) Replacement

Course Number: A-123-0176.

Location: Trident Training Facility, Bangor, Bremerton, WA; Trident Training Facility, Kings Bay, GA.

Length: 5 weeks (194 hours).

Exhibit Dates: 7/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to state the purpose of the command and control system (CCS), define the abbreviations and terms used with the CCS, state the operational characteristics and capabilities of the CCS, state the operational characteristics and capabilities of Defense Weapons Ordinance Subsystem (DWOS), perform alignment, adjustment, calibration and corrective maintenance on the torpedo launching system.

Instruction: Lecture and laboratory exercises on torpedo launching systems, ordinance handling equipment, command and control equipment and defensive weapons ordinance subsystems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electro/mechanical and pneumatics systems laboratory (3/89).

NV-1715-1366

Trident Navigation Subsystem Theory

Course Number: A-193-0345.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (77 hours).

Exhibit Dates: 6/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to understand the functions of the Trident Navigational Subsystem.

Instruction: Lectutes on the functional operation of the Trident Navigation Subsystems. Each of the 17 components of the navigation subsystem is covered.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/89).

NV-1715-1367

Navigation Control Console Mk 3 Mod 2 Maintenance

Course Number: A-193-0342.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (63 hours).

Exhibit Dates: 4/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the functional operation and of the Mk3 Mod 2 Navigation Control Console (NCC), and describe the , Control, Test logic and functual waterface circuitry of the NCC, and perform all authorized fault isolation an repair procedures an the NCC.

Instruction: Lecture and laboratory exercises supporting corrective maintenance procedures on the Mk3 Mod 2 navigational control console; specifically with respect to the: X-Y plotter, teleprinter, CNC controls, status displays and power supplies.

Credit Recommendation: In the vocational certificate category, 1 semester hour in applied electronics (control consoles).

NV-1715-1368

SONAR Sounding Set AN/BON-3J Maintenance

Course Number: A-193-0329.

Location: Trident Traning Facility, Bangor, Bremerton, WA.

Length: 3 weeks (92 hours).

Exhibit Dates: 11/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe in detail the construction features of the AN/BQN-3J sonar sounding set subassemblies, and describe in detail its functional operation; and perform authorized fault isolation and repair procedures on the equipment.

Instruction: Lectures and laboratory exercises supporting corrective maintenance procedures on the AN/BQN-3J sonar sounding set, specifically with respect to the system training unit, control display unit, transmitter receiver groups, sonar read-out, computer interface, digital depth measuring system, automatic power level control, external display interface and performance monitor/fault locator.

Credit Recommendation: In the vocational certificate category, 1 semester hours in applied techniques (sonar in electronics (sonar systems) (3/89).

NV-1715-1369

Ships Inertial Navigation System Theory and Maintenance II

Course Number: A-193-0322.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (72 hours).

Exhibit Dates: 12/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform routine check-out procedures on the MK2 Mod 6/7 Ships Inertial Navigation System (SINS), performs preventive and corrective maintenance on the MK2 Mod 6/7 SINS, and effectively utilize special tools an support documentation in isolating system faults.

Instruction: Lecture an laboratory exercises inthe describtion, function and corrective maintenance procedures of Inertial Navigation System power distribution and control loops.

Credit Recommendation: In the vocational certificate category, 2 semester hours in applied electronics (inertial navigation systems) (3/89).

NV-1715-1370

Trident Electrostatically Supported Gyro Monitor (ESGM) Navigation Aids Technician Replacement

Course Number: A-193-0309.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 17 weeks (730 hours).

Exhibit Dates: 4/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate, monitor and test navigational equipment.

Instruction: This course is comprised of A-193-0398 (NV-1715-1371) and A-193-0399 (NV-1715-1372). See individual exhibits.

Credit Recommendation: See individual exhibits (3/89).

NV-1715-1371

Trident Electrostatically Supported Gyro Monitor (ESGM) NAVAIDS Technician Replacements

Course Number: A-143-0398.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 13 weeks (566 hours).

Exhibit Dates: 4/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform all normal and casualty operations on the Navigation Subsystem, Sonar Sounding Set, Radio Navigation Set, Loran Receiving Set, ESGM and Navigation Equipment VAMP. Student will also perform preventative maintenance and fault isolation/repair procedures on various electronic navigation equipment.

Instruction: Lecture and laboratory exercises in the operation, testing, and maintenance of electronic navigation equipment including: central navigation computer, navigation control console, radio navigation set, LORAN Set, sonar sounding set, electrostatically supported gyro monitor (ESGM) and strategic weapons system (SWS) ventilation and power distribution.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronic navigation systems maintenance (3/89).

NV-1715-1372

Trident I-Navigation Subsystems

Course Number: A-193-0399.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 4 weeks (164 hours).

Exhibit Dates: 8/88–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform all normal and casualty procedures or the Trident I Navigation Subsystem; perform all preventive maintenance procedures on subsystem; and perform documented fault isolation and repair procedures on subsystems.

Instruction: Lecture and laboratory exercises in support of operational and maintenance efforts on strategic weapons system and navigation subsystems including: SWS ventilation, 400HZ, 600HZ and DC power supply and navigation subsystem interface and calibration.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electromedical systems technology (3/89).

NV-1715-1373

Trident I CNC Equipment Replacement

Course Number: A-193-0396.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 16 weeks (592 hours).

Exhibit Dates: 2/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform normal and casualty operationsl procedures on the navigation subsystem, perform preventive maintenance procedures on the subsystem level and perform documented fault isolation and repair procedures on the subsystem.

Instruction: Lecture and laboratory exercise in the operation testing and maintenance of navigation computer systems including: Navigation computer CP-890B/UYK, digital to digital and analog to digital converters, tape I/O and the navigation control counsol.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer technology, and 2 in laboratory digital systems maintenance (3/89).

NV-1715-1374

Advanced Theory of Ships Inertial Navigation Systems (SINS) Calibration

Course Number: A-193-0320.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 1 week (51 hours).

Exhibit Dates: 1/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform calibration procedures on Mk 2 Mod 6/7 Ships Inertial Navigation System.

Instruction: Lectures and laboratory exercises in the theory and detailed logic analysis of the Ships Inertial Navigation System, familiarization with the operation, special tools and support documentation, and repair procedures.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/89).

NV-1715-1375

Electrostatically Supported Gyro Monitor (ESGM) Calibration

Course Number: A-193-0331.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (63 hours).

Exhibit Dates: 11/81–Present.

Learning Outcomes: Upon completion of the course, the student will be able to calibrate the Electrostatically Supported Gyro Monitor (ESGM).

Instruction: Lecture and laboratory exercises in the operational TASKS concerned with calibration of ESGM system equipment.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (3/89).

NV-1715-1376

Advanced Theory and Maintenance I Ships Inertial Navigation System (SINS) Mk 2 Mods 6/7

Course Number: A-193-0321.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (72 hours).

Exhibit Dates: 4/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate the Mk 2 Mod 6/7 Ships Inertial Navigation System (SINS), perform preventive and corrective maintenance on the MK 2 Mod 6/7 SINS and effectively utilize special tools and support documents in isolating system faults.

Instruction: Lecture and laboratory exericises in advanced theory and maintenance of Ships Inertial Navigation Systems including: temperature control, monitoring alarm and support circuits; data monitoring, transmissions and gyro-monitoring circuits; and on-line diagnotic monitoring circuits.

Credit Recommendation: In the vocational certificate category, 2 semester hours in applied electronics (Inertial Navigational Systems) (3/89).

NV-1715-1377

Trident-I Fire Control Techician Replacement

Course Number: A-121-0412.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 23 weeks (532 hours).

Exhibit Dates: 5/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform normal and casualty operational procedures on the Mk98 Mod O Fire Control System and associated equipment, and perform preventive maintenance and fault isolation/repair procedures on the Mk98 Mod O Fire Control System and associated equipment.

Instruction: Lecture an laboratory exercises supporting operational and maintenance procedures on Fire Control Equipment including; computer network software, diagnostic disk file, magnetic tape flie, keyboard an display, printer subsystem, master clock, data base equipment, power and switching subsystems and optical alignment group.

Credit Recommendation: In the vocational certificate category, 4 semester hours in applied electronics fire control systems; In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electronics and 2 in computer technology (3/89).

NV-1715-1378

Trident-1 Missile Technician Conversion

Course Number: A-121-0440.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 23 weeks (562 hours).

Exhibit Dates: 6/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to transfer his skills as a missile technician to trident system including; perform standard test procedures on trident missile launching systems, and performs routine maintenance procedures on missile launching systems missile lauching systems, troubleshoot and isolate faults on the system and component level,

Instruction: Lecture an laboratory exercises on the theory, operation and troubleshooting of a missile launching system including the use of computer aided diagnostics and troubleshooting flow charts to the board level; pneumatic, hydraulic and electric power conversion subsystems and digital/computer components; the ability to use basic digital/computer theory and systems knowledge to troubleshoot to the component level is also emphasized.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electromedical systems (3/89); in the lower-division baccalaureate/associate degree category, 2 semester hours in digital systems maintenance laboratory (3/89).

NV-1715-1379

Trident I Ships Inertial Navigation System (SINS) Equipment

Course Number: A-193-0397.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 17 weeks (620 hours).

Exhibit Dates: 7/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to apply basic concepts of physics, electronics and electromechanical devices, and perform operating procedures on Ships Inertial Navigation System (SINS) MK 2 Mod 7 and related equipment, and perform preventive and corrective mai maintenance on SINS MK 2 Mod 7 and related equipment.

Instruction: Lecture and laboratory exercises in applying basic electronics, physics and computer science to support the operation and maintenance of Ships Inertial Navigation Systems. Specific applications include servo leops, gyros, power supplies, printer interfacing and computer operations.

Credit Recommendation: In the vocational certificate category, 2 semester hours in applied electronics (Inertial Navigation Systems Maintenance) (3/89). In the lower-division baccalaureate/associate degree category, 2 semester hours in physical science, and 2 semester hours in computer technology (3/89).

NV-1715-1380

Ships Inertial Navigation System (SINS) Mk2 Mod 7 Technician Replacement

Course Number: A-193-0307.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 21 weeks (784 hours).

Exhibit Dates: 7/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to oper-

ate, maintain and test SINS and associated equipment.

Instruction: This course is a combination course, composed of A-193-0397, (NV-1715-1379), and A-193-0399 (NV-1715-1372).

Credit Recommendation: See separate exhibits (3/89).

NV-1715-1381

Trident Central Navigation Computer Technician Replacement

Course Number: A-193-0308.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 20 weeks (756 hours).

Exhibit Dates: 2/83-Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform operational, maintenance, and testing functions required onboard the Trident class SSBN. Student will understand normal/casualty/alternate operation and employment of computers CP-8908/UYK, D/D converter, A/D converter, a magnetic tape unit, and other associated equipment.

Instruction: This is a combination course, consisting of A-193-0396 (NV-1715-0396) and A-193-0399 (NV-1715-1372). See separate exhibits.

Credit Recommendation: See separate exhibits for credit recommended.

NV-1715-1382

Terrier Mk 152 Computer Complex

Course Number: A-150-0085.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 19–20 weeks (784 hours).

Exhibit Dates: 11/88–Present.

Learning Outcomes: Upon completion of the course the student will understand the operation of a digital computer and associated I/O equipment including operating console, terminal, and data recorder; understand the instruction set of the computer and be able to write machine language programs which perform arithmetic, control and I/O tasks; maintain and troubleshoot the computer system using automated diagnostics and manual signal tracing routines.

Instruction: For this course before 11/88 see NV-1715-0391. Lectures and practical experience which cover the specific computer and auxilliary input/output equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer systems and organization, 3 in electronic systems troubleshooting and maintenance, and 3 in computer systems troubleshooting and maintenance (6/89).

NV-1715-1383

Fleet Ballistic Missile Navigation Maintenance NAVAIDS

Course Number: A-193-0037.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 3–4 weeks (128 hours).

Exhibit Dates: 7/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to test, align, and maintain several submarine navigational aids and optical test equipment.

Instruction: Lectures and practical exercises related to the maintenance of the specific equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hous in optical systems maintenance and 2 in electronic systems troubleshooting and maintenance (5/89).

NV-1715-1384

Tartar Weapons System Mk 74 Mod 6

Course Number: A-121-0183.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 10 weeks (400 hours).

Exhibit Dates: 3/88-Present.

Learning Outcomes: Upon completion of the course the student will be able to supervise the operation, testing, and maintenance of a guided missile control and firing system including radar, digital logic, and launching systems.

Instruction: Lectures and practical exercises which feature the specific equipment used in the weapon system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (6/89).

NV-1715-1385

Fire Control System Technician Mk 88 Mod 1 Replacement

Course Number: A-121-0245.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 27–28 weeks (1136 hours).

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to understand the organization of a computer system and to troubleshoot and repair a missile fire control system, including the computer, tape drive and printer.

Instruction: Lectures and practical exercises emphasizing the maintenance of the fire control system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance, 3 in computer systems troubleshooting and maintenance, and 2 in computer sytems and organization (6/89).

NV-1715-1386

AN/SPG-55B Mod 9 Radar Difference

Course Number: A-104-0194.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 3/88-Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and repair all parts of a specific radar system including transmitter, receiver, and signal processing circuits.

Instruction: Lectures and practical exercises with emphasis on the maintenance of the radar system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (6/89).

NV-1715-1387

Close-In Weapon System Mk 15 Block 0/1 Difference

Course Number: A-113-0095.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA; Fleet Training Center, San Diego, CA.

Length: 10 weeks (400 hours).

Exhibit Dates: 1/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and maintain a weapon system including digital equipment, solid state devices, and RF transmission, receiving, and processing equipment.

Instruction: Lectures and practical exercises related to the maintenance of the weapon system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (6/89).

NV-1715-1388

Close-In Weapon System Mk 15 Mod 11/14 Operation and Maintenance

Course Number: A-113-0114.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA; Fleet Training Center, San Diego, CA; Service School Command, Great Lakes, IL.

Length: 29 weeks (1160 hours).

Exhibit Dates: 1/89-Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and maintain a weapon system including digital equipment, solid state devices, and RF transmission, receiving, and processing equipment.

Instruction: Lectures and practical exercises related to the maintenance of the weapon system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (6/89).

NV-1715-1389

NATO Seasparrow Surface Missile System Officer

Course Number: A-2F-0055.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 3/89–Present.

Learning Outcomes: Upon completion of the course the student will supervise system maintenance, administration, and tactically employ a tactical missile system consisting of radar, signal processing, computer and aiming components.

Instruction: Lectures and practical exercises on the function and operation of the major subsystems.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course.

NV-1715-1390

3D Radar Search AN/SPS-39A

Course Number: A-104-0103.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 20-21 weeks (840 hours).

Exhibit Dates: 7/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate and maintain a military radar system and adaptive video processor.

Instruction: For this course before 7/88 see NV-1715-0233. Lectures and practical exercises in the operation, maintenance and alignment of radar system components.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in radar systems and 2 in electronic systems troubleshooting and maintenance (6/89).

NV-1715-1391

TARTAR WEAPONS DIRECTION SYSTEM (WDS) MK 4 WDE MK 1

Course Number: A-121-0029.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 16 weeks (640 hours).

Exhibit Dates: 9/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot a repair a weapons direction system to the component level.

Instruction: Lectures and practical exercises on troubleshooting and corrective maintence of the weapons system. For this course before 9/88 see NV-1715-1121.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (6/88).

NV-1715-1392

CENTRAL NAVIGATION COMPUTER (CNC) TECHNICIAN REPLACEMENT

Course Number: A-193-0392.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 12–13 weeks (512 hours).

Exhibit Dates: 7/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, troubleshoot, and repair a navigation computer and its peripherals.

Instruction: Lectures and practical exercises related to the computer system and to computer organization.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer systems troubleshooting and maintenance and 3 in computer systems and organization (6/89).

NV-1715-1393

SHIPS INERTIAL NAVIGATION SYSTEM (SINS) MK 2 MOD 6 EQUIPMENT TECHNICIAN REPLACEMENT

Course Number: 1-193-0391.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 17 weeks (680 hours).

Exhibit Dates: 9/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and maintain a submarine navigation system including computer, repeaters, test equipment, and navigation equipment.

Instruction: Lectures and practical exercises with an emphasis on troubleshooting the system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (6/89).

NV-1715-1394

NATO SEASPARROW 7M MAINTENANCE

Course Number: A-104-0204.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA; Combat System Technical Training Center, Mare Island, CA.

Length: 30 weeks (1200 hours).

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, maintain and troubleshoot a radar-directed computer-controlled missile system; understand the functions of the major system components including radar, signal processing, digital computer, and servomechanism aiming; perform hardware and software preventive maintenance using automated and manual test methods and equipment; troubleshoot and repair to the module level all systems.

Instruction: Lectures and practical exercises which prepare the student to operate, maintain, and troubleshoot complex electronic equipment. There is extensive troubleshooting experience.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance, 3 in computer systems troubleshooting and maintenance, 2 in computer systems and organization, 3 in radar systems, and 3 in control systems (6/89).

NV-1715-1395

STRATEGIC WEAPON SYSTEM COMMAND POSEIDON WEAPONS OFFICER

Course Number: A-2F-0031.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 3–4 weeks (144 hours).

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to understand the major systems which make up a missile fire control system, including digital computers and data transmission.

Instruction: Lectures and practical exercises on the operation of the major subsystems.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (6/89).

NV-1715-1396

TERRIER CG/DDG STANDARD MISSILE (ER) OFFICER ADVANCED

Course Number: A-2F-0061.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 3/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to supervise maintenance administration and employment of a missile fire control system including radar, computer, and launching subsystems.

Instruction: Lectures and practical exercises using the system's components.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (6/89).

NV-1715-1397

ELECTROSTATICALLY SUPPORTED GYRO MONITOR (ESGM) BACKFIT STRATEGIC WEAPON SYSTEM COMMAND REPLACEMENT/NAVIGATION

Course Number: A-2E-0039.

Location: Guided Missile School, Dam Neck, Virginia Beach, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will understand the basic principles of inertial navigation and the mechanical and electronic systems which make up a ship's inertial navigation system.

Instruction: Lectures and homework on the system.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/89).

NV-1715-1398

TRIDENT 1 BACKFIT STRATEGIC WEAPON SYSTEMS COMMAND REPLACEMENT

Course Number: A-2F-0050.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 3–4 weeks (144 hours).

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will understand and operate, at the command level, the major subsystems of a missile fire control system including computers and data transmission.

Instruction: Lectures and practical exercises in the function and operation of the major system components.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/89).

NV-1715-1399

FIRE CONTROL SYSTEM MK 88 MOD 2 ADVANCED TECHNICIAN

Course Number: A-121-0526.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 1–2 weeks (72 hours).

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform corrective maintenance on the cabling and intraconnections of a missile weapons system.

Instruction: Lectures and practical exercises on wirewrap techniques, soldering techniques, and missile weapons systems.

Credit Recommendation: In the vocational certificate category, 1 semester hour in soldering and wirewrap techniques (6/89).

NV-1715-1400

STRATEGIC WEAPONS SYSTEM ELECTRONIC A SCHOOL

Course Number: A-121-0142.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 13–14 weeks (544 hours).

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to recognize and utilize terms specific to electricity and electronics; use basic algebra and arithmetic including power of ten notation to analyze basic electric and electronic circuits for pertinent qualities; use multimeters, oscilloscopes, and signal generators to troubleshoot circuits; recognize circuit components by inspection; correctly assemble electronic and electric circuits using schematic diagrams; convert between number systems including decimal, octal, binary, hexadecimal, one's complement, and two's complement; analyze digital circuits including and/or gates and flip-flops; analyze counters, encoders, decoders, multiplexers, adders, and registers. The student will have a basic understanding of the physics of linear and circular motion, and the electromechanical devices for the sensing and control of such motion; understand the fundamental operation of synchros, resolvers, inductosyns, and servomechanism systems; be able to troubleshoot and repair, to the major component level, electromechanical servomechanism systems.

Instruction: School includes lectures and laboratories and is divided into three sections: basic electricity and electronics (7 weeks), computer fundamentals (4 weeks), and special electronics and mechanical skills

(2-3 weeks). For this course before 3/88 see NV-1715-0705.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electronics laboratory, 2 in DC circuits, 2 in AC circuits, 3 in digital principles, 3 in solid state electronics, 3 in computer systems and organization, and 3 in control systems (6/89).

NV-1715-1401

Electronic Special Circuits

Course Number: A-121-0529.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 5/88-Present.

Learning Outcomes: Upon completion of the course the student will be familiar with electron tubes (vacuum tubes), basic electronic communications, and radar systems.

Instruction: Very little laboratory work is required. The students learn terminology and basic facts. Course prepares them for further study.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electronic communication (6/89).

NV-1715-1402

Central Navigation Computer (CNC) Technician

(Computer Intermediate Level Maintenance)

(Fleet Ballistic Missile Tender Navigation Maintenance Computer)

Course Number: A-193-0038.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 2-3 weeks (96 hours).

Exhibit Dates: 3/88-Present.

Learning Outcomes: Upon completion of the course the student will be able to maintain, troubleshoot, and repair components of electromechanical control systems including servomechanisms and attendent gear trains using electronic and mechanical analysis test sets.

Instruction: Lectures and laboratory exercises involving the use of a servomechanism test set and attendent xy recorder and electronic test equipment. For this course before 3/88 see NV-1715-0182.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in servomechanism/robotics equipment troubleshooting, maintenance and repair (6/89).

NV-1715-1403

NATO Seasparrow 7M Difference Maintenance

Course Number: A-104-0203.

Location: Guides Missiles School, Dam Neck, Virginia Beach, VA; Combat Systems Technical Training Center, Mare Island, CA.

Length: 6-7 weeks (256 hours).

Exhibit Dates: 3/88-Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, troubleshoot, and repair a guided missile fire control system, launch system, and associated computer.

Instruction: Lectures and practical exercises with emphasis on repair and maintenance of a surface missile system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (6/89).

NV-1715-1404

NAVAIDS Equipment Technician Replacement

Course Number: A-193-0393.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 16 weeks (640 hours).

Exhibit Dates: 3/88-Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and repair a sonar set, a radio navigation set, a frequency standard, a loran receiving set, and a gyro monitor.

Instruction: Lectures and practical exercises with emphasis on maintenance of the specific submarine navigation system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (6/89).

NV-1715-1405

AN/SQR-15 Maintenance Training

Course Number: J-130-0101.

Location: Fleet Antisubmarine Warfare Training Center-Atlantic, Norfolk, VA.

Length: 15 weeks (600 hours).

Exhibit Dates: 3/87-Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and repair a towed-array sonar system and its associated subsystems.

Instruction: Lectures and practical exercises on the sonar system with emphasis on corrective maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (6/89).

NV-1715-1406

Universal ILM Tender

Course Number: A-121-0554.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 21 weeks (840 hours).

Exhibit Dates: 1/89-Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and perform preventive and corrective maintenance on specific missile systems.

Instruction: Instruction includes classroom and laboratory work on the operation of electrical and electronic systems and their interface with other systems required to launch missiles. Includes procedures for fault isolation and and correction on these systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in mechanical systems maintenance; in the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (6/89).

NV-1715-1407

Vertical Laucher System Mk 41

Course Number: A-121-0522.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA; Naval Ship Weapons Engineering Station, Port Hueneme, CA; Fleet Training Center, San Diego.

Length: 19-20 weeks (784 hours).

Exhibit Dates: 3/89-Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and maintain the computers, tape unit, terminals, control systems, and mechanical systems that comprise a missile launch system.

Instruction: Lectures and practical exercises on all parts of the missile launch system. Emphasis is placed on troubleshooting and corrective maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance and 3 in computer systems troubleshooting and maintenance (6/89).

NV-1715-1408

Mk 152 Digital Computer

Course Number: A-150-0079.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 19-20 weeks (784 hours).

Exhibit Dates: 11/88-Present.

Learning Outcomes: Upon completion of the course the student will understand the operation of a digital computer and associated I/O equipment including operating console, terminal, and data recorder; understand the instruction set of the computer and be able to write machine language programs which perform arithmetic, control and I/O tasks; maintain and troubleshoot the computer system using automated diagnostics and manual signal tracing routines.

Instruction: For this course before 11/88 see NV-1715-0391. Lectures and practical experience which cover the specific computer and auxilliary input/output equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer systems and organization, 3 in electronic systems troubleshooting and maintenance, and 3 in computer systems troubleshooting and maintenance (6/89).

NV-1715-1409

AN/SQR-17A(V) Difference Maintenance

Course Number: K-130-0277.

Location: Fleet Antisubmarine Training Center-Atlantic, Norfolk, VA; Fleet Antisubmarine Warfare Training Center, San Diego, CA.

Length: 5-6 weeks (230 hours).

Exhibit Dates: 9/88-Present.

Learning Outcomes: Upon completion of the course the student will be able to maintain, troubleshoot, and repair a specific sonar system.

Instruction: Lectures and practical exercises with emphasis on corrective maintenance of the sonar system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (6/89).

NV-1715-1410

Miniature Electronics Repair

Course Number: C-100-3182.

Location: Naval Air Station, Rota, Spain; Naval Air Station, Atsugi, Japan; Naval Air Station, Whidbey Island, WA. Naval Air Station, El Toro, CA. Naval Air Station, Moffett Field, CA. Naval Air Station, Miramar, CA. Naval Air Station, Lemoore, CA. Naval Air Station, Cecil Field, FL. Naval Air Station, Norfolk, VA.

Length: 6 weeks (200 hours).

Exhibit Dates: 2/86-Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform miniture repairs to printed circuit boards, including removal and replacement of laminate material; removal and replacement of conducting tracks; removal and replacement of conformal coatings; install lead wires on various types of terminations and connectors; and use miniature repair equipment including those operations which require microscopic viewing.

Instruction: Lecture and lab experience covering printed circuit board construction; component types and mounting methods; electronic sounders and fluxer; removal and replacement of discrete components and multi-lead through-hole devices; removal and replacement of surface mount devices; laminated board and trace repair; and lead preparation and connection techniques.

Credit Recommendation: In the vocational certificate category, 2 semester hours in repair techniques (8/89).

NV-1715-1411

AN/AAS-33A Detecting and Ranging Set Receiver Group/Reciprocating Compressor/Infrared Indicator Intermediate Maintenance Course.

Course Number: C-102-3980.

Location: Naval Air Station, Whidbey Island, WA.

Length: 9 weeks (360 hours).

Exhibit Dates: 2/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform under supervision, intermediate maintenance on the AN/AAS-33A Infrared/Laser Detecting and ranging set, using the AN/AAM-60 electro-optical systems test set.

Instruction: Lectures and laboratory assignments covering operation, maintenance, troubleshooting and repair of the following systems/subsystems: the AN/AAM-60 Electro-optical test set with digital logic, phase locked loops, CRT display electronics and signal processing, servo system electronics, and an HP 218B 16 bit micro-computers; the AN/AAS-33A detecting and ranging receiver with IR detectors, optics, cooling, vacuum and signal processing; 4 ginbolled gyro stablized platform with synchros, resolvers and phase-locked loops; and laser generation, transmitting, receiving and signal processing.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electro-optical systems maintenance (8/89).

NV-1715-1412

OQ-35A/ASM-347 (V) Programmer Comparator Intermediate Maintenance

Course Number: C-198-3011.

Location: Naval Air Station, Whidbey Island, WA. Naval Air Station, Oceana, VA.

Length: 11 weeks (320 hours).

Exhibit Dates: 2/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to list the input power requirements for the Programmer Comparator (PC); demonstrate a knowledge, in writing, of the functional operation of the Analog-to-Digital Converter to include solving theoretical troubleshooting problems; state the function and modes of operation of the Calibration Interface Adapter; trace signal from one point in the PC to another; use applicable publications to isolate and correct faults in the PC; develop programs in machine code, to sequence the PC through a sampling cycle.

Instruction: Lecture and laboratory exercises on the OQ-35A/ASM-347 (V) programmer-comparator.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in programmable controllers (8/89).

NV-1715-1413

C-8610/AWE Armament Control Panel Intermediate Maintenance Course.

Course Number: C-646-3767.

Location: Naval Air Station, Whidbey Island, WA; Naval Air Station, Oceana, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 4/77–Present.

Learning Outcomes: Upon completion of the course, the student will be able to maintain and repair the C-8610/AWE armament control panel and operate the associated SRA maintenance adapter set.

Instruction: Lecture and lab experience on the armament control panel and associated controls and indicators, and the SRA maintenance adapter SRT.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (8/89).

NV-1715-1414

Electro-Optics/Cryogenics Fundamentals

Course Number: C-102-3981.

Location: Naval Air Station, Whidbey Island, WA; Naval Air Station, Oceana, VA; Naval Air Station, Moffet Field, CA.

Length: 2 weeks (59 hours).

Exhibit Dates: 8/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to effectively support, under supervision, intermediate maintenance on electro-optical and cryogenic systems. The student will demonstrate a knowledge, in writing, of the properties of electromagnetic waves and beam dynamics, relationships of the different frequencies of light and color, principles of wave optics, principles of light polarization, principles and definitions of lens optics, fundamentals of the partical theory of light, basic atomic structure and energy levels, principles of photon absorption and emission, basic characteristics of laser operation, and introduction to cryogencis.

Instruction: Lecture and practical exercises in the theory, operation, maintenance and troubleshooting of electro-optical and cryogenic systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in applied physics (8/89).

NV-1715-1415

GT-3 OK-441/ALM Controller Intermediate Maintenance

Course Number: C-102-4743.

Location: Naval Air Station, Whidbey Island, WA.

Length: 4 weeks (120 hours).

Exhibit Dates: 7/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to state the four main sections of the HP-1000 computer and their functions. Enter machine language programs via the computer front panel. Perform the disk cartridge load and unload procedure. Demonstrate knowledge of how to test troubleshoot, align, adjust and maintain the dual disk drive unit. Perform HP2645A Display Terminal operation, testing and maintenance. Complete a statement descriving the operating system to include its purpose, subdivisions, utilities programs system prompts, command structure and security codes.

Instruction: Lecture and laboratory exercises in computer operations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer operations (8/89).

NV-1715-1416

OJ-511/ALM Exciter Test Station Intermediate Maintenance

Course Number: C-102-4745.

Location: Naval Air Station, Whidbey Island, WA.

Length: 5 weeks (160 hours).

Exhibit Dates: 11/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform under close supervision intermediate maintenance including system analysis and troubleshooting using computer-controlled diagnostics, on a test station which uses the IEE-488 bus to interface various test equipments such as Digital Multi-meters, spectrum analyzers, timers and oscilloscopes to the computer and item under test.

Instruction: Lecture and laboratory activities covering functional operation, circuit operation, testing using computer diagnostics and troubleshooting and repair of the OJ-511/ALM Exciter Test Station.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in maintenance repair of computer controller test equipment (8/89).

NV-1715-1417

AN/USM-467 Radar Communication Test Station Operator Intermediate Maintenance

Course Number: C-198-3046.

Location: Naval Air Station, Whidbey Island, WA. Naval Air Station, Oceana, VA.

Length: 4 weeks (148 hours).

Exhibit Dates: 1/88–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate and do minor hardware and software maintenance on a Radar Communications Test Station.

Instruction: Classroom lectures and laboratory application on operation and programming of a Radar Communications Test Station. Subjects covered and tasks mastered include operation of system; knowledge of real time, executive (RTE) operating system, self test programs and operator usage; and knowledge of and programming facility with the ATLAS (Abbreviated Languages for All Systems) language, as applied to a real time control system.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (8/89).

NV-1715-1418

AN/USM-467 Radar Communications Test Station Maintainer Intermediate Maintenance

Course Number: C-198-3047.

Location: Naval Air Station, Whidbey Island, WA. Naval Air Station, Oceana, VA.

Length: 9 weeks (315 hours).

Exhibit Dates: 1/88–Present.

Learning Outcomes: Upon completion of the course, the student will be able to maintain, troubleshoot and repair down to the component level, using self test diagnostic and coventional test equipment a Radar Communications Test Station.

Instruction: Classroom lecture and laboratory exercise covering the theory of operation and circuitry of various devices such as power supplys, digital computers, disc controller, dual disk drive, programmable multifunction meter, digial word generator, color graphics unit, bus test unit, programmable oscilloscope, multiple matrix switch, syncro/reslover, auto function generator, auto spectrum analyser, RF Interface unit, signal analyser, HP-436A power meter and rebidium oscillator. Also covered is the use of the IEE-488 bus to control and interface the above devices and the use of system programming languages.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer interfacing (8/89).

NV-1715-1419

AN/APM-375 Mini-Sace Search Radar Test Console AN/APQ-156 and AN/APS-130 Search Radar Systems and MSRTC Tested AN/AAS-33A WRAS Intermediate Maintenance Course

Course Number: C-104-3771.

Location: Naval Air Station, Whidbey Island, WA; Naval Air Station, Oceana, VA.

Length: 19 weeks (560 hours).

Exhibit Dates: 10/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to understand the AN/APM-375 Mini-Sace Search Radar Test Console (MSRTC), the AN/AP0-156 and the AN/APS-130 Search Radar Systems and MSRTC-tested AN/AAS-33A WRAS, including system analysis and troubleshooting techniques. The student will be able to perform intermediate level maintenance under close supervision.

Instruction: Lecture and lab covering the AN/APM-375 Mini-Sace Search Radar test console functional analysis; the AN/AAS-33A detecting and ranging set functional analysis; and the AN/AP0-156 and AN/APS-130 Search Radar functional analysis.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in analog and power supply circuit analysis; 1 in troubleshooting techniques.

NV-1715-1420

IP-722F/AVA-1 Analog Display Indicator Intermediate Maintenance

Course Number: C-198-3762.

Location: Naval Air Station, Whidbey Island, WA.

Length: 6 weeks (200 hours).

Exhibit Dates: 5/88–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform under close supervison intermediate maintenance on a video display subsystem including power supplies, signal generating, processing and shaping circuits; video amplifiers, and analog to digital conversion.

Instruction: Lecture on basic operation and circuits and practical laboratory troubleshooting covering test set up and procedures; low voltage and high voltage power supplies; video circuits and indicator lamps; generation of field scans, buffering, lineority and drive signals; video amplifier; analog to digital conversion circuits; timers; symbols generation for flight path, command heating, alphanumerics, and other externally input display, symbols; and a video mixer.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in video interfacing (8/89).

NV-1715-1421

OJ-615/ALM Countermeasures Test Console Intermediate Maintenance

Course Number: C-198-3763.

Location: Naval Air Station, Whidbey Island, WA.

Length: 5 weeks (160 hours).

Exhibit Dates: 10/88–Present.

Learning Outcomes: Upon completion of the course, the student will be able to understand the theory of the OJ-615/ALM countermeasures test console system analysis and troubleshooting techniques; to perform, under close supervision, test station maintenance in an intermediate maintenance work center.

Instruction: Lecture and Laboratory applicaton related to transmitter test station theory, including: power supplies and line filters; test equipment; IEEE-488 Bus Analysis; Matrix Switch.

Credit Recommendation: Credit is not recommmended because of the limited, specialized nature of the course (8/89).

NV-1715-1422

AN/ALR-50 Support Equipment Intermediate Maintenance

Course Number: C-102-3097.

Location: Naval Air Station, Whidbey Island, WA.

Length: 4 weeks (112 hours).

Exhibit Dates: 3/77–Present.

Learning Outcomes: Upon completion of the course, the student will be able to analyze the AN/ALM-140 test set system by tracing signal flow through a system block diagram and will state the basic function of each subsystem (plug-in module). The student will isolate instructor-induced troubles down to the component level in the following subsystems: tone generator, formal generator, code generator, sequence generator, control board, interface analyzer board and timer and analog interface board. The student will also be able to calibrate and align test set.

Instruction: Classroom lecture and laboratory application on the operation and maintenance of the AN/ALM-140 test set system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semseter hours in electronic systems troubleshooting and maintenance

NV-1715-1424

Advanced First Term Avionics, Class A1

Course Number: C-100-2010.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 11 weeks (437 hours)

Exhibit Dates: 4/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot, test and maintain, under minimum supervision, navigation, communication and radar systems.

Instruction: Lectures and practical exercises in AC and DC circuits, resonance, time constants, decibels, ideal transistors, transistor theory including biasing, load line analysis, equivalent circuits, RC, transformers, direct coupled, feedback, video, and power amplifiers, power supplies, regulators, wave-shaping circuits, oscillators, fundamentals of computer logic and systems, with emphasis on maintenance of equipment, microwave principles including characteristics of transmission lines, waveguides, cavities, antennas, microwave tubes and circuits, fundamentals of AM, FM, and SSB, and block diagrams and operation of radar and navigation equipment with emphasis on maintenance and repair.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in AC circuits, 3 in active devices and circuits, and 3 in communications electronics (9/89).

NV-1715-1425

AN/FPN-63(V) Maintenance, Class C1

Course Number: C-103-2037.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 10 weeks (400 hours).

Exhibit Dates: 1/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to maintain and troubleshoot the precision approach radar system and turntable system.

Instruction: Lectures and practical exercises in electronic systems, process of timing devices, transmitters, receivers, indicators, turntables, power circuits, radar alignment, and systems troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in radar systems and 3 in computer systems troubleshooting and maintenance (9/89).

NV-1715-1426

AN/GPN-27 Maintenance, Class C1

Course Number: C-103-2036.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 9 weeks (360 hours).

Exhibit Dates: 6/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform preventive maintenance on an airport surveillance radar system.

Instruction: Lectures and practical exercises in radar systems and their controls, power supplies, transmitters, receivers, AC power distribution, system alarm/fault logic synchronizers, and preventive maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in radar systems and 4 in electronic communications (9/89).

NV-1715-1427

AN/SPN-35A Maintenance, Class A1

Course Number: C-103-2012.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 7–8 weeks (312 hours).

Exhibit Dates: 9/82–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, test, troubleshoot, and perform preventive and corrective maintenance on a radar system.

Instruction: Lectures and practical exercises in electronic block diagrams, power distribution, power supplies, antenna control and drive circuits, azimuth and elevation controls, antenna alignment, radio frequency monitors, IF and video amplifiers, receivers and transmitters, sweep circuits, trigger delay generators, control computations and target generators, and special emphasis on system troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (9/89).

NV-1715-1428

AN/SPN-41 Maintenance, Class C1

Course Number: C-103-2023.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 4-5 weeks (176 hours).

Exhibit Dates: 7/83-Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, test, troubleshoot and repair radar systems.

Instruction: Lectures and practical exercises in power distribution, elevation drives, azimuth drives, antenna alignment, synchro/servo fundamentals, transmitter stabilization, digital logic and emphasis in radar system troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in radar system (9/89).

NV-1715-1429

AN/SPN-42A Maintenance, Class C1

Course Number: C-103-2013.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 22 weeks (880 hours).

Exhibit Dates: 1/83-Present.

Learning Outcomes: Upon completion of the course the student will be able to operate and maintain an all weather carrier landing system including its computers and subsystems.

Instruction: Lectures and practical exercises in radar systems, controls, operation, DC power distribution, radar subsystems, data stabilization subsystems, control and monitoring equipment, input and output buffers, data link monitors. Includes systems analysis and ability to isolate and repair faults. Includes console alignment, encoder alignment, radar alignment, computer maintenance procedure, machine language programming, computer subsystem power supplies, control logic circuiting, program translation, computer diagnostic tests, and fault diagnosis using diagnostic programs.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in computer operation, 8 in computer systems and organization, and 4 in radar systems (9/89).

NV-1715-1430

AN/SPN-43A Maintenance, Class C1

Course Number: C-103-2014.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 4-5 weeks (176 hours).

Exhibit Dates: 2/87-Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, test, troubleshoot, and repair a radar system.

Instruction: Lectures and practical exercises in block diagrams, power supplies, power distribution, high voltage circuits, oscillators, amplifiers, frequency control, stabilization relay circuits and azimuth drive and elevation tilt circuits. Emphasis is placed on practical exercises and troubleshooting laboratories.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in radar systems (9/89).

NV-1715-1431

AN/SPN-44 Maintenance, Class C1

Course Number: C-103-2024.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 3 weeks (104 hours).

Exhibit Dates: 2/84-Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, test, troubleshoot, and repair a radar system.

Instruction: Lectures and practical exercises in power distribution, low and high voltage power supplies, receivers and transmitters, Doppler processors, servo systems, recorders and indicators. Emphasis is placed on radar systems and troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in radar systems (9/89).

NV-1715-1432

AN/TPX-42A Basic Direct Altitude Identity Readout (DAIR) Maintenance, Class, C1.

Course Number: C-103-2034.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 7 weeks (280 hours).

Exhibit Dates: 3/84-Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, test, troubleshoot, and repair the Direct Altitude Identity Readout system.

Instruction: Lectures and practical exercises in the operation and basic maintenance of the radar system. Topics include semiconductor devices, logic devices, powers supplies, coders, receivers, transmitters, analog to digital converters, processor operation and troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance and 1 in radar systems (9/89).

NV-1715-1433

AN/TPX-42A(V)5 Direct Altitude Identity Readout (DAIR) Maintenance, Class C1

Course Number: C103-2028.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 5-6 weeks (208 hours).

Exhibit Dates: 3/87-Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, test, troubleshoot, and repair the Direct Altitude Identity Readout system.

Instruction: Lectures and practical exercises in the operation and maintenance of the radar system. Topics include semiconductors, power supplies, digital sweep generator, data processor memory circuits, and troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (9/89).

NV-1715-1434

AN/TPX-42A(V)8 Carrier Air Traffic Control Center (CATCC) Direct Altitude Identity Readout (DAIR) Maintenance Class C1

Course Number: C-103-2033.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 9 weeks (360 hours).

Exhibit Dates: 5/88-Present.

Learning Outcomes: Upon completion of the course the student will be able operate, test, troubleshoot and repair a radar system.

Instruction: Lectures and practical exercises in control and maintenance panels, maintenance procedures, electrostatic devices, block diagrams, fault isolation, circuit analysis, and keyboard familiarization. Special emphasis is placed on troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (9/89).

NV-1715-1435

AN/TPX-42A(V)10 Radar Air Traffic Control Facility (RATCF) Direct Altitude Identity Readout (DAIR) Maintenance, Class C1

Course Number: C-103-2035.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 7-8 weeks (296 hours).

Exhibit Dates: 4/88-Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, test, troubleshoot, and repair a radar system.

Instruction: Lectures and practical exercises in introduction to computers, programming, console operations, power supplies, circuit analysis, and direct memory access. Emphasis is placed on troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (9/89).

NV-1715-1436

Antisubmarine Warfare Operator, Class A1

Course Number: C-210-2010.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 10-11 weeks (436 hours).

Exhibit Dates: 5/85-Present.

Learning Outcomes: Upon completion of the course the student will be able to perform the duties of an antisubmarine warfare operator.

Instruction: Lectures and practical exercises in radar systems, including plotting codes and tactics; sonar and sonar operations; and the fundamentals of oceanography.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in oceanography and 1 in radar systems (9/89).

NV-1715-1437

Aviation Ordnance, Class A1

Course Number: C-646-2010.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 10–11 weeks (415 hours).

Exhibit Dates: 10/88–Present.

Learning Outcomes: Upon completion of the course the student will have the basics skills which lead to fulfillment of technical requirements of apprentice aviation ordnanceman.

Instruction: Lectures and laboratories in mathematics, hardware, use of tools and special tools, safety, electricity to include series, parallel, and series/parallel circuits, measuring devices, troubleshooting, corrosion control, ammunition and magazines, ordnance, aircraft guns, guided missiles, and their functions, operation and safety.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in DC circuits (9/89).

NV-1715-1438

Avionics Intermediate, Class C7

Course Number: C-100-2012.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 30–31 weeks (1225 hours).

Exhibit Dates: 10/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to maintain and repair electronic, avionic, digital, radar and communication systems.

Instruction: Lectures and laboratories in mathematics, physics, electronic devices and systems, digital computer systems, communication and microwave principles, wave form devices, radar principles, systems analysis, avionics principles, servomechanisms, and test equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in semiconductor devices, 4 in AC ciruits, 4 in digital computers, 3 in digital fundamentals, 3 in communications electronics, 4 in radar systems, 2 in avionic systems, and 1 in physics (9/89).

NV-1715-1439

Avionics Technician, Class A1

Course Number: C-100-2013.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: *Version 1:* 26 weeks (1040 hours). *Version 2:* 23 weeks (884 hours).

Exhibit Dates: *Version 1:* 4/89–Present. *Version 2:* 10/86–3/89.

Learning Outcomes: *Version 1:* Upon completion of the course the student will be able to operate, maintain, and troubleshoot solid state devices, radar systems, and electrical and electronic systems with little supervision. *Version 2:* Upon completion of the course the student will be able to operate, maintain, and troubleshoot communication radar, and electrical and electronic systems.

Instruction: *Version 1:* Lectures and laboratories in mathematics, computer, electrical, electronic, communication and radar systems. Included are the fundamentals of amplitude and frequency modulation, receiver circuits, use of test equipment, and troubleshooting to the component level. Topics include RF/IF and radio amplifiers, mixers, oscillators, detecters, modulators, and power supplies. Includes introduction to digital logic, principles and circuits, as well as to the organization, programming and troubleshooting of basic digital computers. Also includes AC and DC fundamentals, semiconductor devices, and electronic system troubleshooting and repair. Also includes lectures and laboratories in the troubleshooting and repair of radar systems. *Version 2:* Lectures and laboratories in mathematics, computer, electrical, electronic, communication and radar systems. Included are the fundamentals of amplitude and frequency modulation, receiver circuits, use of test equipment, and troubleshooting to the component level. Topics include RF/IF and radio amplifiers, mixers, oscillators, detecters, modulators, and power supplies. Includes introduction to digital logic, principles and circuits, as well as to the organization, programming and troubleshooting of basic digital computers. Also includes AC and DC fundamentals, semiconductor devices, and electronic system troubleshooting and repair. Also includes lectures and laboratories in the troubleshooting and repair of radar systems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in shop mathematics; in the lower-division baccalaureate/associate degree category, 6 semester hours in communications electronics, 4 in computer organization, 4 in microprocessors, 4 in computer systems troubleshooting and maintenance, and 3 in radar systems (9/89). *Version 2:* In the vocational certificate category, 3 semester hours in shop mathematics; in the lower-division baccalaureate/associate degree category, 6 semester hours in communications electronics, 4 in computer organization, 4 in computer systems troubleshooting and maintenance and 4 in electronics systems troubleshooting and maintenance (9/89).

NV-1715-1440

Avionics Technician, Class A1

Course Number: C-100-2014.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 8–9 weeks (344 hours).

Exhibit Dates: 4/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to use test equipment to perform circuit analysis.

Instruction: This course is made up of the first 8 weeks, 3 days of the AVA school (NV-1715-1439). Lectures and practical exercises in the fundamentals of DC and AC circuits including analog and digital meter principles and use, principles of transformers, bridge circuits and circuit analysis, and technical methematics.

Credit Recommendation: In the vocational certificate category, 3 semester hours in shop mathematics; in the lower-division baccalaureate/associate degree category, 1 semester hour in DC circuits and 1 in AC circuits (9/89).

NV-1715-1441

Marine Air Traffic Control
Communications Technician,
Class C1

Course Number: C-103-2032.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 30–31 weeks (1216 hours).

Exhibit Dates: 6/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, test, troubleshoot, and repair communications systems and data processing equipment.

Instruction: Lectures and laboratories in analog electronic components and circuits including semiconductors, diodes, transistors, power supply filters and rectifiers, amplifiers, oscillators, multivibrators, mixers, modulators, antennas, and gain and frequency control. Also included: theory of digital components and circuits, including logic gates, integrated circuits, flip-flops, I/O devices, memory devices, and microprocessors. Emphasis is placed on fault isolation and repair of equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in electronic devices and circuits, 4 in digital devices and circuits, 2 in computer principles, and 2 in electronic systems troubleshooting and maintenance (9/89).

NV-1715-1442

Marine Air Traffic Control
Navigational Aids Technician,
Class C1

Course Number: C-103-2030.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 33–34 weeks (1336 hours).

Exhibit Dates: 6/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, test, troubleshoot, install, and repair navigation equipment and data processing equipment.

Instruction: Lectures and laboratories in analog electronic components, including semiconductors, diodes, transistors, power supply filters and rectifiers, oscillators, multivibrators, mixers, modulators, antennas, and gain and frequency control. Also includes digital theory including logic gates, integrated circuits, flip-flops, I/O devices, memory devices, and microprocessors. Emphasis is places on troubleshooting navigation aids systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in electronic devices and ciruits, 4 in digital devices and circuits, 2 in computer principles, and 2 in electronic systems troubleshooting and maintenance (9/89).

NV-1715-1443

Marine Air Traffic Control Radar
Technician, Class C1

Course Number: C-103-2031.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 35–36 weeks (1432 hours).

Exhibit Dates: 3/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, test, troubleshoot, install, and repair radar equipment and data processing equipment.

Instruction: Lectures and laboratories in, analog electronic components, including semiconductors, diodes, transistors, power supply filters and rectifiers, oscillators, multivibrators, mixers, modulators, antennas, and gain and frequency control. Also includes digital theory including logic gates, integrated circuits, flip-flops, I/O devices, memory devices, and microprocessors. Emphasis is places on troubleshooting radar systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in electronic devices and ciruits, 4 in digital devices and circuits, 2 in computer principles, and 6 in electronic systems troubleshooting and maintenance (9/89).

NV-1715-1444

BASIC ELECTRONICS RATE TRAINING

Course Number: A-100-0089.

Location: Submarine School, Groton/New London, CT.

Length: 14 weeks (560 hours).

Exhibit Dates: 6/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to make mathematical calculations and solve problems using basic algebraic and trigonometric methods; calculate voltages and currents in DC series and parallel circuits; calculate AC circuit variables in RL, RC, and RLC circuits; analyze the operation of solid state devices including diodes, bipolar transistors, and solid state circuits including power supplies, amplifiers, operational amplifiers, oscillators, and wave shapers; describe the operation of digital gates, flip-flops, counters, registers, adders, and A/D converters; and perform arithmetic in binary, octal, and hexadecimal numbering systems.

Instruction: Lectures and practical exercises on topics in basic technical mathematics and electronics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in technical mathematics, 2 in DC circuits, 3 in AC circuits, 3 in digital principles, and 6 in solid state electronics (10/89).

NV-1715-1445

AN/BRQ-1 AN/WYQ-1 COMBINED MAINTENANCE

Course Number: A-102-0128.

Location: Submarine School, Groton/New London, CT.

Length: 8 weeks (328 hours).

Exhibit Dates: 8/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, troubleshoot, repair and maintain HF receivers with emphasis on types of signal generation, frequencies, and inputs/outputs.

Instruction: Theory and laboratory exercises on the operation and maintenance of receivers.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (10/89).

NV-1715-1446

CRYPTOLOGIC MAINTENANCE TECHNICIAN AN/WLQ-4(V) SUBSYSTEM MAINTENANCE PIPELINE

Course Number: A-233-0052.

Location: Submarine School, Groton/New London, CT.

Length: 27 weeks (1080 hours).

Exhibit Dates: 8/83–Present.

Learning Outcomes: Upon completion of this pipeline the student will be able to peform subsurface cryptologic maintenance.

Instruction: This pipeline course consists of A-150-0267, AN/UYK-20(V) Basic Maintenance; A-233-0049 AN/WLQ-4(V) (E-Suite) Combined Maintenance; A-102-0128, AN/BRQ-1 AN/WYQ-1 Combined Maintenance; and A-233-0050, AN/WLQ-4(V) N-Suite Combined Maintenance. Please see the exhibits under the numbers above for further information.

Credit Recommendation: Please refer to the courses listed above for credit recommendations (10/89).

NV-1715-1447

AN/WLQ-4(V) N-SUITE COMBINED MAINTENANCE

Course Number: A-233-0050.

Location: Submarine School, Groton/New London, CT.

Length: 7 weeks (270 hours).

Exhibit Dates: 6/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot, repair, and maintain a wideband recorder, a frequency converter, an FM multiplexer, and a signal distribution unit.

Instruction: Lectures and laboratories with emphasis on equipemnt maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (10/89).

NV-1715-1448

AN/WLQ-4(V) (E-SUITE) COMBINED MAINTENANCE

Course Number: A-233-0049.

Location: Submarine School, Groton/New London, CT.

Length: 10 weeks (440 hours).

Exhibit Dates: 10/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot, repair and maintain a navigation system that includes antennas and signal processing equipment.

Instruction: Lectures and practical exercises related to the maintenance of a naval navigation system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (10/89).

NV-1715-1449

APPLICATION OF STATIC CONTROL DEVICES

Course Number: A-662-0139.

Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC; Guided Missile School Detachment, Dam Neck, VA; Submarine Training Facility, San Diego, CA; Submarine Training Center, Pearl Harbor, HI.

Length: 2 weeks (72 hours).

Exhibit Dates: 2/87–Present.

Learning Outcomes: Upon completion of the course the student will be able describe a wide variety of applications of solid state conponents, basic measurement and control circuits, and logic circuits. Student will analyze solid state circuits function, determine circuit outputs, and troubleshoot devices.

Instruction: Lectures, demonstrations and laboratory exercises in applied solid state circuits.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in DC machinery and 1 in electronic systems troubleshooting and maintenance (10/89).

NV-1715-1450

MK 19/27 ADVANCED THEORY AND MAINTENANCE

Course Number: A-670-0051.

Location: Submarine School, Groton/New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 4 weeks (160 hours).

Exhibit Dates: 9/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to describe basic feedback theory including synchros and solid state electronic control systems as applied to multidimensional orientation measurement systems. Student will be able to analyze circuit diagrams for function and troubleshoot and repair functions on the control systems, power supplies, and measurement systems.

Instruction: Lectures, demonstrations, and laboratory exercises on the above areas using a sophisticated gyrocompass as a physical device.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours lecture and 1 semester hour laboratory in electromechanical systems (10/89).

NV-1715-1451

COMBINED INTEGRATED SUBMARINE COMMUNICATIONS ANTENNA SUBSYSTEM MAINTENANCE

Course Number: A-101-0137.

Location: Submarine School, Groton/New London, CT.

Length: 5–6 weeks (161 hours).

Exhibit Dates: 8/88–Present.

Learning Outcomes: Upon completion of the course the student will operate and maintain basic submarine loop and whip antennas.

Instruction: Lectures and practical exercises on the antennas.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (10/89).

NV-1715-1452

ANALOG-TO-DIGITAL CONVERTER MK 65 MODS 1 AND 2 MAINTENANCE

Course Number: A-193-0253.

Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC; Trident Training Facility, Bangor, WA.

Length: 1–2 weeks (57 hours).

Exhibit Dates: 9/83–Present.

Learning Outcomes: Upon completion of the course the student will be able to describe functional components of specialized analog to digital converter and be familiar with maintenance procedures.

Instruction: Lectures and laboratories on the converter.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (10/89).

NV-1715-1453

NAVIGATION CONTROL CONSOLE MK 3 MODS 1 AND 2 MAINTENANCE

Course Number: A-193-0342.

Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC; Trident Training Facility, Bangor, WA.

Length: 1 week (56 hours).

Exhibit Dates: 11/84–Present.

Learning Outcomes: Upon completion of the course the student will be able to maintain and repair a navigational control console.

Instruction: Lectures and practical exercises with emphasis on console maintenance.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (10/89).

NV-1715-1454

Magnetic Tape Input/Output Device
MX-7988A,B UYK Maintenance

Course Number: A-193-0[illegible].
Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC; Trident Training Facility, Bangor, WA.
Length: 2 weeks (76 hours).
Exhibit Dates: 7/81–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot, repair, and maintain a magnetic tape unit.

Instruction: Lectures and laboratory exercises on the maintenance and repair of magnetic tape units, including a magnetic tape transport, read/write switching amps, power supplies, combination logic functions, command code execution, and use of special tools and test equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer systems troubleshooting and maintenance (10/89).

NV-1715-1455

Radio Navigation Set AN/BRN-3B
Maintenance

Course Number: A-193-0261.
Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC.
Length: 2 weeks (79 hours).
Exhibit Dates: 7/83–Present.

Learning Outcomes: Upon completion of the course the student will be able to describe and operate an HF radio receiver including knowledge of preamplifiers, limiters, RF amplifiers, IF amplifiers, and audio amplifiers; perform diagnostic checks using computer programs; and align, adjust, and maintain the RF receiver.

Instruction: Lectures and laboratory exercises on the subject matter.

Credit Recommendation: In the vocational certificate category, 2 semester hours in repair and maintenance of RF receivers (10/89).

NV-1715-1456

Guidance System Mk 3 Mod 0 Theory
and Maintenance

Course Number: A-121-0296.
Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC.
Length: 2 weeks (75 hours).
Exhibit Dates: 1/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot, repair, and maintain a missile guidance system.

Instruction: Lectures and practical exercises on the circuitry and components of the missile guidance system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems troubleshooting and maintenance (10/89).

NV-1715-1457

Electrostatically Supported Gyro
Monitor (ESGM) Backfit
Navigation Subsystem Theory

Course Number: A-193-0346.
Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC.
Length: 2 weeks (64 hours).
Exhibit Dates: 8/80–Present.

Learning Outcomes: *Upon completion of* the course the student will be able to describe the theory to support the performance of all corrective maintenance for the navigation system.

Instruction: Lectures and practical exercises on the function and operation of the navigation system.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (10/89).

NV-1715-1458

Electrostatically Supported Gyro
Monitor (ESGM) Calibration

Course Number: A-193-0431.
Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC.
Length: 2 weeks (64 hours).
Exhibit Dates: 4/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to calibrate and comprehend the theory behind the gyro monitor.

Instruction: Lectures and laboratory exercises on the specific equipment.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (10/89).

NV-1715-1459

AN/BPS-14 Radar Combined
Maintenance

Course Number: A-104-0165.
Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC; Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 3 weeks (120 hours).
Exhibit Dates: 2/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot, repair, and maintain a naval radar system.

Instruction: Lectures and practical exercises focused on the maintenance of a specific radar system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (10/89).

NV-1715-1460

5 Kw Static Inverter Combined
Maintenance

Course Number: A-662-0030.
Location: Submarine School, Groton/New London, CT; Submarine Training Center, Charleston, SC; Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 2 weeks (64 hours).
Exhibit Dates: 4/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to describe solid state electronic circuits as applied to DC and AC power conversion systems at the functional level. Student will be able to analyze circuit function from diagrams and conduct repairs, troubleshooting, and maintenance functions of the power conversion and monitoring systems.

Instruction: Lectures, demonstations and practical exercises in solid state electronic power conversion.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in solid state electronics (10/89).

NV-1715-1461

Mk 3 Mod 6 Ship's Inertial Navigation
System (SINS) Combined
Maintenance

Course Number: A-193-0357.
Location: Submarine School, Groton/New London, CT.
Length: 16–17 weeks (646 hours).
Exhibit Dates: 12/85–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, troubleshoot, repair and maintain an inertial navigation system.

Instruction: Lectures and practical exercises in the theory of computer organization, timing circuits, register logic, and test equipment for computer maintenance and repair.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in computer systems and organization and 3 in computer systems troubleshooting and maintenance (10/89).

NV-1715-1462

Inertial Navigation System (ESGN)
AN/WSN-3A(V)2 Combined
Maintenance

Course Number: A-193-0354.
Location: Submarine School, Groton/New London, CT.
Length: 7 weeks (280 hours).
Exhibit Dates: 2/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, troubleshoot and repair an inertial navigation system.

Instruction: Lectures and practical exercises on the navigation system which includes a microprocessor-based special purpose computer.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (10/89).

NV-1715-1463

AN/WLQ-4(V) Direct Support
Element Basic Operator

Course Number: A-233-0051.
Location: Submarine School, Groton/New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 4 weeks (154 hours).
Exhibit Dates: 1/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform normal operational procedures with supervision on the communications subsystem.

Instruction: Theory and laboratory exercises on the function and operation of the subsystem including speakers, loud speakers, interface box, audio recorders, and magnetic tape drives.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (10/89).

NV-1715-1464

Magnetic Disk File (MDF) Theory and
Electrical Maintenance

Course Number: A-121-0304.
Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC.
Length: 3 weeks (120 hours).
Exhibit Dates: 2/82–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot, repair, and maintain a magnetic disk drive used for computer data storage.

Instruction: Lectures and laboratory exercises covering, in detail, the circuitry and components of a computer disk drive.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems troubleshooting and maintenance (10/89).

NV-1715-1465

Subsurface Direct Support Maintenance

Course Number: A-233-0074.

Location: Submarine School, Groton/New London, CT.

Length: 8 weeks (320 hours).

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, troubleshoot, and repair basic receivers and transmitters.

Instruction: Lectures and laboratories in audio detection, IF, RF, amplifiers and oscillator stages. Also includes bandwidth switching, prescaling, frequency conversion, video amplification, power supplies and alignment of complex electronic assemblies.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (10/89).

NV-1715-1466

Sonar Receiving Set AN/BQR-23 Basic Maintenance

Course Number: A-130-0156.

Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (64 hours).

Exhibit Dates: 8/81–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate remote controlled CRT displays and understand the use of the CPU, I/O address register and data control.

Instruction: Lectures and practical exercises on signal processing, beam tracing, and video amplifiers.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (10/89).

NV-1715-1467

AN/BQR-15 SPALT 9080 Operations and Maintenance

Course Number: A-130-0332.

Location: Submarine School, Groton/New London, CT.

Length: 1-2 weeks (52 hours).

Exhibit Dates: 3/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, troubleshoot, and repair a sonar receiving set.

Instruction: Experienced technicians are introduced to the theory, operation, and maintenance of a particular sonar receiving set. Instruction is also provided on electrical, mechanical, and hydraulic maintenance of the set.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic systems troubleshooting and maintenace (10/89).

NV-1715-1468

Static Control Device Theory

Course Number: A-661-0138.

Location: Submarine School, Groton/New London, CT; Submarine Training Facility, San Diego, CA; Submarine Training Facility, Charleston, SC; Guided Missile School Detachment, Norfolk, VA; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 1-2 weeks (75 hours).

Exhibit Dates: 2/87–Present.

Learning Outcomes: Upon completion of the course the student will understand the theory of solid state components, basic circuits, and logic circuits; make algebraic computations associated with solid state components and circuits such as gain and impedance of transistors, including FETs, and determine outcomes for logic circuits.

Instruction: Lectures, demonstrations and laboratory exercises in solid state electronics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in solid state electronics (10/89).

NV-1715-1469

AN/BSC-2 Data Link Communications System (DLCS) Equipment Combined Maintenance

Course Number: A-101-0230.

Location: Submarine School, Groton/New London, CT.

Length: 5 weeks (200 hours).

Exhibit Dates: 3/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, troubleshoot, repair and maintain a data link communication system.

Instruction: Lectures and practical exercises with emphasis on maintenance of the data link communication system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (10/89).

NV-1715-1470

AN/WRR-7 Combined Maintenance

Course Number: A-101-0068.

Location: Submarine Training Facility, Charleston, SC; Submarine School, Groton/New London, CT.

Length: 6 weeks (214 hours).

Exhibit Dates: 7/85–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot, repair, and maintain a digital data processor, a radio receiver, a power supply, a frequency standard, and a cryptologic device.

Instruction: Lectures and practical exercises with emphasis on the maintenance of the equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (10/89).

NV-1715-1471

Submarine Satellite Information Exchange Subsystem Combined Maintenance

Course Number: A-101-0083.

Location: Submarine School, Groton/New London, CT.

Length: 8 weeks (375 hours).

Exhibit Dates: 2/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, troubleshoot, and repair a submarine satellite information exchange system.

Instruction: Lectures and practical exercises related to the equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (10/89).

NV-1715-1472

AN/WIC Integrated Announcing System

Course Number: A-623-0051.

Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/83–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, troubleshoot, and repair shipboard internal communications equipment and describe the theory of operation at the system and subsystem level.

Instruction: Lectures, tests, and practical exercises which include demonstrations, individualized practice, and solution of practical problems in fault isolation, component-level repair, and electrical safety.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic systems troubleshooting and maintenance (10/89).

NV-1715-1473

Underwater Fire Control, Class A

Course Number: A-113-0133.

Location: Submarine School, Groton/New London, CT.

Length: 6 weeks (240 hours).

Exhibit Dates: 11/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to analyze and maintain electromechanical control systems including step motors, servo systems, and synchros; describe the organization of general purpose computers; and troubleshoot and repair an electronic fire control system and a submarine warfare system.

Instruction: Lectures and practical exercises on topics in electromechanical systems, computer theory, and specific military systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electromechanical control systems, 3 in electronic systems troubleshooting and maintenance, and 3 in computer systems and organization (10/89).

NV-1715-1474

Submarine Communications Equipment Combined Maintenance

Course Number: A-101-0061.

Location: Submarine School, Groton/New London, CT.

Length: 17 weeks (688 hours).

Exhibit Dates: 4/89–Present.

Learning Outcomes: Upon completion of the course the student will operate and maintain submarine radio receivers, antennas, MF/HF transmitters, and special communications equipment.

Instruction: This pipeline course consists of A-101-0237, Special Communications Equipment Combined Maintenance; A-101-

0135, Receivers Combined Maintenance, and A-101-0137, Combined Integrated Submarine Communications Antenna Subsystem Maintenance. The remaining course component is classified and was not evaluated. Please see the exhibits listed above for further information.

Credit Recommendation: Please see the exhibits listed in the instruction for credit recommendations (10/89).

NV-1715-1475

Special Communications Equipment Combined Maintenance

Course Number: A-101-0237.
Location: Submarine School, Groton/New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI; Trident Training Facility, Kings Bay, GA.
Length: 8 weeks (304 hours).
Exhibit Dates: 12/85–Present.
Learning Outcomes: Upon completion of the course the student will be able to troubleshoot, repair, and maintain a radio transmitter system.
Instruction: Lectures and practical exercises related to the maintenance of the transmitters.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (10/89).

NV-1715-1476

AN/BRN-6/SRN-9A Combined Maintenance

Course Number: A-102-0168.
Location: Submarine School, Groton/New London, CT.
Length: 2 weeks (74 hours).
Exhibit Dates: 12/84–Present.
Learning Outcomes: Upon completion of the course the student will be able to operate, maintain, troubleshoot, and repair a navigation satellite receiver.
Instruction: This course covers both theory and laboratory on the physical, functional, and interface description of the troubleshooting and repair of a radio receiver. The course also covers the use of special tools and test equipment.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic systems troubleshooting and maintenance (10/89).

NV-1715-1477

Submarine Tactical Communications Equipment Combined Maintenance

Course Number: A-101-0133.
Location: Submarine School, Groton/New London, CT.
Length: 13 weeks (506 hours).
Exhibit Dates: 4/89–Present.
Learning Outcomes: Upon completion of the course the student will be able to describe the theory of operation and be able to perform routine preventive and corrective maintenance on submarine tactical communications equipment.
Instruction: This is a pipeline course consisting of A-101-0083, Submarine Satellite Information Exchange System For Shipboard Installations Combined Maintenance and A-101-0251, Submarine Digital Teletype Combined Maintenance. For further information, please see the individual exhibits.
Credit Recommendation: Please see the individual exhibits listed under instruction for credit recommendations (10/89).

NV-1715-1478

Navigation Technician 594/688 Class Pipeline

Course Number: A-193-0103.
Location: Submarine School, Groton/New London, CT.
Length: 14 weeks (547 hours).
Exhibit Dates: 9/76–Present.
Learning Outcomes: Upon completion of the pipeline the student will be able to operate, maintain, and repair navigation systems including radar, receivers, and Identify Friend or Foe systems.
Instruction: This is a pipeline course consisting of A-102-0253, DMINS AN/WSN-1(V)2 Combined Maintenance; A-102-0199, AN/BPS-15 Radar Combined Maintenance; A-102-0168, BRN-6/SRN-9A Combined Maintenance; and A-102-0229 and A-102-0131. The last two courses were too short for evaluation. Please see the individual courses for further information.
Credit Recommendation: PLease see the individual exhibits listed above for the credit recommendations (10/89).

NV-1715-1479

Navigation Technician 637/688 Class Pipeline

Course Number: A-193-0363.
Location: Submarine School, Groton/New London, CT.
Length: 14 weeks (550 hours).
Exhibit Dates: 1/84–Present.
Learning Outcomes: Upon completion of the pipeline the student will be able to operate, maintain, and repair navigation systems including radar, receivers, and Identify Friend or Foe systems.
Instruction: This is a pipeline course consisting of A-193-0354, Inertial Navigation System (ESGN) AN/WSN-3A(V)2 Combined Maintenance; A-102-0199, AN/BPS-15 Radar Combined Maintenance; A-102-0168, BRN-6/SRN-9A Combined Maintenance; and A-102-0229 and A-102-0131. The last two courses were too short for evaluation. Please see the individual courses for further information.
Credit Recommendation: PLease see the individual exhibits listed above for the credit recommendations (10/89).

NV-1715-1480

Subsurface Cryptologic Technician (CT) Augmentee Operator Pipeline

Course Number: A-233-0079.
Location: Submarine School, Groton/New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 6 weeks (240 hours).
Exhibit Dates: 1/86–Present.
Learning Outcomes: Upon completion of the course the student will be able to operate subsurface cryptographic equipment.
Instruction: This is a pipeline course consisting of A-233-0051, AN/WLQ-4(V) Direct Support Element (DSE) Basic Operator, and A-233-0073 and A-233-0086, both of which were too short for evaluation. Please see exhibit for A-233-0051 for further information.
Credit Recommendation: For credit recommendation please see exhibit listed above (10/89).

NV-1715-1481

Subsurface Cryptologic Technician (CT) Augmentee Operator Pipeline

Course Number: A-233-0081.
Location: Submarine School, Groton/New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 6 weeks (240 hours).
Exhibit Dates: 1/86–Present.
Learning Outcomes: Upon completion of the course the student will be able to operate subsurface cryptographic equipment.
Instruction: This is a pipeline course consisting of A-233-0051, AN/WLQ-4(V) Direct Support Element (DSE) Basic Operator, and A-233-0027, AN/WLR-8(V)2 Basic Operation. Please see these exhibits for further information.
Credit Recommendation: For credit recommendation please see the exhibits listed above (10/89).

NV-1715-1482

Subsurface Cryptologic Technician (CT) Augmentee Operator Pipeline

Course Number: A-233-0080.
Location: Submarine School, Groton/New London, CT.
Length: 9 weeks (360 hours).
Exhibit Dates: 1/86–Present.
Learning Outcomes: Upon completion of the course the student will be able to operate subsurface cryptographic equipment.
Instruction: This is a pipeline course consisting of A-233-0051, AN/WLQ-4(V) Direct Support Element (DSE) Basic Operator; A-233-0029, AN/WRQ-1, AN/WYQ-1 Operator; and A-233-0073 and A-233-0086, both of which were too short for evaluation. Please see exhibits for A-233-0051 and A-233-0029 for further information.
Credit Recommendation: For credit recommendation please see exhibits listed above (10/89).

NV-1715-1483

Electronic Support Measures 637 Class Type 2 Combined Maintenance Pipeline

Course Number: A-233-0055.
Location: Submarine School, Groton/New London, CT.
Length: 15 weeks (600 hours).
Exhibit Dates: 1/82–Present.
Learning Outcomes: Upon completion of the course the student will be able to operate, troubleshoot, and repair electronic support systems.
Instruction: This pipeline course consists of A-150-0267, AN/UYK-20(V) Basic Maintenance; A-233-0049, AN/WLQ-4(V) (E-Suite) Combined Maintenance; and A-102-0157, Periscope Type 18 Combined Maintenance. Please see thes exhibits for further information.
Credit Recommendation: PLease see the exhibits listed above for credit recommendations (10/89).

NV-1715-1484

Magnetic Disk File (MDF) Theory and Mechanical Maintenance Fire Control (FC) Mk 88

Course Number: A-121-0305.
Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC.
Length: 1-2 weeks (48 hours).

Exhibit Dates: 8/83-Present.

Learning Outcomes: Upon completion of the course the student will understand the theory of and be able to operate and repair computer magnetic disk drives and operate and repair electro/hydraulic/mechanical systems serving the computer disk drive units.

Instruction: Lectures and laboratories on the disk drives.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour lecture and 1 semester hour laboratory in mechanical systems (disk drives) (10/89).

NV-1715-1485

AN/BQH-5(V)4 Combined Maintenance

Course Number: A-130-0290.

Location: Submarine School, Groton/New London, CT; Submarine Training Center, Pearl Harbor, HI.

Length: 4 weeks (154 hours).

Exhibit Dates: 1/85-Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, maintain, and troubleshoot recorder/reproducer tape transport equipment.

Instruction: Lectures and laboratory instruction on the above topic.

Credit Recommendation: In the vocational certificate category, 1 semester hour in audio tape recorder repair (10/89).

NV-1715-1486

Intermediate Maintenance Activity (IMA) Machinery Maintenance

Course Number: A-210-0014.

Location: Submarine School, Groton/New London, CT.

Length: 1-2 weeks (54-80 hours).

Exhibit Dates: 6/86-Present.

Learning Outcomes: Upon completion of the course the student will be able to describe the basic concepts of acoustics, rotating machinery vibration, noise generation, structureborne and fluidborn transmission, machinery balancing and noise measurement, and reduction procedures. Student will operate vibration monitoring equipment and understand the maintenace implications of the measurements.

Instruction: Lectures, demonstrations, and laboratory exercises in acoustics, vibrations, and measurement.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester lecture and 1 semester hour laboratory in acoustics or vibrations (10/89).

NV-1715-1487

Navigation Technician Type 2 637 Class Pipeline

Course Number: A-193-0372.

Location: Submarine School, Groton/New London, CT.

Length: 23 weeks (910 hours).

Exhibit Dates: 10/85-Present.

Learning Outcomes: Upon completion of this pipeline the student will be able to operate and perform preventive and corrective maintenance on a number of navigation system components including radar, NAVSAT, and Identify Friend or Foe (IFF) systems.

Instruction: This course consistes of A-193-0357, Mk 3 Mod 6 Ship's Inertial Navigation System Combined Maintenance; A-102-0199, AN/BPS-15 Radar Combined Maintenance; A-102-0168, BRN-6/SRN-9A Combined Maintenance; and A-102-0229. The last was too short for evaluation. The others can be found in exhibits listed under the course number and title. Please refer to the individual exhibits.

Credit Recommendation: Please refer to the courses listed above for credit recommendations (10/89).

NV-1715-1488

Torpedoman's Mate Class A1

Course Number: A-123-0127.

Location: Service School Command, Orlando, FL.

Length: 10 weeks (400 hours).

Exhibit Dates: 11/86-Present.

Learning Outcomes: Upon completion of the course the student will be able to solve problems using basic math and linear equations; analyze circuits to calculate resistance, current, voltage, in series, parallel, complex DC circuits and capacitance, inductance in basic AC circuits.

Instruction: Principles of basic mathematics and algebra, solving linear equasions, series and parallel DC circuits, complex DC circuits, capacitance, inductance, reactance, and transformers. Laboratory exercises in basic techniques of measurement for AC and DC circuits. Also includes explosives, underwater sound, hydraulics and pneumatics, nucleonics, planned maintenance and safety as they relate to torpedos and torpedo systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in DC circuits and 1 in technical mathematics (2/90).

NV-1715-1489

Electronics Technician Class A

Course Number: A-100-0084.

Location: Service School Command, Orlando, FL.

Length: 17 weeks (680 hours).

Exhibit Dates: 10/88-Present.

Learning Outcomes: Upon completion of the course the student will be able to solve for voltage, current, power and resistor values in DC series, parallel, and series-parallel circuits; use common laboratory instruments and perform laboratory work; calculate transient voltages and currents in RC and RL circuits; calculate voltages, currents and impedances in sinusoidal RLC circuits; analyze transformer circuits; analyze filters; analyze vacuum tube circuits; analyze circuits containing diodes, transistors, and circuit protection devices; analyze Class A, B, AB, and C power amplifiers; analyze rectifier circuits and regulated power supplies; describe the operation of solid state nonlinear semiconductor devices; analyze multivibrators, limiters, clampers, oscillators, integrators, differentiators; analyze and troubleshoot AM transmitter and receiver circuits; describe antenna characteristics and radio wave propagation; troubleshoot and repair electric and electronic circuits to the component level.

Instruction: Lectures and laboratory exercises on topics in basic electricity and electronics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in DC circuits, 3 in AC circuits, 7 in solid state electronics, 3 in electronic systems troubleshooting and maintenance and 2 in electronic communications (2/90).

NV-1715-1490

Tomahawk Missile Intermediate Maintenance

Course Number: A-121-0487.

Location: Service School Command, Orlando, FL.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/88-Present.

Learning Outcomes: Upon completion of the course the student will be able to perform preventive maintenance, documented fault isolation, and repair procedures on a cruise missile under supervision.

Instruction: Lectures and practical exercises related to the maintenance of the missile. Course does not go into detailed circuit analysis or mechanical component breakdown.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/90).

NV-1715-1491

Torpedo MK 48 Intermediate Maintenance Activity Supervisor

Course Number: A-123-0181.

Location: Service School Command, Orlando, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/84-1/90.

Learning Outcomes: Upon completion of the course the student will be able to manage the maintenance activities of a torpedo weapons system.

Instruction: Lectures and practical exercises on the maintenance of a torpedo system.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/90).

NV-1715-1492

Torpedo Technician Advanced

Course Number: A-123-0147.

Location: Service School Command, Orlando, FL.

Length: 15 weeks (600 hours).

Exhibit Dates: 2/89-Present.

Learning Outcomes: Upon completion of the course the student will be able to analyze operation of basic DC series, parallel, series-parallel, bridge and DC networks. Includes Thevenin's Theorem, AC theory, algebra, inductance, capacitance. Able to solve for current, voltage and time relationships in DC RL circuits, transformers, filters, RCL circuits; able to solder and wirewrap; able to operate basic test equipment, transistor amplifiers, oscillators, switching circuits, synchros and resolvers. Able to use digital numbering systems, Boolean algebra and describe logic circuits, flip-flops, counters, shift registers, and A/D and D/A converters and multiplexers.

Instruction: Lectures in DC and AC circuits including series, parallel circuits, Thevenin's Theorem, capacitance, inductance, RL and RCL circuits, AC transformers, resonance. Lectures and practical exercises in digital electronics, including numbering systems, Boolean algebra, and logic circuits. Laboratory exercises in soldering and wirewrap techniques, electrostatic discharge and failure analysis.

Credit Recommendation: In the vocational certificate ·category, 2 semester hours in electronic shop practice; in the lower-division baccalaureate/associate degree category, 2 semester hours in DC circuits, 3 in

AC circuits, 4 in solid state electronics, and 3 in digital principles (2/90).

NV-1715-1493

Torpedo Mk 48 Advanced Capability (ADCAP) Intermediate Maintenance

Course Number: A-123-0183.

Location: Service School Command, Orlando, FL.

Length: 15 weeks (600 hours).

Exhibit Dates: 7/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to maintain and repair the Mk 48 torpedo and its test sets.

Instruction: Lectures and practical exercises on the maintenance of the torpedo and its associated systems.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/90).

NV-1715-1494

General Purpose Electronic Test Equipment Repair Intermediate Maintenance

Course Number: C-198-3041.

Location: Air Maintenance Training Group Detachment, Norfolk, VA; Air Maintenance Training Group Detachment, North Island, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 5/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to analyze transistor amplifier circuits, operational amplifier circuits, power supplies; convert between binary, octal, hexadecimal, and BCD number systems; construct truth tables for logic circuits; describe counters, decoders, and multiplexers; troubleshoot and repair signal generators, voltmeters, oscilloscopes, and frequency counters.

Instruction: Lectures and practical exercises with emphasis on troubleshooting common electronic laboratory instruments.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital principles, 1 in solid state electronics, and 3 in electronic systems troubleshooting and maintenance (3/90).

NV-1715-1495

Intermediate Level Calibration of Physical/Dimensional Test and Measuring Systems Phases B/D

Course Number: C-198-3034.

Location: Air Maintenance Training Group Detachment, Norfolk, VA; Air Maintenance Training Group Detachment, North Island, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 10/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to calibrate various physical/mechanical measuring devices such as pressure and vacuum devices, torque and tension measuring devices, temperature measuring devices, and dimensional measuring devices.

Instruction: Lectures and practical exercises in physical/dimensional calibration techniques. Analytical/mathematical techniques are not stressed.

Credit Recommendation: In the vocational certificate category, 3 semester hours in mechanical measuring instrument calibration (3/90).

NV-1715-1496

Intermediate Level Test Equipment Calibration

Course Number: C-198-3033.

Location: Air Maintenance Training Group Detachment, Norfolk, VA; Air Maintenance Training Group Detachment, North Island, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 8/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to calibrate oscilloscopes, meters, counters, and signal generators involving adjustments or replacement of components to ensure operational standards.

Instruction: Classroom lectures on theory and laboratory exercises on equipment calibration. Extensive laboratory time is devoted to signal generators and power measurements.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in the calibration of electronic test equipment (3/90).

NV-1715-1497

AN/SQR-17(V) Series Operator

Course Number: K-130-0274.

Location: Fleet Antisubmarine Warfare Training Center, Norfolk, VA; Fleet Antisubmarine Warfare Training Center, San Diego, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 2/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate a particular sonar set.

Instruction: Lectures and practical exercises on the operation of the sonar set.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (3/90).

NV-1715-1498

AN/SQR-18A(V)1 Operator

Course Number: K-130-0216.

Location: Fleet Antisubmarine Warfare Training Center, Norfolk, VA; Fleet Antisubmarine Warfare Training Center, San Diego, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 8/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate a sonar receiving set.

Instruction: Lectures and laboratory exercises using the specific sonar equipment.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (3/90).

NV-1715-1499

Surveillance Towed Array Sensor System (SURTASS) Shore

Course Number: J-130-0288.

Location: Fleet Antisubmarine Warfare Training Center, Norfolk, VA.

Length: 7 weeks (280 hours).

Exhibit Dates: 8/85–Present.

Learning Outcomes: Upon completion of the course the student will be able to recognize, analyze, locate, and correct malfunctions by using diagnostic routines and associated test equipment.

Instruction: Lectures and practical exercises in disk controllers, disk packs, CRT monitors, trackballs, display controllers, keyboards, magnetic tape controllers, magnetic tape transports, and the synchronous channel multiplexer.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer systems troubleshooting and maintenance (3/90).

NV-1715-1500

Advanced Digital Theory

Course Number: J-130-0299.

Location: Fleet Antisubmarine Warfare Training Center, Norfolk, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 10/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to analyze digital circuits containing gates, flip-flops, registers, counters, adders and subtractors; convert between binary, decimal, octal, hexadecimal and BCD number systems; program a specific microprocessor using machine language; describe the principles and the uses of flags, stocks, interrupts, and interfaces; and troubleshoot a microprocessor-based computer to the component level.

Instruction: Lectures and laboratory exercises related to the topics. Laboratory emphasizes troubleshooting microprocessor-based computer.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital principles and 3 in microprocessors (3/90).

NV-1715-1501

AN/SQQ-23 PAIR Operations Basic

Course Number: K-130-0097.

Location: Fleet Antisubmarine Warfare Training Center, Norfolk, VA; Fleet Antisubmarine Warfare Training Center, San Diego, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 11/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate a specific sonar system and a specific receiving system using existing or provided environmental and tactical data to detect, classify and track submarine and nonsubmarine contacts.

Instruction: Lectures and practical exercises on the operation of a specific sonar system.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (3/90).

NV-1715-1502

Passive Equipment Cabinet (PEC) Operation and Maintenance

Course Number: J-130-0263.

Location: Fleet Antisubmarine Warfare Training Center, Norfolk, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 9/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to analyze printed circuit boards and chassis-mounted components; troubleshoot; isolate faults; and maintain boards and components to the module replacement level.

Instruction: Classroom instruction and major laboratory exercises in fault isolation and troubleshooting techniques. Topics include AC/DC power distribution, test diagrams, audio circuits and switch matrix circuits.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems troubleshooting and maintenance (3/90).

NV-1715-1503

FF-1052 Sonar Supervisor

Course Number: K-130-1119.

Location: Fleet Antisubmarine Training Center, Norfolk, VA; Fleet Antisubmarine Training Center, San Diego, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 12/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to supervise the operation of a sonar team in antisubmarine warfare.

Instruction: Lectures and practical exercises on topics in antisubmarine warfare including sonar systems, search plan development, detection and classification, tracking, attack, and sonobuoy operation.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (3/90).

NV-1715-1504

AN/SQQ-89(V)1/3 Sonar Watch Supervisor

Course Number: K-130-1102.

Location: Fleet Antisubmarine Warfare Training Center, Norfolk, VA; Fleet Antisubmarine Warfare Training Center, San Diego, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 7/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to supervise a sonar team in antisubmarine warfare operations; recommend a sonar search plan; obtain and evaluate data; and supervise search methodology.

Instruction: Lectures and practical exercises in search methodology using equipment in the sonar suite.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/90).

NV-1715-1505

Advanced Acoustic Analysis Class C

Course Number: J-210-0529.

Location: Fleet Antisubmarine Warfare Training Center, Norfolk, VA; Fleet Antisubmarine Warfare Training Center, San Diego, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 8/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform advanced acoustic analysis of sonar contacts in accordance with recently published intelligence data.

Instruction: Lectures and practical exercises in Soviet sonar technology, underwater communications systems, and signature analysis of Soviet submarines.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (3/90).

NV-1715-1506

AN/SQQ-89(V)2 Sonar Watch Supervisor

Course Number: K-130-1103.

Location: Fleet Antisubmarine Warfare Training Center, Norfolk, VA; Fleet Antisubmarine Warfare Training Center, San Diego, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 7/85–Present.

Learning Outcomes: Upon completion of the course the student will supervise the operation of a specific antisubmarine warfare sonar system.

Instruction: Lectures and practical exercises over topics in antisubmarine warfare tactics, development of sonar search plans, sonobuoy use, detection, classification and tracking.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/90).

NV-1715-1507

AN/SQQ-89(V)2 Surface Antisubmarine Warfare (ASW) Combat System Operator Class C

Course Number: K-130-0269.

Location: Fleet Antisubmarine Warfare Training Center, Norfolk, VA; Fleet Antisubmarine Warfare Training Center, San Diego, CA.

Length: 10 weeks (400 hours).

Exhibit Dates: 12/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate a specific antisubmarine warfare sonar system.

Instruction: Lectures and practical exercises on topics in sonar, antisubmarine warfare tactics, sonobuoys, detection and classification, tracking and searching.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/90).

NV-1715-1508

AN/SQQ-89(V)1 Surface Antisubmarine Warfare (ASW) Combat System Operator Class C

Course Number: K-130-0283.

Location: Fleet Antisubmarine Warfare Training Center, Norfolk, VA; Fleet Antisubmarine Warfare Training Center, San Diego, CA.

Length: 15 weeks (600 hours).

Exhibit Dates: 11/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate the combat sensors and support equipment of a specific surface antisubmarine warfare combat system in all phases of the mission.

Instruction: Lectures and practical exercises in the operation of a sonar system and its associated subsystems.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/90).

NV-1715-1509

Antisubmarine Warfare (ASW) Evaluator Common Core

Course Number: J-2G-0539.

Location: Fleet Antisubmarine Warfare Training Center, Norfolk, VA; Fleet Antisubmarine Warfare Training Center, San Diego, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 9/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to use technical knowledge and skills to employ antisubmarine sensors and weapons.

Instruction: Lectures, laboratories and demonstrations on the subject matter.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (3/90).

NV-1715-1510

Antisubmarine Warfare (ASW) Officer

Course Number: J-2G-0536.

Location: Fleet Antisubmarine Warfare Training Center, Norfolk, VA; Fleet Antisubmarine Warfare Training Center, San Diego, CA.

Length: 9 weeks (360 hours).

Exhibit Dates: 9/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to supervise antisubmarine operations.

Instruction: Lectures, laboratories, and demonstrations on oceanography, sound propagation, fire control systems, torpedos, missiles, launching systems, and tactical considerations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/90).

NV-1715-1511

Dental Equipment Repair Technology Class C

Course Number: B-198-0013.

Location: School of Dental Assisting and Technology, San Diego, CA.

Length: 24 weeks (840 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course the student will be able to use basic electronic test equipment to maintain, troubleshoot and repair dental equipment.

Instruction: Lectures and practical exercises on topics in basic electricity, tools, dental chairs, X-rays, pneumatic systems systems, sterilizers, plumbing equipment, dental operating equipment, ultrasonic equipment, film processors, and dental laboratory equipment. Emphasis is on troubleshooting, repair and maintenance.

Credit Recommendation: In the vocational certificate category, This course is equivalent to a certificate in dental equipment maintenance and repair; in the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance and 3 in basic electronics laboratory (6/90).

NV-1717-0001

Aviation Management

Course Number: E-4D-10.

Location: Fleet Airborne Electronics Training Unit, Pacific, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 2/70–1/88.

Objectives: To train staff and unit maintenance officers to fully utilize the Navy maintenance and material management system.

Instruction: Lectures on documentation and analysis of man-hour accounting, maintenance data collection, aircraft statistical data, and maintenance requirement cards; personnel management; and familiarization of staff and support activities.

Credit Recommendation: In the vocational certificate category, credit in aviation management on the basis of institutional evaluation (2/74).

NV-1717-0002

RA-5C Plane Captains Organizational Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Albany, GA; Air Maintenance Training Detachment, Sanford, FL.

Length: 3-4 weeks (120-160 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To provide fleet maintenance personnel with training in RA-5C aircraft organizational maintenance.

Instruction: Lectures and practical exercises in aircraft structures and hydraulic, electrical, power plant, environmental, and indicating systems maintenance; corrosion control; and flight and inlet-duct airflow control systems operations and maintenance.

Credit Recommendation: In the vocational certificate category, 3 semester hours in maintenance management (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in maintenance management (2/74).

NV-1717-0003

Naval Aviation
Maintenance/Material
Management, Class B

Course Number: Not available.

Location: Naval Air Technical Training Station, Memphis, TN.

Length: 2 weeks (78 hours).

Exhibit Dates: 10/70–1/88.

Objectives: To train noncommissioned officers to supervise maintenance activities.

Instruction: Lectures and practical experience in aviation maintenance management procedures, publications, data collection systems, and aviation safety.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in maintenance management (2/74); in the upper-division baccalaureate category, 2 semester hours in maintenance management (2/74).

NV-1717-0005

RA-5C Maintenance Supervisors
Familiarization

Course Number: C-000-3743; C-2A-3743.

Location: Air Maintenance Training Detachment, Albany, GA.

Length: 4 weeks (144 hours).

Exhibit Dates: 2/73–1/88.

Objectives: To train senior enlisted personnel and branch officers in the operation and mission capabilities of the RA-5C weapons system.

Instruction: Lectures and practical exercises in the operation and mission capabilities of the RA-5C weapon system, including aircraft familiarization and safety, primary essential aircraft systems, electronic systems, structures and corrosion control, hydraulic power system, survival and environmental systems, flight control and fuel systems, AN/ASQ-56A integrated electronic central and electronic altimeter, electronic countermeasures system, and reconnaissance systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in maintenance supervisor familiarization (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in maintenance supervisor familiarization (6/74).

NV-1717-0006

Prospective Engineer Officers

Course Number: K-4H-465.

Location: Fleet Training Center, San Diego, CA.

Length: 8 weeks (240 hours).

Exhibit Dates: 6/65–12/68.

Objectives: To train junior officers as prospective engineering and damage control officers on steam- and diesel-drive ships.

Instruction: Lectures and practical exercises in the duties of an engineering department officer and a damage control officer. Course includes administration, boilers, auxiliaries, steam propulsion and diesel propulsion machinery, electrical systems and equipment, fire fighting, damage control, and nuclear, biological, and chemical warfare defense.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours as an elective in industrial management (7/74).

NV-1717-0007

Warehouse Operations Management

Course Number: A-8C-0015.

Location: Naval Supply Center, Oakland, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 10/71–1/88.

Objectives: To train military and civilian personnel in military warehousing.

Instruction: Lectures and practical exercises in the study of warehousing and storage planning and practices; materials-handling principles; selection and utilization of equipment; automated materials-handling systems; military packaging policies and the basic principles of unit protection and packing; including quantitative aspects of management; documentation and control; warehousing and storage; materials handling; preservation and packaging.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-1717-0008

Aviation Maintenance Control
Administration

Course Number: C-000-3204.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Alameda, CA; Air Maintenance Training Detachment, Quonset Point, RI; Air Maintenance Training Detachment, Pensacola, FL; Air Maintenance Training Detachment, Norfolk, VA; Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, Lemoore, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 8/71–1/88.

Objectives: To train enlisted personnel in the administrative practices and procedures of aviation units.

Instruction: Lectures and practical exercises in the administrative practices and procedures of aviation units, including maintenance management, maintenance and production control, component repair program, maintenance data collection and reporting, aircraft accounting, ground support equipment data reporting, aircraft engine accounting system, logs and records, and administrative procedures.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in organization and management (7/74).

NV-1717-0010

Aviation Ordnanceman, Class C7
(Aviation Ordnanceman, Class B)

Course Number: C-646-2011.

Location: Air Technical Training Center, Jacksonville, FL; Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: *Version 1:* 21–26 weeks (840 hours). *Version 2:* 21–25 weeks (840–1000 hours).

Exhibit Dates: *Version 1:* 2/74–12/84. *Version 2:* 10/53–1/74.

Objectives: To train enlisted personnel to perform ordnance functions aboard ships.

Instruction: Lectures and practical exercises in administrative techniques, mathematics, physics, electricity, guns, munitions, equipment, and missiles.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in basic algebra and trigonometry, 3 in electricity/electric circuits and 2 in principles of physics (2/81). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electricity (12/68); in the upper-division baccalaureate category, 2 semester hours in maintenance management (12/68).

NV-1717-0011

Naval Aircraft Maintenance
Management

Course Number: Not available.

Location: Naval Training Detachment, North Island, CA; Naval Training Detachment, Jacksonville, FL; Naval Training Detachment, Lemoore, CA; Naval Training Detachment, Quonset Point, RI; Naval Training Detachment, Pensacola, FL; Naval Training Detachment, Norfolk, VA; Naval Training Detachment, Whidbey Island, WA; Naval Training Detachment, Barbers Point, HI.

Length: 3 weeks (120 hours).

Exhibit Dates: 6/67–1/88.

Objectives: To train enlisted personnel to manage aviation maintenance materiel.

Instruction: Lectures and practical exercises in maintenance materiel management, including management, control and security of classified information, naval aircraft maintenance program framework organization, administrative functions and procedures, maintenance and materiel control, quality control, maintenance data collection system, and maintenance equipment.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in maintenance management (12/68).

NV-1717-0012

Parachute Rigger School, Class B

Course Number: None.

Location: Air Technical Training Unit, Lakehurst, NJ.

Length: 12 weeks (496 hours).

Exhibit Dates: 1/66–12/68.

Objectives: To provide parachute riggers with administrative, theoretical, and practical backgrounds for operating squadrons.

Instruction: Lectures and practical exercises in supervision and management; aircraft maintenance skills; sewing machine adjustments and repairs; liquid oxygen and oxygen regulators; and pressure suits and components.

Credit Recommendation: In the vocational certificate category, 1 in sewing and sewing machine maintenance, 5 in liquid oxygen and regulators, and 2 in pressure suits (5/74); In the upper-division baccalaureate category, 2 semester hours in maintenance management (12/68).

NV-1717-0013

Leadership and Management for
Officers (LMT)
(Leadership and Management for Petty
Officers (LMT))

Course Number: A-7C-0018; A-500-0031.

Location: Various Naval Training Centers, USA.
Length: 2 weeks (80 hours).
Exhibit Dates: 4/75–8/79.
Objectives: To provide officers and petty officers with the latest and most pertinent information on leadership methods, management techniques, and skills for applying the Navy's Human Goals Plan.
Instruction: Instruction covers responsibility, accountability, and authority; management and motivation; organizational development; interpersonal communications; problem-solving applications; crisis management; and pertinent human resources management information.
Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (3/76).

NV-1717-0014

Leadership and Management Education and Training (LMET) for Leading Petty Officers

Course Number: A-500-0034.
Location: Various Naval Training Centers, USA; Human Resources Management Detachment, Rota, Spain.
Length: 2 weeks (70 hours).
Exhibit Dates: 9/79–3/90.
Objectives: To provide leading petty officers with modern concepts and methods of leadership development and human resources utilization.
Instruction: Course content covers concepts which maximize student growth in the management areas of leadership development and motivational concepts. Topics include establishing authority,time management, methods of developing subordinates, self-motivation, employee discipline techniques and managerial styles. Students are actively involved by role playing, model building, goal setting and performance analysis.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in industrial management, industrial psychology, leadership development or a management elective (11/81).

NV-1717-0015

Leadership and Management Education and Training (LMET) for Chief Petty Officers
(Leadership and Management Education and Training (LMET) For Leading Chief Petty Officers)

Course Number: A-500-0036.
Location: Various Naval Training Centers, USA; Human Resource Management Detachment, Rota, Spain.
Length: 2 weeks (70–80 hours).
Exhibit Dates: 9/79–3/90.
Objectives: To provide leading chief petty officers with modern concepts and methods of leadership development and human resources utilization.
Instruction: Course content covers concepts which maximize student growth in the management areas of leadership development and motivational concepts. Topics include establishing authority, time management, methods of developing subordinates, self-motivation, employee discipline techniques and managerial styles. Students are actively involved by role playing, model building, goal setting and performance analysis.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in industrial psychology, leadership development or a management elective (12/89).

NV-1717-0016

Surface Warfare Split Tour Engineer Officer

Course Number: A-4H-0060.
Location: Surface Warfare Officer School Command, Newport, RI.
Length: 11–14 weeks (408 hours).
Exhibit Dates: 4/76–Present.
Objectives: To provide advanced engineering to unrestricted line officers who are enroute to engineer officer billets in steam propulsion ships.
Instruction: Through individualized instruction officers are provided the necessary knowledge to effectively manage the engineering department of a US naval ship. The course includes the following topics: heat transfer and fluid flow; electrical theory and systems; main propulsion systems; auxiliary systems; damage control; water chemistry; automatic boiler controls; and engineering organization and management.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic marine engineering, 2 in maintenance management (11/82).

NV-1717-0017

Surface Warfare Officer Basic

Course Number: A-4H-0118.
Location: Surface Warfare Officers School Command, Newport, RI; Surface Warfare Officers School Command, Coronado, CA.
Length: 17–18 weeks (674–688 hours).
Exhibit Dates: 10/79–Present.
Objectives: To prepare newly commissioned line officers for junior officer assignment in surface warfare units and to provide a performance-oriented foundation for promotion.
Instruction: A managerial type course providing basic instruction in navigation; seamanship and ship handling; external communications; steam diesel and gas turbine propulsion and auxiliary systems; damage control; inspection and safety; and naval ordnance. Also, included are instruction in human resources management; correspondance and training; materials management; engineering administration and operations; professional development and leadership and management.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic seamanship or 3 in a technical elective (11/82); in the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in leadership development or industrial psychology or industrial management or a management elective (11/82).

NV-1717-0018

Surface Warfare Officer Advanced Command

Course Number: A-4H-0111.
Location: Surface Warfare Officer School Command, Newport, RI.
Length: 6–9 weeks (320 hours).
Exhibit Dates: 1/72–Present.
Objectives: To prepare senior grade officers to command suface warfare units by providing fleet-oriented training.
Instruction: The course includes training in personnel leadership and management, inspection, supply management, safety and seamanship. Technical topics briefly touched upon include: nuclear weapons, navigation, communications, surveillance systems, sonar and missile or torpedo systems including Tartar, Terrier, Seasparrow, ASROC and Mk 46.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in ships management (11/82).

NV-1717-0019

Surface Warfare Officer Department Head

Course Number: A-4H-0107.
Location: Surface Warfare Officers School Command, Newport, RI.
Length: 18–24 weeks (735-780 hours).
Exhibit Dates: 4/76–Present.
Objectives: To prepare commissioned officers to execute leadership and and supervisory duties aboard ship.
Instruction: The training emphasizes departmental, system and unit interdependence. The course includes theoretical, technical and practical instruction pertinent to command-at-sea including lectures and problem solving exercises in fundamentals of electricity, computers, fire control, explosives, launching systems, communications systems, intelligence, nuclear weapons, mathematics, physics and high pressure steam systems.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in physics (mechanics and thermodynamics), 2 in basic electricity and 3 in basic marine engineering (11/82); in the upper-division baccalaureate category, 3 semester hours in industrial management, industrial psychology, leadership development or a management elective (11/82).

NV-1717-0020

Surface Warfare Officers Advanced Executive Command

Course Number: A-4H-0112.
Location: Surface Warfare Officers School Command, Newport, RI.
Length: 6–7 weeks (280 hours).
Exhibit Dates: 1/72–Present.
Objectives: To train Navy personnel in shipboard operations and management.
Instruction: Classroom instruction and practical exercises in shipboard operation and management including maintenance management, seamanship, navigation, rules of the road, ship handling, cargo stowage, underway replenishment, ordnance, nuclear and small craft operation.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in ships operations and management or 3 in basic seamanship (11/82).

NV-1717-0021

Leadership Management Education and Training (LMET) Instructor
(Leadership Management Education and Training, Class C1)

Course Number: A-012-0045.
Location: Naval Amphibious School, Little Creek, VA; Leadership and Organizational Effectiveness School, Millington, Memphis, TN.
Length: 10 weeks (400 hours).
Exhibit Dates: 10/83–Present.
Objectives: To provide selected enlisted and officer personnel with knowledge and

skills necessary to instruct in a specific two week Leadership Management Education course offered at U.S. Navy schools and provide a general background in classroom instruction.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) articulate modern principles of course design, (2) practice techniques of creating a positive classroom environment, (3) practice techniques of managing group learning, (4) demonstrate feedback counseling and goal setting skills in a classroom setting, (5) demonstrate practical sensitivity to EEO issues in a classroom, (6) exhibit competence in negotiations and group process in the classroom setting, (7) prepare teaching plans and other instructional materials, and (8) evaluate classroom performance of peers and students.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in instructional stategies and teaching methods and 3 in practice teaching (2/85).

NV-1717-0022

Leadership and Management Education and Training (LMET) for Machinist's Mate/Boiler Technician Six-Year Obligator (6YO) Petty Officer

Course Number: A-500-0033.

Location: Service Schools Command, Great Lakes, IL.

Length: 2 weeks (70 hours).

Exhibit Dates: 5/79-Present.

Learning Outcomes: Upon completion of the course, the student will be able to recognize and understand key leadership and management skills (competencies); perform self-assessment in relation to these competencies; and utilize these competencies in the field.

Instruction: Student is instructed using lecture, discussion, roleplaying, simulation and case studies in the following topics: human resource development and leadership concepts or procedures, learning skills, self-assessment and control, leadership performance and management styles, management control processes, reward and discipline, social power (influence), counseling, critical thinking, moral development, and subordinate development.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in introduction to personnel management OR introduction to organizational behavior (6/88).

NV-1720-0001

Submarine Tender Radiological Controls

Course Number: F-000-034.

Location: Submarine School, Groton, CT.

Length: 3 weeks (90 hours).

Exhibit Dates: 12/67-1/88.

Objectives: To train enlisted personnel in the basic theory of radiological controls as applied to nuclear support ships and shore facilities.

Instruction: Lectures and practical exercises in basic theory of radiological controls as applied to nuclear support ships and shore facilities. Course includes basic mathematics, slide rule use, radiological controls, and testing of samples for radiation.

Credit Recommendation: In the vocational certificate category, 1 semester hour in laboratory procedures (6/74).

NV-1720-0002

Cryogenics Equipment Technician

Course Number: J-750-0015.

Location: Cryogenics School, Portsmouth, VA.

Length: 19-20 weeks (760 hours).

Exhibit Dates: 1/87-Present.

Learning Outcomes: Upon completion of the course the student will be able to produce liquid nitrogen and liquid oxygen, and handle, store, operate, repair, and maintain cryogenic systems.

Instruction: Classroom instruction and practical exercises on cryogenic systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours lecture and 1 laboratory in cryogenic mechanical systems (3/89).

NV-1720-0003

Advanced Cryogenics Equipment Technician

Course Number: J-750-0485.

Location: Fleet Training Center Cryogenics School, Portmouth, VA.

Length: 8-9 weeks (320 hours).

Exhibit Dates: 10/88-Present.

Learning Outcomes: Upon completion of the course the student will be able to produce liquid nitrogen and liquid oxygen; handle, store, operate, repair, and maintain cryogenic systems.

Instruction: Classroom and practical exercises on cryogenic equipment and systems.

Credit Recommendation: In the vocational certificate category, 5 semester hours in cryogenic refrigeration systems; in the lower-division baccalaureate/associate degree category, 1 semester hour lecture and 1 semester hour laboratory in cryogenic mechanical systems (3/89).

NV-1721-0001

Remote Sensor System for Physical Security, Class C1

Course Number: A-198-0030.

Location: Service School Command, Great Lakes, IL.

Length: *Version 1:* 7 weeks (252 hours) *Version 2:* 4 weeks (120 hours).

Exhibit Dates: *Version 1:* 4/83-Present. *Version 2:* 8/77-3/83.

Objectives: To train selected students to maintain the remote sensor system for physical security at all times and in all conditions.

Instruction: *Version 1:* Lectures and practical exercises in the operation, theory and block diagram analysis on three types of remote sensor security systems. Basic digital theory is covered as background information to repair the multiplexer and video monitor to the component level. *Version 2:* Topics include troubleshooting and maintaining remote sensing equipment such as static, magnetic, and sonic, and keeping equipment operating properly under all conditions.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in security systems maintenance (1/86). *Version 2:* In the vocational certificate category, 2 semester hours in security systems maintenance (9/77).

NV-1721-0002

Noise Measurement and Reduction

Course Number: F-210-014.

Location: Submarine School, Groton, CT.

Length: 2 weeks (60 hours).

Exhibit Dates: 7/73-1/88.

Objectives: To train enlisted personnel to use sound measurement equipment, to isolate vibrations in noise-critical machinery, to reduce submarine noise, and to perform in-place dynamic balancing.

Instruction: Lectures and practical exercises in the use of sound measurement equipment, vibration analysis of noise-critical machinery, submarine noise reduction, and in-place dynamic balancing, including vibration fundamentals, analysis of frequency spectrum, mechanical vibration and measurement, airborne measurement, use of specific equipment, and overhaul of noise-critical motors.

Credit Recommendation: In the vocational certificate category, 2 semester hours in sound and vibration (5/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in mechanical technology laboratory (sound and vibration) or as an elective in mechanical technology (sound and vibration) (5/74).

NV-1721-0003

Noise and Vibration Measurement

Course Number: A-210-0013; L-210-015.

Location: Submarine Training Center, Charleston, SC; Submarine Training Center, San Diego; Fleet Submarine Training Facility, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: *Version 1:* 4/85-Present. *Version 2:* 11/72-3/85.

Objectives: To train enlisted personnel to operate sound- and vibration-monitoring equipment.

Instruction: *Version 1:* Upon successful completion of this course the student will possess the basic knowledge of submarine noise reduction, mechanical vibration and measurement, use of sound measurement equipment, analysis of frequency spectrum, inplace dynamic balancing, and vibration isolation of noise critical machinery. The course is presented through lectures and laboratory instruction in sound, vibration fundamentals, structure borne noise equipment and vibration isolation devices. Hands-on instruction in dynamic balancing and mechanical overhaul of noise critical motors. Instruments studies include general radio sound analysis system, electronic strobotac, and sound level meter. *Version 2:* Lectures and practical exercises in the operation of sound- and vibration-monitoring equipment, including sound and vibration theory, general radio equipment, calibration of vibration-monitoring equipment, vibration survey techniques and data analysis, in-place balance theory, vibration isolation, data acquisition, and equipment maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in vibration reduction and analysis (11/85). *Version 2:* In the vocational certificate category, 2 semester hours in sound and vibration (5/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in mechanical technology laboratory (sound and vibration) or as an elective in mechanical technology (sound and vibration) (5/75).

NV-1721-0004

Instrumentmen, Class A

Course Number: A-670-0010.

Location: Service Schools Command, Great Lakes, IL.

Length: Self-paced 16-17 weeks (546-640 hours).

Exhibit Dates: *Version 1:* 1/82-Present. *Version 2:* 11/70-12/81.

Objectives: To train enlisted personnel to repair typewriters and measuring instruments.

Instruction: Lectures and practical exercises in typewriter troubleshooting and repair, high- and low-pressure pneumatic and hydraulic measuring instruments repair and calibration, tachometers, torque- and flow-measuring instruments, temperature-measuring instruments, brazing and soldering techniques, and use of common hand and power tools.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in typewriter repair, 6 in instrument repair (1/82); in the lower-division baccalaureate/associate degree category, 6 semester hours in mechanical technology (1/82). *Version 2:* In the vocational certificate category, 5 semester hours in typewriter repair, 6 in instrument repair, 6 in mechanical technology (5/74); in the lower-division baccalaureate/associate degree category, 7 semester hours in mechanical technology (5/74).

NV-1721-0005

WATCH AND CLOCK REPAIR, CLASS C (Instrumentmen—Watch Repair)

Course Number: A-670-0011.

Location: Service Schools Command, Great Lakes, IL.

Length: *Version 1:* 12 weeks (432 hours). *Version 2:* 16 weeks (480 hours).

Exhibit Dates: *Version 1:* 5/76-Present. *Version 2:* 6/70-4/76.

Objectives: To train enlisted personnel to perform as watch and clock repairmen.

Instruction: Lectures and practical exercises in the lubrication, cleaning, disassembly, reassembly, and testing of clocks, watches, aneroid and mercurial barometers, and dial indicators, including use of watchmaker's tools (pivot drill and plug, balance staff, jewel setting, winding stem and click springs) and repivoting of wheel.

Credit Recommendation: *Version 1:* In the vocational certificate category, 10 semester hours in horology or watch and clock repair (1/82); in the lower-division baccalaureate/associate degree category, 6 semester hours in horology or watch and clock repair (1/82). *Version 2:* In the vocational certificate category, 15 semester hours in horology or watch and clock making (6/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in horology or watch and clock making (6/74); in the upper-division baccalaureate category, 3 semester hours in horology or watch and clock making (6/74).

NV-1721-0006

A-7A/B ATTITUDE HEADING AND REFERENCE SYSTEM INTERMEDIATE MAINTENANCE

Course Number: C-102-3793.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: 2 weeks (60-80 hours).

Exhibit Dates: *Version 1:* 8/74-Present. *Version 2:* 5/71-7/74.

Objectives: To train maintenance personnel in the operation and maintenance of a specific attitude, heading, and reference system.

Instruction: Lectures and practical exercises on an attitude, heading, and reference system (ASN-50), including introduction to the system and review of gyroscopic fundamentals; theory of the displacement gyro, amplifier power supply, compass adapter compensator, compass controller and switching rate gyro, attitude indicator coupler, attitude director indicator; and intermediate maintenance and test procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in instrument maintenance (3/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in control systems maintenance (3/82). *Version 2:* In the vocational certificate category, 3 semester hours in instrument maintenance (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in instrument maintenance (6/74).

NV-1721-0007

OPTICALMEN, CLASS A

Course Number: A-670-0018.

Location: Service School Command, Great Lakes, IL.

Length: *Version 1:* Self-paced 24 weeks (871 hours). *Version 2:* 15-17 weeks (612-692 hours). *Version 3:* 17 weeks (540 hours).

Exhibit Dates: *Version 1:* 8/84-Present. *Version 2:* 1/82-7/84. *Version 3:* 1/68-12/81.

Objectives: To train nonrated personnel as opticalmen in units of the fleet or in shore activities.

Instruction: *All Versions:* Lectures and practical exercises in the duties of opticalmen, including basic mathematics, hand tools and measuring instruments, drills and drilling machines, grinders, basic lathe operation, basic milling machine operation, maintenance and material management, fundamentals of optics, optical instrument components, optical instrument repair, lens cementing and painting, primary telescopes, and navigational instruments. *Version 1:* includes basic electricity and blueprint reading.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in machine tool operation, 2 in physical optics, 1 in basic mathematics, 1 in basic circuit theory and 1 in basic circuit laboratory (1/86). *Version 2:* Insufficient data available for evaluation (1/82). *Version 3:* In the lower-division baccalaureate/associate degree category, 3 semester hours in machine tool operation, 1 in basic arithmetic, 2 in physics (8/74); in the upper-division baccalaureate category, credit in physics on the basis of institutional evaluation (8/74).

NV-1721-0008

GYROCOMPASS TECHNICIAN MECHANICAL, CLASS C1

Course Number: *All Versions:* A-670-0014. *Version 2:* A-670-014.

Location: Service School Command, Great Lakes, IL.

Length: *Version 1:* 5 weeks (167 hours). *Version 2:* 10 weeks (400 hours).

Exhibit Dates: *Version 1:* 9/73-1/88. *Version 2:* 5/67-8/73.

Objectives: To train interior communications technicians to operate, maintain, and repair Sperry and Arma mechanical gyrocompasses.

Instruction: Lectures and practical exercises in the operation, maintenance, and repair of Sperry and Arma gyrocompasses, including principles of gyrocompasses, operation procedures, disassembly and assembly procedures, and inspection, overhaul, and repair procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in industrial-mechanical technology (9/77). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in industrial or mechanical technology (8/74).

NV-1721-0009

METEOROLOGICAL EQUIPMENT MAINTENANCE, CLASS C

Course Number: C-198-2010.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 4-17 weeks (176-688 hours).

Exhibit Dates: 4/74-1/88.

Objectives: To train electronic technicians to operate and maintain meteorological equipment in use within the Naval Weather Service Command and the Marine Corps Weather Service.

Instruction: Course consists of the following nine phases: I—Radiosonde Receptor Equipment; II—Weather Satellite Equipment; III—Transmissometer and RVR Converter; IV—Cloud Height Equipment; V—Surface Observational Equipment; VI—Weather Radar Equipment; VII—Weather Radar-Television Equipment; VIII—Radar-Telephone Transmission Systems; IX—Rawin Sounding Equipment. Students will attend all or part of the course, depending on their ultimate duty assignment. Group A students will complete all nine phases; Group B students will complete phases I and II; and Group C students will complete phases III, IV, and V.

Credit Recommendation: Group A: In the vocational certificate category, 12 semester hours in weather equipment maintenance or instrument repair (6/75); in the lower-division baccalaureate/associate degree category, 8 semester hours in instrumentation, electrical laboratory, and/or electronic laboratory, and 4 semester hours in weather equipment (6/75). Group B: In the vocational certificate category, 4 semester hours in weather equipment maintenance or instrument repair (6/75); in the lower-division baccalaureate/associate degree category, 4 semester hours in instrumentation, electrical laboratory, and/or electronic laboratory (6/75). Group C: In the vocational certificate category, 5 semester hours in weather equipment maintenance or instrument repair (6/75); in the lower-division baccalaureate/associate degree category, 5 semester hours in instrumentation, electrical laboratory, and/or electronic laboratory (6/75).

NV-1721-0010

SOUND ANALYSIS, NOISE AND VIBRATION REDUCTION (ENLISTED)

Course Number: A-210-0014; F-210-015.

Location: Submarine School, Groton, New London,CT.

Length: *Version 1:* 2 weeks (80 hours). *Version 2:* 3 weeks (91 hours).

Exhibit Dates: *Version 1:* 7/73-Present. *Version 2:* 3/70-6/73.

Objectives: To train personnel in the techniques and equipment involved in the analysis and reduction of submarine noise and vibration.

Instruction: *All Versions:* Lectures and practical exercises in the operation, calibration, and maintenance of specific noise and vibration measuring instruments. *Version 1:*

Includes operation, calibration and maintenance of spectrum analysers and recorders as well as dynamic balancing and isolation techniques for noise reduction.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in vibration reduction and analysis (6/81). *Version 2:* Credit is not recommended because of the military-specific nature of the course (5/74).

NV-1721-0011

Noise Reduction/Structure Borne Monitoring (Noise and Vibration Monitoring System (NVMS)

Course Number: A-210-0019.

Location: Submarine Training Facility, San Diego, CA; Submarine Training Facility, Charleston, SC; Submarine School, New London, CT Guided Missile School Detachment, Norfolk, VA; Sub Training Center Pacific, Pearl Harbor, HI.

Length: 2 weeks (79 hours).

Exhibit Dates: 12/85–Present.

Learning Outcomes: Upon successful completion of the course, the student will possess the basic knowledge of submarine noise reduction, mechanical vibration and measurement, use of sound measurement equipment, analysis of frequency spectrum, in-place dynamic balancing, and vibration isolation of noise critical machinery.

Instruction: The course is presented through lectures and laboratory instruction in sound, vibration fundamentals, structure borne noise equipment and vibration isolation devices. Hands-on instruction in dynamic balancing and mechanical overhaul of noise critical motors. Instruments studies include general radio sound analysis system, electronic strobotac, and sound level meter. For previous version, see NV-1721-0003.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to acoustics (7/87).

NV-1722-0001

Aviation Boatswain's Mate G (Gasoline) Class A
(Gasoline Handling)

Course Number: Not available.

Location: Air Material Center, Philadelphia, PA.

Length: 9 weeks (350 hours).

Exhibit Dates: 5/56–4/58.

Objectives: To qualify enlisted personnel as aviation boatswain's mates (gasoline handling).

Instruction: Lectures and practical exercises in aircraft carrier air department organization, hydraulics principles, air-sea rescue, aircraft fire fighting and damage control fire fighting, aviation seamanship, aircraft carrier flight and hangar deck operations, fuel and oil storage and transfer, gaseous storage and transfer systems and handling operations, and fuel and fire-fighting equipment operation and preventive maintenance procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in fire science, 1 as an elective in seamanship, and 3 as an elective in petroleum or chemical technology (4/74).

NV-1722-0002

Boatswain's Mate Training

Course Number: G-060-6305.

Location: Amphibious School, Norfolk, VA.

Length: 2-3 weeks (68-105 hours).

Exhibit Dates: 7/68–1/88.

Objectives: To train seamen to perform the duties of a boatswain's mate.

Instruction: Lectures and practical exercises on duties of boatswain's mates, including honors and ceremonies, marlinspike seamanship, ground tackle and mooring, painting and equipment, damage control, gunnery, aids to navigation, rules of the road, life saving equipment, visual signals, weather, welin davits, amphibious boat seamanship, cargo handling and equipment, booms and rigging, and replenishment at sea.

Credit Recommendation: In the vocational certificate category, 2 semester hours in seamanship (5/74).

NV-1722-0003

Coastal Patrol Craft Training

Course Number: H-00-1800; H-000-1800.

Location: Inshore Operations Training Center, Mare Island, CA.

Length: 9 weeks (487–561 hours).

Exhibit Dates: 7/69–1/88.

Objectives: To train personnel for riverine/coastal warfare operations.

Instruction: Lectures and practical exercises on riverine/coastal warfare operations, including team training for coastal patrol craft crews in boat operations, tactics, navigation, seamanship, gunnery, and communications; specialized training in small arms, engineering, hull, damage control and salvage; survival-in-water training; all aspects of counterinsurgency and survival; and language training.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-1722-0004

Fin Stabilizer System (Sperry and Ledgewood Controls) Maintenance, Class C1

Course Number: A-690-0023.

Location: Service School Command, Great Lakes, IL.

Length: 6 weeks (180 hours).

Exhibit Dates: 7/77–1/88.

Objectives: To train selected personnel to check out, troubleshoot, maintain and repair the Sperry active fin stabilizer system.

Instruction: Instruction in the operation and maintenance of the fin stabilizer system including servo-amplifier systems, hydraulic systems, and system troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electromechanical and hydraulic systems (9/77).

NV-1722-0005

Basic Boatswain's Mate (General)

Course Number: J-060-0622; J-060-6221.

Location: Fleet Training Center, Newport, RI.

Length: 3 weeks (105 hours).

Exhibit Dates: 8/71–1/88.

Objectives: To provide nonrated naval personnel with the skills of the general boatswain's mate rating.

Instruction: Lectures and practical exercises on the responsibilities of the general boatswain's mate rating, including duties, marlinspike seamanship, ground tackle, line handling, painting and equipment, honors and ceremonies, aids to navigation, weather, rules of the road, boat seamanship, visual signals, life saving equipment, welin davits, booms and rigging, cargo-handling equipment, and replenishment at sea.

Credit Recommendation: In the vocational certificate category, 2 semester hours in seamanship (5/74).

NV-1722-0006

Destroyer Officer

Course Number: A-00-107.

Location: Naval Destroyer School, Newport, RI.

Length: 26 weeks (780 hours).

Exhibit Dates: 6/69–1/88.

Objectives: To train officers in the operations, weapon systems, and engineering departments aboard naval destroyers.

Instruction: Lectures in ship handling and operations, weapons systems, antisubmarine warfare, fuel oil system, electrical system, lubrication system, and special problems in damage control.

Credit Recommendation: In the vocational certificate category, 5 semester hours in industrial technology (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in industrial technology (6/74); in the upper-division baccalaureate category, 3 semester hours in naval engineering (12/68).

NV-1722-0007

Basic Submarine Quartermaster, Class A

Course Number: F-772-010.

Location: Submarine School, Groton, CT.

Length: 5 weeks (199 hours).

Exhibit Dates: 8/67–1/88.

Objectives: To train enlisted personnel to assist in navigation and visual communication.

Instruction: Lectures and practical exercises in navigation publications, charts and instruments, piloting, tides and currents, rules of the nautical road, use of operating signals in cummunications, flaghoists, flashing lights, and semaphore.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1722-0008

Officer of the Deck-Basic
(Prospective Officer of the Deck)

Course Number: *Version 1:* K-2E-2103. *Version 2:* C-602.

Location: Fleet Training Center, San Diego, CA.

Length: 3 weeks (87–92 hours).

Exhibit Dates: *Version 1:* 5/78–Present. *Version 2:* 6/66–12/68.

Objectives: To provide basic preparation for the duties of an officer of the deck in port or underway.

Instruction: *Version 1:* Lectures, problem solving and laboratory experiences in seamanship, navigation and tactics including ground tackle, heavy weather seamanship, use of magnetic compass, buoys and other navigation aids, navigational publications, use of maneuvering board and voice radio procedures. *Version 2:* Lectures and practical exercises in communications, navigation and rules of the road, tactics, watchstanding in port and at sea, anchoring and weighing anchor, ship handling drill, navigational instruments, and the U.S. bouyage system.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in basic navigation and seamanship (1/83). *Version 2:*

Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1722-0009

Swift Boat Crew Training

Course Number: H-00-5324; H-000-5324.

Location: Amphibious School, Coronado, CA.

Length: 9 weeks (260 hours).

Exhibit Dates: 1/66–12/68.

Objectives: To prepare personnel for duty as Swift boat crewmen.

Instruction: Lectures and practical exercises in survival swimming, maps and charts, navigation, radio operation, communications, electronics, engine operation, boat electrical systems, and maintenance.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-1722-0010

River Patrol Craft Training

Course Number: H-00-1600; H-000-1600.

Location: Inshore Operations Training Center, Mare Island, CA.

Length: 8–10 weeks (432–538 hours).

Exhibit Dates: 11/66–1/88.

Objectives: To train officers and enlisted personnel in the conduct of river patrol operations.

Instruction: Team training in boat operations and tactics; boarding and search procedures; navigation; seamanship; gunnery; communications; and hull, engine and electronics maintenance and repair.

Credit Recommendation: In the vocational certificate category, 6 semester hours in seamanship (7/74).

NV-1723-0001

Machine Tool Operator
(Machine Tool Operations)

Course Number: A-702-0028; L-702-010.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Fleet Ballistic Missile Training Center, Charleston, SC; Submarine School, Groton, New London, CT.

Length: *Version 1:* 3 weeks (112 hours). *Version 2:* 2 weeks (60–72 hours).

Exhibit Dates: *Version 1:* 2/79–3/85. *Version 2:* 9/66–1/79.

Objectives: To provide enlisted personnel with advanced training in the operation of South Bend engine lathes.

Instruction: For this course after 3/85 see NV-1723-0015. Lectures and practical exercises in the repair and operation of South Bend engine lathes, including measuring instruments, center drilling, rough turning, tool bit grinding, taper turning, threading and knurling, and milling.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in mechnical or manufacturing technology (6/81). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in machine shop (4/74).

NV-1723-0002

Machinery Repairmen, Class A

Course Number: A-702-0019.

Location: Service School Command, San Diego, CA.

Length: *Version 1:* 10–11 weeks (400 hours). *Version 2:* 12 weeks (360–374 hours).

Exhibit Dates: *Version 1:* 12/78–Present. *Version 2:* 10/64–11/78.

Objectives: To train enlisted personnel to perform as machinery repairmen.

Instruction: Lectures and practical exercises in machinery repair, including use of hand tools and measuring instruments; principles and applications of blueprint reading; mathematics; portable equipment; machine shop procedures, bench work, and disassembly, repair, assembly, and testing; basic, intermediate, and advanced operations on drilling, shaping, turning, milling, grinding, sawing, and engraving machines; the fabrication of parts and repair of valves, and maintenance management.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in machine trades or machinery repair (5/82); in the lower-division baccalaureate/associate degree category, 3 semester hours in machine trades or machinery repair (5/82). *Version 2:* In the vocational certificate category, 6 semester hours in machine trades or machinery repair (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in machine trades or machinery repair (5/74); in the upper-division baccalaureate category, 2 semester hours in machine trades or machinery repair (5/74).

NV-1723-0003

Molders, Class B

Course Number: A-790-0011.

Location: Development and Training Center, San Diego, CA.

Length: 12 weeks (360 hours).

Exhibit Dates: 2/65–1/88.

Objectives: To train enlisted personnel to identify and test ferrous and nonferrous casting metals, identify and use melting equipment, prepare molds, and cast various ferrous and nonferrous metals.

Instruction: Lectures and practical exercises in preparing molds and casting metals. Topics include mechanical drawings, mathematics and foundry calculations, mold construction, melting equipment, leadership skills, casting-metal metallurgy, identification and testing of metal castings, nonferrous alloy casting technology, and foundry management.

Credit Recommendation: In the vocational certificate category, 6 semester hours in foundry practice (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in foundry practice (6/74).

NV-1723-0004

Patternmaker, Class A

Course Number: A-790-0012.

Location: Patternmakers School, San Diego, CA.

Length: 20 weeks (600–694 hours).

Exhibit Dates: 11/61–1/88.

Objectives: To train personnel to perform as patternmakers.

Instruction: Lectures and practical exercises in the functions of patternmakers, including fundamentals of patternmaking; shop math, pattern reproduction, production molding, and mold construction; flanged fittings, molding equipment, and intercasting; surface development; segmental, staved, and lag construction; metal patterns; shell molding; advanced patternmaking; pattern and casting design; pattern machinery operation, maintenance, and safety precautions; and hand and portable power tools.

Credit Recommendation: In the vocational certificate category, 24 semester hours in patternmaking and foundry (6/74); in the lower-division baccalaureate/associate degree category, 15 semester hours in patternmaking and foundry (6/74); in the upper-division baccalaureate category, 6 semester hours in patternmaking and foundry (6/74).

NV-1723-0005

Shipfitters Hull Maintenance Technician, Class A, Phase 2

Course Number: A-700-010.

Location: Training Center, Philadelphia, PA; Training Center, San Diego, CA.

Length: *Version 1:* 8 weeks (240 hours). *Version 2:* 12 weeks (353 hours).

Exhibit Dates: *Version 1:* 8/77–10/81. *Version 2:* 1/72–7/77.

Objectives: To train enlisted personnel in shipfitting and hull maintenance.

Instruction: Lectures and practical exercises in shipfitting and hull maintenance, including basic tools and materials, basic metallurgy, oxyacetylene welding, silver brazing, braze welding, manual arc welding, sheetmetal layout and fabrication, piping sections layout and fabrication, shipboard piping systems, and environmental pollution control.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in welding processes, 1 in sheet metal fabrication (10/81). *Version 2:* In the vocational certificate category, 8 semester hours in sheet metal work and piping (5/74).

NV-1723-0006

Shipfitters, Class A (Metalsmith)

Course Number: Not available.

Location: Training Center, San Diego, CA.

Length: 12 weeks (360 hours).

Exhibit Dates: 5/63–12/68.

Objectives: To train enlisted personnel to be metalsmiths.

Instruction: Lectures and practical exercises in metalsmithy, including shipfitter responsibilities, mathematics, blueprint reading and symbols, tools and materials, metallurgy, welding, brazing and soldering, coppersmithing, and basic metalsmithing.

Credit Recommendation: In the vocational certificate category, 8 semester hours in metalsmithy (5/74).

NV-1723-0007

Steelworker/Sheetmetal, Class C

Course Number: A-703-0010.

Location: Construction Training Center, Gulfport, MS; Construction Training Center, Port Hueneme, CA; Construction Battalion Center, Davisville, RI.

Length: 6–7 weeks (180–210 hours).

Exhibit Dates: 1/72–1/88.

Objectives: To train petty officers to perform as sheet metal technicians.

Instruction: Lectures and practical exercises in sheet metal work and blueprint reading and estimating, including mathematics; blueprint reading, planning, and estimating; sheet metal pattern layout; sheet metal tools and equipment; soldering; sheet metal fabrication and installation; material requisitioning; pattern layout; and duties and responsibilities of the supervisor.

Credit Recommendation: In the vocational certificate category, 4 semester hours in sheet metal (5/74).

NV-1723-0008

Steelworker, Class J (SW)

Course Number: A-711-0018.

Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS; Construction School, Davisville, RI.

Length: 14-15 weeks (420-454 hours).

Exhibit Dates: 9/63-1/88.

Objectives: To train personnel to perform as steelworkers with construction battalions.

Instruction: Lectures and practical exercises in the techniques of control and supervision and the materials and tools used in the planning and erection of steel structures, including foremanship, applied mathematics, metal working, oxyacetylene welding, inert-gas welding, and steel erection.

Credit Recommendation: In the vocational certificate category, 9 semester hours in construction and advanced steelwork (7/76).

NV-1723-0009

Steelworkers, Class A

Course Number: A-711-0015.

Location: Construction Training Center, Gulfport, MS; Construction Training Center, Port Hueneme, CA.

Length: *Version 1:* 9 weeks (265 hours). *Version 2:* 12 weeks (360-361 hours).

Exhibit Dates: *Version 1:* 7/75-1/88. *Version 2:* 12/63-6/75.

Objectives: To train enlisted personnel to be steelworkers.

Instruction: *Version 1:* Lectures and practical exercises in erection of steel structures, including basic mathematics, blueprint reading and sketching, sheet metal layout, metal working, and welding. *Version 2:* Topics also include steel erection and rigging.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in construction, basic steelworker (7/76). *Version 2:* In the vocational certificate category, 6 semester hours in construction, basic steelworker (5/74).

NV-1723-0010

Intermediate Level Maintenance Navigation Technician
(Navigation Technician Intermediate Level Maintenance)

Course Number: A-193-0311.

Location: Naval Guided Missiles School, Dam Neck, VA.

Length: 3 weeks (104-120 hours).

Exhibit Dates: 8/82-Present.

Objectives: To provide naval personnel with the skills and knowledge to perform intermediate level maintenance on navigation subsystems.

Instruction: Lectures and practical exercises in the appropriate administrative procedures for maintenance duties including the correct soldering and wirewrapping techniques needed to maintain the navigation subsystem.

Credit Recommendation: In the vocational certificate category, 2 semester hours in soldering and wirewrapping techniques (6/89).

NV-1723-0011

Machinery Repairmen, Class B

Course Number: A-702-0020.

Location: Technical Training Command, San Diego, CA.

Length: *Version 1:* 17 weeks (510 hours). *Version 2:* 18 weeks (600 hours).

Exhibit Dates: *Version 1:* 9/72-1/88. *Version 2:* 10/64-8/72.

Objectives: To train personnel to serve as machinery repairmen.

Instruction: Lectures and practical exercises in machinery repair. Course includes shop mathematics, interpretation of drawings of machine tool operations on the toolmaker's lathe; turret lathe; surface, tool and universal cylindrical grinders; milling machines and rapid, plane, angular, and differential indexing; the generation and manufacture of spur, helical, bevel, and worm gears, and symmetrical and nonsymmetrical forms; metal spraying; physical metallurgy and plastics; and advanced precision measuring instruments.

Credit Recommendation: *Version 1:* In the vocational certificate category, 10 semester hours in advanced machine shop (5/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in advanced machine shop (5/74); in the upper-division baccalaureate category, 6 semester hours in advanced machine shop (5/74). *Version 2:* In the vocational certificate category, 10 semester hours in machinery repair, metals, machine technology, and toolmaking (5/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in machinery repair, metals, machine technology, and toolmaking (5/74); in the upper-division baccalaureate category, 4 semester hours in machinery repair, metals, machine technology, and toolmaking (5/74).

NV-1723-0013

Hull Technician Class A, Phase I/II

Course Number: A-495-0035; A-700-0010.

Location: Naval Technical Training Center, Treasure Island, San Francisco, CA; Navy Damage Control Training Center, Philadelphia, PA.

Length: 11 weeks (440 hours).

Exhibit Dates: 11/81-Present.

Objectives: To train enlisted personnel in damage control techniques and in ship fitting and hull maintenance.

Instruction: The first three weeks contain lectures and practical exercises in hull and hull systems, casualty control fire fighting, hull and pipe patching, characteristics of nuclear bursts, classification and detection of biological and chemical agents, ship board decontamination use and care of oxygen breathing equipment. The last 8 weeks is directed to lectures and practical exercises in ship fitting and hull maintenance, including basic tools and materials, oxyacetylene welding, manual arc welding, sheet metal layout and fabrication, ship board piping systems and environmental pollution control.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, for those students completing phase I, 2 semester hours in damage control and 1 in firefighting. For those students completing phase II, 3 semester hours in welding processes and 1 in sheet metal fabrication (11/81).

NV-1723-0014

Underwater Hydraulic Tools

Course Number: A-433-0043.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Mobile Diving Salvage School, Little Creek, VA.

Length: 2 weeks (75 hours).

Exhibit Dates: 3/85-Present.

Objectives: To provide training for second class divers and above with advanced maintenance and tool technique training in the NAVSEA under water hydraulic tool package.

Instruction: Lecture and laboratory instruction. Upon successful completion of this course the diver is prepared for assignment to ashore/afloat ship repair facilities to provide underwater ship repair. This includes in depth study of the individual tools, their power sources, troubleshooting and preventive maintenance actions. Hydraulic tools covered in the course are: grinder, impart wrench, come-along, rope cutter, jack and sump pump.

Credit Recommendation: In the vocational certificate category, 1 semester hour in mechanical laboratory (11/85).

NV-1723-0015

Machine Tool Operator

Course Number: A-702-0028.

Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC; Trident Training Facility, Kings Bay, GA; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 3 weeks (119 hours).

Exhibit Dates: 4/85-Present.

Learning Outcomes: Upon completion of the course the student will be able to operate and maintain lathes and milling machines.

Instruction: Lectures and laboratories in lathes and milling machine operation and maintenance, including measuring instruments, center drilling, rough turning, tool bit grinding, taper turning, threading, knurling and milling.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour lecture and 1 semester hour laboratory in manufacturing or mechanical technology (lathe and milling machine operation) (10/89).

NV-1723-0016

Advanced Auxiliary Equipment Package

Course Number: A-652-0136.

Location: Submarine School, Groton/New London, CT.

Length: 13 weeks (513 hours).

Exhibit Dates: 7/84-Present.

Learning Outcomes: Upon completion of the course the student will be able to weld, braze, and repair air conditioning and refrigeration systems.

Instruction: This is a pipeline course consisting of A-701-0064, Fuel Gas Welding, Brazing, and Cutting; A-701-0053, Shielded Metal Arc Welding; A-702-0028, Machine Tool Operator; and A-720-0030, Air Conditioning and Refrigeration. Please see the individual exhibits for further information.

Credit Recommendation: Please see the exhibits cited above for credit recommendations (10/89).

NV-1724-0001

Heat Treatment of Metals, Class C

Course Number: A-702-0021.

Location: Service Schools Command, San Diego, CA.

Length: 7 weeks (234-280 hours).

Exhibit Dates: *Version 1:* 2/72-Present. *Version 2:* 10/64-1/72.

Objectives: To train personnel as heat treatment specialists.

Instruction: *All Versions:* Lectures and practical exercises in the heat treatment of metals, including properties of metals, metal alloy systems, identification and classification of metals, corrosion and surface treatment. *Version 2:* Includes maintenance and material management.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in physical metallurgy, 3 in heat treating laboratory (5/82). *Version 2:* In the upper-division baccalaureate category, 4 semester hours in physical metallurgy, 4 in heat treating (5/74).

NV-1724-0002

Nondestructive Testing of Metals

Course Number: A-701-017.

Location: Welding School, Class C, San Diego, CA.

Length: 14-19 weeks (420-665 hours).

Exhibit Dates: 3/65-1/88.

Objectives: To train personnel in the nondestructive testing of metals.

Instruction: Lectures and practical exercises in Atomic Energy Commission rules and regulations pertaining to radiography and the safe handling of radioactive byproduct material, and the fundamentals of nondestructive testing, including NDT-related inspections and mathematics; fundamentals of radiation as applied to industrial radiography; radiation control, detection, and measurement; magnetic particle and liquid penetrant testing; ultrasonic testing; and radiographic inspection.

Credit Recommendation: In the vocational certificate category, credit in metals testing on the basis of institutional evaluation (5/74); in the lower-division baccalaureate/associate degree category, credit in metals testing on the basis of institutional evaluation (5/74); in the upper-division baccalaureate category, credit in metals testing on the basis of institutional evaluation (12/68).

NV-1724-0003

Nondestructive Testing of Metals
Ultrasonic Thickness Inspection
Class C1

Course Number: A-701-0046.

Location: Service School Command, San Diego, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 3/80-Present.

Objectives: To train naval personnel to be ultrasonic thickness and banding inspectors.

Instruction: Includes instruction in the theory of ultrasonics, principles and fundamental wave modes; equipment-transducers and flow detectors; documents and standards; thickness and bonding readings and glass reinforced plastics.

Credit Recommendation: In the vocational certificate category, 1 semester hour in ultrasonic nondestructive testing (5/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in ultrasonic quality control (5/82).

NV-1724-0004

Nondestructive Testing of Metals
Ultrasonic Silver Braze
Inspection, Class C1

Course Number: A-701-0034.

Location: Service School Command, San Diego, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 2/76-Present.

Objectives: To train naval personnel in ultrasonic silver braze inspection.

Instruction: Classroom instruction and laboratory exercises in the theory of ultrasonic wave technology to be used for nondestructive testing inlcuding wave theory, equipment calibration, transducers, and flaw detection as applied to brazed joints.

Credit Recommendation: In the vocational certificate category, 2 semester hours in ultrasonic nondestructive testing (5/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in ultrasonic quality control (5/82).

NV-1724-0005

Nondestructive Testing of Metals
Ultrasonic Shearwave
Inspection, Class C1

Course Number: A-701-0047.

Location: Service School Command, San Diego, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 8/78-Present.

Objectives: To train personnel in the theory, application and techniques required for ultrasonic shearwave inspection.

Instruction: Theory of the generation, attenuation and reflections of ultrasonic wave modes including the advantages and limitations of ultrasonic testing. Operation and qualification of ultrasonic shearwave equipment to detect, evaluate and record weld discontinuities in accordance with written procedures and acceptance standards.

Credit Recommendation: In the vocational certificate category, 2 semester hours in ultrasonic sheer wave nondestructive testing (5/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in quality control ultrasonic sheerwave inspection (5/82).

NV-1724-0006

Nondestructive Testing of Metals
Visual, Magnetic Particle and
Liquid Penetrants
Operator/Inspector

Course Number: A-701-0033.

Location: Service School Command, San Diego, CA.

Length: 8 weeks (320 hours).

Exhibit Dates: 12/75-Present.

Objectives: To train naval personnel in the theory and application of nondestructive testing of materials.

Instruction: To train enlisted personnel in the theory and application of nondestructive testing of materials including inspection of weld zones by visual, magnetic particle, and liquid penetrant methods. Also instruction in basic magnetic theory and welding techniques.

Credit Recommendation: In the vocational certificate category, 3 semester hours in nondestructive testing (5/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in quality control in visual metals, magnetic particles and liquid penetrants (5/82).

NV-1724-0007

Nondestructive Testing of Metals
Radiographic Inspector Class C1

Course Number: A-701-0035.

Location: Service School Command, San Diego, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 10/79-Present.

Objectives: To train naval radiographers in the advanced theory, application and techniques required for radiographic inspectors.

Instruction: Lectures and practical exercises in radiographic theory including nomenclature and functions of X-ray equipment, characteristics of X- and gamma-rays, X-ray films including processing and factors affecting quality, radiographics, mathematics, weld defects, qualifications and inspections requirements. Also included are perceptual skills required for film interpretation along with information and knowledge required in accepting or rejecting discontinuation/defects.

Credit Recommendation: In the vocational certificate category, 3 semester hours in nondestructive testing, mathematical inspection (5/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in metal radiographic, 1 in photographic laboratory (5/82).

NV-1724-0008

Nondestructive Testing of Metals
Eddy Current Inspection Class
C1

Course Number: A-701-0050.

Location: Service School Command, San Diego, CA.

Length: 2 weeks (68 hours).

Exhibit Dates: 8/77-Present.

Objectives: To train personnel in the theory, application and techniques required for eddy current inspection.

Instruction: Electrical theory of the generation, distribution and concepts of eddy currents including the advantages and limitations of eddy current testing. Operation and qualification of eddy current crack detection equipment on ferrous weldments in accordance with written procedures and acceptance standards. Operation and qualification of eddy current equipment to detect and evaluate dealloying in bronze castings in accordance with written procedures and acceptance standards.

Credit Recommendation: In the vocational certificate category, 1 semester hour in nondestructive testing (5/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in quality control (5/82).

NV-1724-0009

Nondestructive Testing of Metals
Radiographic Operator

Course Number: A-701-0032.

Location: Service School Command, San Diego, CA.

Length: 10 weeks (400 hours).

Exhibit Dates: 3/79-Present.

Objectives: To train personnel in the theory, application and techniques required for radiographic inspection.

Instruction: Lectures and practical exercises in the theory of the generation and exposure effects of X-rays and Gamma-rays and development of film exposure and development techniques to written procedures and acceptance standards.

Credit Recommendation: In the vocational certificate category, 3 semester hours in radiographic nondestructive testing (5/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in radiographic quality control, 1 in photographic laboratory (5/82).

NV-1726-0001

Ship Serviceman Class C Shipboard
Barber

Course Number: A-840-0012; A-840-0013.

Location: Service Schools Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 4 weeks (140 hours).

Exhibit Dates: 1/73–1/88.

Objectives: To train personnel to perform as barbers.

Instruction: Lectures and practical exercises in the organization and management of barbershop operations, including use and maintenance of barbershop equipment, hair cutting, barber tools and equipment, management and operation, skin diseases and prevention, honing and stropping, and neck shaving.

Credit Recommendation: In the vocational certificate category, 4 semester hours in barbering (6/74).

NV-1728-0001

Counterinsurgency Training

Course Number: G-00-6250; G-000-6250.

Location: Naval Amphibious School, Little Creek, Norfolk, VA.

Length: 3 weeks (205 hours).

Exhibit Dates: 4/68–1/88.

Objectives: To train and prepare naval officers and enlisted personnel for duty in countries subject to insurgency warfare. The course presents a geopolitical orientation to a country under wartime conditions, and prepares the individual to survive hostile conditions.

Instruction: Fundamentals of insurgency warfare; counterinsurgency; weapons; techniques of survival, evasion, resistance, and escape.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (11/73).

NV-1728-0002

Naval Internal Security Force Training

Course Number: H-00-5240; H-000-5240.

Location: Naval Amphibious School, Coronado, San Diego, CA.

Length: 4 weeks (97 hours).

Exhibit Dates: 6/67–1/88.

Objectives: To provide training in internal security and counterinsurgency operations, and to provide a basic geopolitical orientation to a specific foreign country.

Instruction: History of insurgent movements; fundamentals of counterinsurgency; communist ideology, organization and goals; general principles of guerilla and counterguerilla operations; naval tactics and techniques which have application in combating insurgent movements; general principles of psychological operations and civil affairs; area and cultural orientation; intelligence and counterintelligence orientation; voice communication procedure; and internal security. Instruction further acquaints student with basic techniques of personal and physical security and qualifies him in areas of physical fitness, marksmanship, and communications skills.

Credit Recommendation: In the vocational certificate category, 3 semester hours in criminal justice (11/73).

NV-1728-0003

Counterinsurgency Pre-Deployment

Course Number: H-00-5221; H-000-5221.

Location: Naval Amphibious School, Coronado, San Diego, CA.

Length: 13 weeks (508 hours).

Exhibit Dates: 1/69–1/88.

Objectives: To provide maximum training in internal defense, internal development and insurgency/counterinsurgency to Navy officers and personnel enroute to duty in an advisory capacity or in a billet which will require close operational contact with the indigenous population in a Pacific Ocean Area country where subversive aggression is incipient or in being.

Instruction: Ideologies: theory and application; area studies; insurgency and counterinsurgency; psychological operations; intelligence and counterintelligence; guerilla and counterguerilla warfare; communications; engineering; medical; weapons training; field tactics; survival, evasion, resistance to interrogation, and escape techniques.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in Vietnamese language, 9 in criminal justice (11/73).

NV-1728-0004

Fire Fighter Instructor
(Fire Fighting Instructor)

Course Number: A-780-0024; A-780-0025.

Location: Damage Control Training Center, Philadelphia, PA; Damage Control Training Center, Treasure Island, CA.

Length: 4 weeks (128–140 hours).

Exhibit Dates: 1/64–1/88.

Objectives: To prepare enlisted personnel as instructors of fire fighters.

Instruction: Lectures and practical experience in the use and care of fire-fighting equipment, fire-fighting techniques, lesson planning, and instructing.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in fire fighting (1/74).

NV-1728-0005

Aviation Boatswain's Mate F (Fuels), Class

Course Number: C-821-2010.

Location: Naval Air Technical Training Center, Lakehurst, NJ; Naval Air Technical Training Center, Philadelphia, PA.

Length: 7–8 weeks (280–320 hours).

Exhibit Dates: 4/66–1/88.

Objectives: To train enlisted personnel in the specialized techniques of ship fire fighting.

Instruction: Lectures and practical experience in safety, survival, and fire-fighting procedures, fuel and volatile liquid types, inspection and maintenance of transfer systems and shore based refuelers and service unit systems.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/74).

NV-1728-0006

1. Aircraft Firefighting and Rescue, Class A1
2. Aviation Crash Crewman Class C

Course Number: C-780-2010.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: 3–4 weeks (120–160 hours).

Exhibit Dates: *Version 1:* 7/78–Present. *Version 2:* 7/64–6/78.

Objectives: To train enlisted personnel who have backgrounds in aviation fundamentals to perform as aviation crash crewmen.

Instruction: Lectures and practical exercises in the functions of aviation crash crewmen, including theory of fire and fire extinguishing, aircraft familiarization, mobile fire-fighting equipment, and crash rescue and fire-fighting techniques.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in fire fighting (9/89). *Version 2:* In the vocational certificate category, 3 semester hours in fire fighting (5/74).

NV-1728-0007

Safety Inspector Class C

Course Number: None.

Location: Naval Schools Construction, Port Hueneme, CA; Naval Schools Construction, Davisville, RI; Naval Schools Construction, Gulfport, MS.

Length: 3 weeks (94 hours).

Exhibit Dates: 5/72–1/88.

Objectives: To train enlisted personnel to be safety inspectors in construction battalions.

Instruction: Lectures and practical exercises in naval safety programs and chain of command, safety administrative procedures, safety section organization and functions, transportation and construction equipment safety, power tools and hand tools safety, utilities construction and electrical safety, and steelworker and builder safety.

Credit Recommendation: In the vocational certificate category, 2 semester hours in safety inspection (5/74).

NV-1728-0009

Damage Controlman Class 'A' School

Course Number: A-495-2060.

Location: Naval Technical Training Center, Treasure Island, CA.

Length: 8 weeks (300 hours).

Exhibit Dates: 12/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to provide training to promote, effective shipboard team member participation in damage control activities.

Instruction: Lecture and laboratory exercise to provide knowledge of shipboard systems identification and communication of damage control conditions, and skill development in effective and safe damage control procedures (i.e. Firefighting, Biological and Chemical Decontamination).

Credit Recommendation: In the vocational certificate category, 3 semester hours in decontamination technology; in the lower-division baccalaureate/associate degree category, 4 semester hours in fire technology, and 2 in shipboard systems (8/89).

NV-1728-0011

Damage Control Assistant

Course Number: A-4G-0011; A-4G-0010.

Location: Naval Control Training Center, San Francisco, CA; Naval Control Training Center, Treasure Island, CA; Naval Control Training Center, Philadelphia, PA.

Length: *Version 1:* 6 weeks (220 hours). *Version 2:* 9 weeks (266 hours).

Exhibit Dates: *Version 1:* 7/78–Present. *Version 2:* 3/71–6/78.

Objectives: To train officers to be damage control officers.

Instruction: *All Versions:* Lectures in fire prevention and fire-fighting techniques, including extinguishing random fires, shipboard fire prevention, operation of oxygen breathing apparatus and other fire-fighting equipment; practical damage control, including underwater damage repair, plugging and patching and damage control battle organization; and nuclear, biological, and chemical warfare defense operations. *Version 2:* Includes research and development of firefighting equipment, practical damage control including ships systems operation and repair procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in ships engineering, 1 in fire prevention (7/87). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in fire prevention (5/74); in the upper-division baccalaureate category, 3 semester hours in ships engineering (5/74).

NV-1728-0012

Damage Controlmen Class A HT-A
Phase 1

Course Number: A-780-0035; A-780-0036.

Location: Damage Control Training Center, Philadelphia, PA; Damage Control Training Center, Treasure Island, CA.

Length: 3-8 weeks (240 hours).

Exhibit Dates: 7/70-10/81.

Objectives: To train enlisted personnel in damage control techniques.

Instruction: Lectures and practical exercises in hull and hull systems, casualty control, shoring, hull and pipe patching, plastic repairs, fire fighting, basic nuclear physics, characteristics of nuclear bursts, classification and detection of biological and chemical agents, shipboard decontamination, use and care of oxygen breathing equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in fire fighting, 3 in damage control (10/81).

NV-1728-0013

Aviation Boatswain's Mate U
(Utility), Class A

Course Number: Not available.

Location: Air Material Center, Philadelphia, PA.

Length: 9 weeks (360 hours).

Exhibit Dates: 3/57-2/58.

Objectives: To train boatswain's mates in the use and maintenance of aviation catapults and arresting gear.

Instruction: Lectures and practical exercises on the use and maintenance of catapults and arresting gear, including marlinspike seamanship, wire rope socketing, hydraulics, fundamentals of fire fighting, general information and preventive maintenance of catapult and arresting gear systems.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74).

NV-1728-0014

Aviation Boatswain's Mate H
(Aircraft Handling), Class A
(Aviation Boatswain's Mate H (Handling), Class A)

Course Number: C-822-2010.

Location: Air Technical Training Center, Philadelphia, PA; Air Technical Training Center, Lakehurst, NJ.

Length: 7-8 weeks (280 hours).

Exhibit Dates: 6/65-7/82.

Objectives: To train enlisted personnel as aviation boatswain's mates.

Instruction: Lectures and practical exercises on aircraft carrier fire fighting, aircraft-handling equipment maintenance, and spotting and handling of aircraft, including survival and emergency equipment, aircraft familiarization and handling, aircraft carrier fire fighting and personnel rescue, aircraft crash fire-fighting procedures and techniques, aircraft crash fire-fighting equipment ashore, and crash fire and rescue drills.

Credit Recommendation: In the vocational certificate category, 4 semester hours in fireman training (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in fire science (6/74); in the upper-division baccalaureate category, 2 semester hours in industrial safety and security (6/74).

NV-1728-0015

Military Justice (Non-Lawyer)

Course Number: A-5F-0014.

Location: Naval Training Center, San Diego, CA; Naval Justice School, Newport, RI.

Length: 5 weeks (120-148 hours).

Exhibit Dates: *Version 1:* 8/72-1/88. *Version 2:* 3/70-7/72.

Objectives: To train commissioned officers to act as paralegal professionals.

Instruction: Lectures and practical exercises in the duties and skills necessary to act as a paralegal professional in legal and court situations. Course includes court procedures; an in-depth study of criminal, civil, and military law; prosecution and judgemental services; and legal advising.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 4 semester hours in criminal justice or criminology (7/74). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in political science (12/68).

NV-1728-0016

Military Justice (Lawyer)

Course Number: A-5F-0013.

Location: Naval Justice School, Newport, RI.

Length: 10 weeks (400 hours).

Exhibit Dates: 7/72-1/88.

Objectives: To provide lawyers with a basic orientation to military and administrative law.

Instruction: Instruction includes lectures in military and administrative law, criminal procedure, military crimes, and rules of evidence; moot court exercises; and trial clinics and administrative proceedings. Students are required to do some library research.

Credit Recommendation: Undergraduate credit is not recommended because of the professional nature of the course (6/75).

NV-1728-0017

Military Justice (Officers)

Course Number: K-00-2044; K-00-060.

Location: Fleet Training Center, San Diego, CA.

Length: 3 weeks (90 hours).

Exhibit Dates: 2/71-1/88.

Objectives: To prepare personnel to perform the duties of a discipline or legal officer.

Instruction: Instruction provides the student with an overview of military justice, including court martial procedure, laws of evidence, court martial punishments, and search and seizure.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in evidence or criminal investigation (6/75).

NV-1728-0018

Aviation Boatswain's Mate Handling,
Class A1 (Shore Track)

Course Number: C-822-2012.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 3-4 weeks (132 hours).

Exhibit Dates: 8/82-6/86.

Learning Outcomes: Upon completion of the course, the student will be able to assist in aircraft ground maneuvering and assist in fire fighting with direct supervision on shore.

Instruction: Includes lectures and performance exercises in aircraft ground maneuvering and firefighting techniques on shore.

Credit Recommendation: In the vocational certificate category, 1 semester hour in heavy equipment operation (fire fighting) (6/87); in the lower-division baccalaureate/associate degree category, 1 semester hour in A/C ground handling, 1 in fire fighting principles, and 1 in industrial safety (6/87).

NV-1728-0019

Aviation Boatswain's Mate Handling,
Class A1 (Sea Track)

Course Number: C-822-2011.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 2-3 weeks (95 hours).

Exhibit Dates: 8/81-Present.

Learning Outcomes: Upon completion of the course, the student will be able to assist in aircraft ground maneuvering and assist in fire fighting with direct supervision at sea.

Instruction: Includes lectures and performance exercises in aircraft ground maneuvering and firefighting techniques at sea.

Credit Recommendation: In the vocational certificate category, 1 semester hour in heavy equipment operation (fire fighting) (6/87); in the lower-division baccalaureate/associate degree category, 1 semester hour in A/C ground handling, 1 in fire fighting principles, and 1 in industrial safety (6/87).

NV-1728-0020

Aviation Boatswain's Mate Handling,
Class A1
(Aviation Boatswain's Mate Aircraft Handling, Class A1)

Course Number: C-822-2010.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: *Version 1:* 5-6 weeks (224 hours). *Version 2:* 1-2 weeks (54-64 hours).

Exhibit Dates: *Version 1:* 5/87-Present. *Version 2:* 8/82-4/87.

Learning Outcomes: Upon completion of the course, the student will be able to assist in aircraft ground maneuvering and assist in firefighting with direct supervision on shore or at sea.

Instruction: Lectures and performance exercises in aircraft ground manuevering and firefighting techniques.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in heavy equipment operation (firefighting) (6/87); in the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft ground handling, 1 in fire fighting principles, and 1 in industrial safety (6/87). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft ground handling (6/87).

NV-1728-0021

Navy Security Guard (Class C1)

Course Number: A-830-0011.

Location: Naval Air Technical Training Center, Lakehurst, NJ.
Length: 4 weeks (181 hours).
Exhibit Dates: 10/85–Present.
Learning Outcomes: Upon completion of the course, the student will be able to display knowledge of patrolling assigned sector, qualify in weapons and firearms and self-defense techniques, conduct preliminary investigations, complete and file police reports, operate patrol vehicle, perform physical security, loss prevention, crime prevention, respond to calls for police service, and become familiar with military code of justice.
Instruction: Topics covered are patrol techniques, vehicle operations, felony stops, report writing/forms, apprehensions and restraints, crisis intervention/combatting terrorism, crime prevention/loss prevention, defensive tactics, weapons firing, and emergency driving procedures.
Credit Recommendation: In the vocational certificate category, 1 semester hour in physical training and weaponry (8/87); in the lower-division baccalaureate/associate degree category, 3 semester hours in patrol procedures (8/87).

NV-1728-0022

Sensitive Compartmented Information (SCI) Administration and Physical Security

Course Number: J-3A-0984.
Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.
Length: 1–2 weeks (60 hours).
Exhibit Dates: 9/84–Present.
Learning Outcomes: Upon completion of the course the student will be able to administer and employ security procedures for small shipboard and land based offices.
Instruction: Lectures and extensive practical exercises expose students to: an introduction to intelligence, performance and administration of a security program; completion of investigation forms and checklists; application of detection, telephone, and other security systems.
Credit Recommendation: In the vocational certificate category, 2 semester hours in security administration (12/87).

NV-1728-0023

Senior Enlisted Damage Control

Course Number: A-495-2055.
Location: Naval Technical Training Center, Treasure Island, CA. Damage Control Training Center, Philadelphia, PA.
Length: 10 weeks (400 hours).
Exhibit Dates: 12/84–Present.
Learning Outcomes: Upon completion of the course, the student will be able to operate and maintain all equipment in the areas of damage control; firefighting, chemical-biological and radiological (CBR) defense, nuclear weapons incidents, ship stability and bouyancy, and gas free engineering. Also plan, manage, conduct and critique ship-board training programs in damage control.
Instruction: Lecture and laboratory exercises in instructor training, damage control (DC) organization stability and bouyance, CBR defense, nuclear weapons and accidents/incidents, firefighting, emergency hull repair, practical DC, DC maintenance, and fire marshal/gas-free engineer.
Credit Recommendation: In the vocational certificate category, 2 semester hours in industrial safety, in the lower-division baccalaureate/associate degree category, 2 semester hours in advanced fire technology, and 1 in instructional methods (8/89).

NV-1729-0001

Food Services and Disbursing

Course Number: None.
Location: Naval Supply Center, Oakland, CA.
Length: 2 weeks (70 hours).
Exhibit Dates: 10/71–1/88.
Objectives: To acquaint experienced supply officers with new developments and procedures in food service management.
Instruction: New developments in food service management; review and reinforcement of food service/disbursing management functions.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/73).

NV-1729-0002

Commissaryman-Steward Management Principles, Class C

Course Number: A-800-0015; A-800-014; A-800-015.
Location: Naval School, San Diego, CA.
Length: 9 weeks.
Exhibit Dates: 9/71–4/85.
Objectives: To provide students with advanced technical knowledge and skills in food services and supervision.
Instruction: Management and administration principles; organization and personnel management; technical aspects; sanitation and nutrition.
Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in food service management (12/73).

NV-1729-0003

Commissaryman-Steward, Class C

Course Number: None.
Location: Naval School, San Diego, CA.
Length: 8 weeks (240 hours).
Exhibit Dates: 8/71–1/88.
Objectives: To provide trainees with advanced knowledge and skill in food services.
Instruction: Advanced training in food production and baking, with emphasis on fine food and classical cuisine; basic accounting; equipment; sanitation; standard recipes.
Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in hotel-restaurant institutions (12/73).

NV-1729-0004

Commissaryman-Steward, Class A
(Commissaryman Class A)

Course Number: None.
Location: Naval School, Newport, RI; Naval School, San Diego, CA.
Length: 8 weeks (240 hours).
Exhibit Dates: 4/68–1/88.
Objectives: To provide enlisted personnel with the technical knowledge and skills required to perform as commissarymen or stewards in food service facilities.
Instruction: Organization of supply department; methods of food service computation; principles of nutrition and their application to menu planning; sanitation and safety precautions; principles, methods, and techniques of cooking and baking.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in hotel-restaurant institutions (12/73).

NV-1729-0005

Stewards, Class A

Course Number: None.
Location: Naval School, San Diego, CA.
Length: 6–7 weeks (180–210 hours).
Exhibit Dates: 9/62–12/68.
Objectives: To train personnel to cook and serve meals, prepare menus, and maintain records.
Instruction: A basic course in food production principles, covering cooking, baking, menu planning, sanitation, receiving, and storage.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in hotel-restaurant institutions (12/73).

NV-1729-0006

Commissarymen, Class B

Course Number: None.
Location: Naval School, San Diego, CA; Naval School, Bayonne, NJ; Naval School, Newport, RI.
Length: 15 weeks (450 hours).
Exhibit Dates: 5/62–12/68.
Objectives: To prepare food service personnel for supervisory and advanced technical duties.
Instruction: Essentially an advanced volume-food service management course with emphasis on the finer points of cooking, baking, menu planning, purchasing, and management.
Credit Recommendation: In the vocational certificate category, 5 semester hours in hotel restaurant institutions (12/73); in the upper-division baccalaureate category, 3 semester hours in hotel-restaurant institutions (12/73).

NV-1729-0007

Steward Apprentice, Class P
(Class P Steward's Apprentice)

Course Number: None.
Location: Naval Training Center, San Diego, CA; Naval School, Great Lakes, IL; Naval School, Bainbridge, MD.
Length: 6 weeks (103 hours).
Exhibit Dates: 3/56–12/68.
Objectives: To train stewards in dining room preparation and individual food service.
Instruction: Lectures and practical exercises in dining room preparation and individual food service, including table setting and meal service; preparation of salads, sandwiches, vegetables, eggs, beverages, and cereals; food storage and preparation precautions; and securing for sea.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in catering or food service (6/74).

NV-1729-0008

Stewards
(Commissioned Officers' Mess Closed Mess Management)

Course Number: A-801-015.
Location: Mess Management Training Facility, Patuxent River, MD.
Length: 8 weeks (240 hours).
Exhibit Dates: 6/68–1/88.
Objectives: To train stewards to manage mess halls.
Instruction: Lectures and practical exercises in the management of mess halls. Course includes military leadership, mess regulations, mathematics, accounting proce-

dures, sanitation, table and banquet planning and services, nutrition and menu planning, culinary arts, meat, poultry and seafood preparation, and layout and facilities.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in food preparation (or 3 in introduction to food service and 3 in catering), 3 in business mathematics, 3 in food and beverage management (8/74); in the upper-division baccalaureate category, 2 semester hours in food service management (12/68).

NV-1729-0009

Management of Navy OPEN Messes (Management of Officers and Petty Officers' Messes)

Course Number: S-8E-0010; A-8E-010.

Location: Special Services Administrative Activity, Patuxent River, MD; Mess Management Training Facility, Patuxent River, MD.

Length: 4 weeks (120-140 hours).

Exhibit Dates: *Version 1:* 1/77–Present. *Version 2:* 6/66–12/76.

Objectives: To train enlisted personnel and civilians to manage officers' and petty officers' messes.

Instruction: *Version 1:* Instruction includes lectures, audio-visual presentations and practical exercises designed to develop managerial skills needed to successfully operate Navy OPEN Messes. Included are club regulations, accounting, cost controls and personnel procedures. *Version 2:* Lectures and practical exercises in the management of officers' and petty officers' messes. Course includes development of managerial and administrative abilities in relationship to mess and club regulations; accounting, auditing, and cost controls; personnel management and promotion.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in food and beverage management (7/79); in the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to institutional management (7/79). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in food and beverage management, and 3 in food and beverage cost controls or accounting (8/74); in the upper-division baccalaureate category, 3 semester hours in institutional management (12/68).

NV-1729-0010

Submarine Food Service Watchstander

Course Number: F-000-0070.

Location: Service School Command, San Diego, CA; Submarine School, Groton, New London, CT.

Length: 2 weeks (77 hours)

Exhibit Dates: 3/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to apply the principles, rules and concepts of issuing, inventorying and product acceptability in a food service operation.

Instruction: This is a lecture course emphasizing the following skills: the student will be able to prepare forms and procedures for receiving and storage of food items, and for inventory procedures; apply safety, operating, and cleaning procedures to food service equipment used in food service facilities; implement sanitation and safety techniques to food service operations and personnel; use the basic four food groups and nutrition as they apply to menu planning; develop and apply menu planning techniques as they pertain to acceptability factors; and to implement basic supervision principles to food service policies, procedures, and personnel responsibilities.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in food service operations (3/90).

NV-1729-0011

Mess Management Specialist 'A'

Course Number: A-800-0013.

Location: Service School Command, San Diego, CA.

Length: 7 weeks (205 hours).

Exhibit Dates: 7/78–Present.

Learning Outcomes: Upon completion of the course, the student will have gained fundamental knowledge and practical skills needed to prepare food items using standard recipes.

Instruction: Lectures and laboratory experiences emphasize basic cooking and baking skills, use of standard recipes, food service organization, recipe conversion, sanitation and safety rules, and table service.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in food preparation (2/90).

NV-1729-0012

Food Service Records and Returns

Course Number: A-800-0020.

Location: Service School Command, San Diego, CA; Trident Training Facility, Bangor, WA; Naval Submarine School, Groton, CT; Fleet Training Command, Norfolk, VA; Trident Training Facility, King's Bay, GA; Fleet and Mine Warfare Training Center, Charleston, SC.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to design and mantain record keeping systems and filing systems.

Instruction: The instruction includes lectures and exercises in developing and maintaining records in the areas of procurement, receiving, delivery, transfers, expenditures, and receipts.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in food service operation (2/90).

NV-1729-0013

Food Service Management

Course Number: A-800-0027.

Location: Service School Command, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 8/89–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate and solve problems associated with a computerized food service record keeping system.

Instruction: Lectures and performance exercises using computers to include; equipment set up and upkeep, loading software computer operations, security requirements, and food service applications.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hurs in food service computer applications (2/90).

NV-1729-0014

Food Service Administration

Course Number: A-800-0015.

Location: Service School Command, San Diego, CA; Supply Schools, Fleet Training Center, Norfolk, VA.

Length: 6-7 weeks (264 hours).

Exhibit Dates: 4/85–Present.

Learning Outcomes: Upon completion of the course, the student will have fundamental knowledge of food production and how it interacts with food service.

Instruction: Lectures and/or exercises in sanitation, customer service, menu planning, executive (private) dining, employee cafeterias, and the overall administration of food and beverage service.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in food service administration (2/90).

NV-1729-0015

General Mess Operatons

Course Number: A-800-0025.

Location: Service School Command, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 4/86–Present.

Learning Outcomes: Upon completion of the course, the student will have an understanding of the different techniques involved in the management of a food service facility.

Instruction: The course consists of lectures and problem solving in the areas of food preparation, menu planning, food presentation, food service equipment, sanitation and safety, and food service management.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in food service operations (2/90).

NV-1729-0016

Private Mess Operations

Course Number: A-800-0026.

Location: Service School Command, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 9/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform the advanced administrative, accounting, and managerial functions required in operating an executive dining room.

Instruction: Classroom lectures emphasizing purchasing, receiving, and inventory procedures, accounting and auditing, protocol, and service and preparation techniques.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in dining room management (2/90).

NV-1729-0017

Advanced Food Preparation

Course Number: A-800-0018.

Location: Service School Command, San Diego, CA.

Length: 3 weeks (110–120 hours).

Exhibit Dates: 6/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to apply the principles of advanced culinary arts in food preparation.

Instruction: Course will consist of lectures and performance exercises in advanced cooking, baking, garnishing, and ice carving.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in advanced culinary arts (2/90).

NV-1730-0001

Basic Refrigeration Theory and Maintenance

Course Number: L-652-021.

Location: Fleet Submarine Training Facility, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To train enlisted personnel to operate, test, and repair refrigeration systems.

Instruction: Lectures and practical exercises in basic refrigeration theory and maintenance. Course includes the theory of operation of the vapor-compression refrigeration system; a study of system components; and practice in troubleshooting, servicing, and maintaining small refrigeration systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in refrigeration maintenance (5/74).

NV-1730-0002

Auxiliary Equipment Package

Course Number: A-652-0043; A-652-0044.

Location: Submarine School Groton, New London CT; Submarine Training Center, Pearl Harbor, HI; Fleet Ballistic Submarine Training Center, Charleston, SC.

Length: 10 weeks (318 hours).

Exhibit Dates: 5/72–1/88.

Objectives: To train enlisted personnel to operate and service refrigeration equipment, pumps, and air compressors.

Instruction: Lectures and practical exercises in maintaining and servicing refrigeration equipment. Course includes pumps, air compressors, and hydraulic and pneumatic systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in refrigeration systems—operation and servicing (5/74).

NV-1730-0003

1. Ships Stores Refrigeration R-12/York/Combined Maintenance (R-12 SS 4K Combined Maintenance)
2. Submarine Refrigeration and Air Conditioning R-12

Course Number: F-652-014; A-720-0027.

Location: Submarine School, Groton, New London,CT. *Version 1:* Fleet Ballistic Missile School, Charleston, SC; Naval Submarine Training Center, Pearl Harbor, HI.

Length: 2 weeks (60–64 hours).

Exhibit Dates: *Version 1:* 5/80–1/84. *Version 2:* 3/68–4/80.

Objectives: To train enlisted personnel to maintain and service large refrigeration systems.

Instruction: For this course after 1/84 see NV-1730-0009. Lectures and practical exercises in the maintenance of large refrigeration units. Topics include system components, troubleshooting, and the general construction, operation, and servicing of large refrigeration systems employing reciprocating compressors.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in mechanical servicing of refrigeration systems (6/81); in the lower-division baccalaureate/associate degree category, 2 semester hours in applied science of refrigeration systems (6/81). *Version 2:* In the vocational certificate category, 2 semester hours in mechanical servicing of refrigeration systems (5/74).

NV-1730-0004

Submarine (SSN/SSBN) Auxiliary Machinery Operation and Maintenance

Course Number: F-652-010.

Location: Fleet Training Group, Pearl Harbor, HI; Submarine School, Groton, CT; Mine Warfare Training Center, Charleston, SC.

Length: 10 weeks (300 hours).

Exhibit Dates: 8/70–1/88.

Objectives: To train enlisted personnel to maintain and service refrigeration systems containing reciprocating or centrifugal compressors, and lithium-bromide absorption units.

Instruction: Lectures and practical exercises in the maintenance and operation of refrigeration systems. Course includes the mechanical aspects of the construction and operation of refrigeration systems employing reciprocating or centrifugal compressors, lithium-bromide absorption systems, hydraulic systems, and air compressors. Instruction emphasizes system components, troubleshooting, and service procedures.

Credit Recommendation: In the vocational certificate category, 6 semester hours in refrigeration equipment, mechanical service, and maintenance (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in refrigeration equipment, mechanical service, and maintenance (7/74).

NV-1730-0005

C-2A Environmental Systems Organizational Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 10/69–1/88.

Objectives: To train enlisted personnel to maintain the C-2A air conditioning and pressurization systems.

Instruction: Lectures and practical exercises in C-2A air conditioning and pressurization systems maintenance, including air conditioning and pressurization fundamentals, utility and survival systems, emergency equipment, and system operation and maintenance procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in refrigeration laboratory (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in refrigeration laboratory (7/74).

NV-1730-0006

Refrigerant 11 Air Conditioning (Air Conditioning Refrigerant 11)

Course Number: L-652-0010; L-652-010.

Location: Fleet Submarine Training Facility, Pearl Harbor, HI.

Length: 2 weeks (62 hours).

Exhibit Dates: 5/67–1/88.

Objectives: To provide maintenance training to enable the trainee to understand required R-11 compressor operation, maintenance and troubleshooting, to include associated auxiliary equipment and safety problems.

Instruction: Provides instruction in the components and functions of mechanical systems, principles of operation and safety precautions. Training covers the operation, disassembly, reassembly, maintenance, and troubleshooting of the R-11 unit.

Credit Recommendation: In the vocational certificate category, 2 semester hours in mechanical servicing of refrigeration systems (6/77).

NV-1730-0007

S-3A Environmental Control, Miscellaneous Utilities and Egress Systems Organizational Maintenance

Course Number: C-602-3679.

Location: Naval Air Station, Cecil Field, FL; Naval Air Station, North Island, San Diego, CA.

Length: 2 weeks (96 hours).

Exhibit Dates: 9/83–Present.

Objectives: To provide enlisted personnel the skills necessary to operate, test and troubleshoot the aircraft environmental control and egress systems.

Learning Outcomes: Upon completion of the course, the student will be able to understand and troubleshoot the oxygen, bleed air, refrigeration cabin environmental control, ice protection and egress systems and (2) use proper test procedures and equipment for troubleshooting these systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in air conditioning refrigeration systems (4/85).

NV-1730-0009

Ship's Stores Refrigeration System R-12 Combined Maintenance

Course Number: A-720-0027.

Location: Submarine School, Groton/New London, CT; Submarine Training Center, Charleston, SC; Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine Training Center, Norfolk, VA.

Length: 1–2 weeks (58 hours).

Exhibit Dates: 2/84–Present.

Learning Outcomes: Upon completion of the course the student will be able to describe the interworkings of refrigeration systems to other mechanical systems and will be able to operate and maintain industrial refrigeration systems.

Instruction: Lectures and laboratories in the operation and maintenance of industrial refrigeration systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester lecture and 1 semester hour laboratory in refrigeration systems (10/89).

NV-1730-0010

Lithium Bromide Maintenance F-1

Course Number: A-652-0224.

Location: Submarine School, Groton/New London, Ct; Submarine Training Center, Charleston, SC; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (77 hours).

Exhibit Dates: 7/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to describe the theory and operation of absorption refrigeration systems.

Instruction: Lectures and laboratories in the lithium bromide system, charcteristics, control systems, operation, and maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour lecture and 1 semester hour laboratory in refrigeration systems (10/89).

NV-1730-0011

Air Conditioning and Refrigeration

Course Number: A-720-0030

Location: Submarine School, Groton/New London, CT.

Length: 6 weeks (234 hours).

Exhibit Dates: 7/84-Present.

Learning Outcomes: Upon completion of the course the student will be able to describe the theory and principles of operation of mechanical and absorption refrigeration systems.

Instruction: Lectures and laboratories in mechanical and absorption refrigeration systems, including instruction in psychrometrics, electrical motor theory, compressor and heat exchanger construction, controls, load calculations, and comfort conditioning.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours lecture and 2 semester hours laboratory in refrigeration systems (10/89).

NV-1731-0001

Trident Submarine Atmospheric
Support System Maintenance

Course Number: A-652-0146.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 1 week (56 hours).

Exhibit Dates: 11/84-Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform all operational and documented fault isolation procedures as CO/H2 Burner and CO2 Scrubber assemblies.

Instruction: Lecture and laboratory exercises in the theory of operation and maintenance of CO/H2 Burners and CO2 Scrubbers.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/89).

NV-1732-0001

Steam Generating Plant Inspector

Course Number: *Version 1:* K-651-2151. *Version 2:* A-651-0030, A-651-022.

Location: *Version 1:* Fleet Training Center, San Diego, CA. *Version 2:* Destroyer School, Newport, RI.

Length: 4 weeks (120 hours).

Exhibit Dates: *Version 1:* 5/81-Present. *Version 2:* 12/69-4/81.

Objectives: To train enlisted personnel to perform as steam generating plant inspectors.

Instruction: Lectures and practical exercises on steam generating plants, including salient design features of naval boilers, tube ruptures and renewal, casing and foundation, pressure parts not exposed to firesides, hydro tests, safety valves, boiler inspection, boiler chemistry, and steam generator performance during steady load.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in boiler inspection (5/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in steam generating plant technology (5/82). *Version 2:* In the vocational certificate category, 3 semester hours in boiler inspection (5/74).

NV-1732-0002

Basic Nuclear Power

Course Number: Not available.

Location: Submarine School, Mare Island, CA; Submarine School, New London, CT; Submarine School, Bainbridge, MD; Submarine School, Orlando, FL.

Length: 22 weeks (555-650 hours).

Exhibit Dates: 7/56-Present.

Objectives: To train enlisted personnel in nuclear power plant theory and operation.

Instruction: Lectures and practical exercises in nuclear power plant theory and operation, including basic mathematics (algebra, trigonometry, and introduction to calculus); modern physics; reactor principles; thermodynamics; water technology; nuclear power plant systems and components; health physics; and one or more courses in welding, chemistry, machine tool operation, electronics, or electrical machinery. NOTE: When this course was established in the mid-1950's, the office was able to obtain the curriculum outline from the Department of the Navy and have it evaluated. The recommendation for the program as it was given until 1961 is provided below. However, by 1961, the course was changed and the curriculum appeared to have been substantially strengthened, although the course materials were classified for military security reasons and could not be evaluated. Nevertheless, the course as it has been offered since 1961 is considered to be academically stronger than the earlier program. Inasmuch as the credit listed below is recommended for the course as given prior to 1961, institutions would be justified in granting that amount of credit plus additional credit as determined by institutional evaluation.

Credit Recommendation: In the vocational certificate category, 12 semester hours in nuclear power plant operation (see Note above) (5/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in nuclear engineering technology (see Note above) (5/74); in the upper-division baccalaureate category, 3 semester hours in introductory atomic physics or nuclear technology (see Note above) (12/68).

NV-1732-0003

Advanced Nuclear Power

Course Number: Not available.

Location: Submarine School, Mare Island, CA; Submarine School, New London, CT; Submarine School, Bainbridge, MD; Submarine School, Orlando, FL.

Length: 22 weeks (650-690 hours).

Exhibit Dates: 7/56-Present.

Objectives: To train officers in nuclear reactor engineering theory and nuclear reactor power plant system operation.

Instruction: Lectures and practical exercises in advanced mathematics, atomic and nuclear physics, reactor engineering, servomechanisms, reactor and power plant control theory, metallurgy, thermodynamics, nuclear power plant systems and components, reactor control systems and components, and health physics. Note: When this course was established in the mid-1950's, the office was able to obtain the curriculum outline from the Department of the Navy and have it evaluated. The recommendation for the program as it was given until 1961 is provided below. However, by 1961, the course was changed and the curriculum appeared to have been substantially strengthened, although the course materials were classified for military security reasons and could not be evaluated. Nevertheless, the course as it has been offered since 1961 is considered to be academically stronger than the earlier program. Inasmuch as the credit listed below is recommended for the course as given prior to 1961, institutions would be justified in granting that amount of credit plus additional credit as determined by institutional evaluation.

Credit Recommendation: In the vocational certificate category, 16 semester hours in nuclear power plant operation (see Note above) (5/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in nuclear engineering technology (see Note above) (5/74); in the upper-division baccalaureate category, 3 semester hours in reactor engineering (see Note above) (12/68).

NV-1732-0005

DATC Machinist's Mate Maintenance
(600 PSI MM Maintenance)

Course Number: A-651-0024.

Location: Training Center, San Diego, CA.

Length: 3 weeks (105 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train machinist's mates and boilermen in the maintenance and repair of main propulsion machinery and its auxiliaries.

Instruction: Lectures and practical exercises in the maintenance and repair of main propulsion machinery and its auxiliaries, including the operation and theory of these systems, blueprints and micrometers, valve repair, steam traps, main turbines and reduction gears, flexible couplings, auxiliary turbines, main feed pump, centrifugal and reciprocating pumps, deaerating feed tank, high- and low-pressure air compressors, lubricating oil pumps, and lube oil purifier.

Credit Recommendation: In the vocational certificate category, 2 semester hours in maintenance machinist or power plant technology (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in maintenance machinist or power plant technology (5/74); in the upper-division baccalaureate category, 2 semester hours in maintenance machinist or power plant technology (5/74).

NV-1732-0006

Utilitiesman, Class A1 (UT"A")

Course Number: A-720-0012; A-720-0016.

Location: Construction Training Center, Gulfport, MS; Construction Training Center, Port Hueneme, CA. *Version 2:* Construction School, Davisville, RI.

Length: *Version 1:* 11-14 weeks (331-420 hours). *Version 2:* 12 weeks (368 hours).

Exhibit Dates: *Version 1:* 1/72-1/88. *Version 2:* 6/57-12/71.

Objectives: To train enlisted personnel to be utilities men.

Instruction: Lectures and practical exercises in utilities operation, including plumbing, field sanitation, internal combustion engines, pumps, compressors, water treatment, refrigeration, and boiler operation.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in utilities (7/76); in the lower-division baccalaureate/associate degree category, 2 semester hours in utilities (7/76). *Version 2:* In the vocational certificate category, 9 semester hours in theory of water purification (5/74); in the upper-division baccalaureate category, 2 semester hours in theory of water purification (12/68).

NV-1732-0007

NC-8A Mobile Electric Power Plant
Intermediate Maintenance

Course Number: C-602-3223.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, North Island, CA.
Length: 2 weeks (80 hours).
Exhibit Dates: 9/76–Present.
Objectives: To train naval personnel to operate, maintain and repair the NC-8A mobile electric power plant.
Instruction: Lectures and practical exercises in operational procedures of the NC-8A mobile electrical power plant including maintenance and repair of the electrical propulsion unit, AC/DC generator supply system, electrical, control and regulation.
Credit Recommendation: In the vocational certificate category, 1 semester hour in AC/DC Generator Repair (3/82).

NV-1732-0008

STEAM GENERATOR MAINTENANCE

Course Number: A-651-0075.
Location: Fleet Training Center, San Diego, CA; Fleet Training Center, Norfolk, VA.
Length: 8–10 weeks (301 hours).
Exhibit Dates: 8/80–12/88.
Objectives: To train personnel in the proper inspection operation and maintenance of high pressure boilers.
Instruction: For this course after 12/88 see NV-1732-0017. Classroom instruction and practical exercises in the inspection, operation and maintenance of high pressure boilers and boiler components including refractories, drums, headers, tubes, firesides, uptakes, smoke indicators, burners, quick closing valves, soot blowers, blowdown system, supports, air casings, safety valves and liquid level indicators.
Credit Recommendation: In the vocational certificate category, 10 semester hours in high pressure boiler maintenance and repair (5/82); in the lower-division baccalaureate/associate degree category, 3 semester hours in high pressure boiler operation and maintenance (5/82).

NV-1732-0009

SENIOR ENLISTED STEAM ENGINEERING

Course Number: A-651-0106.
Location: Service School Command, Great Lakes, IL.
Length: 8 weeks (320 hours).
Exhibit Dates: 8/82–1/84.
Objectives: To train personnel in the operation of a high pressure steam plant.
Instruction: For this course after 1/84 see NV-1732-0014. Lectures and practical exercises in the operation of a high pressure steam plant including plant piping, electrical and control systems, plant safety, inspection, maintenance and management programs, personnel duties and training, plant operation and casualty control procedures.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in high pressure steam plant operation, 1 in high pressure steam plant laboratory (10/83).

NV-1732-0010

FFG-7 CLASS SHIP AUXILIARY ELECTRICAL SYSTEM TECHNICIAN

Course Number: A-662-0121.
Location: Service School Command, Great Lakes, IL.
Length: 19 weeks (760 hours).
Exhibit Dates: 2/81–Present.
Objectives: To train personnel to operate and perform corrective and preventive maintenance on auxiliary electrical systems on a FFG-7 class ship.
Instruction: This is a pipeline course consisting of the following courses: NV-1704-0262, NV-1714-0022, NV-1402-0020, NV-1714-0031, NV-1714-0029 and NV-1601-0026.
Credit Recommendation: Please refer to the exhibits listed above for our credit recommendations.

NV-1732-0011

PROSPECTIVE NUCLEAR ENGINEER OFFICER

Course Number: L-4H 0026.
Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Trident Training Facility, Bangor, Bremerton, WA; Submarine Training Facility, San Diego CA.
Length: 8 weeks (Self-paced).
Exhibit Dates: 1/74–Present.
Objectives: To assist nuclear engineer officers in preparation for the nuclear engineer officer examination.
Instruction: The course consists of a series of test questions for the maintenance of 58G reactor plants.
Credit Recommendation: Credit is not recommended because of the nature of the presentation of the course (11/85).

NV-1732-0012

SUBMARINE MAIN POWER GENERATOR

Course Number: A-662-0137.
Location: Submarine Training Facility, Charleston, SC; Submarine School, New London, CT; Guided Missile School Detachment, Norfolk, VA; Submarine Training Center, Pacific, Pearl Harbot, HI; Submarine Training Facility, San Diego, CA.
Length: 2 weeks (71 hours).
Exhibit Dates: 5/85–1/87.
Learning Outcomes: Upon completion of the course, the student will be able to operate, repair, and do preventive maintenance on submarine voltage converter type power generators and regulators.
Instruction: For this course after 1/87 see NV-1714-0053. Instruction includes principles of AC and DC motors and generators, repair and maintenance procedures, methods of voltage and frequency regulation, general discussion of rectifiers, saturable reactors and servo feedback considerations.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electrical power generation and control (7/87).

NV-1732-0013

CARBON DIOXIDE SCRUBBER AND CARBON MONOXIDE/HYDROGEN BURNER COMBINED MAINTENANCE

Course Number: A-652-0104.
Location: Submarine Training Facility, Charleston, SC; Submarine School, New London, CT; Guided Missile School Detachment; Norfolk, VA; Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine Training Facility, San Diego, CA.
Length: 1 week (42 hours).
Exhibit Dates: 5/82–Present.
Learning Outcomes: Upon completion of the course, the student will be able to perform preventive maintenance, testing, troubleshooting, and overhaul of the major components of the CO2 Scrubber and CO-H2 Burner System.
Instruction: Instruction includes group-paced classroom and laboratory instruction on maintenance and repair of the CO2 Scrubber and CO-H2 Burner system.
Credit Recommendation: In the vocational certificate category, 2 semester hours in introduction to mechanics (7/87).

NV-1732-0014

SENIOR ENLISTED PROPULSION ENGINEERING (STEAM, GAS TURBINE, DIESEL)

Course Number: A-651-0110.
Location: Service Schools Command, Great Lakes, IL.
Length: 9–10 weeks (330–360 hours).
Exhibit Dates: 2/84–Present.
Learning Outcomes: Upon completion of the course, the student will be able to administer the labor force in the routine operations of a power plant; carry out shipboard inspections, tests and trials; provide for crew training readiness; demonstrate knowledge of generic shipboard engineering systems; evaluate operating conditions of systems and components of a Steam (169W), Diesel (169X), or Gas Turbine (169V) Propulsion plant for proper response/corrective action.
Instruction: Lectures, laboratory training and practical exercises covering inspection, maintenance and management procedures, personnel duties and training, plant operation and casulty control procedures for high pressure steam powerplant systems including auxiliaries, electrical, control and plant safety systems.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in powerplant management, 3 in powerplant technology, 2 in steam plant operations laboratory (169W) OR diesel plant operations laboratory (169X) OR gas turbine operations laboratory (169V) (6/88).

NV-1732-0015

NUCLEAR PROPULSION PLANT REFRESHER TRAINING

Course Number: A-661-0106.
Location: Submarine School, Groton/New London, CT; Submarine School, Pearl Harbor, HI; Submarine School, Norfolk, VA; Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.
Length: 5 weeks (91 hours).
Exhibit Dates: 10/85–Present.
Learning Outcomes: Upon completion of the course, the student will have the theoretical background to qualify as Engineering Water Supervisor.
Instruction: Lecture and self-paced study modules covering fundamental reactor plant concepts and principles (nuclear physics, chemistry and material science), plant start-up and operations at power.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in nuclear power plant technology (2/89).

NV-1732-0016

TRIDENT SUBMARINE AUXILIARY EQUIPMENT TECHNICIAN REPLACEMENT LEVEL I

Course Number: A-652-0140.
Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.
Length: 6 weeks (209 hours).
Exhibit Dates: 6/84–Present.
Learning Outcomes: Upon completion of the course, the student will be able to identify by function various power plant components, and perform normal operating procedures on power plant auxiliary equipment, perform preventive and corrective maintenance on such power plant equip-

ment as pumps, valves, hydraulic, pneumatic and refrigeration systems.

Instruction: Lecture and laboratory exercises in the construction operation and maintenance of power plant auxiliary equipment such as pumps, valves, hydraulic and compressed air systems and refrigeration.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in power plant technology or facilities engineering (2/89).

NV-1732-0017

STEAM GENERATOR MAINTENANCE

Course Number: A-651-0075.

Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/89–Present.

Learning Outcomes: Upon completion of the course the student will perform proper inspection, repair and maintenance on high pressure steam generators.

Instruction: Classroom instruction and practical exercises in the inspection and maintenance of high pressure boilers and boiler components including refractories, drums, headers, tubes, firesides, uptakes, smoke indicators, burners, quick closing valves, soot blowers, blowdown system, supports, air casings, safety valves, and liquid level indicators.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in steam generator maintenance and repair (3/89).

NV-1732-0018

VALVE AND STEAM TRAP MAINTENANCE

Course Number: A-651-0065.

Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA.

Length: 1-2 weeks (42 hours).

Exhibit Dates: 4/84–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform preventive and corrective maintenance on all types of valves and orifice-type steam traps as found in steam power plant and its supporting systems.

Instruction: Performance-oriented instruction on the above topics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in steam power systems laboratory (3/89).

NV-1732-0019

NUCLEAR POWER PLANT WELDER REQUALIFICATION

Course Number: A-701-0031.

Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC; Trident Training Center, Bangor, WA; Trident Training Center, Kings Bay, GA; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (80 hours).

Exhibit Dates: 8/85–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform basic welding functions and take intermediate and advanced welding or welding supervisor instruction to ASME pressure vessel and nuclear code standards.

Instruction: Lectures on safety, welding and silver brazing processes, and nondestructive testing processes. Laboratory sessions are used to bring the student to a reasonable level of proficiency in welding (or brazing) pipe or plate. Repairs to welds and braze joints are also covered.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours lecture and 3 semester hours laboratory in welding processes, brazing processes, and nondestructive testing processes (10/89). Note: this course duplicates A-701-0015. Credit should not be awarded for both.

NV-1733-0001

PARACHUTE RIGGER (SURVIVAL), CLASS A

Course Number: Not available.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 10 weeks (400 hours).

Exhibit Dates: 3/56–7/65.

Objectives: To train enlisted personnel to perform as parachute riggers (survival).

Instruction: Lectures and practical exercises in parachute rigging, construction, and repair, including nomenclature, inspection, packing, testing, and maintenance of service parachutes; descent techniques; fleet-type sewing machine operation; use of all dropable air-sea rescue and personal and fixed-aviation survival equipment; and land and sea survival techniques.

Credit Recommendation: In the vocational certificate category, 4 semester hours in aeronautical technology, 2 in sewing machines and fabrics (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in aeronautical technology (5/74).

NV-1733-0003

BASIC NAVAL PARACHUTIST, CLASS C1

Course Number: C-602-2020.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 3 weeks (120 hours).

Exhibit Dates: 9/85–12/86.

Learning Outcomes: Upon completion of the course, the student will be able to perform all phases of training leading up to and including five static line parachute descents.

Instruction: Includes lectures and performance with a ratio of approximately 1:4, supervised training leading to qualification to pack parachutes, expanded training in related areas of equipment inspection, aircraft exit, parachute canopy control, various malfunctions and emergencies and proper actions. Extensive physical fitness training throughout.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in physical education/conditioning (6/87).

NV-1733-0004

JUMPMASTER NAVAL PARACHUTIST, CLASS C1

Course Number: C-602-2022.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 4 weeks (120 hours).

Exhibit Dates: 3/80–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform jumpmaster duties to include accuracy landing procedures, accurate direction of aircraft in flight and organization and conducting safe and efficient parachute operations.

Instruction: Includes lecture and practical performance with a ratio of approximately 1:12. Physical fitness stressed throughout course. Inspection and packing parachute equipment and control of parachute descent to reach a predetermined area without instructions from people on the ground. Trained to organize and conduct parachute operations to include considerations of weather and aircraft performance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in physical education - advanced parachute procedures (6/87).

NV-1733-0005

ADVANCED NAVAL PARACHUTIST, CLASS C1

Course Number: C-602-2021.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 3 weeks (120 hours).

Exhibit Dates: 3/80–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform free-fall parachute descents of not less than five seconds followed by manually deploying the parachute.

Instruction: Includes lecture and practical performance with a ratio of approximately 1:9. Physical conditioning stressed throughout the course. Specific areas of training include inspection and packing parachute and related equipment, parachute canopy control, aircraft exits, free-falling techniques and positions, use of supplemental oxygen for high attitude, night and water landing considerations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in physical education (introduction to sky diving) (6/87).

NV-1736-0001

BUILDER/MILLWORKER, CLASS C (BU "C" Millworker)

Course Number: A-712-0011.

Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS; Construction School, Davisville, RI.

Length: 6-9 weeks (180-275 hours).

Exhibit Dates: 11/70–1/88.

Objectives: To provide advanced instruction in the methods of millwork.

Instruction: Lectures and practical exercises in advanced rough-lumber manufacturing, including the manufacturing of doors, windows, finish stalls, and various types of trim; operation and operator maintenance of millworking machines; the preparation of jigs for precutting and prefabrication of mass-produced items such as rafters and trusses; shop layout, planning, and estimation; and furniture and cabinet construction.

Credit Recommendation: In the vocational certificate category, 4 semester hours in millwork (7/76).

NV-1736-0002

PRECISION GRINDING AND BALANCING CLASS C1

Course Number: A-702-0022.

Location: Service School Command, San Diego, CA.

Length: 6 weeks (240 hours)

Exhibit Dates: 3/76–Present.

Objectives: To train naval personnel with advanced machine training in sharpening, reclaiming and restoring cutters for machine shop operations.

Instruction: Includes lecture, demonstrations, and laboratory exercises in precision grinding including safety, hand tools, abrasives, composition, marking and installation of grinding wheels, surface and cylindrical grinders, tool and cutter grinders and special grinders. The course also includes theory and application of hardness testing and analysis and balancing machine components.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in advanced machine shop (5/82).

NV-1736-0003

Turret Lathes and Metal Build-up Class C1

Course Number: A-702-0023.

Location: Service School Command, San Diego, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 3/76–Present.

Objectives: To train personnel in the theory and use of turret lathes, boring mills and surface build-up equipment.

Instruction: Lectures and practical exercises in the set-up, operation and maintenance of horizontal and vertical turret lathes and horizontal boring mills. Selection, operation and maintenance of metal surfacing equipment including spray, torch and electroplating types. Repair and restoration of Babbit bearings.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in machine tool metalworking, 3 in machine shop laboratory (5/82).

NV-1736-0004

Advanced Milling and Shop Management Class C1

Course Number: A-702-0024.

Location: Service School Command, San Diego, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 3/76–Present.

Objectives: To give naval personnel the advanced theory and application of gear manufacture and basic supervision skills.

Instruction: Includes geometric and trigonometric computation development for set-up and indexing, spur, helical, level and worm gear manufacture as well as advanced use of the universal milling machine and attachments. Includes instruction in effective shop management techniques; personnel supervision, workload maintenance and equipment coordination.

Credit Recommendation: In the vocational certificate category, 5 semester hours in advanced machine shop, 1 in supervision/management techniques (5/82); in the lower-division baccalaureate/associate degree category, 3 semester hours in advanced machine shop, 1 in trade mathematics (5/82).

NV-2201-0113

Gunnery Petty Officer

Course Number: J-041-0102.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA.

Length: 2–3 weeks (80 hours).

Exhibit Dates: 3/85–Present.

Objectives: To train petty officers in the major administrative requirements, principles and applications associated with gunnery science.

Instruction: Lectures on gunnery administration including operational reports, tactical weapon publications, and support activities. Discussions on ordnance handling, characteristics of small arms, and introduction to ballistics theory which includes use of range tables, factors that effect accuracy and error resolutions. Practical exercises on administrative procedures and ballistic calculations and error analysis.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0001

Carrier Fixed Wing Antisubmarine (AASW) Warfare Tactics

Course Number: E-2D-056.

Location: Fleet Aviation Specialized Operational Training Group, Pacific, San Diego, CA.

Length: 3 weeks (105 hours).

Exhibit Dates: 5/72–1/88.

Objectives: To instruct Naval officers in basic oceanography and antisubmarine warfare tactical procedures.

Instruction: Instruction covers basic oceanography and antisubmarine warfare, with specific emphasis on tactical procedures utilized in the employment of carrier fixed-wing antisubmarine warfare systems.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/76).

NV-2202-0002

Navy Sniper Training

Course Number: H-000-1900.

Location: Inshore Operations Training Center, Cp. Roberts, CA.

Length: 3 weeks (124 hours).

Exhibit Dates: 1/70–1/88.

Objectives: To train highly skilled riflemen to perform as snipers from river assault and river patrol boats.

Instruction: Lectures and practical exercises in sniper orientation, sniper equipment, marksmanship, and field tactics.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/74).

NV-2202-0003

Nurse Corps Indoctrination

Course Number: A-00-0053; A-00-4602.

Location: Women Officers School, Newport, RI.

Length: 4 weeks (173 hours).

Exhibit Dates: 3/72–1/88.

Objectives: To provide commissioned officers in the nurse corps with military orientation.

Instruction: Lectures in personnel administration; leadership; the naval medical department; legal aspects of military nursing; physical education; personal grooming; and naval history, customs, and traditions.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in personnel administration and management (2/74).

NV-2202-0004

Medical Officer Indoctrination

Course Number: None.

Location: Officer Indoctrination School, Newport, RI.

Length: 3 weeks (105 hours).

Exhibit Dates: 5/70–1/88.

Objectives: To teach the student basic naval subjects to prepare him to assume the duties of a shipboard medical officer.

Instruction: Lectures on Navy organization, national security, general administration, and fleet familiarization.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (8/72).

NV-2202-0005

Amphibious Command Indoctrination

Course Number: G-2E-6303.

Location: Amphibious School, Norfolk, VA.

Length: 2-4 weeks (74–164 hours).

Exhibit Dates: 5/69–1/88.

Objectives: To orient or refresh commanding officers, executive officers, and senior staff officers of amphibious ships in the organization and functions of amphibious forces.

Instruction: Lectures and practical exercises in operations, planning, readiness training, communications, engineering, weather conditions, and command and staff responsibilities.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/74).

NV-2202-0006

Amphibious Tactical Air Control Party

(Tactical Air Control Party)

Course Number: G-2G-4314; G-2G-6432; H-2G-5421; H-2G-3621.

Location: Naval Amphibious School, Norfolk, VA, Naval Amphibious School, San Diego, CA.

Length: 3 weeks (96–106 hours).

Exhibit Dates: 1/66–1/88.

Objectives: To train officers to control and coordinate tactical air support.

Instruction: Procedures of tactical air support planning and request; techniques of forward air controlling; helicopter planning and employment; and practical field exercises.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/74).

NV-2202-0007

Naval Preparatory School

Course Number: None.

Location: Naval Training Center, Bainbridge, MD; Naval Training Center, San Diego, CA.

Length: 9 weeks.

Exhibit Dates: 1/69–1/88.

Objectives: To provide prospective engineering and science students with a college-preparatory course in mathematics and English.

Instruction: Lectures and practical exercises in English grammar and syntax; techniques of improving written and oral expression; algebra, trigonometry, analytical geometry; calculus; and chemistry and physics.

Credit Recommendation: Credit is not recommended because of the college preparatory nature of the course (1/74).

NV-2202-0008

Rotary Wing Antisubmarine Warfare Tactics

Course Number: E-2C-012.

Location: Fleet Airborne Electronics Training Unit, Pacific, San Diego, CA.

Length: 3 weeks (102 hours).

Exhibit Dates: 2/71–1/88.

Objectives: To instruct Naval aviators in antisubmarine warfare tactical procedures and general oceanography as applied to antisubmarine warfare acoustic sensors.

Instruction: Instruction covers oceanography and antisubmarine warfare, with specific emphasis on tactical procedures utilized in the employment of helicopter antisubmarine warfare systems.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (5/76).

NV-2202-0009

Torpedo Tube Mk 65 Basic Maintenance

Course Number: A-123-0157.

Location: Submarine School, New London, CT; Fleet Ballistic Missile School, Charleston, SC; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: 6/76–1/88.

Objectives: To provide the theory and skills required to perform organizational maintenance of the Mk 65 torpedo tube (all models) aboard operating submarines.

Instruction: Course is largely descriptive involving the maintenance of torpedo tubes, including air hydraulic and ejection systems, safety precautions, loading and firing procedures; actual tube line up and firing are accomplished.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (9/77).

NV-2202-0010

Vietnam Orientation

Course Number: None.

Location: Amphibious School, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/72–12/76.

Objectives: To provide personnel with a broad overview of the military, political, social, and economic policies of South Vietnam.

Instruction: Geographical, historical, and cultural aspects of South Vietnam; weapons, survival, and medical training; communications; defense planning; logistics; methods of insurgency and counterinsurgency; administrative organization.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (1/74).

NV-2202-0011

Vietnam Orientation

Course Number: A-011-0014.

Location: Amphibious School, San Diego, CA.

Length: 3 weeks (110 hours).

Exhibit Dates: 11/72–12/76.

Objectives: To provide personnel with a broad overview of the military, political, social, and economic situation in South Vietnam.

Instruction: Nature of the Vietnam conflict; national objectives and strategies in Southeast Asia; U.S. Navy role in Southeast Asia; Vietnamese geographical, historical, and cultural introduction; weapons; medical and survival training.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/74).

NV-2202-0012

Sonar Watch Supervisor and Advanced Watchstander Training

Course Number: F-210-011.

Location: Submarine School, Groton, CT.

Length: 2 weeks (54 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To provide experienced watch supervisors or prospective watch supervisors with advanced training in passive sonar contact procedures.

Instruction: Foreign patrol craft and warship acoustic analysis; foreign diesel and nuclear submarines; sonar identification and classification translation; radio and sonar filter operation.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics (1/74).

NV-2202-0013

Submarine Officers Advanced

Course Number: A-2E-0030.

Location: Submarine School, Groton, CT.

Length: 24 weeks (752 hours).

Exhibit Dates: 7/71–1/88.

Objectives: To train selected junior officers in the technical and administrative management of nuclear submarines.

Instruction: Procedures of shipboard management and administration; electronic equipment techniques; foreign naval weapons systems; navigational skills; naval communications; principles of electronic warfare.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in personnel management and administration, 3 in electrical engineering (1/74).

NV-2202-0014

Basic Military Training
(Recruit Training)

Course Number: None.

Location: Recruit Training Command, San Diego, CA; Recruit Training Command, Great Lakes, IL; Recruit Training Command, Orlando, FL.

Length: 7–8 weeks (265–267 hours).

Exhibit Dates: 4/79–Present.

Objectives: To assimilate recruits into the Navy way of life and to prepare them for further advanced training in specialized Navy occupations.

Instruction: Student will receive indoctrination and physical conditioning to prepare for the rigors and unique demands of naval service. Observance of naval customs and traditions will be taught in a manner to foster pride in the nation and in patriotic behavior, high standards of conduct, and respect for civilian and military authority.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in personal fitness/conditioning, 1 in personal/community health, 2 in first aid and safety (10/79).

NV-2202-0015

A-6A Conventional Weapons

Course Number: None.

Location: Naval Air Maintenance Training Group, Oceana, VA; Naval Air Maintenance Training Group, Whidbey Island, WA.

Length: 2 weeks (80 hours).

Exhibit Dates: 4/71–1/88.

Objectives: To provide ordnance personnel with a broad understanding of suspension and launching equipment and conventional weaponry.

Instruction: Aircraft familiarization; assembly, installation, and disassembly procedures for conventional weapons; safety features and procedures for conventional weapons.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/74).

NV-2202-0016

Warrant Officer (WO) Aviation Indoctrination

Course Number: None.

Location: Naval Air Basic Training Command, Pensacola, FL.

Length: 6–8 weeks (213–300 hours).

Exhibit Dates: 6/65–1/88.

Objectives: To train warrant officers to perform managerial and supervisory functions in the aviation field.

Instruction: Lectures in the basic principles of management, including human relations, personnel management, basic psychology, world affairs, effective written and oral communication, military justice, and military organization.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in naval science (12/68).

NV-2202-0017

Surface Explosive Ordnance Disposal Basic

Course Number: A-4E-0022; A-431-0012.

Location: Naval School, Indian Head, MD.

Length: 12 weeks (440 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train military personnel of all branch services in the techniques of explosive ordnance disposal.

Instruction: Basic electricity; elementary physics; demolition procedures; identification operation; munitions procedures; operation, render-safe, and disposal procedures; identification and reporting of underwater explosive ordnance.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in metallurgical engineering (1/74).

NV-2202-0018

UDT-SEAL Explosive Ordnance Disposal Indoctrination

Course Number: A-431-0023.

Location: Naval School, Indian Head, MD.

Length: 5 weeks (175 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To provide naval personnel with the skills necessary to recognize, evaluate, recover, and dispose of conventional ordnance and explosives.

Instruction: Basic physics and principles of electricity; fuze operation; characteristics and methods of disposal of explosive fillers; procedures of explosive demolition; identification and classification of placed, projected, and dropped munitions.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/74).

NV-2202-0019

Explosive Ordnance Disposal — Reserve Officer Training

Course Number: A-4E-0045.

Location: Naval School, Indian Head, MD.

Length: 2 weeks (75 hours).
Exhibit Dates: 10/72-1/88.
Objectives: To train naval reserve officers in the procedures for recovering, evaluating, and disposing of non-nuclear explosive ordnance.
Instruction: Underwater ordnance and principles of operation; performance of requalification dives and swims; principles of explosive ordnance disposal reconnaissance; methods of munitions projection; hazards, precautions, and disposal procedures for dropped munitions; type, employment, and operation of guided missiles.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/74).

NV-2202-0020

Explosive Ordnance Disposal Navy Basic

Course Number: None.
Location: Naval School, Indian Head, MD.
Length: 10 weeks (328 hours).
Exhibit Dates: 8/72-1/88.
Objectives: To train naval personnel to recover, evaluate, render safe, and dispose of underwater explosive ordnance.
Instruction: Lectures in the theory, concepts, and operations of torpedoes, exploders, and mines; requalification exercises in open and semi-closed circuit scuba.
Credit Recommendation: In the vocational certificate category, 6 semester hours in ordnance engineering (1/74); in the upper-division baccalaureate category, 3 semester hours in ordnance engineering (1/74).

NV-2202-0021

Aviation Antisubmarine Warfare (AASW) for Second Tour Pilots, P-3C

Course Number: E-2D-0071; E-2D-071.
Location: Fleet Aviation Specialized Operational Training Group, Pacific, Moffett Field, CA.
Length: 2-3 weeks (77-91 hours).
Exhibit Dates: 9/72-1/88.
Objectives: To provide experienced Naval aviators with supplementary training to prepare them for duty in the Pacific.
Instruction: Training includes oceanography and underwater acoustics, aviation antisubmarine warfare tactical procedures, a basic knowledge of aviation antisubmarine warfare sensors and associated equipment, and familiarization with current electronic warfare concepts, capabilities, limitations, and requirements.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/76).

NV-2202-0022

Fleet Officer and Fleet Enlisted Air Intelligence

Course Number: None.
Location: Operational Intelligence Training, Alameda, CA.
Length: 6 weeks (199 hours).
Exhibit Dates: 3/72-1/88.
Objectives: To train military personnel in the operational aspects of air intelligence.
Instruction: Administrative and functional aspects of security; classified accounting procedures and methods ; management and handling of classified material; meteorology; map and chart reading; procedures of NON-IOIC data base; terminology, types and operations of nuclear weapons; radar characteristics; photography; Sino-Soviet air defense systems; stereoscopy.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (12/68).

NV-2202-0023

Fleet Air Intelligence Officer

Course Number: K-3A-5002; K-3A-516.
Location: Fleet Operational Intelligence Training Center, San Diego, CA.
Length: 3 weeks (152 hours).
Exhibit Dates: 2/70-1/88.
Objectives: To train Navy and Marine Corps officers in the operational aspects of air intelligence.
Instruction: Lectures on fundamentals of intelligence; recognition and capabilities of Eurasian-communist weapons systems; practical intelligence work and briefs; radar and weapons employment; imagery interpretation and photography; geopolitical topics; and intelligence requirements and reporting.
Credit Recommendation: In the vocational certificate category, 1 semester hour in photographic interpretation (1/74).

NV-2202-0024

CVA/CVS Air Launched Weapons General Ordnance

Course Number: None.
Location: Navy Military Training Detachment, Jacksonville, FL; Navy Military Training Detachment, Norfolk, VA; Navy Military Training Detachment, Alameda, CA; Navy Military Training Detachment, North Island, CA.
Length: 3 weeks (120 hours).
Exhibit Dates: 1/71-1/88.
Objectives: To teach weapon handlers assigned to aircraft carriers the procedures and safety precautions of air launched weapons handling.
Instruction: Lectures and practical exercises in basic carrier operation, ammunition handling, pyrotechnics, aircraft munitions, and air launched missiles.
Credit Recommendation: In the vocational certificate category, 3 semester hours in explosives handling (2/74).

NV-2202-0025

Battalion Staff Officers (Amphibious Planning)

Course Number: G-2E-4231.
Location: Amphibious Base, Little Creek, VA.
Length: 2 weeks (77 hours).
Exhibit Dates: 12/71-1/88.
Objectives: To train U.S. and foreign armed forces officers and staff noncommissioned officers to function effectively as members of a battalion executive staff in amphibious environments.
Instruction: Lectures on amphibious operations; organization for combat; organization and functioning of battalion staff; the sequence of command and staff action; and principles of intelligence, operations, logistics, embarkation, supporting arms, and communications.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/74).

NV-2202-0026

Jumpmaster Naval Parachutist, Class C1
(Naval Jumpmaster Class C)

Course Number: C-602-2022.
Location: Naval Air Technical Training Center, Lakehurst, NJ.
Length: Self-paced 2-3 weeks (80-120 hours).
Exhibit Dates: 5/69-1/88.
Objectives: To train Navy and Marine Corps personnel to safely and efficiently organize and conduct parachute operations.
Instruction: Lectures and practical exercises in theory of parachuting; organization and direction of parachute jumping; jumpmaster equipment; maps and photos; communications; and parachute operations, including day, night, land, and water jumps.
Credit Recommendation: In the vocational certificate category, 1 semester hour in parachuting (2/74).

NV-2202-0027

Surface Warfare Officer School

Course Number: None.
Location: Surface Warfare Officer School, Newport, RI.
Length: 6 weeks (202 hours).
Exhibit Dates: 11/71-6/74.
Objectives: To provide instruction for surface line officers in division officer and watch-standing duties.
Instruction: Lectures and practical exercises in administration and organization, shipboard damage control, watch standing, seamanship, engineering, ship handling.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in personnel management and administration (2/74).

NV-2202-0028

Gun Fire Control System (GFCS) Mk 63 Maintenance

Course Number: K-113-2074.
Location: Fleet Training Center, San Diego, CA.
Length: 2 weeks (60 hours).
Exhibit Dates: 10/72-1/88.
Objectives: To prepare fire control technicians and designated strikers to maintain the Mark 63 Gunfire Control System (GFCS Mk 63).
Instruction: Lectures on the description and operation of GFCS Mk 63 and practical exercises in checks and adjustments in the maintenance of GFCS Mk 63.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/74).

NV-2202-0029

Basic Enlisted Submarine

Course Number: A-060-0011; F-000-010.
Location: Submarine School, Groton, New London, CT.
Length: 6-8 weeks (165-236 hours).
Exhibit Dates: *Version 1:* 5/79-11/84. *Version 2:* 10/67-4/79.
Objectives: To prepare enlisted personnel for assignment to an operational submarine.
Instruction: For this course after 11/84 see NV-2202-0148. *All Versions:* Lectures and practical experience in standard submarine organization and regulations, systems and principles of submarine operation, safety and escape tank training, and interior communications. *Version 1:* Includes lectures and practical exercises in hydraulic systems principles and operation, ventilation systems, pumping systems, pressurized air systems, ship control systems and refrigeration systems.
Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester

hour in principles of hydraulic systems (6/81). *Version 2:* In the vocational certificate category, credit in submarine operations on the basis of institutional evaluation (2/74).

NV-2202-0030

1. Basic Naval Parachutist, Class C1
2. Basic Naval Parachutist Course, NP-1 Class C

(Naval Parachutist, Basic, Class C)

Course Number: C-602-2020.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: *Version 1:* Self-paced 3 weeks (120 hours). *Version 2:* 2 weeks (80 hours).

Exhibit Dates: *Version 1:* 5/74-1/88. *Version 2:* 5/69-4/74.

Objectives: To train military personnel to become qualified parachutists.

Instruction: Lectures and practical exercises in the history of parachuting; aircraft procedures; canopy control; and pre-jump, during-jump, and post-jump procedures.

Credit Recommendation: *Version 1:* Credit is not recommended because of the military-specific nature of the course (2/74). *Version 2:* Credit is not recommended because of the military-specific nature of the course (2/74).

NV-2202-0031

Amphibious Planning

Course Number: G-2G-6510; H-2G-5212.

Location: Amphibious Schools, Norfolk, VA; Amphibious Schools, San Diego, CA.

Length: 2 weeks (73 hours).

Exhibit Dates: 1/71-1/88.

Objectives: To provide officers with the knowledge and skills necessary to plan amphibious operations.

Instruction: Lectures and practical exercises in planning amphibious operations, including ship-to-shore movement, intelligence, communications, and general military planning procedures.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/74).

NV-2202-0032

Aviation Antisubmarine Warfare
(AASW) for Second Tour Pilots,
P3A/B(D)

Course Number: E-2D-065.

Location: Fleet Aviation Specialized Operational Training Group, Moffett Field, CA.

Length: 3 weeks (115 hours).

Exhibit Dates: 9/72-1/88.

Objectives: To provide experienced naval aviators with supplementary training to prepare them for duty in the Pacific.

Instruction: Lectures and practical demonstrations in oceanography, underwater acoustics, aircraft sensors, and airborne antisubmarine warfare tactics.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/74).

NV-2202-0033

Aviation Officer Candidate

Course Number: *Version 1:* Q-9B-0021.

Location: Air Basic Training Command, Pensacola, FL.

Length: *Version 1:* 14 weeks (375 hours). *Version 2:* 16 weeks (440 hours). *Version 3:* 11-16 weeks (404-489 hours).

Exhibit Dates: *Version 1:* 10/85-Present. *Version 2:* 1/69-9/85. *Version 3:* 3/66-12/68.

Objectives: To train military personnel to be aviation officers.

Instruction: Lectures in naval history, orientation to naval careers, world affairs, physics and mathematics, engineering, aerodynamics, aviation physiology, navigation and seamanship, physical fitness and swimming, and applied leadership training.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 4 semester hours in naval science, 2 in fundamentals of administration and operations, 2 in navigation, 2 in aerodynamics, and 2 in aviation science (11/86). *Version 2:* In the upper-division baccalaureate category, 12 semester hours in naval science (2/74). *Version 3:* In the upper-division baccalaureate category, 6 semester hours in naval science (12/68).

NV-2202-0034

Light Airborne Multipurpose System
(LAMPS) Operator

(Light Airborne Multipurpose System
(LAMPS) Sensor Operator)

Course Number: E-210-0057; E-210-57.

Location: Fleet Aviation Specialized Operational Training Group, Pacific, San Diego, CA; Fleet Airborne Electronics Training Unit, Pacific, San Diego, CA.

Length: 2-6 weeks (78-192 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train enlisted personnel in passive/active acoustic and nonacoustic sensor operation in a light airborne multipurpose system squadron.

Instruction: Lectures and practical exercises in passive/active acoustic and nonacoustic sensor operation, basic localization techniques, RADAR/MAD operation, and aural interpretation.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-2202-0035

Light Airborne Multipurpose System
(LAMPS) Tactics

Course Number: E-2C-013.

Location: Fleet Airborne Electronics Training Unit, Pacific, San Diego, CA.

Length: 3 weeks (103 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train officers in basic oceanography and tactical procedures.

Instruction: Lectures include basic oceanography, antisubmarine warfare, and antiship missile defense, with emphasis on current tactical procedures used by light airborne multipurpose system squadrons.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-2202-0036

Airborne Early Warning, Class O

Course Number: None.

Location: Air Technical Training Center, Glynco, GA.

Length: 7 weeks (280 hours).

Exhibit Dates: 2/68-1/88.

Objectives: To provide flight officers with training in airborne early warning systems.

Instruction: Lectures on fleet organization, avionics equipment, navigational problems, airborne early warning and antisubmarine warfare systems, and basic air control; simulated training in anti-air warfare; and flight training.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/74)

NV-2202-0037

Shore Fire Control Party

Course Number: G-041-6436.

Location: Amphibious School, Little Creek, Norfolk, VA.

Length: 3 weeks (117-121 hours).

Exhibit Dates: 4/68-1/88.

Objectives: To train enlisted personnel in the duties of shore fire control party men.

Instruction: Lectures and practical exercises in communications, map reading, fire support ships and ammunition, naval gunfire spotting, and simulated firing training.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-2202-0038

Basic Counterintelligence
Communications (CIC)
Techniques for Enlisted
Personnel

Course Number: K-221-0019.

Location: Fleet Anti-Air Warfare Training Center, San Diego, CA.

Length: 3 weeks (88 hours).

Exhibit Dates: 2/72-1/88.

Objectives: To teach enlisted personnel basic counterintelligence communications (CIC) techniques.

Instruction: Lectures and practical exercises in basic CIC techniques, including concepts of CIC, radiotelephone nets and radiotelephone procedures, allied naval signal book, internal communications and sound-powered telephone procedures, basic principles of radar, maneuvering-board fundamentals, CIC plots, DRT check-out, plotting procedures, radar assisted piloting, basic tactics, single-line and circular formations and associated maneuvers, and types of screens and screen maneuvers.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-2202-0039

VS CRAG Enlisted Aircrewman
Antisubmarine Warfare (ASW)
Indoctrination and Equipments

Course Number: D-050-011.

Location: Fleet Airborne Electrician Training Unit, Atlantic, Norfolk, VA.

Length: 5 weeks (150 hours).

Exhibit Dates: 1/66-12/68.

Objectives: To train VS aircrew personnel to operate ASW equipment.

Instruction: Lectures in ASW organization, submarine characteristics and operating procedures; radar, ECM, and Jezebel operator techniques and duties; MAD, AQA-1, and Julie operator techniques and duties; and tactical display and navigational equipment introduction.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (12/68).

NV-2202-0040

VP CRAG Pilot Antisubmarine
Warfare (ASW) Indoctrination,
Equipments and Tactics

Course Number: D-2A-011.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA.

Length: 6 weeks (150 hours).

Exhibit Dates: 1/66-12/68.

Objectives: To train CRAG pilots to operate the VP aircraft weapons systems.

Instruction: Lectures and synthetic trainer exercises in submarine operating characteristics; various search techniques, including radar, ECM, Jezebel, SOSUS, visual search, exhaust trail indicator equipment and tactics, and search planning and execution; operational, intelligence, and contact reporting; localization tactics and equipment; and VP aircraft weapons system, including tactical navigational equipment, tactical plotting, and ASA-16 capabilities, operation, and limitations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74)

NV-2202-0041

P3A/B VP Readiness Tactical Coordinator

(VP CRAG Tactical Coordinator Antisubmarine Warfare (ASW) Indoctrination, Equipments and Tactics)

Course Number: D-2D-0010; D-2D-010.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA.

Length: 7 weeks (210–235 hours).

Exhibit Dates: 1/66–1/88.

Objectives: To train VP CRAG tactical coordinators in the operation, capabilities, limitations, and tactical applications of VP aircraft.

Instruction: Lectures in VP weapons system introduction; detection and contact classification theory; visual search techniques; radar characteristics, equipment, and tactics; and various weapons system equipment operation.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (12/68).

NV-2202-0042

Antisubmarine Warfare (ASW) Tactics—VS Pilot/Naval Flight Officer

(VS CRAG Pilot Antisubmarine Warfare (ASW) Indoctrination Equipments and Tactics—S-2E Aircraft)

Course Number: D-2A-0013; D-2A-013.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA.

Length: 5–6 weeks (150–187 hours).

Exhibit Dates: 1/66–1/88.

Objectives: To train pilots to operate the S-2E weapons system.

Instruction: Lectures and practical exercises in submarine operating characteristics, underwater sound, radar and ECM equipment and tactics, submarine evasion tactics, tactical navigation equipment operation, and synthetic trainer exercises.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (12/68).

NV-2202-0043

Antisubmarine Warfare (ASW) Tactics—First Tour VP Pilot

(VS CRAG Pilot Antisubmarine Warfare (ASW) Indoctrination, Equipments, and Tactics—S-2D Aircraft)

(VP Pilot P3A/B)

Course Number: D-2A-0011; D-2A-0012; D-2A-012.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA.

Length: 5–7 weeks (150–235 hours).

Exhibit Dates: 1/66–1/88.

Objectives: To train pilots to operate S-2D weapons systems.

Instruction: Lectures in ASW organization, VS weapons system introduction, submarine operating characteristics, underwater sound, radar equipment and tactics, submarine evasion tactics, attack criteria, and coordinated submarine/air barrier operations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (12/68).

NV-2202-0044

VP CRAG Enlisted Aircrewman Antisubmarine Warfare (ASW) Indoctrination and Equipments

Course Number: D-050-010.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA.

Length: 5 weeks.

Exhibit Dates: 7/66–12/68.

Objectives: To train enlisted personnel in ASW equipment operation.

Instruction: Lectures in ASW background and organization, methods of aircrew designation, submarine characteristics and operating procedures, radar and ECM operator techniques and duties, and tactical navigational and tactical display equipment introduction.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (12/68).

NV-2202-0045

Amphibious Warfare Indoctrination

Course Number: G-00-6301.

Location: Amphibious School, Little Creek, VA.

Length: 2 weeks (69–73 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train officers in the organization and capabilities of amphibious forces and the basic principles and techniques of amphibious warfare.

Instruction: Lectures and practical exercises on amphibious warfare, including concepts of amphibious operations, organization and command; naval orientation in amphibious forces; supporting arms; amphibious planning, intelligence, communications, and logistics; and ship and shore movement.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-2202-0046

Amphibious Junior Officer Indoctrination

Course Number: H-00-5223.

Location: Amphibious School, San Diego, CA.

Length: 9 weeks (268 hours).

Exhibit Dates: 6/70–1/88.

Objectives: To enable junior officers without previous shipboard experience to perform as administrators, division officers, and watch standers.

Instruction: Lectures and practical exercises on amphibious indoctrination, including amphibious warfare indoctrination, naval amphibious communications and drill, landing craft control, duties of boat officers, boat handling and salvage operations, division organization and administration, indoctrination of new personnel, amphibious shipboard indoctrination, and courses from fleet training center.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-2202-0047

Weapons Delivery System (Officers)

Course Number: F-4E-013.

Location: Submarine School, Groton, CT.

Length: 11 weeks (307 hours).

Exhibit Dates: 4/70–1/88.

Objectives: To train submarine officers in the functions, operations, and effective employment of the BQQ-2 sonar system, the Mk 113 fire control system, the Mk 48 weapons system, and the Mk 28 SUBROC missile.

Instruction: Lectures and practical exercises in weapons delivery systems, including the capabilities, operations, and employment of the BQQ-2 sonar system, the Mk 113 UWFCS, the Mk 48 torpedo and all other operational torpedoes, and the Mk 28 SUBROC missile; and in the duties of the fire control party and the approach officer, and techniques of passive ranging and target motion analysis.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-2202-0048

Mobile Riverine Force Staff Officer Training

Course Number: H-00-1501.

Location: Inshore Operations Training Center, Mare Island, CA.

Length: 6 weeks (256 hours).

Exhibit Dates: 4/69–1/88.

Objectives: To train officers in the techniques and tactics of riverine warfare.

Instruction: Lectures and practical exercises on riverine warfare techniques, including survival in water, counterinsurgency, survival training, riverine warfare orientation and operations, organization and command, small arms and support weapons, communications, combat support, combat service support, and tactical boat operations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-2202-0049

Ship Landing Party Indoctrination

Course Number: G-2E-4606; G-010-4606.

Location: Landing Force Training Command, Norfolk, VA.

Length: 2 weeks (76 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train personnel to conduct small-unit operations ashore and to quell civil riots and disorders ashore.

Instruction: Lectures and practical exercises on the conduct of small-unit tactics, including individual training, weapons, riot control, communications, map reading, small-unit tactics, helicopter orientation, amphibious training and camouflage.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-2202-0050

Chief Petty Officer Leadership, Class C

Course Number: None.

Location: Air Training Command, Pensacola, FL.

Length: 5 weeks (220 hours).

Exhibit Dates: 7/59–12/68.

Objectives: To improve the leadership qualities of chief petty officers.

Instruction: Lectures and practical exercises on leadership areas including duties, responsibilities, capabilities, discipline, morale, management, moral leadership, inspections, military justice, drill and command, teaching techniques, job analysis, drill review, conference speaking, world affairs, naval history, and naval traditions.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/68).

NV-2202-0051

JUDGE ADVOCATE GENERAL'S CORPS INDOCTRINATION

Course Number: A-00-0046.

Location: Officer Training School, Newport, RI.

Length: 8 weeks (280 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train legal officers in basic Navy Judge Advocate General's Corps duties.

Instruction: Lectures in basic naval subjects, including protocol, administration, development of policy, history, concepts of sea power, carrier and submarine operations, combined military operations, shipboard organization, communications, formations and maneuvering, propulsion and damage control, and basic navigation.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (5/74).

NV-2202-0052

ANTI-SUBMARINE AIR CONTROL (OFFICER AND ENLISTED)

(Antisubmarine Air Control, Class C/O)
(Antisubmarine Air Control, Class O)

Course Number: K-00-556; J-221-0321; K-00-1013; J-2G-3212; J-221-3212.

Location: Fleet Combat Direction Systems Training Center, Atlantic, Dam Neck, VA; Fleet Antisubmarine Warfare School, San Diego, CA; Air Technical Training Center, Glynco, GA.

Length: 3-5 weeks (105-164 hours).

Exhibit Dates: 6/66-6/87.

Objectives: To train officers and senior enlisted personnel to perform as antisubmarine air controllers using fixed- and rotary-wing techniques and procedures.

Instruction: Lectures and practical exercises in antisubmarine air control using fixed- and rotary-wing techniques and procedures, including search and rescue, oceanography, submarine capabilities, coordinated antisubmarine warfare operations, intelligence procedures, aircraft control, attack procedures, communications and emergency procedures, helicopters and sonar characteristics, and associated light, multipurpose systems.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/74).

NV-2202-0053

NAVAL GUNFIRE AIR SPOTTER

Course Number: H-2G-5443.

Location: Amphibious School, San Diego, CA.

Length: 3 weeks (114-153 hours).

Exhibit Dates: 2/66-1/88.

Objectives: To train officers to request and control artillery and close air support, and to perform as gunfire air spotters.

Instruction: Lectures and practical exercises in the procedures for requesting and controlling artillery and close air support, and the function of gunfire air spotters, including amphibious operations, use of artillery, air support, and supporting arms coordination; ordnance and weapons systems; air observation; map reading; shipboard gunfire control systems; fire procedures; communications; and aviation ordnance and effects.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (12/68).

NV-2202-0054

SIGNALMAN CLASS A

(Basic Signalman)

Course Number: A-203-0001; K-201-2115; J-201-615; K-301-840.

Location: Service School Command, Orlando, FL; Fleet Training Center, San Diego, CA; Fleet Training Center, Newport, RI; Fleet Training Center, Pearl Harbor, HI.

Length: 6 weeks (180 hours).

Exhibit Dates: 10/63-Present.

Objectives: To train enlisted personnel as watchstanders.

Instruction: Lectures and practical exercises in visual communications procedures, including international Morse code, flag identification and flaghoist signaling, publications, flashing light and semaphore drills and positions, and message construction and procedure.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/83).

NV-2202-0055

SUPPORTING ARMS COORDINATION

(Supporting Arms Coordinator)

Course Number: G-2G-6449.

Location: Amphibious School, Little Creek, Norfolk, VA.

Length: 6 weeks (218-227 hours).

Exhibit Dates: 10/69-1/88.

Objectives: To qualify officers to perform as supporting-arms coordinators on amphibious staffs.

Instruction: Lectures and practical exercises on troop organization and operations, coordination of naval gunfire with air and artillery support, planning naval gunfire support of amphibious operations, and SACC operations. Includes map reading and supporting-arms familiarization, planning naval gunfire support of operations ashore, conduct of fire, and supporting-arms coordination.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-2202-0056

SUBMARINE OFFICERS INDOCTRINATION

Course Number: A-2E-0029; F-00-012.

Location: Submarine School, Groton, CT.

Length: 5 weeks (134-142 hours).

Exhibit Dates: 8/70-1/88.

Objectives: To qualify officers who have had training in nuclear power as officers on nuclear-powered submarines.

Instruction: Lectures and practical exercises in the duties of officers on nuclear-powered submarines, including vital ship control systems (hydraulics, steering and diving, trim and drain, hovering, high- and low-pressure air, main ballast tanks, electrical distribution, ventilation, and snorkeling), diving principles, recovery operations, communications, shiphandling, navigational principles, submarine sensors (including sonar), sound propagation principles, and basic electronics procedures.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-2202-0057

TROOP NAVAL GUNFIRE SPOTTER

Course Number: G-2E-6435; G-2G-6435; G-041-6435.

Location: Amphibious School, Little Creek, VA.

Length: 3 weeks (108-116 hours).

Exhibit Dates: 10/66-1/88.

Objectives: To train officers and noncommissioned officers to perform as naval gunfire spotters.

Instruction: Lectures and practical exercises in planning and coordination of naval gunfire at the spotter level, including administration, gunfire support, communications, fire support ships and ordnance, fire planning and coordination, conduct of fire, principles of observation, gunfire teams and communication nets, characteristics and operation of the radar beacon, and communications equipment.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-2202-0058

NAVAL GUNFIRE LIAISON OFFICER

Course Number: G-2G-6434.

Location: Amphibious School, Little Creek, VA.

Length: 8-9 weeks (271-290 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train officers to perform as gunfire liaison officers.

Instruction: Lectures and practical exercises in the duties of gunfire liaison officers, including troop organization and operations, communications, map reading, conduct of fire, naval gunfire spotting, supporting arms, gunfire support planning, and coordination of gunfire support with air and artillery support in amphibious operations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-2202-0059

NAVAL GUNFIRE AIR SPOTTER

Course Number: G-2G-6438.

Location: Amphibious School, Little Creek, Norfolk, VA.

Length: 2 weeks (88 hours).

Exhibit Dates: 12/72-1/88.

Objectives: To train officers as naval gunfire air spotters.

Instruction: Lectures in naval gunfire support introduction, fire support ships operation, ordnance and gunnery, naval gunfire planning and coordination, air observer procedures, administrative procedures, and physical training.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-2202-0060

NAVAL GUNFIRE LIAISON OFFICER

Course Number: H-2G-5441.

Location: Amphibious School, Coronado, San Diego, CA.

Length: 7 weeks (265-339 hours).

Exhibit Dates: 1/66-1/88.

Objectives: To train officers to be naval gunfire liaison officers.

Instruction: Lectures and practical exercises in troop organization and operation, spotting and coordination of naval gunfire with air and artillery support, planning naval gunfire support of amphibious operations, communications, map reading, target intelligence, aerial photograph interpretation, ammunition, and physical training.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (12/68).

NV-2202-0061

Shore Fire Control Party Enlisted (Modified for U.S. Marine Corps Reserve)

Course Number: H-041-5442A.

Location: Amphibious School, Coronado, San Diego, CA.

Length: 2 weeks (78 hours).

Exhibit Dates: 7/70-1/88.

Objectives: To train enlisted personnel as communicators and spotters on shore fire control parties.

Instruction: Lectures and practical exercises in amphibious operations, administration, military organization, map reading, naval ordnance and weapons systems, and communications equipment and procedures.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-2202-0062

Shore Fire Control Party Enlisted

Course Number: H-041-5442.

Location: Amphibious School, Coronado, San Diego, CA.

Length: 3-4 weeks (132-210 hours).

Exhibit Dates: 7/66-1/88.

Objectives: To train enlisted personnel in naval gunfire techniques.

Instruction: Lectures and practical exercises in ammunition, naval fires classification, characteristics and employment of naval gunfire support ships, communication equipment operation and procedures, map reading, targets, and battle tactics.

Credit Recommendation: Credit is not because of the military-specific nature of the course (5/74).

NV-2202-0063

Gunner's Mate Specialized Training

Course Number: A-011-0021.

Location: Amphibious School, Coronado, San Diego, CA.

Length: 2 weeks (75 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train rated gunner's mates to maintain and repair small arms and other base defense or craft-mounted weapons.

Instruction: Lectures and practical exercises in maintenance and repair of cannons, mortars, machine guns, grenade launchers, rockets, mines, and various small arms.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-2202-0064

Naval Gunfire Spotters (Troop Officers)

Course Number: H-2G-5445.

Location: Amphibious School, Coronado, San Diego, CA.

Length: 3 weeks (115-153 hours).

Exhibit Dates: 7/66-Present.

Objectives: To train officers in the tactics, techniques, employment, and conduct of naval gunfire during amphibious operations.

Instruction: Lectures and practical exercises in military organization, supporting services, map reading, fire support, ordnance and weapons systems, air operations, communications, and the conduct of naval gunfire.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (12/68).

NV-2202-0065

Leadership Schools Class C-1

Course Number: Not available.

Location: Service School Command, San Diego, CA; Naval Schools Command, Norfolk, VA; Naval Schools Command, Great Lakes, IL.

Length: 4 weeks (120 hours).

Exhibit Dates: 1/61-12/68.

Objectives: To provide enlisted personnel with leadership training.

Instruction: Lectures in leadership training, including the Navy's role in world affairs, human relations, petty officer duties and responsibilities, and command leadership training programs.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (5/74).

NV-2202-0066

Boat Group Officers

Course Number: H-2E-5313.

Location: Amphibious School, Coronado, San Diego, CA.

Length: 2 weeks (82 hours).

Exhibit Dates: 11/72-Present.

Objectives: To train officers to supervise boat groups in ship-to-shore amphibious operations.

Instruction: Lectures and practical exercises in landing craft and amphibious vehicle operation, control of assault boat waves in practice movements, beaching and retracting, landing craft communications, and navigation.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-2202-0067

Naval Gunfire Staff Officer

Course Number: H-2G-5444.

Location: Amphibious School, San Diego, CA.

Length: 2 weeks (75 hours).

Exhibit Dates: 6/72-1/88.

Objectives: To train staff officers to develop gunfire plans in support of amphibious operations.

Instruction: Lectures and practical exercises in amphibious operations and supporting gunfire, ordnance and weapons systems, communications, map reading, physical conditioning, field artillery, supporting arms coordination, and military symbols.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-2202-0068

Environmental Indoctrination

Course Number: D-2A-0003.

Location: Naval Air Basic Training Command, Pensacola, FL.

Length: 3 weeks (98-112 hours).

Exhibit Dates: 3/70-1/88.

Objectives: To train officers in environmental indoctrination as a prerequisite for aviation/flight officer training.

Instruction: Lectures on introduction to aerodynamics, aviation physiology, aviation engineering, survival training, swimming, mathematics and physics, defensive driving, and physical fitness.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (5/74).

NV-2202-0069

Combat Information Center (CIC) Officer, Class O

Course Number: C-2G-2017.

Location: Air Technical Training Center, Glynco, GA.

Length: 9-13 weeks (353-512 hours).

Exhibit Dates: 10/65-1/88.

Objectives: To train officers in all operational phases of combat information centers.

Instruction: Instruction includes management, organization, electronics, electronic warfare, and communications; surface, air, and advanced operations, including air control, antiair and antisubmarine warfare.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (5/76).

NV-2202-0070

Ice Observer, Class C

Course Number: Not available.

Location: Technical Training Unit, Lakehurst, NJ.

Length: 6 weeks (240 hours).

Exhibit Dates: 4/57-12/68.

Objectives: To train enlisted personnel for ice reconnaissance duties and operations.

Instruction: Lectures and practical exercises in ice reconnaissance duties and operations. Topics include military operations, ice seamanship, survival, sea ice, land ice, equipment utilization, and observation techniques.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/68).

NV-2202-0071

Combat Sensor Warfare Training

Course Number: H-00-1940; H-000-1940.

Location: Inshore Operations Training Center, Mare Island, CA.

Length: 6 weeks (348 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train personnel in combat sensor warfare and in the detection and evaluation of clandestine insurgent movements.

Instruction: Lectures and practical exercises in combat sensor warfare, including counterinsurgency, military organization in Vietnam, MACV organization and basic field organization, survival training, intelligence, operations, small arms and explosives, first aid, ground unit tactics, sensor warfare, advanced operational and environmental training, and legal and medical aspects of drug abuse.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course(6/74).

NV-2202-0073

DLG 6-16 (MOD) Terrier Weapons System Missile Fire Control

System (MFCS) Mk 76 Mod 5
(DLG-16 (MOD) Terrier Weapons System)

Course Number: A-121-0150.

Location: Guided Missiles School, Dam Neck, VA.

Length: 10 weeks (354 hours).

Exhibit Dates: 10/72-12/75.

Objectives: To train fire control technicians on the Terrier missile weapons systems.

Instruction: Lectures and practical exercises on the Terrier weapons system, including introduction to the DLG-16 integrated weapon system, target sensors with Naval Tactical Data System (NTDS) interface, specific weapons direction system, ships weapons systems, weapons system alignment, digital system maintenance test program and analog system maintenance tests.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-2202-0074

Air Watch Officer
(Combat Information Center (CIC) Watch Officer, Class O)

Course Number: J-2G-0322; K-2G-351; K-2G-352; K-2G-353; C-2G-2020.

Location: Fleet Combat Training Center, Dam Neck, Va; Fleet Anti-Air Warfare Training Center, San Diego, CA; Air Technical Training Center, Glynco, GA.

Length: 4 weeks (160 hours).

Exhibit Dates: 5/71-Present.

Objectives: To train officers and chief petty officers to perform as CIC watch officers for normal steaming and condition-III watches.

Instruction: Lectures and practical exercises in the functions of the CIC watch officer, including foundation skills, preparation for assuming the watch, surface formation maneuvers, special situations, anti-air warfare, strike force operations, and anti-submarine warfare, exercises, and administration. Includes plot and display boards, data link systems and anti-air and anti-submarine warfare theory.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0075

Electric Hydraulic Power Drive for 5"/38 Caliber Dual Purpose Single Mount

Course Number: K-041-2050.

Location: Fleet Training Center, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train enlisted personnel to operate, maintain, repair, and analyze the 5"/38 caliber train and Mk 6 elevation power drive.

Instruction: Lectures and practical exercises in the maintenance and repair of the electric hydraulic power drive for the 5"/38 caliber gun mount. Course includes hydraulic systems, electrical systems, local and automatic control, elevation and train indicator receiver regulator, and the interlocking solenoid system.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/74).

NV-2202-0076

Basic Quartermaster

Course Number: K-772-600.

Location: Fleet Training Center, Pearl Harbor, HI.

Length: 4 weeks (120 hours).

Exhibit Dates: 3/64-12/68.

Objectives: To train enlisted personnel to stand quartermaster watches.

Instruction: Lectures and practical exercises in charts and related publications; navigational aids, time and timepieces; logs; compasses and compass error; weather; tides and currents; sunrise and sunset; azimuths; taking bearings; symbols; types of fixes; set and drift; speed and distance; and plotting problems.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-2202-0077

A-4 Conventional Weapons Training

Course Number: Not available.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 4 weeks (160 hours).

Exhibit Dates: 3/68-1/88.

Objectives: To train enlisted personnel to install and disassemble armament carried on A-4 aircraft.

Instruction: Lectures and practical exercises in the installation and disassembly of armament carried on A-4 aircraft. Course includes explosives introduction, safety procedures, aircraft bombs, fuzes, and rockets and launchers.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-2202-0078

2F69D P-3 Weapon System Follow-on-Training

Course Number: Not available.

Location: Fleet Aviation Specialized Operational Training Group, Pacific, Moffett Field, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 4/73-1/88.

Objectives: To train flight crew personnel in weapons systems.

Instruction: Lectures and practical exercises in weapons systems, including operating sensors for detection, identification, and destruction of enemy submarines.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-2202-0079

2F87 P-3 Weapon System Follow-on-Training

Course Number: Not available.

Location: Fleet Aviation Specialized Operational Training Group, Pacific, Moffett Field, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 4/73-1/88.

Objectives: To train enlisted personnel to operate the 2F87 P-3 weapon system.

Instruction: Lectures and practical exercises in 2F87 P-3 weapon system operation, including operating sensors required to detect, identify, localize, and destroy hostile submarines.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-2202-0080

Helicopter (HS) Antisubmarine Warfare (ASW) Operator
(Helicopter Aviation Antisubmarine Warfare (AASW) Air Sonar Operator (AN/AQS-13))

Course Number: E-210-0032; E-210-32.

Location: Fleet Airborne Electronics Training Unit, Pacific, North Island, CA.

Length: 3-4 weeks (90-138 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train enlisted personnel to be airborne sonar operators.

Instruction: Lectures and practical exercises in airborne sonar operation, including sonar search procedures, aerial plotting, vector beam patterns, sound recognition, group training, and weapons system trainer.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/75).

NV-2202-0081

Counterinsurgency Orientation

Course Number: H-00-5219; H-000-5219.

Location: Amphibious School, Coronado, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train enlisted personnel in the concepts and policies of counterinsurgency.

Instruction: Lectures and practical exercises in the concepts and policies of counterinsurgency, with a survey of foreign political ideologies that are in conflict with democratic philosophies. Course includes a survey of philosophical, sociological, political, and cultural influences that conflict with democratic aims, as well as an overview of strategies and tactics used in defense against insurgent movements in foreign countries.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-2202-0082

Talos Telemetering Data Reduction

Course Number: Not available.

Location: Guided Missiles School, Dam Neck, VA; Naval Schools Command, Mare Island, CA.

Length: 3 weeks (90 hours).

Exhibit Dates: 2/68-12/78.

Objectives: To train officers and enlisted personnel to perform data reduction and analysis of Talos guided missile telemetered flight records.

Instruction: Lectures and practical exercises on Talos telemetering data reduction, including fire control system, telemetering system, airborne telemetering equipment, telemeter ground station and associated evaluation equipment, prefiring procedures, Talos data reduction, and flight analysis.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-2202-0083

Terrier Telemetering Data Reduction

Course Number: Not available.

Location: Guided Missile School, Dam Neck, VA; Schools Command, Mare Island, CA.

Length: 3 weeks (90 hours).

Exhibit Dates: 2/68-12/72.

Objectives: To train officers and enlisted personnel to perform data reduction and analysis on Terrier guided missile telemetered flight records.

Instruction: Lectures and practical exercises on data reduction and analysis of Terrier guided missile telemetered flight records, including introduction to airborne and ground station telemetering systems; Terrier guided missile exercise heads; telemeter ground stations and associated equipment; and specific Terrier guided missile functional description, data reduction and flight analysis.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-2202-0084

ASTOR/SUBROC Operator Maintenance

Course Number: K-000-947.

Location: Nuclear Weapons Training Center, Pacific, North Island, CA.

Length: 3 weeks (90 hours).

Exhibit Dates: 5/68-1/88.

Objectives: To train COMSUBPAC personnel in the operation and maintenance of the ASTOR torpedo warhead and the SUBROC warhead.

Instruction: Lectures and practical exercises in the operation and maintenance of the ASTOR torpedo warhead and SUBROC warhead, including nuclear weapons administration, nuclear training, and weapons training.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (8/74).

NV-2202-0085

3"/50 Caliber Rapid Fire Gun Mount Maintenance

Course Number: K-041-2052.

Location: Fleet Training Center, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train enlisted personnel to operate, maintain, adjust, and repair the 3"/50 caliber rapid-fire gun and mount.

Instruction: Lectures and practical exercises in 3"/50 caliber rapid-fire gun and mount operation, maintenance, and repair, including stand, carriage, training gear, elevating gear, power drives, electrical installations, gun assembly, and loader.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (8/74).

NV-2202-0086

Navy Nuclear Weapons Advanced Maintenance

Course Number: A-644-0015.

Location: Defense Atomic Support Agency, Albuquerque,NM.

Length: 4 weeks (126 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train enlisted personnel to maintain nuclear warheads.

Instruction: Lectures and practical exercises in the depot-level maintenance of nuclear warheads, including theory of nuclear warhead components, disassembly, inspection, testing, maintenance, general handling, and safety, and preparation and testing of sealant compounds.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (8/74).

NV-2202-0087

Aviation Indoctrination, Limited Duty Officer (LDO)

Course Number: None.

Location: Air Base Training Command, Pensacola, FL.

Length: 8 weeks (296 hours).

Exhibit Dates: 10/64-1/88.

Objectives: To train limited-duty officers to assume various aviation-related duties.

Instruction: Lectures and practical exercises in aviation indoctrination for limited-duty officers. Course includes naval leadership, organization and administration, naval history and operations, and physical training.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in naval science (12/68).

NV-2202-0088

Aviation Reserve Officer Candidate (AVROC)

Course Number: None.

Location: Air Basic Training Command, Pensacola, FL.

Length: *Version 1:* 16 weeks (440 hours). *Version 2:* 12-16 weeks (404-489 hours).

Exhibit Dates: *Version 1:* 1/69-1/88. *Version 2:* 3/66-12/68.

Objectives: To train military personnel to be aviation officers.

Instruction: This course is the same as NV-2202-0033, except that reserve personnel complete it in two 6- or 8-week summer sessions. Topics include: naval history; orientation to naval careers; world affairs; physics and mathematics; engineering; aerodynamics; aviation physiology; navigation and seamanship; physical fitness and swimming; and applied leadership training.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 12 semester hours in naval science (i.e., 6 semester hours for each summer session) (2/74). *Version 2:* In the upper-division baccalaureate category, 6 semester hours in naval science (i.e., 3 semester hours for each summer session) (12/68).

NV-2202-0089

Naval Gunfire Support Planning

Course Number: H-2G-5447.

Location: Amphibious School, Coronado, San Diego, CA.

Length: 5-6 weeks (197-237 hours).

Exhibit Dates: 7/66-12/68.

Objectives: To provide Navy and Marine Corps officers with knowledge and skills in naval gunfire planning and employment.

Instruction: Lectures and practical exercises in history of naval gunfire, amphibious raids, organization of military combat units, supporting arms, air control, communications, with special emphasis on landing force aspects.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-2202-0090

Amphibious Junior Division Officer Indoctrination

Course Number: G-00-6518.

Location: Amphibious School, Little Creek, Norfolk, VA.

Length: 3 weeks (102 hours).

Exhibit Dates: 4/67-1/88.

Objectives: To provide newly commissioned officers with knowledge in amphibious warfare.

Instruction: Lectures and practical exercises in concepts of amphibious warfare, operations, planning, communications, ship/shore movement, physical training, leadership, career counseling, and support operations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-2202-0091

PHIBLANT Petty Officer Leadership

Course Number: G-000-6583.

Location: Amphibious Base, Little Creek, VA.

Length: 2 weeks (73 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To provide leadership training.

Instruction: Lectures and practical exercises to include basic leadership principles, instructor training, military law, world affairs, American government, Navy history and heritage, and career counseling.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-2202-0092

Enlisted Submarine Indoctrination

Course Number: A-060-0012.

Location: Submarine School, Groton, CT.

Length: 4 weeks (113 hours).

Exhibit Dates: 7/71-1/88.

Objectives: To provide enlisted personnel with familiarization and knowledge of submarines.

Instruction: Lectures and practical exercises in purpose, function, and location of installed equipment and systems of a nuclear-powered submarine, including theory and operation of equipment and systems, and all aspects of submarine duty.

Credit Recommendation: Credit is not recommended because of the specialized nature of the course (7/74).

NV-2202-0093

Women Officer Candidate School

Course Number: A-00-0051.

Location: Women Officer School, Newport, RI.

Length: *Version 1:* 16 weeks (480 hours). *Version 2:* 7-8 weeks (182-240 hours).

Exhibit Dates: *Version 1:* 8/71-1/88. *Version 2:* 3/61-7/71.

Objectives: To provide women officer candidates with instruction and training in essential naval subjects which will prepare them to perform duties as naval officers.

Instruction: Study of the Navy role in support of national objectives, national security organization, leadership, managerial and personnel administration, military justice, and communication skills development.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 4 semester hours in naval organization and history (7/74). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in naval organization and history (7/74).

NV-2202-0094

Limited Duty Officer (LDO) Indoctrination

Course Number: None.
Location: Naval Schools Command, Newport, RI.
Length: *Version 1:* 7–10 weeks (217 hours). *Version 2:* 5 weeks (150 hours).
Exhibit Dates: *Version 1:* 4/56–12/68. *Version 2:* 6/54–3/56.
Objectives: To provide orientation and familiarization to newly commissioned officers in the broad scope of customs, traditions, and regulations of the Navy.
Instruction: Lectures and practical exercises in naval leadership, administration, customs, military courtesy, seamanship, military justice, and naval operations.
Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in naval science (12/68). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in naval science (12/68).

NV-2202-0095

Naval School, Officer Women (Reserve)

Course Number: None.
Location: Naval Schools Command, Newport, RI.
Length: 15–16 weeks (450–488 hours).
Exhibit Dates: 4/54–1/88.
Objectives: To provide indoctrination and training in general subjects for personnel on duty in reserve forces.
Instruction: Lectures and practical exercises in basic naval subjects to include administration, communication, operation, naval techniques, regulations, essential techniques and basic psychology of leadership, and naval ideals, customs, and traditions. (Reserve personnel attend two eight-week summer sessions.)
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in naval organization and history for each eight-week summer session (7/74).

NV-2202-0096

Carrier Aviation Antisubmarine Warfare Acoustic Operator (Passive)

Course Number: E-210-51.
Location: Fleet Airborne Electronics Training Unit, San Diego, CA.
Length: 4 weeks (120 hours).
Exhibit Dates: 10/72–1/88.
Objectives: To prepare personnel as antisubmarine warfare acoustic operators.
Instruction: Lectures and practical exercises to include sonobouys, radio receivers, switch functions, safety precautions, preflight practices, diesel submarines, and foreign submarine identification and operations.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-2202-0097

A-7 M61A1 Gun and Associated Systems Intermediate Maintenance

Course Number: C-646-3786.
Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.
Length: 2 weeks (80 hours).
Exhibit Dates: 7/70–3/82.
Objectives: To train personnel to maintain the M61A1 gun.
Instruction: Lectures and practical exercises in the operation, inspection, disassembly, repair, reassembly, and testing of the M61A1 gun and control system.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (5/74).

NV-2202-0098

Mine Hunting Sonar Familiarization (Reserve)

Course Number: A-130-0081.
Location: Mine Warfare School, Charleston, SC.
Length: 2 weeks (80 hours).
Exhibit Dates: 11/71–6/76.
Objectives: To provide personnel with the necessary skills and related knowledge to operate specified sonar sets.
Instruction: Lectures, demonstrations, and practical experience in doctrine, basic sonar principles and procedures for navigation and plotting, and instruction in system capabilities and limitations of the AN/SQQ-14 mine-detecting/classifying sonar.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the training (8/77).

NV-2202-0099

Fire Control System (FCS) Mk 113 Mod 9 Target Motion Analysis (TMA) Operator/Familiarization

Course Number: A-2F-0036.
Location: Guided Missiles School, Dam Neck, VA.
Length: 2 weeks (60 hours).
Exhibit Dates: 8/71–1/88.
Objectives: To instruct personnel in target motion analysis using a specific fire control system.
Instruction: Lectures and practical exercises providing basic background in relative motion concepts; plotting techniques; purpose of the system; elements of display; and interpretation of observations.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/75).

NV-2202-0100

Marine Nuclear Ordnance Platoon (NOP)

Course Number: Not available.
Location: Nuclear Weapons Training Group, Pacific, North Island, CA.
Length: 7 weeks (215–245 hours).
Exhibit Dates: 1/73–1/88.
Objectives: To train selected Marine Corps officers and noncommissioned officers for assignment to nuclear operations platoons.
Instruction: Instruction includes administration, security, reliability, and safety, and theory of operation, assembly, test, and maintenance of Marine Corps ground-delivered weapons.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/75).

NV-2202-0101

Naval Enlisted Scientific Education Program (NESEP)
(NESEP Basic)

Course Number: A-00-4402; A-00-4404; A-00-0109.
Location: Officer Candidate School, Newport, RI.
Length: 10 weeks (260–350 hours).
Exhibit Dates: 4/72–1/88.
Objectives: To prepare selected enlisted personnel for commissioning.
Instruction: Classroom and practical instruction in leadership and supervision, naval operations, and general military subjects.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in interpersonal relations (6/75).

NV-2202-0102

Officer Candidate School

Course Number: A-00-4401; A-00-0044.
Location: Education and Training Center, Newport, RI.
Length: 16–19 weeks (512–665 hours).
Exhibit Dates: 4/55–1/88.
Objectives: To provide officer candidates with an introduction to essential naval subjects.
Instruction: Classroom and practical instruction in naval orientation and supervision, tactics, seamanship, damage control, engineering, navigation, and the role of sea power. Primary emphasis is placed on leadership for newly commissioned officers.
Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in advanced naval science (7/74).

NV-2202-0103

Reserve Officer Candidate (ROC II and ROC I)

Course Number: A-00-4301; A-00-0045.
Location: Education and Training Center, Newport, RI.
Length: 16–21 weeks (512–665 hours).
Exhibit Dates: 4/55–1/88.
Objectives: To provide reserve officer candidates with instruction in essential naval subjects.
Instruction: This course provides essentially the same instructional material as the Officer Candidate program for active-duty personnel (see NV-2202-0102). Students attend 8–9 weeks of training (ROC II) during the summer between their junior and senior college years. The remainder of the program—8–12 weeks (ROC I)—is completed after graduation from college.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in advanced naval science for completion of ROC II and 3 in advanced naval science for completion of ROC I (see "Instruction" section above) (7/74).

NV-2202-0104

Gun Mount 5"/54 Mk 42 Mod 9 and 10, Class C1

Course Number: A-113-0044.
Location: Gunner's Mate School, Great Lakes, IL.
Length: 19 weeks (570–592 hours).
Exhibit Dates: 2/70–1/88.
Objectives: To train personnel in the operation, adjustment, and maintenance of a 5"/54 gun mount.
Instruction: Lectures and practical exercises in gun loaders, hoists, ammunition carriers, and related equipment.
Credit Recommendation: In the vocational certificate category, 2 semester hours in electromechanical hydraulic systems and 2 in electromechanical hydraulics laboratory (9/77).

NV-2202-0105

Advanced Jezebel (VP)

Course Number: E-210-44.

Location: Naval Air Station, Moffet Field, CA.

Length: 2 weeks (75 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train personnel in the operation of a specific electronic system.

Instruction: Lectures and practical exercises to include advanced gram analysis, tactical aspects of AQA-7 Jezebel, intelligence data, and basic sonar theory.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/75).

NV-2202-0106

Mine Mk 60 Mod 0 Weapons Systems
Technician

Course Number: J-647-0036.

Location: Fleet and Mine Warfare Training Center, Charleston, SC.

Length: 8 weeks (260 hours).

Exhibit Dates: 4/80-Present.

Objectives: To train enlisted personnel to perform intermediate maintenance on a CAPTOR weapons system.

Instruction: Lectures and practical exercises in the maintenance of a weapons system including all associated support equipment. The tasks include weapons preparation as well as operation and authorized maintenance of test equipment.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/83).

NV-2202-0107

Navigation Officer (Shipboard) and
Celestial Class C2

Course Number: J-2G-0618.

Location: Fleet Training Center, Norfolk, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 3/82-Present.

Objectives: To train officers in the principles and techniques of navigation.

Instruction: Lectures and practical exercises in shipboard duties of the ship's navigator including use and maintenance of charts and navigation publications, magnetic compass operation and adjustment, piloting, celestial navigation and administration of navigation functions aboard ship.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in navigation (9/83).

NV-2202-0108

Naval and Marine Electronic
Warfare Officer

Course Number: C-2D-3810.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 12 weeks (480 hours).

Exhibit Dates: 11/81-Present.

Objectives: To provide background knowledge prerequisite to operational training in a squadron.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) create an area order of battle from appropriate publications (2) determine the threats within a complex signal environment based upon the identification of Systems/Platforms through recognition of the signals (3) relay an assessment of the environment in accord with the communication plan (4) adjust the order of battle to accomplish the basic ESM and/or ESM objectives.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/87).

NV-2202-0109

Naval Science Institute

Course Number: P-00-4307.

Location: Naval Education and Training Command, Newport, RI.

Length: 6 weeks (240 hours).

Exhibit Dates: 3/78-Present.

Objectives: To provide the student with the training equivalent to the basic course of the Naval ROTC and to qualify the students for enrollment into the advanced course.

Instruction: This is a four part course including introduction to naval science, ship systems (engineering), ships systems (weapons) and sea power and maritime affairs. Introduction to naval science includes an introduction to to the naval profession and concepts of sea power; ship's systems (engineering) includes coverage of basic therodynamics, steamplant systems, diesel engines, gas turbines, power plant auxiliaries, basic ships structure, stability, buoyancy, damage stability and damage control; ships systems (weapons) includes the basic principles of a naval weapons system such as sensor and detection equipment, tracking equipment, computational devices and weapons delivery systems. The seapower section has a survey of US naval history from the American Revolution to the present including law of the sea, comparisons of the US and Soviet naval strategies and merchant marine commerce. There is a physical education component that requires sailing competency upon completion of the course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in naval science ship systems II (weapons), 3 in naval science orientation, 3 in sea power and maritime affairs OR 2 in naval history since 1775, 3 in naval science ship systems I (engineering) OR 3 in basic marine engineering OR 3 in an engineering elective, and 1 in personal physical fitness and 1 in basic sailing (7/84).

NV-2202-0110

Senior Enlisted Academy

Course Number: P-00-1300.

Location: Naval Education and Training Center, Newport, RI.

Length: 9 weeks (360 hours).

Exhibit Dates: 9/81-Present.

Objectives: To prepare senior enlisted personnel to fulfill their leadership and management responsibilities.

Instruction: Lectures and practical exercises in the areas of leadership and management including group dynamics, motivation, managerial theories; communications skills including writing exercises and oral presentations; national security affairs including the role of the United States military in the world today; and navy programs including programming, budgeting and planning.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in management process and theory, 4 in human relations in supervision, 3 in operations management, 2 in business communications, 2 in effective speaking, 1 in personal physical fitness (7/84); in the upper-division baccalaureate category, 3 semester hours in international relations (7/84).

NV-2202-0111

S-3A Armament Control and
Delivery System Organizational
Maintenance

Course Number: C-646-3676.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 6/82-Present.

Objectives: To train technicians to maintain a weapons delivery system.

Learning Outcomes: Upon completion of the course, the student will be able to perform general maintenance at the block diagram level on the following systems: the search store system, the conventional weapons system and the special weapons and rocket aiming sight system.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (4/85).

NV-2202-0112

Advanced Submarine Quartermaster

Course Number: A-061-0015.

Location: Submarine School, Groton, CT; Submarine Training Facility, San Diego, CA; Fleet Ballistic Submarine Training Center, Charleston, SC; Guided Missile School Detachment, Norfolk, VA; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 3 weeks (85 hours).

Exhibit Dates: 1/85-Present.

Objectives: To teach classroom elements of the requirements of rated quartermasters in duties assisting navigator.

Instruction: Course presents navigation administration, time and longitude, restricted waters navigation, daily phenomenon, weather fundamentals, maneuvering boards, compasses, celestial navigation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to navigation procedures (11/85).

NV-2202-0114

CV Naval Tactical Data System
(NDTS) Data Utilization

Course Number: K-2G-0092.

Location: Fleet Combat Training Center, Dam Neck, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 7/84-Present.

Objectives: To provide officer and senior enlisted personnel with training in the operation procedures, capabilities and limitations of the CV/CVN class ship tactical data system.

Instruction: Lectures and laboratory exercises provide the student with a basic understanding of the purpose and use of various controls, subsystems and modes of operation, methods of data entry, duties of various coordinator/controller personnel and practical application with system mock up of target tracking equipment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/86)

NV-2202-0115

Surface Electronic Warfare Officer
(Electronic Warfare Officer Surface)

Course Number: J-2G-0210.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA; Fleet Training Group, Pearl Harbor, HI; Fleet Combat Training Center, Pacific, San Diego, CA.

Length: 4-5 weeks (160 hours).
Exhibit Dates: 9/81-Present.
Objectives: To train officers in the concepts and operational applications of electronic warfare.
Instruction: Lectures on a broad range of electronic warfare topics are given covering subjects such as target acquisition and analysis methods, countermeasures, Soviet naval warfare capabilities, free world weapon systems, and electronic warfare administration. Laboratory exercises on mission planning problems are included.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0116

Antisubmarine Warfare Operations Center Watch Officer

Course Number: J-2G-0367.
Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA.
Length: 3-4 weeks (140 hours).
Exhibit Dates: 8/84-Present.
Objectives: To train officers in system capabilities and equipment operation, of a tactical data base management system and its use in a naval operations center.
Instruction: Classroom lectures, demonstration and laboratory work on function and operation of different computer/system components and controls, preparation, receipt and transmission of messages and data, briefing and debriefing flight crews, and preparing analyzing, interpretating data and making calculations.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (6/86).

NV-2202-0117

Naval Reserve Senior Officer Tactics

Course Number: J-2G-0380.
Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA.
Length: 2 weeks (73 hours).
Exhibit Dates: 5/85-Present.
Objectives: To provide senior reserve officers with a realistic update in the varied aspects of naval warfare.
Instruction: Classroom exercises which provide a knowledge of Soviet warfare capabilities and tactics, U.S. antisubmarine, electronic, and anti-air warfare capabilities, and U.S. and NATO surface capabilities, students also engage in exercises which provide practical application experiences.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0118

Track Supervisor/Tadil A Track Coordinator (Advanced)

Course Number: J-221-0308.
Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA.
Length: 1 week (40 hours).
Exhibit Dates: 6/81-Present.
Objectives: To provide selected enlisted personnel with the knowledge and skills required to function as a tactical data system target tracking supervisor in a multiship/service environment.
Instruction: Classroom lecture combined with laboratory work provides instruction in supervisor duties and responsibilities in accordance with current fleet directives. Also included is information on data input equipment, target tracking procedures, gridlocks, data linking, and related systems.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (6/86).

NV-2202-0119

CGN-38/DDG-993 (SM-2) Combat Systems Operator

Course Number: J-221-0309.
Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA.
Length: 3 weeks (105 hours).
Exhibit Dates: 1/86-Present.
Objectives: To train personnel to operate the combat system and display consoles on board CGN-38 and DDG-993 class ships.
Instruction: Lecture and laboratory exercises covering the identification of weapon system/subsystems and sensors, and purpose and operation of various subsystems involving tracking, identification and display, data entry, video processor, sonar and weapon control systems when used in a combat environment.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0120

Antisubmarine Air Control Naval Tactical Data System (NTDS)

Course Number: J-221-0323.
Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA; Fleet Combat Training Center, Pacific, San Diego, CA.
Length: 4 weeks (140 hours).
Exhibit Dates: 9/85-Present.
Objectives: To train selected personnel to perform the duties of an antisubmarine air controller which include the ability to provide positive control to antisubmarine warfare craft.
Instruction: Classroom and laboratory exercises include instruction in air control, console operation, antisubmarine warfare search procedures, sensors, submarine classifications, sonobouy patterns, weapons and attack procedures, antisubmarine warfare operations, and aircraft air traffic control procedures.
Credit Recommendation: In the vocational certificate category, credit in aircraft traffic control operation on the basis of institutional evaluation (6/86).

NV-2202-0121

Force/Ship Weapons Coordinator Tactical Training

Course Number: J-221-0324.
Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA.
Length: 2 weeks (75 hours).
Exhibit Dates: 9/83-Present.
Objectives: To provide shipboard watchstanders, assigned to tactical data system equipped ships, with comprehensive tactical training.
Instruction: Classroom lectures covering basic knowledge of: the Soviet threat, U.S. and NATO ships and their weapons, capabilities and limitations of U.S. Navy fighter aircraft, warfare net radio procedures, capabilities, limitations and use of USAF, USN and NATO early warning aircraft, anti-aircraft warfare equipment and use, and a thorough knowledge of composite warfare doctrine.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0122

Antisubmarine Warfare (ASW) Centers Command and Control System Operator

Course Number: J-221-0362.
Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA.
Length: 3-4 weeks (140 hours).
Exhibit Dates: 9/85-Present.
Objectives: To train personnel in the system capabilities, operation and functions of antisubmarine warfare equipment.
Instruction: Course consists of lectures and practical work encompassing mission support operations, telecommunications procedures, console operation, data terminal operation, and simulated training missions with associated calculations.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (6/86).

NV-2202-0123

Tactical Action Officer

Course Number: K-2G-0033.
Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA; Fleet Combat Training Center, Pacific, San Diego, CA.
Length: 6 weeks (210 hours).
Exhibit Dates: 7/73-Present.
Objectives: To provide experienced officers with the tactical and supervisory skills necessary to serve as a multi-threat warfare tactician on board surface ships and embarked tactical staffs.
Instruction: Instruction consists of mainly classroom lectures with a few hours of associated laboratory work. Major units of study include: physical environment, naval forces command, control, communications and intelligence, Soviet capabilities, ship and submarine weapons, sensors, and platforms, U.S. naval air capabilities, counter assessment and tactics.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0124

Air Watch Officer

Course Number: J-2G-0322.
Location: Fleet Training Center, San Diego, CA.
Length: 3 weeks (105 hours).
Exhibit Dates: 5/84-Present.
Learning Outcomes: Upon completion of the course, the student will be able to provide inexperienced officers and chief petty officers the training to qualify as a Watch Oficer in a Combat Information Center (CIC).
Instruction: An overview of the equipment, tactics, and duties of the personnel in a combat control center on a ship. This includes plot and display boards, CIC communication and data link systems, maneuvering theory, surface formation maneuvers, anti-air and anti-submarine warfare theory and duties of CIC officers.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course.

NV-2202-0125

Combat Information Center (CIC) Officer

Course Number: J-2G-0325.
Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA.
Length: 6 weeks (210 hours).

Exhibit Dates: 10/81-Present.

Objectives: To train officers in all operational phases of combat information centers.

Instruction: Instruction includes management, organization, electronic warfare, intelligence, and communications; also surface formation maneuvers, and advanced operations including air control, antiair and antisubmarine warfare.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0126

Air Intercept Control Supervisor

Course Number: K-221-0015.

Location: Fleet Combat Training Center, Pacific, San Diego, CA; Fleet Combat Training Center, Atlantic, Dam Neck, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 8/78-Present.

Objectives: To train qualified air intercept controllers to effectively supervise and instruct air intercept operations.

Instruction: Classroom and laboratory exercises including instruction in air control procedures; U. S. and Soviet aircraft types, performance, and tactics; Soviet naval and air capabilities and warfare doctrine; antisubmarine warfare detection equipment, weapons and tactics; weather considerations; intercept control communications and tactics, navigation aids, IFF and radar capabilities; and rules/regulations and publications related to aircraft operations; supervisor training.

Credit Recommendation: In the vocational certificate category, credit in aircraft traffic control operation on the basis of institutional evaluation (6/86).

NV-2202-0127

Naval Warfare Operations Specialist-Advanced

Course Number: K-221-0053.

Location: Fleet Combat Training Center, Pacific, San Diego, CA; Fleet Combat Training Center, Atlantic, Dam Neck, VA.

Length: 10-14 weeks.

Exhibit Dates: 4/79-Present.

Objectives: To provide the present knowledge and skills required to qualify as Combat Information Center Watch supervisors and division leading petty officers.

Instruction: Classroom lectures, demonstrations and laboratory exercises which provide training in basic principles and tactical use of: navigation methods, communications publications and equipment, surface tactical maneuvering, naval gunfire support, amphibious operations, anti-submarine, antiship and anti-aircraft warfare, radar usage, electronic warfare, and the naval tactical data system (NTDS).

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0128

Antisubmarine Warfare (ASW) Module Watch Officer

Course Number: J-2G-0369.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA.

Length: 3-4 weeks (105 hours).

Exhibit Dates: 4/84-Present.

Objectives: To train officers in system capabilities and equipment operating of a data base management system and its use in a naval operational center.

Instruction: Classroom lectures, demonstrations and laboratory work on function and operation of different computer/system components and controls, preparation, receipt and transmission of messages and data, briefing and debriefing flight crews, and preparing, analyzing, interpreting data and making calculations.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (6/86).

NV-2202-0129

Enlisted Tactical Applications

Course Number: J-221-0025.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA; Fleet and Mine Warfare Training, Charleston, SC.

Length: 2 weeks (67 hours).

Exhibit Dates: 3/82-Present.

Objectives: To provide leading petty officers with a basic understanding of the interrelationships between their weapons/sensor systems and other systems in the ship group, and force to enable them to make better decisions regarding their employment in a multi-threat environment.

Instruction: Classroom lectures include information on Soviet naval forces, U.S. Navy command, control and communications tactics, U.S. and allied naval ships, weapons, and sensors, shipboard organization for warfare, and tactical gaming.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0130

Combat Information Center (CIC) Procedures Advanced

Course Number: J-221-0305.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA; Fleet Training Center, Mayport, FL; Fleet and Mine Warfare Training Center, Charleston, SC.

Length: 2 weeks (70 hours).

Exhibit Dates: 10/80-Present.

Objectives: To train the junior operation specialist as a watch stander and petty officers as a watch supervisor in a combat information center aboard a ship.

Instruction: Review of sound powered and radio telephone procedures, antisubmarine, anti-aircraft and antisurface ship warfare and electronic warfare techniques. Course emphasis is on plotting ship maneuvers for weapon engagement, avoiding courses, scouting, tactics, fleet maneuvers, navigation calculations, and maintaining various records in proper format.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the coruse (6/86).

NV-2202-0131

Air Intercept Controller, Conventional Qualification

Course Number: K-221-0007.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA; Fleet Combat Training Center, Pacific, San Diego, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 8/81-Present.

Objectives: To train senior enlisted and junior officer personnel with previous experience with the tactical data system in the duties, responsibilities and skills required of air intercept controllers.

Instruction: Lectures and practical exercises in air intercept control, including fleet anti-air warfare, threat intelligence, interceptor aircraft characteristics and air-to-air weapons systems, air navigation aids, communications equipment, intercept control communications procedures and vocabulary, radar indicator equipment, identification equipment, and preparation and procedures for NTDS control.

Credit Recommendation: In the vocational certificate category, credit in aircraft traffic control operation on the basis of institutional evaluation (6/86).

NV-2202-0132

Joint Military Operations for College of Naval Warfare

Course Number: None.

Location: Naval War College, Newport, RI.

Length: 13 weeks (156 hours).

Exhibit Dates: 11/85-Present.

Learning Outcomes: Upon completion of the course, the student will be able to assess and implement concepts of military management, planning, and analysis consistent with theoretical foundations of strategy and warfare.

Instruction: Instruction includes a blend of frequent seminar work, carefully selected readings, case studies, an independent research project and written examinations. The course is divided into four components: strategy and operations; military warfare; planning and decision making; gaming. Students are required to complete a final examination at the conclusion of each component.

Credit Recommendation: In the graduate degree category, 6 semester hours in either management or military science (9/87).

NV-2202-0133

Maritime Operations for College of Naval Command and Staff

Course Number: None.

Location: Naval War College, Newport, RI.

Length: 14 weeks (151 hours).

Exhibit Dates: 11/85-Present.

Learning Outcomes: Upon completion of the course, the student will be able to assess and implement concepts of military management, planning, and analysis consistent with theoretical foundations of strategy and warfare.

Instruction: Instruction includes a blend of frequent seminar work, carefully selected readings, case studies, an independent research project and written examinations. The course is divided into three components: strategy and operations; military warfare; planning and decision making; gaming. Students are required to complete a final examination at the conclusion of each component.

Credit Recommendation: In the graduate degree category, 6 semester hours in either management or military science (9/87).

NV-2202-0134

Maritime Operations Employment of Naval Forces Nonresident Seminar

Course Number: None.

Location: Annapolis, MD; Corpus Christi, TX; Dahlgren, VA; Newport, RI; Norfolk, VA; Patuxent, MD; Pensacola, FL; San Diego, CA; San Francisco, CA; Seattle, WA; Washington, D.C.; White Oak, MD.

Length: 36 weeks (90 hours).

Exhibit Dates: 3/88-Present.

Learning Outcomes: Upon completion of the course the student will be able to assess concepts of military management, planning, and analysis and be able to participate knowledgeably in the decision making and management of maritime operations.

Instruction: Seminar and selected readings. Short papers and two written examinations. Major topics are: strategic concepts, planning and decision making, and Naval warfare tasks.

Credit Recommendation: In the graduate degree category, 3 semester hours in management or military science (3/88).

NV-2202-0135

Naval War Correspondence Course in Maritime Operations (Employment of Naval Forces)

Course Number: None.

Location: Naval War College, Off-Campus Program, Washington, D.C.

Length: Maximum 52 weeks.

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to assess concepts of military management, planning, and analysis and be able to participate knowledgeably in the decision making and management of maritime operations.

Instruction: The course is organized by modules in the following major areas: strategic concepts, planning and decision making, and naval warfare tasks. Students complete readings in each module and write essays for all modules. The essays are reviewed by faculty and graded.

Credit Recommendation: In the graduate degree category, 1 semester hour in management or military science (3/88).

NV-2202-0136

Trident Sonar Advanced Operator

Course Number: A-130-0323.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 3 weeks (120 hours).

Exhibit Dates: 8/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform advanced sonar watchstanding techniques on the AN/BQQ-6 in all modes.

Instruction: Classroom and laboratory instruction in sonar administration, sonar calculators, contact localization, and tactical security.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/89).

NV-2202-0137

Trident Sonar Supervisor

Course Number: A-130-0187.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 3 weeks (46 hours).

Exhibit Dates: 8/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform as an advanced sonar supervisor.

Instruction: Classroom and laboratory instruction on the supervisor's responsibilities, sonar subsystem operating conditions air ASW systems, acoustics, and pseudo sound.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/89).

NV-2202-0138

Strategic Weapon System Officer Trident 1

Course Number: A-2F-4623.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 3–4 weeks (144 hours).

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will direct operational procedures for a nuclear ballistic missile targeting system.

Instruction: Lectures and practical exercises concerning operation of the missile system.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/89).

NV-2202-0139

Strategic Weapons System Assistant Weapons Officer (AWEPS) Trident 1 Backfit

Course Number: A-2F-4622.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA; Submarine Training Facility, Charleston, SC.

Length: 4–5 weeks (178 hours).

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will function as a missile launch officer and nuclear weapons handling supervisor.

Instruction: Lectures and practical exercises related to operational procedures for a specific missile weapons system.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/89).

NV-2202-0140

Terrier New Threat Upgrade (NTU) Advanced Officer

Course Number: A-2F-4638.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 3/89–Present.

Learning Outcomes: Upon completion of the course the student will supervise system maintenance, administration, and employment of a guided missile fire control system.

Instruction: Lectures and practical exercises on topics related to the specific missile fire control system.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/89).

NV-2202-0141

Strategic Weapons System Officer Poseidon

Course Number: A-2F-4621.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 3–4 weeks (144 hours).

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will direct operational procedures for a nuclear weapons system.

Instruction: Lectures and practical exercises on system operation.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/89).

NV-2202-0142

Strategic Weapons System Assistant Weapons Officer Poseidon

Course Number: A-2F-4620.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA; Submarine Training Facility, Charleston, SC; Submarine School, Groton, CT.

Length: 4–5 weeks (176 hours).

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will function as a missile launch officer and a nuclear weapons handling supervisor.

Instruction: Lectures and practical exercises related to operational procedures for a missile officer.

Credit Recommendation: Credit is not recommended because of the miltary-specific nature of the course (6/89).

NV-2202-0144

Trident Mk 4 Reentry System Tender Transfer and Handling

Course Number: A-644-0023.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 2 weeks (62 hours).

Exhibit Dates: 9/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate and perform preventive maintenance on missile warheads and warhead handling equipment.

Instruction: Lectures and practical exercises on the subject equipment.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/89).

NV-2202-0145

Surface Acoustic Analysis Specialist

Course Number: J-130-0500.

Location: Fleet Antisubmarine Warfare Training Center-Atlantic, Norfolk, VA; Fleet Antisubmarine Warfare Training Center, San Diego, CA.

Length: 24 weeks (960 hours).

Exhibit Dates: 11/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to make basic calculations of algebra, trigonometry, and statistics and apply the concepts of underwater acoustics to to sonar systems.

Instruction: This evaluation is based on the first five and one half weeks of the course. The remainder is classified. Lectures and exercises in algebra, trigonometry, statistics, underwater acoustics including sound propagation theory, environmental effects, acoustic signal processing, underwater sounds, and sonar theory.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in technical mathematics; in the upper-division baccalaureate category, 4 semester hours in physics of underwater acoustics (6/89).

NV-2202-0146

Intermediate Surface Acoustic Analysis

Course Number: K-130-1093.

Location: Fleet Antisubmarine Warfare Training Center-Atlantic, Norfolk, VA; Fleet Antisubmarine Warfare Training Center, San Diego, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 4/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to identify ship types based on the passive sonar acoustic signals received.

Instruction: Lectures and practical exercises related to signal reception of passive sonar systems.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (6/89).

NV-2202-0148

Basic Enlisted Submarine

Course Number: A-060-011/A.

Location: Submarine School, Groton, New London, CT.

Length: 5-6 weeks (228 hours).

Exhibit Dates: 12/84–Present.

Learning Outcomes: Upon completion of the course the student will be able to describe the function of components of shipboard mechanical systems.

Instruction: Lectures and practical instruction in the basic function of shipboard mechanical systems including description of a submarine's air, drain, ballast, trim, hydraulic, ventilation, and power systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in general mechanical systems (10/89).

NV-2202-0149

Advanced Signalman

Course Number: J-203-0803.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 7/86–Present.

Learning Outcomes: Upon completion of the course the student will be familiar with communications procedures, honors, ceremonies, and advanced navigation techniques.

Instruction: Instruction consists of classroom discussion of the duties of a signalman, handling classified material, message formats, light and flag signal procedures, record keeping, radio procedures, proper display of flags, dress and full dress of ships, navigation, emergency procedures, International Morse code, and the U.S. systems of buoys and navigational aids.

Credit Recommendation: In the vocational certificate category, 2 semester hours in International Morse code; in the lower-division baccalaureate/associate degree category, 2 semester hours in navigational rules (12/89).

NV-2202-0150

Senior Quartermaster Refresher

Course Number: J-061-2207.

Location: Fleet Training Center, Norfolk, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 6/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to provide navagational expertise to shipboard personnel; select and use appropriate nautical charts; advise during unusual navigational conditions in accordance with fleet directives; extract and record maintenance data from navigation publications; compute positions, courses, and distances and navigate to and from a hypothetical point; determine ship's permanent allowance; correct and update ship's charts and publications; solve for errors in magnetic and gyro compass systems; navigate by dead reckoning; use all charted visual aids to navigation; plot lines of position; use tide and current data; determine anchorages; use electronic navigation systems, including SATNAV and LORAN; be familiar with ship's weather monitoring systems; know the rules of the road; and plan and plot navigational briefs.

Instruction: Lectures and laboratory exercises using navigation instruments, charts, and aids to navigation. Topics include rules of the road, records and logs, gyro and magnetic compass systems, voyage planning and preparation, tides and currents, and dead reckoning.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in navigation (12/89).

NV-2203-0143

Poseidon Mk 3 Renetry System Tender Transfer and Handling

Course Number: A-644-0018.

Location: Guided Missiles, School, Dam Neck, Virginia Beach, VA.

Length: 3-4 weeks (144 hours).

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to handle and transfer missiles between a submarine and a submarine surface tender.

Instruction: Lectures and practical exercises related to the handing of the Poseidon missile.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/89).

NV-2205-0001

Electrostatically Supported Gyro Monitor (ESGM) Backfit Strategic Weapon System Navigation Officer Replacement

Course Number: A-2G-0027.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 6 weeks (240 hours).

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to understand and apply basic inertial navigation theory and direct the operation and maintenance of a ship's inertial navigation guidance system.

Instruction: Lectures and practical exercises in inertial navigation and the subsystems which make up an inertial navigation system, including gyroscope principles, coordinate systems, torqing, azimuth alignment, and drift prediction.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic navigation (6/89).

NV-2205-0002

Electrostatically Supported Gyro Monitor (ESGM) Backfit Navigation Subsystem

Course Number: A-193-0394.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 4-5 weeks (178 hours).

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate the ESGM Backfit Navigation Subsystem as well as perform basic preventive and corrective maintenance and calibration procedures on the system.

Instruction: Instruction includes classroom and laboratory work on principles of navigation, operating principles of of navigation equipment, and basic preventive maintenance of the equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic navigation (6/89).

Navy Enlisted Ratings Exhibits

NER-AB-001

AVIATION BOATSWAIN'S MATE

ABCS
ABCM

Exhibit Dates: 6/71–Present.

Occupational Field: 6 (Aviation Ground Support).

Career Pattern

May progress from: ABHC, Chief Aviation Boatwain's Mate, Aircraft Handling (E-7); ABFC, Chief Aviation Boatswain's Mate, Fuels (E-7); OR ABEC, Chief Aviation Boatswain's Mate, Launching and Recovery Equipment (E-7). ABCS: Senior Chief Aviation Boatswain's Mate (E-8). ABCM: Master Chief Aviation Boatswain's Mate (E-9).

Description

ABCS: Able to perform the duties required for ABHC (Chief Aviation Boatswain's Mate, Aircraft Handling), ABFC (Chief Aviation Boatswain's Mate, Fuels), or ABEC (Chief Aviation Boatswain's Mate, Launching and Recovery Equipment); monitors maintenance schedules and administers safety programs in the following areas: launch, recovery, aviation-fuel system, aircraft-handling, crash-rescue and damage-control equipment; assigns personnel and prepares correspondence; organizes, schedules, and evaluates training programs; responsible for availability of spare parts and equipment; implements quality control and surveillance procedures for aviation fuel; evaluates equipment overhaul procedures; administers long-range maintenance programs; requisitions, inventories, and disposes of materials in own operational area; administers air terminal operations, including storage of cargo, handling of passengers and aircrew, and aircraft services. *ABCM:* Able to perform the duties required for ABCS; formulates guidelines for use in safety inspections; plans, organizes, and implements control activities in compliance with policy statements, orders, and directives; establishes goals and objectives in area of responsibility; reviews and interprets maintenance directives; reviews performance of aircraft-handling, crash-rescue, and damage-control crews with crew members; reviews programs and insures that all scheduled maintenance for launch, recovery, aviation-fuel system aircraft- handling, crash-rescue, and damage-control equipment is performed; establishes inspection and operational evaluation procedures to be used on repaired or newly installed parts; develops operating budgets and monitors expenditures; enters changes to ship equipment configuration accounting system and submits required reports.

Recommendation, ABCS

In the vocational certificate category, if the individual progressed from ABEC (Chief Aviation Boatswain's Mate, Launching and Recovery Equipment), use the recommendation in exhibit NER-ABE-001. In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation safety, 3 in maintenance management, and 3 in air operations management, and additional credit in hydraulics, fire science, and aircraft servicing or air operations on the basis of institutional evaluation; add the 16 semester hours for ABHC (Chief Aviation Boatswain's Mate, Aircraft Handling), or the 16 semester hours for ABFC (Chief Aviation Boatswain's Mate, Fuels), or the 13 semester hours for ABEC (Chief Aviation Boatswain's Mate, Launching and Recovery Equipment), as appropriate. In the upper-division baccalaureate category, 3 semester hours for field experience in management (2/77).

Recommendation, ABCM

In the vocational certificate category, if the individual progressed from ABEC (Chief Aviation Boatswain's Mate, Launching and Recovery Equipment), use the recommendation in exhibit NER-ABE-001. In the lower-division baccalaureate/associate degree category, 4 semester hours in aviation safety, 3 in maintenance management, 3 in air operations management, and 3 in introduction to management, and additional credit in hydraulics, fire science, and aircraft servicing or air operations on the basis of institutional evaluation; add the 16 semester hours for ABHC (Chief Aviation Boatswain's Mate, Aircraft Handling) in exhibit NER-ABH-001; or the 16 semester hours for ABFC (Chief Aviation Boatswain's Mate, Fuels) in exhibit NER-ABF-001, or the 13 semester hours for ABEC (Chief Aviation Boatswain's Mate, Launching and Recovery Equipment) in exhibit NER-ABE-001, as appropriate. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (2/77).

NER-ABE-001

AVIATION BOATSWAIN'S MATE,
LAUNCHING AND RECOVERY
EQUIPMENT

ABE3
ABE2
ABE1
ABEC

Exhibit Dates: 6/71–Present.

Occupational Field: 6 (Aviation Ground Support).

Career Pattern

AN: Airman (E-3). *ABE3:* Aviation Boatswain's Mate, Launching and Recovery Equipment, Third Class (E-4). *ABE2:* Aviation Boatswain's Mate, Launching and Recovery Equipment, Second Class (E-5). *ABE1:* Aviation Boatswain's Mate, Launching and Recovery Equipment, First Class (E-6). *ABEC:* Chief Aviation Boatswain's Mate, Launching and Recovery Equipment (E-7). *ABCS:* Senior Chief Aviation Boatswain's Mate (E-8). *ABCM:* Master Chief Aviation Boatswain's Mate (E-9).

Description

Summary: Operates and maintains hydraulic and steam catapults, barricades and arresting gear; operates catapult launch, retract panels, consoles, firing panels, water brakes, chronographs, blast deflectors and cooling panels; imspects and proof-loads cables, fittings, and wire rope sockets. *ABE3:* Inspects and lubricates launch and recovery equipment; replaces packing and seals on catapults and arresting gear; rigs and installs barricades; performs planned maintenance on arresting gear and arresting gear engines; operates and maintains jet blast deflectors; determines safe working loads for hoisting materials, wire rope, manila lines, nylon lines, and webbing; uses maintenance cards; completes maintenance records. *ABE2:* Able to perform the duties required for ABE3; inspects, tests, and adjusts catapults and related equipment; tests, adjusts, and calibrates arresting gear and barricades; supervises personnel on aircraft launch hookup; inventories equipment and spare parts; orders spare parts and special tools. *ABE1:* Able to perform the duties required for *ABE2:*; disassembles, replaces defective parts, and reassembles catapult systems, arresting gear engines, and accessories; prepares data for equipment logs; supervises the use of maintenance publications; prepares preventive maintenance schedules; maintains custody records. *ABEC:* Able to perform the duties required for ABE1; supervises the use, filing, and maintenance of publications and records; screens defective components for repairs; inspects and evaluates operation of repaired equipment; insures quality control; prepares quarterly schedules of preventative maintenance; supervises the accounting for and replacement of spare parts and equipment.

Recommendation, ABE3

In the vocational certificate category, 3 semester hours in basic hydraulics and additional credit on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, credit in hydraulics on the basis of institutional evaluation (2/77).

Recommendation, ABE2

In the vocational certificate category, 3 semester hours in basic hydraulics and additional credit on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, credit in hydraulics on the basis of institutional evaluation (2/77).

Recommendation, ABE1

In the vocational certificate category, 3 semester hours in hydraulics, 2 in shop management, and 1 in record keeping, and additional credit in hydraulics on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in hydraulics, 2 in shop management, 2 in personnel supervision, and 1 in record keeping, and additional credit in hydraulics on the basis of institutional evaluation (2/77).

Recommendation, ABEC

In the vocational certificate category, the recommendation is the same as that for ABE1. In the lower-division baccalaureate/associate degree category, 3 semester hours in hydraulics, 3 for field experience in management, 3 in personnel supervision, 2 in shop management, and 2 in record keeping, and additional credit in hydraulics on the basis of institutional evaluation (2/77).

Aviation Boatswain's Mate, Fuels

ABF3
ABF2
ABF1
ABFC

Exhibit Dates: 6/71–Present.

Occupational Field: 6 (Aviation Ground Support).

Career Pattern

AN: Airman (E-3). *ABF3:* Aviation Boatswain's Mate, Fuels, Third Class (E-4). *ABF2:* Aviation Boatswain's Mate, Fuels, Second Class (E-5). *ABF1:* Aviation Boatswain's Mate, Fuels, First Class (E-6). *ABFC:* Chief Aviation Boatswain's Mate, Fuels (E-7). *ABCS:* Senior Chief Aviation Boatswain's Mate (E-8). *ABCM:* Master Chief Aviation Boatswain's Mate (E-9).

Description

Summary: Operates, maintains, and repairs fueling and lubricating oil systems including service stations, pumprooms, pumps, piping, valves, tanks, and protective piping systems; operates equipment associated with the fueling and defueling of aircraft aboard ship and ashore; operates motor driven fueling equipment; maintains fuel quality; trains, directs, and supervises firefighting crews and fire rescue teams; follows fuel-handling safety precautions. *ABF3:* Operates shipboard firefighting and life saving equipment; knows the characteristics of aviation fuel fires and the procedures and equipment required to fight them; performs maintenance record keeping; uses portable inertness analyzers; aligns valves in fuel piping systems for various operations; fuels and defuels aircraft; obtains samples of aviation fuels and tests for water and solid contaminants; knows the properties and hazards of aviation fuels; makes entries in pumproom logs and records; uses maintenance record cards; operates crash firefighting and mobile fueling and lubricating oil equipment; uses and maintains hand tools and portable power tools. *ABF2:* Able to perform the duties required for ABF3; replaces components of aviation fuel and lubricating oil systems; conducts tests on fuel filter elements; operates solid contamination detectors and water free detectors; inventories, orders, and accounts for spare repair parts; supervises crews in the fueling and defueling of aircraft. *ABF1:* Able to perform the duties required for ABF2; analyzes malfunctions of aviation-fuel system test equipment, aviation fuel and lubricating oil systems, and the nitrogen distribution system and determines corrective action; maintains fuel and lubricating oil inventory records; calibrates, adjusts, tests, cleans, and flushes aviation fuel and lubricating oil systems; knows the principles and maintenance requirements of centrifugal purifiers; trains subordinates in the operation of fuel systems and test equipment; prepares weekly maintenance schedules; maintains inventory and supply records. *ABFC:* Able to perform the duties required for ABF1; supervises inspection, operation, maintenance and repair of aviation fuel systems; monitors procedures for maintaining quality control; prepares quarterly maintenance schedules; responsible for materials and supplies for organizational unit; supervises inspection procedures to ensure that technical specifications and standards of workmanship are met; inspects and evaluates the operation of repaired or newly installed parts and components of aviation fuel systems and related equipment.

Recommendation, ABF3

In the lower-division baccalaureate/associate degree category, 3 semester hours in fire science and 1 in aircraft servicing (2/77).

Recommendation, ABF2

In the lower-division baccalaureate/associate degree category, 3 semester hours in fire science and 2 in aircraft servicing (2/77).

Recommendation, ABF1

In the lower-division baccalaureate/associate degree category, 3 semester hours in fire science, 3 in aircraft servicing, 2 in personnel supervision, 2 in shop management, and 2 in record keeping (2/77).

Recommendation, ABFC

In the lower-division baccalaureate/associate degree category, 3 semester hours in fire science, 3 in aircraft servicing, 3 in personnel supervision, 3 for field experience in management, 2 in shop management, and 2 in record keeping (2/77).

Aviation Boatswain's Mate, Aircraft Handling

ABH3
ABH2
ABH1
ABHC

Exhibit Dates: 6/71–Present.

Occupational Field: 6 (Aviation Ground Support).

Career Pattern

AN: Airman (E-3). *ABH3:* Aviation Boatswain's Mate, Aircraft Handling, Third Class (E-4). *ABH2:* Aviation Boatswain's Mate, Aircraft Handling, Second Class (E-5). *ABH1:* aviation Boatswain's Mate, Aircraft Handling First Class (E-6). *ABHC:* Chief Aviation Boatswain's Mate, Aircraft Handling (E-7). *ABCS:* Senior Chief Aviation Boatswain's Mate (E-8). *ABCM:* Master Chief Aviation Boatswain's Mate (E-9).

Description

Summary: Directs the movement and spotting of aircraft ashore and afloat; operates and maintains ground-handling equipment used for moving and hoisting aircraft; supervises securing of aircraft and equipment; performs crash rescue, firefighting, crash removal, and damage control; performs duties in connection with launching and recovering aircraft. *ABH3:* Carries out cockpit emergency entry procedures; knows procedures for rescuing personnel from crashed aircraft; operates damage-control equipment, lifesaving apparatus, and fire and elevator doors; supervises movement and spotting of aircraft ashore and afloat; secures aircraft and equipment; performs preventive operator maintenance on aircraft ground-handling equipment; operates and performs daily inspections on mobile crash-handling vehicles and equipment; installs aircraft hoisting slings involving emergency crash landings; computes safe working load for hoisting material; rigs deck equipment on shore-based arresting gears; operates aircraft cranes, elevator controls and related hangar/deck equipment; provides signals for the launching and recovery of helicopters; performs air terminal functions including storage of cargo, handling of passengers, aircrew, and aircraft services; completes maintenance records. *ABH2:* Able to perform the duties required for ABH3; directs part of a crew involved in repairing damage to flight and hangar decks; spots aircraft for catapult launching; tests hangar sprinkler systems; reads and interprets blueprints and drawings; inventories installed equipment and spare parts; orders spare parts and special tools; uses maintenance publications. *ABH1:* Able to perform the duties required for ABH2; directs a crew involved in repairing damaged flight and hangar decks; directs a unit of a deck, water, or land crash fire and rescue group; keeps logs pertaining to test data and equipment history; determines type and use of emergency equipment for removing crashed or damaged aircraft; prepares weekly schedules of preventive maintenance; maintains inventories and custody records; reeves cables on ship's boat and airplane crane; interprets aircraft spotting and respotting procedures; interprets procedures and equipment requirements for jettisoning aircraft and equipment. *ABHC:* Able to perform the duties required for ABH1; plans spotting of aircraft on flight and hangar decks; conducts prelaunch briefings of plane directors; directs the movement and spotting of aircraft during launching, landing, and respotting aboard aircraft carriers; prepares quarterly schedules of preventive maintenance; supervises inspection procedures for quality control; screens defective components for feasibility of repair; supervises storage, inventory, and replacement of spare parts and equipment; supervises the use and maintenance of publications and records.

Recommendation, ABH3

In the lower-division baccalaureate/associate degree category, 3 semester hours in fire science and 2 in aircraft servicing or air operations (2/77).

Recommendation, ABH2

In the lower-division baccalaureate/associate degree category, 3 semester hours in fire science and 2 in aircraft servicing or air operations (2/77).

Recommendation, ABH1

In the lower-division baccalaureate/associate degree category, 3 semester hours in fire science, 3 in aircraft servicing or air operations, 2 in personnel supervision, 2 in shop management, and 2 in record keeping, and additional credit in fire science on the basis of institutional evaluation (2/77).

Recommendation, ABHC

In the lower-division baccalaureate/associate degree category, 3 semester hours in fire science, 3 in aircraft servicing or air operations, 3 in personnel supervision, 3 for field experience in management, 2 in shop management, and 2 in record keeping, and additional credit in fire science on the basis of institutional evaluation (2/77).

Air Traffic Controller
(Air Controlman)

AC3
AC2
AC1
ACC
ACCS
ACCM

Exhibit Dates: 6/71–Present.

Occupational Field: 7 (Air Traffic Control).

Career Pattern

AN: Airman (E-3). *AC3:* Air Controlman Third Class (E-4). *AC2:* Air Controlman Second Class (E-5). *AC1:* Air Controlman First Class (E-6). *ACC:* Chief Air Controlman (E-7). *ACCS:* Senior Chief Air Controlman (E-8). *ACCM:* Master Chief Air Controlman (E-9).

Description

Summary: Performs air traffic control duties in air control towers, radar air traffic control facilities, and air operations offices; directs aircraft under VFR and IFR conditions. *AC3:* Interprets FAA regulations pertaining to air traffic control; directs air traffic under visual flight rules; records instrument flight rules clearances and relays to aircraft; issues instructions to vehicular traffic on the airfield and to aircraft on the ground relative to taxiing, parking, and related airport information; issues instructions to fire, crash, and rescue equipment for emergency landings, crashes, and accidents; identifies airfield markings and lighting systems; effects radar handoff; carries out nonradar control of aircraft experiencing emergencies in flight; interprets effect of weather and topography on the operating capability of radar, IFF, and related equipment; maintains flight data and status boards; processes flight plans; controls aircraft using precision approach radar; drafts and processes air traffic control data by teletype/interphone; operates communications equipment and airfield lighting sustems; obtains and relays weather information to aircraft and local weather facilities; checks calibration and adjusts radar indicators; identifies and monitors electronic aids to air navigation; uses standard aeronautical charts and publications used in air navigation. *AC2:* Able to perform the duties required for AC3; carries out radar control of aircraft experiencing emergencies in flight; assigns and evaluates IFF/SIF codes; controls aircraft using air surveillance radar; directs air traffic under instrument flight rules; locates, identifies, and tracks aircraft; interprets characteristics, purposes, and general operating procedures of landing approach sustems; applies minimums applicable to IFR approaches and departures and special VFR operations; maintains air traffic operations logs and records; orders charts and publications. *AC1:* Able to perform the duties required for AC2; supervises procedures used by control tower personnel; coordinates functions of radar air traffic control; applies holding pattern criteria; carries out training program for air traffic control facility personnel; maintains logs, publications, files, and records applicable to air traffic control facilities; inventories, requisitions, and accounts for air traffic control equipment. *ACC:* Able to perform the duties required for AC1; supervises radar air traffic control operations; supervises ATC facility flight checks; conducts emergency drills for air traffic control personnel; supervises the air traffic control facility training program; prepares air traffic control facility reports; interprets and disseminates FAA regulations governing the operations of air traffic control facilities; supervises the use, filing, and maintenance of publications, logs and records. *ACCS:* Able to perform the duties required for ACC; serves as air traffic control facility watch officer; coordinates ATC facility flight checks; reviews and verifies facility compliance with standards for approach zone criteria, obstruction lighting, and field marking; organizes, schedules, and evaluates training program; establishes required inspection procedures; coordinates maintenance of air traffic control facility equipment; manages, coordinates, and evaluates safety programs and emergency drills; prepares local directives and instructions; prepares correspondence; interviews, assigns, and evaluates personnel; plans and organizes runway use and noise abatement programs; submits air traffic control facility reports. *ACCM:* Able to perform the duties required for ACCS; prepares and interprets letters of agreement, directives, and memoranda applicable to air traffic control; develops operating budgets and monitors expenditures; reviews personnel, equipment, and material requirements and forecasts future needs; establishes goals and sets priorities; plans, organizes, implements, and controls air traffic control activities.

Recommendation, AC3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in air traffic control, 6 in air traffic management, and 3 in federal aviation regulations (2/77).

Recommendation, AC2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 9 semester hours in air traffic control, 6 in air traffic management, and 3 in federal aviation regulations (2/77).

Recommendation, AC1

In the vocational certificate category, the recommendation is the same as that for AC2. In the lower-division baccalaureate/associate degree category, 9 semester hours in air traffic control, 6 in air traffic management, 3 in federal aviation regulations, 1 in personnel supervision, and 1 in record keeping (2/77).

Recommendation, ACC

In the vocational certificate category, the recommendation is the same as that for AC2. In the lower-division baccalaureate/associate degree category, 9 semester hours in air traffic control, 6 in air traffic management, 3 in federal aviation regulations, 2 in aviation safety management, 2 in personnel supervision, and 2 in record keeping (2/77).

Recommendation, ACCS

In the vocational certificate category, the recommendation is the same as that for AC2. In the lower-division baccalaureate/associate degree category, 9 semester hours in air traffic control, 6 in air traffic management, 3 in federal aviation regulations, 3 in personnel supervision, 3 in aviation safety management, 2 in record keeping, 2 in aviation facility management, and 2 in technical report writing. In the upper-division baccalaureate category, 3 semester hours for field experience in management (2/77).

Recommendation, ACCM

In the vocational certificate category, the recommendation is the same as that for AC2. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for ACCS. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in organization and planning, and 3 in management problems (2/77).

NER-AD-001

Aviation Machinist's Mate, Senior Chief

ADCS

Exhibit Dates: 6/71–12/76.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

May progress from either ADJC, Chief Aviation Machinist's Mate, Jet Engine Mechanic (E-7), or ADRC, Chief Aviation Machinist's Mate, Reciprocating Engine Mechanic (E-7). *ADCS:* Senior Chief Aviation Machinist's Mate (E-8). *AFCM:* Master Chief Aircraft Maintenanceman (E-9).

Description

Manages, supervises, and administers powerplant work centers; plans safety program pertaining to aircraft power plants, related equipment, and work centers; interprets maintenance instructions and directives; ensures that established procedures are followed for conducting ground tests and inspections to maintain desired quality level; applies quality control concepts; evaluates repair requirements and requests technical assistance from contract representatives, as needed; determines capabilities, limitations, and reliability of aircraft power plants and related systems; administers long-range planned maintenance program; organizes, schedules, and evaluates training programs; prepares local directives and instructions; prepares correspondence.

Recommendation, ADCS

In the vocational certificate category, use the recommendation for either ADJ2 (Aviation Machinist's Mate, Jet Engine Mechanic, Second Class) in exhibit NER-ADJ-001 or ADR1 (Aviation Machinist's Mate, Reciprocating Engine Mechanic, First Class) in exhibit NER-ADR-001, as appropriate. In the lower-division baccalaureate/associate degree category, 3 semester hours in safety management and 3 in principles of administration; add the credit recommended for either ADJC (Chief Aviation Machinist's Mate, Jet Engine Mechanic) in exhibit NER-ADJ-001 or ADRC (Chief Aviation Machinist's Mate, Reciprocating Engine Mechanic) in exhibit NER-ADR-001, as appropriate. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in management problems, 3 in quality control, and 3 in human relations (2/77).

NER-AD-002

Aviation Machinist's Mate, Senior Chief

ADCS

Exhibit Dates: 1/77–Present.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

May progress from either ADC, Chief Aviation Machinist's Mate, (E-7), or ADRC, Chief Aviation Machinist's Mate, Reciprocating Engine Mechanic (E-7). *ADCS:* Senior Chief Aviation Machinist's

Mate (E-8). *AFCM:* Master Chief Aircraft Maintenanceman (E-9).

Description

(Note: See exhibit NER-AD-003 for AD3, AD2, AD1, and ADC.) Manages, supervises, and administers power plant work centers; plans safety program pertaining to aircraft power plants, related equipment, and work centers; interprets maintenance instructions and directives; ensures that established procedures are followed for conducting ground tests and inspections to maintain desired quality level; applies quality control concepts; evaluates repair requirements and requests technical assistance from contract representatives, as needed; determines capabilities, limitations, and reliability of aircraft power plants and related systems; administers long-range planned maintenance program; organizes, schedules, and evaluates training programs; prepares local directives and instructions; prepares correspondence.

Recommendation, ADCS

In the vocational certificate category, use the recommendation for either AD2 (Aviation Machinist's Mate, Second Class) in exhibit NER-AD-003 or ADR1 (Aviation Machinist's Mate, Reciprocating Engine Mechanic, First Class) in exhibit NER-ADR-001, as appropriate. In the lower-division baccalaureate/associate degree category, 3 semester hours in safety management and 3 in principles of administration; add the credit recommended for either ADC (Chief Aviation Machinist's Mate) in exhibit NER-AD-003, or ADRC (Chief Aviation Machinist's Mate, Reciprocating Engine Mechanic) in exhibit NER-ADR-001, as appropriate. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in management problems, 3 in quality control, and 3 in human relations (5/79).

NER-AD-003

AVIATION MACHINIST'S MATE

AD3
AD2
AD1
ADC

Exhibit Dates: 1/77–Present.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AD3:* Aviation Machinist's Mate, Third class (E-4). *AD2:* Aviation Machinist's Mate, Second Class (E-5). *AD1:* Aviation Machinist's Mate, First Class (E-6). *ADC:* Chief Aviation Machinist's Mate (E-7). *ADCS:* Senior Chief Aviation Machinist's Mate (E-8). *AFCM:* Master Chief Aircraft Maintenanceman (E-9).

Description

Summary: Maintains aircraft engines and related systems, including the induction, cooling, fuel, oil, compression, combustion, turbine, airborne gas-turbine compressors and exhaust systems; conducts engine and related systems inspections. *AD3:* Replaces gaskets, packings, and seals in fuel and oil systems; performs fuel and oil pressure adjustments; adjusts idle mixture and idle speed; cleans helicopter transmissions, gearboxes, rotor heads, drive shafts, and related parts; removes, inspects, and installs external fuel tanks; removes and installs ignitor plugs, spark plugs, starting ingition units, and leads of ignition and starting systems; inspects aircraft fuel systems and fuel samples for contamination; removes, cleans and replaces fuel and oil filters; uses technical publications; services aircraft on the flight line; performs operation operational of new or overhauled engines installed in aircraft; uses and maintains handtools. *AD2:* Able to perform the duties required for AD3; installs, removes, and operates jet calibration test units; diagnoses defects in fuel and oil systems; rigs and adjusts power controls, fuel selectors, and shutoff valve controls; inspects, removes, and installs helicopter tail rotor transmissions and rotary-wing heads and components; inspects compressors for proper axial and radial clearances; preserves and depreserves aircraft power plants and related systems; performs cylinder changes and valve clearance adjustments; installs and times magnetos; installs carburetors; installs and adjusts propeller controls; inspects, removes, and installs auxiliary power plant and components; performs periodic aircraft inspections; orders technical publications, directives, and manuals; is a first-line supervisor of a 3- to 7-person work group. *AD1:* Able to perform the duties required for AD2; troubleshoots malfunctions in power plant systems; removes and installs bladder and self-sealing fuel cells; inspects, removes, and installs helicopter intermediate gearboxes, tail rotors, swashplates and pitch link rods; supervises use of ground support equipment peculiar to power plants and related systems; orders power plant parts, equipment, material, and tools maintains inventory records; supervises training of subordinates maintaining power plants and related systems; supervises aircraft inspections; inspects installation and evaluates operation of repaired or newly installed power plants and power plant system components; prepares weekly schedules of preventive maintance; maintains shop files of technical publications, directives, and manuals; supervises medium-sized (10-30 persons) work centers; *ADC:* Able to perform the duties required for AD1; supervises use of engine service maintenance, and test equipment; determines types of information to be recorded in each section of the aircraft log book and aeronautical equipment service record; recommends changes to maintenance instructions; analyzes reports of aircraft engine malfunctions and discrepancies and determines corrective action; analyzes inspection procedures to ensure that specifications and standards of workmanship are met; supervises scheduling of work at power plant work centers; determines feasibility of local repairs to components of power plants and related systems; prepares quarterly schedules of preventive maintenance; orders, inventories, and accounts for quick-engine-change kits and spare engines; disposes of engines removed from service; estimates power plant spare parts, equipment, supplies, and manpower requirements.

Recommendation, AD3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 12 semester hours in aircraft engine maintenance and repair and 3 in aviation maintenance technology (5/79).

Recommendation, AD2

In the vocational certificate category, 15 semester hours in aircraft engine maintenance and repair and 6 in aviation maintenance technology. In the lower-division baccalaureate/associate degree category, 15 semester hours in aircraft engine maintenance and repair, 6 in aviation maintenance technology, and 2 personnel supervision (5/79).

Recommendation, AD1

In the vocational certificate category, the recommendation is the same as that for AD2. In the lower-division baccalaureate/associate degree category, 15 semester hours in aircraft engine maintenance and repair, 6 in aviation maintenance technology, 3 in personnel supervision, and 2 in maintenance management (5/79).

Recommendation, ADC

In the vocational certificate category, the recommendation is the same as that for AD2. In the lower-division baccalaureate/associate degree category, 15 semester hours in aircraft engine maintenance and repair, 6 in aviation maintenance technology, 3 in personnel supervision, 3 in maintenance management, and 3 in shop management. In the upper-division baccalaureate category, 3 semester hours for field experience in management (5/79).

NER-ADJ-001

AVIATION MACHINIST'S MATE, JET ENGINE MECHANIC

ADJ3
ADJ2
ADJ1
ADJC

Exhibit Dates: 6/71–12/76. (Effective 1/77, ADJ was discontinued and its functions were incorporated into AD, Aviation Machinist's Mate.)

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *ADJ3:* Aviation Machinist's Mate, Jet Engine Mechanic, Third Class (E-4). *ADJ2:* Aviation Machinist's Mate, Jet Engine Mechanic, Second Class (E-5). *ADJ1:* Aviation Machinist's Mate, Jet Engine Mechanic, First Class (E-6). *ADJC:* Chief Aviation Machinist's Mate, Jet Engine Mechanic (E-7). *ADCS:* Senior Chief Aviation Machinist's Mate (E-8). *AFCM:* Master Chief Aircraft Maintenanceman (E-9).

Description

Summary: Maintains aircraft jet engines and related systems, including the induction, cooling, fuel oil, compression, combustion, turbine, airborne gas-turbine compressors, and exhaust systems. *ADJ3:* Replaces gaskets, packings, and seals in fuel and oil systems; performs fuel and oil pressure adjustments; cleans helicopter transmissions, gearboxes, rotor heads, drive shafts, and related parts; removes, inspects, and installs external fuel tanks; removes and installs ignitor plugs, starting ignition units, and leads of ignition and starting systems; inspects aircraft fuel systems and fuel samples for contamination; uses technical publications; services aircraft on the flight lines; uses and maintains handtools. *ADJ2:* Able to perform the duties required for ADJ3; installs, removes, and operates jet calibration test units; diagnoses defects in fuel and oil systems; rigs and adjusts power controls, fuel selectors, and shutoff valve controls; inspects, removes, and installs helicopter tail transmissions, and rotary wing heads and components; inspects compressors for proper axial and radial clearances; preserves and depreserves aircraft power plants and related systems; performs periodic aircraft inspections; orders technical publications, directives, and manuals; is a first-line supervisor of a 3- to 7 person work group. *ADJ1:* Able to perform the duties required for ADJ2; troubleshoots malfunctions in power plant systems; removes and installs bladder and self-sealing fuel cells; inspects, removes, and installs helicopter intermediate gearboxes, tail rotors, swashplates and pitch link rods; supervises use of ground support equipment peculiar to power plants and related systems; orders power plant parts, equipment, material, and tools and maintains inventory records; supervises training of subordinates maintaining power plants and related systems; supervises aircraft inspections; inspects installation and evaluates operation of repaired or newly installed power plants and power plant system components; prepares weekly schedules of preventive maintenance; maintains shop files of technical publications, directives, and manuals; supervises medium-sized (10-30 persons) work centers. *ADJC:* Able to perform the duties required for ADJ1; supervises use of engine service, maintenance, and test equipment; determines types of information to be recorded in each section of the aircraft log book and aeronautical equipment service record; recommends changes to maintenance instructions; analyzes reports of aircraft malfunctions and discrepancies and determines corrective action; analyzes inspection procedures to ensure that technical specifications and standards of workmanship are met; supervises scheduling of work at power plant work centers; determines feasibility of local repairs to components of power plants and related systems; prepares quarterly schedules of preventive maintenance; orders, inventories, and accounts for quick-engine-change kits and spare engines; disposes of engines removed from services; estimates power plant spare parts, equipment, supplies, and manpower requirements.

Recommendation, ADJ3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 12 semester hours in aircraft engine (turbine) maintenance and repair and 3 in aviation maintenance technology (2/77).

Recommendation, ADJ2

In the vocational certificate category, 15 semester hours in aircraft engine (turbine) maintenance and repair and 6 aviation maintenance technology. In the lower-division baccalaureate/associate degree category, 15 semester hours in aircraft engine (turbine) maintenance and repair, 6 in aviation maintenance technology, and 2 in personnel supervision (2/77).

Recommendation, ADJ1

In the vocational certificate category, the recommendation is the same as that for ADJ2. In the lower-division baccalaureate/associate degree category, 15 semester hours in aircraft engine (turbine) maintenance and repair, 6 in aviation maintenance technology, 3 in personnel supervision, and 2 in maintenance management (2/77).

Recommendation, ADJC

In the vocational certificate category, the recommendation is the same as that for ADJ2. In the lower-division baccalaureate/associate degree category, 15 semester hours in aircraft engine (turbine) maintenance and repair, 6 in aviation maintenance technology, 3 in personnel supervision, 3 in maintenance management, and 3 in shop management. In the upper-division baccalaureate category, 3 semester hours for field experience in management (2/77).

NER-ADR-001

AVIATION MACHINIST'S MATE,
RECIPROCATING ENGINE MECHANIC

ADR3
ADR2
ADR1
ADRC

Exhibit Dates: 6/71-6/80. (Effective 7/80, ADR was discontinued and its functions were incorporated into AD, Aviation Machinist's Mate.)

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *ADR3:* Aviation Machinist's Mate, Reciprocating Engine Mechanic, Third Class (E-4). *ADR2:* Aviation Machinist's Mate, Reciprocating Engine Mechanic, Second Class (E-5). *ADR1:* Aviation Machinist's Mate, Reciprocating Engine Mechanic, First Class (E-6). *ADRC:* Chief Aviation Machinist's Mate, Reciprocating Engine Mechanic (E-7). *ADCS:* Senior Chief Aviation Machinist's Mate (E-8). *AFCM:* Master Chief Aircraft Maintenanceman (E-9).

Description

Summary: Inspects and maintains aricraft reciprocating engines and related systems. *ADR3:* Performs idle mixture, idle speed, and fuel and oil pressure adjustments; inspects, removes, and installs spark plugs, leads, and coils; replaces gaskets, packings and seals in fuel and oil systems; cleans helicopter transmissions, gearboxes, rotor heads, drive shafts, and related parts; removes, inspects, and installs external fuel tanks; inspects aircraft fuel systems and fuel samples for contamination; performs fuel integrity checks on aircraft fuel systems; uses and maintains handtools; services aircraft on the flight line; uses technical publications. *ADR2:* Able to perform the duties required for ADR3; locates and identifies defects in fuel and oil systems; measures and adjusts engine valve clearance; performs compression tests; performs cylinder changes; installs and times magnetos, distributors, and carburetors; rigs and adjusts power controls, fuel selectors, and shutoff valve controls; removes, installs, and adjusts propeller governors; removes, cleans, and installs propeller assemblies; inspects, removes, and installs helicopter tail rotor transmissions; performs continuity and insulation tests on aircraft engine ignition systems, using electrical test equipment; orders technical publications, directives, and manuals; performs periodic aircraft inspections; applies corrosion prevention and preservation materials; preserves and depreserves aircraft power plants and related systems. *ADR1:* Able to perform the duties required for ADR2; troubleshoots propeller systems; inspects and balances aircraft propeller assemblies; removes and installs bladder and self-sealing fuel cells; inspects, removes, and installs helicopter transmissions and related components, intermediate gearboxes, tail rotors, swashplate and pitch link rods; uses engine analyzers to troubleshoot reciprocating engines; uses schematic diagrams and drawings to troubleshoot power plant systems; maintains shop files of technical publications, directives, and manuals; supervises the training of subordinates involved in maintaining power plants and related systems; supervises aircraft inspections; supervises power plant and related system component build-up, removal, and installations; inspects installation and evaluates operation of repaired or newly installed power plants and power plant system components; prepares weekly schedules of preventive maintenance; orders power plant parts, equipment, materials, and tools and maintains inventory records. *ADRC:* Able to perform the duties required for ADR1; supervises balancing of propeller assemblies; supervises use of engine service, maintenance, and test equipment; recommends changes in maintenance instructions; maintains work center registers and prepares related reports; determines types of information to be recorded in each section of the aircraft log book and aeronautical equipment service record; analyzes reports of aircraft engine malfunctions and discrepancies and determines corrective action; analyzes inspection precedures to ensure that technical specifications and standard of workmanship are met; supervises scheduling of work at work centers; determines feasibility of local repairs to components of power plants and related systems; prepares quarterly schedules of preventive maintenance; orders, inventories, and accounts for quick-engine-change kits and spare engine; disposes of engines removed from service; estimates power plant spare parts, equipment, supplies, and manpower requirements.

Recommendation, ADR3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 10 semester hours in aircraft engine (reciprocating) maintenance and repair and 2 in aviation maintenance technology (2/77).

Recommendation, ADR2

In the vocational certificate category, 12 semester hours in aircraft engine (reciprocating) maintenance and repair and 4 in aviation maintenance technology. In the lower-division baccalaureate/associate degree category, 12 semester hours in aircraft engine (reciprocating) maintenance and repair, 4 in aviation maintenance technology, and 2 in personnel supervision (2/77).

Recommendation, ADR1

In the vocational certificate category, 15 semester hours in aircraft engine (reciprocating) maintenance and repair and 6 in aviation maintenance technology. In the lower-division baccalaureate/associate degree category, 15 semester hours in aircraft engine (reciprocating) maintenance and repair, 6 in aviation maintenance technology, 3 in personnel supervision, and 2 in maintenance management (2/77).

Recommendation, ADRC

In the vocational certificate category, the recommendation is the same as that for ADR1. In the lower-division baccalaureate/associate degree category, 15 semester hours in aircraft engine (reciprocating) maintenance and repair, 6 in aviation maintenance technology, 3 in personnel supervision, 3 in maintenance management, and 3 in shop management. In the upper-division baccalaureate category, 3 semester hours for field experience in management (2/77).

AE3
AE2
AE1
AEC
AECS

Exhibit Dates: 6/71–12/85.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AE3:* Aviation Electrician's Mate Third Class (E-4). *AE2:* Aviation Electrician's Mate Second Class (E-5). *AE1:* Aviation Electrician's Mate First Class (E-6). *AEC:* Chief Aviation Electrician's Mate (E-7). *AECS:* Senior Chief Aviation Electrician's Mate (E-8). *AVCM:* Master Chief Avionics Technician (E-9).

Description

Summary: Maintains and repairs lighting, control, and power system on aircraft, including: power generation, conversion, and distribution systems; aircraft batteries; interior and exterior lighting; electrical control of aircraft systems, including hydraulic, landing gear, flight control, utility, and power plant and related systems; instrument systems, including aircraft engine, flight, and other indicating and warning systems; automatic flight control and stabilization systems; aircraft compass systems; attitude reference systems; and inertial navigation systems. NOTE: Duty assignments have been O-Level (troubleshooting and replacing modular systems on aircraft) or I-Level (disassembling, repairing, and bench-testing modules); persons assigned the AE rating receive equivalent training and must pass the same advancement examination, regardless of whether duty assignments have been O-Level or I-Level or both. *AE3:* Assists in troubleshooting and repairing electrical and instrument systems on aircraft; follows standard check-out procedures to locate and repair electrical malfunctions; reads schematics and block diagrams; uses volt-ohm-milliammeter; completes maintenance forms and inventories parts and supplies; performs avionics corrosion control. *AE2:* Able to perform the duties required for AE3; performs troubleshooting and repair tasks not covered in standard service manuals; knows how to use oscilloscope, signal generators, megger, and frequency counters; may have attended short training programs in troubleshooting and repairing specialized equipment; serves as crew leader, supervising two or three persons on a job; interprets technical directives; maintains technical library and inventory and training records; perform periodic aircraft inspections. *AE1:* Able to perform the duties required for AE2; serves as shift supervisor, supervising 8-9 persons; diagnoses nonroutine malfunctions and demonstrates repair techniques; interprets electrical and electronic schematics and drawings and makes simplified versions; conducts on-the-job training program; inspects and approves completed work assignments; prepares weekly schedules of preventive maintenance; supervises and directs aircraft inspections; directs installation of aircraft electrical changes. *AEC:* Able to perform the duties required for AE1; serves as shop supervisor, supervising 15-20 persons; plans and implements safety instruction and inspection programs; evaluates aircraft electrical systems and equipment test procedures and recommends improvements; prepares maintenance duty schedules; prepares periodic or recurring reports; supervises the use and file maintenance of publications, logs, and records; interprets technical publications pertaining to aircraft electrical systems and test equipment; prepares quarterly schedules of preventive maintenance; supervises quality control program; provides technical assistance in aircraft accident investigations. *AECS:* Able to perform the duties required for AEC; oversees three shops; serves as liaison with other Navy units; administers quality control programs; prepares directives, instructions, and correspondence; advises on personnel, production, material, and training requirements; administers long-range planned maintenance program and training programs and evaluates their effectiveness; recommends changes in methods and techniques to promote safety and operational readiness.

Recommendation, AE3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in beginning electrical/electronics laboratory and 12 in aircraft electrical maintenance, and additional credit in aircraft electrical maintenance on the basis of institutional evaluation. Qualified to enter an apprentice training program in any electrical trade (2/77).

Recommendation, AE2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in beginning electrical/electronics laboratory, 12 in aircraft electrical maintenance, and 2 in introduction to AC/DC theory, and additional credit in aircraft electrical maintenance on the basis of institutional evaluation. Advanced standing in an electrical meter tester, electrical instrument repairman, or aviation electrical mechanic apprentice training program, or in an apprentice training program for any electrical trade, on the basis of employer or trade association performance examination (2/77).

Recommendation, AE1

In the vocational certificate category, 3 semester hours in beginning electrical/electronics laboratory, 12 in aircraft electrical maintenance, and 3 in introduction to AC/DC theory, and additional credit in aircraft electrical maintenance on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in beginning electrical/electronics laboratory, 12 in aircraft electrical maintenance, 3 in introduction to AC/DC theory, 2 in personnel supervision, and 2 in maintenance management, and additional credit in aircraft electrical maintenance, on the basis of institutional evaluation. Advanced standing in an electrical meter tester, electrical instrument repairman, or aviation electrical mechanic apprentice training program, or in an apprentice training program for any electrical trade, on the basis of employer or trade association performance examination (2/77).

Recommendation, AEC

In the vocational certificate category, the recommendation is the same as that for AE1. In the lower-division baccalaureate/associate degree category, 3 semester hours in beginning electrical/electronics laboratory, 12 in aircraft electrical maintenance, 3 in introduction to AC/DC theory, 3 in personnel supervision, 3 in maintenance management, and 3 in shop management, and additional credit in aircraft electrical maintenance on the basis of institutional evaluation. Advanced standing in an electrical meter tester, electrical instrument repairman, or aviation electrical mechanic apprentice training program, or in an apprentice training program for any electrical trade, on the basis of employer or trade association performance examination (2/77).

Recommendation, AECS

In the vocational certificate category, the recommendation is the same as that for AE1. In the lower-division baccalaureate/associate degree category, 3 semester hours in beginning electrical/electronics laboratory, 12 in aircraft electrical maintenance, 3 in introduction to AC/DC theory, 3 in personnel supervision, 3 in maintenance management, 3 in shop management, 3 in safety management, 3 in management electives, and 2 in technical writing, and additional credit in aircraft electrical maintenance on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for a practicum in management and additional credit in human relations and quality control on the basis of institutional evaluation. Advanced standing in an electrical meter tester, electrical instrument repairman, or aviation electrical mechanic appprentice training program, or in an apprentice training program for any electrical trade, on the basis of employer or trade association performance examination (2/77).

In the upper-division baccalaureate category, 2 semester hours in industrial management, 2 in shop management, and 3 for field experience in management (6/87).

Recommendation, AECM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for AECS. In the upper-division baccalaureate category, 2 semester hours in industrial management, 3 in shop management, 6 for field experience in management, and 3 in management problems (6/87).

NER-AF-001

AIRCRAFT MAINTENANCEMAN, MASTER CHIEF

AFCM

Exhibit Dates: 6/71–Present.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

May progress to AFCM, Master Chief Aircraft Maintenanceman (E-9), from either ADCS, Senior Chief Aviation Machinist's Mate (E-8), OR AMCS (Senior Chief Aviation Structural Mechanic) (E-8).

Description

Able to perform the duties required for either ADSC (Senior Chief Aviation Machinist's Mate) or AMCS (Senior Chief Aviation Structural Mechanic); assists in statistical analyses of aircraft accident reports; formulates guidelines for safety inspections and instructions; plans, organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; forecasts future requirements; plans and initiates actions to satisfy requirements; establishes goals and priorities; reviews and evaluates personnel, equipment, and material requirements; administers inventory, requisition, receipt, and transfer procedures for aircraft and components; monitors implementation of preventive maintenance program; serves as liaison with other Navy units; reviews and evaluates inspection records, quality control reports, and flight records to assure that proper maintenance procedures are followed; prepares staff studies and reports; develops operating budgets and monitors expenditures.

Recommendation

Use the recommendation for either ADCS (Senior Chief Aviation Machinist's Mate) in exhibit NER-AD-001 or AMCS (Senior Chief Aviation Structural Mechanic) in exhibit NER-AM-001, as appropriate, and additional credit as follows: In the vocational certificate category, 3 semester hours in technical writing. In the lower-division baccalaureate/associate degree category, 3 semester hours in technical writing and 3 in management electives. In the upper-division baccalaureate category, 6 semester hours for a practicum in management, 3 in management problems, and 3 in human relations, and additional credit in quality control on the basis of institutional evaluation (2/77).

NER-AG-001

AEROGRAPHER'S MATE

AG3
AG2
AG1
AGC
AGCS
AGCM

Exhibit Dates: 6/71–Present.

Occupational Field: 23 (Meteorology).

Career Pattern

AN: Airman (E-3). *AG3:* Aerographer's Mate Third Class (E-4). *AG2:* Aerographer's Mate Second Class (E-5). *AG1:* Aerographer's Mate First Class (E-6). *AGC:* Chief Aerographer's Mate (E-7). *AGCS:* Senior Chief Aerographer's Mate (E-8). *AGCM:* Master Chief Aerographer's Mate (E-9).

Description

Summary: Observes, collects, records and analyzes meteorological and oceanographic data; makes visual and instrumental observations of weather and sea conditions. *AG3:* Identifies the types and knows the purposes of instruments and equipment used by the weather service; operates and performs routine checks and operator preventive maintenance for meteorological and oceanographic equipment and instruments; observes, collects, records, and prepares for transmission surface meteorological elements; plots synoptic surface charts using aviation observations, constant pressure charts, data from environmental warnings and advisories, and skew T, Log P diagrams; determines tracking data from meteorological satellite predict messages; applies grid to meterological satellite pictures; operates radio receivers, facsimile and teletype equipment; uses publications and directives related to weather communications. *AG2:* Able to perform the duties required for *AG3:*: checks surface observations for accuracy prior to transmission; applies meteorological fundamentals of primary, secondary, and tertiary circulations of the earth's atmosphere and of types of weather associated with air masses, frontal systems, and anti-cyclonic systems in drawing weather charts; identifies physical properties of sea water and major current systems and water masses of the ocean; constructs radiological fallout plot from upper wind data; draws synoptic surface charts showing frontal systems, isobars, isallobars, and pressure centers; draws constant-pressure charts showing isohypses, troughs, ridges, and height centers; interprets oceanographic charts; computes astronomical and tidal data; maintains directives, publications, and climatological records; orders, inventories, and disposes of meteorological and oceanographic equipment, instruments, and supplies. *AG1:* Able to perform the duties required for AG2, prepares short-range (up to 24 hours) environmental forecasts; identifies and classifies weather echoes on radar; computes atmospheric refractive index; analyzes and uses skew T, Log P diagrams in preparing environmental forecasts; prepares and presents weather data for local and extended flights; identifies charts and related products from digital computers; performs calibrations and adjustments to meteorological and oceanographic equipment (excluding electronic components). *AGC:* Able to perform the duties required for AG1; interprets ocean thermal structure and factors affecting underwater transmission of sound, wind wave, swell generation, and propagation in preparing oceanographic forecasts; analyzes and uses constant pressure charts, streamline charts, surface charts, satellite data, and sea condition charts in preparing environmental forecasts; constructs and verifies prognostic surface and constant pressure charts; prepares enviromental warnings and advisories; assigns tasks to personnel assigned to weather service units; trains subordinates in correct operating and maintenance procedures for assigned equipment. *AGCS:* Able to perform the duties required for AGC; evaluates recent meteorological and oceanographic developments for integration into local routines; provides climatological, meteorological, and oceanographic data at planning-level meetings; organizes, schedules, and evaluates training programs; administers technical publications library; prepares directives and instructions for attaining organizational objectives and improving operations; prepares correspondence; establishes and implements a program for interviewing, assigning, and evaluating personnel. *AGCM:* Able to perform the duties required for AGCS; prepares statistical analyses of climatological data and provides information concerning its uses, capabilities, and limitations; reviews personnel, equipment and material requirements and forecasts future requirements; establishes goals and set priorities; develops operating budgets and monitors expenditures.

Recommendation, AG3

In the lower-division baccalaureate/associate degree category, 2 semester hours in

meteorology and 2 in meteorology laboratory (2/77).

Recommendation, AG2

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology, 3 in atmospheric environment, 2 in meteorology laboratory, and 1 in oceanography (2/77).

Recommendation, AG1

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology, 3 in atmospheric environment, 3 in meteorology laboratory, 2 in climatology, and 1 in oceanography. In the upper-division baccalaureate category, 1 semester hour in atmospheric physics (2/77).

Recommendation, AGC

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology, 3 in atmospheric environment, 3 in meteorology laboratory, 3 in climatology, 2 in oceanography, and 1 in personnel supervision. In the upper-division baccalaureate category, 1 semester hour in atmospheric physics (2/77).

Recommendation, AGCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology, 3 in atmospheric environment, 3 in meteorology laboratory, 3 in climatology, 3 in oceanography, and 3 in personnel supervision. In the upper-division baccalaureate category, 1 semester hour in atmospheric physics and 1 in measurements and data systems (2/77).

Recommendation, AGCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology, 3 in atmospheric environment, 3 in meteorology laboratory, 3 in climatology, 3 in oceanography, 3 in personnel supervision, and 3 in principles of administration. In the upper-division baccalaureate category, 1 semester hour in atmospheric physics, 2 in measurement and data systems, 3 in weather station management, and 3 in management problems (2/77).

NER-AK-001

AVIATION STOREKEEPER

AK3
AK2
AK1
AKC
AKCS
AKCM

Exhibit Dates: 6/71–Present.

Occupational Field: 16 (Logistics).

Career Pattern

AN: Airman (E-3). *AK3:* Aviation Storekeeper Third Class (E-4). *AK2:* Aviation Storekeeper Second Class (E-5). *AK1:* Aviation Storekeeper First Class (E-6). *AKC:* Chief Aviation Storekeeper (E-7). *AKCS:* Senior Chief Aviation Storekeeper (E-8). *AKCM:* Master Chief Aviation Storekeeper (E-9).

Description

Summary: Receives, identifies, stores, and issues aviation supplies, spare parts, and equipment; maintains stock control records; conducts inventories. *AK3:* Applies automated data processing (ADP) supply procedures; operates various office machines; receives, verifies for quantity and condition, and acknowledges the receipt of materials; issues materials; maintains receipt control records; prepares and submits requisition, purchase, and transportation documents; types (at 20 words per minute), routes, and files correspondence, messages and forms; operates material-handling equipment and microfiche/microfilm reader equipment. *AK2:* Able to perform the duties required for AK3; drafts correspondence and messages; monitors day-to-day status of funds and prepares rough periodic financial reports; maintains equipage inventories and records; conducts inventories; carries out procedures for maintaining, expediting, and processing components awaiting parts; applies procedures for control and accounting of classified equipment; maintains files of publications. *AK1:* Able to perform the duties required for AK2; reviews computer output for accuracy of data content; insures compliance with procedures for records disposal; establishes and maintains tickler files and a technical library; accounts for damaged, overage, and short shipments and deliveries; develops storage plans; prepares correspondence and messages. *AKC:* Able to perform the duties required for AK1; monitors shipboard uniform automated data processing system procedures applicable to supply department functions; plans the layout of offices, storerooms, and issue rooms to facilitate efficient operations; organizes and administers elements of aviation supply activities; prepares lists of material requirements; develops and implements inventory procedures. *AKCS:* Able to perform the duties required for AKC; prepares operating and safety instructions; applies procedures for the establishment, control, and supervision of supply operations; prepares local directives and instructions; reviews and evaluates personnel; organizes on-the-job training program. *AKCM:* Able to perform the duties required for AKCS; monitors conformance to safety and maintenance regulations; plans organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; supervises the administrative, control, material, and fiscal functions of an aviation supply department; forecasts future requirements; plans and initiates actions to satisfy requirements; establishes goals and priorities; evaluates supply procedures and personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, AK3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in office machines and 1 in office procedures (2/77).

Recommendation, AK2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in office machines, 2 in record keeping, and 1 in office procedures (2/77).

Recommendation, AK1

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in record keeping, 2 in office machines, and 1 in office procedures (2/77).

Recommendation, AKC

In the vocational certificate category, 3 semester hours in record keeping, 2 in office machines, 2 in office management, and 1 in office procedures. In the lower-division baccalaureate/associate degree category, 3 semester hours in record keeping, 2 in office machines, 2 in office management, 1 in office procedures, and 1 in personnel supervision. In the upper-division baccalaureate category, credit for a practicum in management on the basis of institutional evaluation (2/77).

Recommendation, AKCS

In the vocational certificate category, the recommendation is the same as that for AKC. In the lower-division baccalaureate/associate degree category, 3 semester hours in record keeping, 3 in management electives, 2 in office machines, 2 in office management, 2 in personnel supervision, and 1 in office procedures. In the upper-division baccalaureate category, 3 semester hours for a practicum in management (2/77).

Recommendation, AKCM

In the vocational certificate category, the recommendation is the same as that for AKC. In the lower-division baccalaureate/associate degree category, 3 semester hours in record keeping, 3 in management electives, 3 in personnel supervision, 3 in office management, 3 in office procedures, and 2 in office machines. In the upper-division baccalaureate category, 3 semester hours for a practicum in management and 3 in management problems, and additional credit in personnel management and in human relations on the basis of institutional evaluation (2/77).

NER-AM-001

AVIATION STRUCTURAL MECHANIC,
SENIOR CHIEF

AMCS

Exhibit Dates: 6/71–Present.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

May progress from AMHC, Chief Aviation Structural Mechanic, Hydraulics (E-7), or AMEC, Chief Aviation Structural Mechanic, Safety Equipment (E-7), or AMSC, Chief Aviation Structural Mechanic, Structures (E-7). *AMCS:* Senior Chief Aviation Structural Mechanic (E-8). *AFCM:* Master Chief Aircraft Maintenanceman (E-9).

Description

Manages, supervises, and administers airframe work centers of varying sizes; supervises aviation structural mechanic in the inspection, maintenance, and repair of aircraft, airframes, and hydraulic and pneumatic systems; plans safety program pertaining to airframes, related equipment, and assigned work areas; evaluates requirements and requests technical assistance from contractor representatives, as needed; prepares local directives and instructions; prepares correspondence; organizes, schedules, and evaluates training programs; monitors the overhaul and rework of airframes, structural components, and related systems; applies concepts; objectives, and functions of quality control; administers long-range, planned maintenance program; applies material control practices and supply management policies.

Recommendation

In the vocational certificate category, use the recommendation for AMH2 (Aviation Structural Mechanic, Hydraulics, Second Class), in exhibit NER-AMH-001, or AME1 (Aviation Structural Mechanic, Safety Equipment, First Class) in exhibit NER-AME-001, or AMS1 (Aviation Structural Mechanic, Structural, First Class) in exhibit NER-AMS-001, as appropriate. In the lower-division baccalaureate/associate degree category, 3 semester hours in safety management and 3 in principles of administration; add the 30 semester hours recommended for AMHC (Chief Aviation Structural Mechanic, Hydraulics) in exhibit NER-AMH-001, or AMEC (Chief Aviation Structural Mechanic, Safety Equipment) in exhibit NER-AME-001, or AMSC (Chief Aviation Structural Mechanic, Structural) in exhibit NER-AMS-001, as appropriate. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in management problems, 3 in quality control, and 3 in human relations (2/77).

NER-AME-001

AVIATION STRUCTURAL MECHANIC,
SAFETY EQUIPMENT

AME3
AME2
AME1
AMEC

Exhibit Dates: 6/71–Present.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AME3:* Aviation Structural Mechanic, Safety Equipment, Third Class (E-4). *AME2:* Aviation Structural Mechanic, Safety Equipment, Second Class (E-5). *AME1:* Aviation Structural Mechanic, Safety Equipment, First Class (E-6). *AMEC:* Chief Aviation Structural Mechanic, Safety Equipment (E-7). *AMCS:* Senior Chief Aviation Structural Mechanic (E-8). *AFCM:* Master Chief Aircraft Maintenanceman (E-9).

Description

Summary: Maintains safety belts, shoulder harnesses, and integrated flight harnesses, inertia reels, seat and canopy ejection systems, gaseous and liquid oxygen systems, life raft ejection systems, fire-extinguishing systems (excluding fire detection systems), emergency egress systems, air-conditioning, heating, and cockpit pressurization systems, and anti-G systems; replenishes liquid oxygen and gaseous systems; removes, inspects, installs, and rigs egress systems; performs daily preflight, postflight, and other periodic inspections. *AME3:* Knows operating principles of aircraft oxygen systems; services aircraft with liquid and gaseous oxygen, using oxygen transfer trailers or direct filling equipment; purges aircraft oxygen systems; removes and installs aircraft oxygen systems, cockpit canopies, canopy seals, safety belts, automatic lap belts, shoulder harnesses, and inertia reels; adjusts actuating controls and mechanisms; replaces defective indicators and controls; removes and installs temperature and pressure control units and components of cooling system equipment; replaces components of fixed fire-extinguishing systems; bleeds air defrosting, anti-ice, and rain removal systems; uses schematic diagrams, drawings, and charts; uses and maintains handtools; uses technical publications. *AME2:* Able to perform the duties required for AME3; assembles and installs equipment; performs periodic aircraft inspections; assists with inventorying equipment; orders parts, equipment, material, and tools; knows operating principles of air-conditioning, pressurization, and utility systems; removes and installs ejection seats and components; adjusts ejection seat and canopy components; performs ground checks on oxygen systems; is a first-line supervisor of 4- to 7-person work group. *AME1:* Able to perform the duties required for AME2; operates vapor cycle system and portable testers for cabin pressurization; troubleshoots and repairs malfunctioning equipment; trains subordinates on operation, maintenance, and repair of aircraft environmental system and egress system; orders and maintains shop files of technical publications, directives, and manuals; adjusts cockpit canopy mechanisms and linkages; tests cockpits and cabins for pressure tightness, leaks, proper pressure, and temperature control; inspects, tests, and adjusts firing mechanisms in ejection seats, lap belts, canopies, and other cartridge-actuated emergency escape systems; analyzes air-conditioning, pressurization, and utility systems malfunctions, isolates defective components, and determines corrective action; inspects installation and evaluates operation of repaired or newly installed parts and components; supervises inspections; prepares weekly schedules of preventive maintenance. *AMEC:* Able to perform the duties required for AME1; interprets technical publications and directives; plans, organizes, and lays out work centers; maintains work center registers and prepares local reports; monitors inspection procedures to ensure that technical specifications and standards of workmanship are met; prepares quarterly schedules of preventive maintenance; maintains work center inventory records; estimates spare parts, supplies, equipment, and manpower requirements.

Recommendation, AME3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 10 semester hours in aircraft safety and warning systems, and 3 in aviation maintenance technology (2/77).

Recommendation, AME2

In the vocational certificate category, 12 semester hours in aircraft safety and warning systems and 4 in aviation maintenance technology. In the lower-division baccalaureate/associate degree category, 12 semester hours in aircraft safety and warning systems, 4 in aviation maintenance technology, and 2 in personnel supervision (2/77).

Recommendation, AME1

In the vocational certificate category, 15 semester hours in aircraft safety and warning systems and 6 in aviation maintenance technology. In the lower-division baccalaureate/associate degree category, 15 semester hours in aircraft safety and warning systems, 6 in aviation maintenance technology, 3 in personnel supervision, and 2 in maintenance management (2/77).

Recommendation, AMEC

In the vocational certificate category, the recommendation is the same as that for AME1. In the lower-division baccalaureate/associate degree category, 15 semester hours in aircraft safety and warning systems, 6 in aviation maintenance technology, 3 in personnel supervision, 3 in maintenance management, and 3 in shop management. In the upper-division baccalaureate category, 3 semester hours for field experience in management (2/77).

NER-AMH-001

AVIATION STRUCTURAL MECHANIC,
HYDRAULICS

AMH3
AMH2
AMH1
AMHC

Exhibit Dates: 6/71–Present.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AMH3:* Aviation Structural Mechanic, Hydraulics, Third Class (E-4). *AHM2:* Aviation Structural Mechanic, Hydraulics, Second Class (E-5). *AMH1:* Aviation Structural Mechanic, Hydraulics, First Class (E-6). *AHMC:* Chief Aviation Structural Mechanic, Hydraulics (E-7). *AMCS:* Senior Chief Aviation Structural Mechanic (E-8). *AFCM:* Master Chief Aircraft Maintenanceman (E-9).

Description

Summary: Maintains hydraulic systems, including main and auxiliary power systems and unit actuating subsystems, landing gear (excluding wheels and tires), brakes, and related pneumatic systems; inspects, removes, and replaces components of hydraulic systems; perform preflight, postflight, and other periodic aircraft inspections. *AMH3:* Removes and installs check valves, relief valves, sequence valves, restrictors, actuating cylinders, and emergency air bottles; uses schematic diagrams, drawings, and charts to trace systems; fabricates, fits, and tests rigid tubing and flexible hose assemblies; identifies types and designations of fuel, oil hydraulic fluids, and lubricants used in aircraft; operates ground support equipment; uses and maintains handtools; bleeds hydraulic systems; adjusts brakes and replaces lining and pucks; replaces gaskets, packings, and wipers in hydraulic components; recognizes the effects of high noise levels on the human body. *AMH2:* Able to perform the duties required for AMH3; is a first-line supervisor of a 4- to 7 person work group; adjusts and replaces hydraulic and pneumatic components of flight control systems; bleeds hydraulic power system and subsystem; removes and installs pumps, motors, pressure regulators, and recoil struts; checks, tests, adjusts, and repairs hydraulic and pneumatic components; replaces master cylinders, power brake valves, and emergency brake system components; troubleshoots malfunctions of landing gear controls, control valves, shock and recoil struts, and shimmy dampers; orders aircraft parts, tools, equipment, and material; adjusts landing gear controls, locks, doors, microswitches, and mechanical linkages. *AMH1:* Able to perform the duties required for AMH2; supervises 10- to 15-person work groups; trains personnel on aircraft hydraulic/pneumatic systems; supervises landing gear drop checks; maintains shop files of technical publications, directives, and manuals; inspects installation and evaluates operation of newly installed parts and components; supervises aircraft inspections; prepares weekly schedules of preventive maintenance; adjusts nose wheel steering mechanisms and control and actuating linkages and mechanisms. *AHMC:* Able to perform the duties required for AMH1; analyzes malfunctions of flight control systems and determines corrective action; determines the need and method for decontamination of a hydraulic system; plans and organizes work centers; provides technical assistance; prepares reports; monitors inspection procedures to ensure that technical specifications and standards of workmanship are met; prepares quarterly preventive maintenance schedules; maintains work center inventory records; estimates spare parts, supplies, equipment, and manpower requirements; diagnoses aircraft irregular flight characteristics and determines corrective action.

Recommendation, AMH3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 10 semester hours in hydraulics systems repair and 3 in aviation maintenance technology (2/77).

Recommendation, AMH2

In the vocational certificate category, 15 semester hours in hydraulics systems repair and 6 in aviation maintenance technology. In the lower-division baccalaureate/associate degree category, 15 semester hours in hydraulics systems repair, 6 in aviation maintenance technology, and 2 in personnel supervision (2/77).

Recommendation, AMH1

In the vocational certificate category, the recommendation is the same as that for AMH2. In the lower-division baccalaureate/associate degree category, 15 semester hours in hydraulics systems repair, 6 in aviation maintenance technology, 3 in personnel supervision, and 3 in maintenance management (2/77).

Recommendation, AMHC

In the vocational certificate category, the recommendation is the same as that for AMH2. In the lower-division baccalaureate/associate degree category, 15 semester hours in hydraulics systems repair, 6 in aviation maintenance technology, 3 in personnel supervision, 3 in maintenance management, and 3 in shop management. In the upper-division baccalaureate category, 3 semester hours for field experience in management (2/77).

AN: Airman (E-3). *AMS3:* Aviation Structural Mechanic, Structures, Third Class (E-4). *AMS2:* Aviation Structural Mechanic, Structures, Second Class (E-5). *AMS1:* Aviation Structural Mechanic, Structures, First Class (E-6). *AMSC:* Chief Aviation Structural Mechanic, Structures (E-7). *AMCS:* Senior Chief Aviation Structural Mechanic (E-8). *AFCM:* Master Chief Aircraft Maintenanceman (E-9).

Description

Summary: Maintains aircraft fuselages, wings, fixed and moveable surfaces, airfoils, empennages, seats (except ejection seats), wheels, tires, controls, and mechanisms; installs and rigs flight controls; fabricates and assembles metal parts and makes minor repairs to aircraft skin; installs rivets and metal fasteners; paints; performs dye penetrant inspections; performs daily preflight, postflight, and other periodic aircraft inspections. *AMS3:* Uses schematic diagrams, drawings, and charts; prepares layout patterns and templates for metal work; fabricates, fits, and tests rigid tubing and flexible hose assemblies; uses technical publications; uses and maintains handtools; performs hardness tests; detects corrosion and assists in correction and prevention of it; removes corrosion products from aircraft surfaces and stuctural members; prepares, primes, and paints aircraft surfaces; applies identification markings; builds up wheels and tires. *AMS2:* Able to perform the duties required for AMS3; assembles and installs equipment; repairs stressed and nonstressed skin; fabricates metal parts and repairs internal structural members; performs periodic aircraft inspections; orders aircraft parts, equipment, materials, and tools; applies corrosion prevention and preservation materials; treats metals chemically after corrosion removal; removes and installs special rivets, metal fasteners, flight control surfaces, and detachable aft fuselage section of aircraft; replaces panels in windshields, canopies, plastic enclosures, and windows; repairs minor surface damage to transparent plastics and breaks, cracks, and punctures in reinforced plastics; repairs leaks in integral fuel tanks; in a first-line supervisor of a 3- to 7-person work group. *AMS1:* Able to perform the duties required for AMS2; troubleshoots and corrects material failures; removes and installs wing panels and stabilizers; corrects balancing of flight control surfaces; performs alignment checks of airframes and landing gear; analyzes the extent of corrosion damage; determines repair procedures for aircraft structural damage; supervises aircraft inspections; supervises and evaluates hardness tests and dye penetrant inspections on metals; inspects installation and evaluates operation of repaired or newly installed parts and components; orders technical publications, directives, and manuals; maintains shop files of technical publications, directives, and manuals; trains personnel on aircraft structural systems; is a supervisor of a medium-sized (20-30 persons) work center. *AMSC:* Able to perform the duties required for AMS1; plans, organizes, and lays out work centers; schedules and assigns workloads; maintains work center registers, inventory records, and prepares local reports; interprets technical publication, directives, and manuals; analyzes reports of discrepancies and malfunctions and determines corrective action; monitors inspection procedures to ensure that technical specifications and standards of workmanshop are met; prepare quarterly schedules of preventive maintenance; estimates aircraft spare parts, supplies, equipment, and manpower requirements; implements a program for detecting, treatment, and preventing corrosion of aircraft.

Recommendation, AMS3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 8 semester hours in airframe structures repair and 2 in aviation maintenance technology or airframe structures (2/77).

Recommendation, AMS2

In the vocational certificate category, 12 semester hours in airframe structures repair and 4 in aviation maintenance technology or airframe structures. In the lower-division baccalaureate/associate degree category, 12 semester hours in airframe structures repair, 4 in aviation maintenance technology or airframe structures, and 2 in personnel supervision (2/77).

Recommendation, AMS1

In the vocational certificate category, 15 semester hours in airframe structures repair and 6 in aviation maintenance technology or airframe structures. In the lower-division baccalaureate/associate degree category, 15 semester hours in airframe structures repair, 6 in aviation maintenance technology or airframe structures, 3 in personnel supervision, and 2 in maintenance management (2/77).

Recommendation, AMSC

In the vocational certificate category, the recommendation is the same as that for AMS1. In the lower-division baccalaureate/associate degree category, 15 semester hours in airframe structures repair, 6 in aviation maintenance technology or airframe structures, 3 in personnel supervision, 3 in maintenance management, and 3 in shop management. In the upper-division baccalaureate category, 3 semester hours for field experience in management (2/77).

NER-AN-001

AIRMAN

AN

Exhibit Dates: 6/71-Present.

Career Pattern

Airman is a general rate (Naval apprenticeship) for persons at pay grades E-1 (recruit), E-2 (Airman apprentice), and E-3 (Airman). At pay grade E-4 (petty officer third class), the person may enter any one of the following ratings: Aircrew Survival Equipmentman (PR), Aviation Antisubmarine Warfare Technician (AX), Aviation Electrician's Mate (AE), Aviation Electronics Technician (AT), Aviation Fire Control Technician (AQ), Aviation Machinist's Mate (AD), Aviation Maintenance Administrationman (AZ), Aviation Ordnanceman (AO), Aviation Structural Mechanic (AM), Aviation Boatswain's Mate (AB), Aviation Support Equipment Technician (AS), Air Controlman (AC), Tradevsman (TD), Aviation Storekeeper (AK), Photographer's Mate (PH), Aerographer's Mate (AG), or Aviation Antisubmarine Warfare Operator (AW).

Description

Assists in the maintenance of aircraft, associated aeronautical equipment, and aircraft support equipment; services, cleans, and handles aircraft; performs other apprentice-level duties involved in the operation of naval aircraft afloat and ashore.

Recommendation

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in aviation/aircraft fundamentals (2/77). NOTE: Credit for airman (AN) should be granted only after pay grade E-3 has been achieved.

NER-AO-001

AVIATION ORDNANCEMAN

AOCM

Exhibit Dates: 6/71-12/85.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AO3:* Aviation Ordanceman Third Class (E-4). *AO2:* Aviation Ordnanceman Second Class (E-5). *AO1:* Aviation Ordnanceman First Class (E-6). *AOC:* Chief Aviation Ordnanceman (E-7). *AOCS:* Senior Chief Aviation Ordnanceman (E-8). *AOCM:* Master Chief Aviation Ordnanceman (E-9).

Description

Summary: Maintains, inspects, and repairs aircraft armament equipment and aviation ordance (weapons) equipment, including aircraft guns, gun accessories, noncomputing gunsights, aerial towed target equipment, small arms, ammunition, handling eqipment, and ammunition suspension, release, launching, and arming equipment; stores and loads aviation ammunition, nuclear weapons, aerial mines, torpedos, and air-launched guided missiles; operates small-arms ranges; supervises the operation of aviation ordnance shops and storage facilities. *AO3:* Prepares gun ammunition for loading; assembles and disasembles aircraft ordnance weapons; performs weapons maintenance; uses schematics, diagrams, and charts to trace systems; performs routine inspection of ordnance equipment; completes periodic maintenance data forms; performs electromechanical maintenance of air armament units; issues standards for safety in ordnance maintenance; operates ground support equipment; detects, removes, and controls corrosion on aircraft armament and aviation ordnance handling equipment. *AO2:* Able to perform the duties required for AO3; serves as arming/dearming crew leader; supervises and coordinates crew loading of munitions aboard aircraft; maintains shop files, logs, and records; orders technical publications and manuals; performs periodic aircraft preloading inspections. *AO1:* Able to perform the duties required for AO2; supervises the preparation of fuel, air, and gel weapons; analyzes test equipment defects; conducts on-the-job training; performs quality checks and inspections on loaded aircraft; supervises and directs aircraft inspections; prepares weekly schedules of preventive maintenance; troubleshoots release and arming system. *AOC:* Able to perform the duties required for AO1; supervises and coordinates receipt stowage, movement, preparation, and loading of munitions by squadron crews; interprets technical publications and instructions on the handling of aviation ordnance equipment and munitions; prepares correspondence and reports; plans, organizes, and supervises aviation ordnance shops, storage facilities, and handling areas; supervises the training of special weapon loading teams; analyzes reports and prepares schedules of preventive maintenance; accounts for inventory; evaluates assigned personnel. *AOCS:* Able to perform the duties required for AOC; supervises and coordinates all the munitions-loading crews of an airwing (several squadrons); prepares local directives and instructions; prepares correspondence; interviews, evaluates, and assigns personnel; organizes and schedules training programs and evaluates their effectiveness; administers long-range planned maintenance program; monitors quality control program; makes recommendations on utilization, capabilities, reliability, and operations of airwing ordnance units. *AOCM:* Able to perform the duties required for AOCS; evaluates aviation ordnance equipment safety requirements and initiates recommendations for improvements; plans, organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; forecasts future requirements; initiates action to satisfy requirements; establishes goals and priorities; reviews and evaluates space, personnel, equipment, and material requirements; provides technical information and advice on the capabilities, limitations, reliability, and use of aviation ordnance, aircraft armament, and related equipment; evaluates the effectiveness of special weapons team training; evaluates new armament equipment and aviation ordnance materials; implements procedures for emergency storage facilities; develops operating budgets and monitors expenditures.

Recommendation, AO3

In the vocational certificate category, 3 semester hours in applied science, 3 in applied mathematics, 3 in mechanical maintenance, and 2 in blueprint reading and schematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in applied physics, 3 in applied mathematics, and 2 in industrial safety (2/77).

Recommendation, AO2

In the vocational certificate category, 3 semester hours in applied science, 3 in applied mathematics, 3 in mechanical maintenance, 3 in basic electronics, 3 in record keeping, and 3 in blueprint reading and schematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in applied physics, 3 in applied mathematics, 3 in basic electronics, 3 in record keeping, and 2 in industrial safety (2/77).

Recommendation, AO1

In the vocational certificate category, the recommendation is the same as that for AO2. In the lower-division baccalaureate/associate degree category, 3 semester hours in applied physics, 3 in applied mathematics, 3 in basic electronics, 3 in record keeping, and 3 in industrial safety. In the upper-division baccalaureate category, 3 semester hours in instructional techniques and materials (2/77).

Recommendation, AOC

In the vocational certificate category, the recommendation is the same as that for AO2. In the lower-division baccalaureate/associate degree category, 3 semester hours in applied physics, 3 in applied mathematics, 3 in basic electronics, 3 in record keeping, 3 in industrial safety, 2 in aviation management, 2 in office management, and 1 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in instructional techniques and materials and additional credit for field experience in management on the basis of institutional evaluation (2/77).

Recommendation, AOCS

In the vocational certificate category, the recommendation is the same as that for AO2. In the lower-division baccalaureate/associate degree category, 3 semester hours in applied physics, 3 in applied mathematics, 3 in basic electronics, 3 in record keeping, 3 in industrial safety, 2 in aviation management, 2 in office management, and 2 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in instructional techniques and materials and 3 for field experience in management (2/77).

Recommendation, AOCM

In the vocational certificate category, 3 semester hours in applied science, 3 in applied mathematics, 3 in mechanical maintenance, 3 in basic electronics, 3 in record keeping, 3 in blueprint reading and schematics, and 3 in technical report writing. In the lower-division baccalaureate/associate degree category, 3 semester hours in applied physics, 3 in applied mathematics, 3 in basic electronics, 3 in record keeping, 3 in industrial safety, 3 in technical writing, 3 in aviation management, 3 in personnel supervision, and 2 in office management. In the upper-division baccalaureate category, 3 semester hours in instructional techniques and materials, 3 for field experience in management, and 3 in management problems, and additional credit in human relations and personnel management on the basis of institutional evaluation (2/77).

NER-AO-002

Aviation Ordnanceman

AO3
AO2
AO1
AOC
AOCS
AOCM

Exhibit Dates: 1/86–Present.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AO3:* Aviation Ordnanceman Third Class (E-4). *AO2:* Aviation Ordnanceman Second Class (E-5). *AO1:* Aviation Ordnanceman First Class (E-6). *AOC:* Chief Aviation Ordnanceman (E-7). *AOCS:* Senior Chief Aviation Ordnanceman (E-8). *AOCM:* Master Chief Aviation Ordnanceman (E-9).

Description

Summary: Maintains, inspects, and repairs aircraft armament equipment and aviation ordnance (weapons) equipment, incuding aircraft guns, gun accessories, noncomputing gunsights, aerial towed target equipment, small arms, ammunition, handling equipment, and ammunition suspension, release launching, and arming equipment; stores and loads aviation ammunition, nuclear weapons, aerial mines, torpedoes, air-launched guided missiles; operates small-arm ranges; supervises the operation of aviation ordnance shops and storage facilities. *AO3:* Prepares gun ammunition for loading; assembles and disassembles aircraft ordnance weapons; performs weapons maintenance; uses schematics, diagrams, and charts to trace systems; performs routine inspection of ordnance equipment; completes periodic maintenance data forms; performs electromechanical maintenance on air armament units; issues standards for safety in ordnance maintenance; operates ground support equipment; detects, removes, and controls corrosion on aircraft armament and aviation ordnance handling equipment; maintains tool inventory; orders supplies and equipment. *AO2:* Able to perform the duties required for AO3; serves as arming/dearming crew leader; supervises and coordinates crew loading of munitions aboard aircraft; maintains shop files, logs, and records; orders technical publications and manuals; performs periodic aircraft preloading inspections. *AO1:* Able to perform the duties required for AO2; supervises the preparation of fuel, air, and gel weapons; analyzes test equipment defects; conducts on-the-job training; performs quality checks ad inspections on loaded aircraft; supervises and directs aircraft inspections; troubleshoots release and arming systems; prepares planned maintenance schedules. *AOC:* Able to perform the duties required for AO1; supervises and coordinates receipt, stowage, movement, preparation, and loading of munitions by squadron crews; interprets technical publications and instructions on the handling of aviation ordnance equipment and munitions; prepares correspondence and reports; plans, organizes, and supervises aviation ordnance shops, storage facilities, and handling areas; supervises the training of special weapons loading teams; analyzes reports and prepares schedules of preventive maintenance; accounts for inventory; evaluates assigned personnel; assists in aircraft accident investigation. *AOCS:* Able to perform the duties required for AOC; supervises and coordinates all the munitions-loading crews of an airwing (several squadrons); prepares local directives and instructions; prepares correspondence; interviews, evaluates, and assigns personnel; organizes and schedules training programs and evaluates their effectiveness; administers long-range planned maintenance program; monitors quality control program; makes recommendations on utilization, capabilities, reliability, and operations on airwing ordnance units. *AOCM:* Able to perform the duties required for AOCS; evaluates aviation ordnance equipment safety requirements and initiates recommendations for improvements; plans, organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; forecasts future requirements; initiates action to satisfy requirements; establishes goals and priorities; reviews and evaluates space, personnel, equipment, and material requirements; provides technical information and advice on the capabilities, limitations, reliability, and use of aviation ordnance, aircraft armament, and related equipment; evaluates the effectiveness of special weapons team training; evaluates new armament equipment and aviation ordnance materials; implements procedures for emergency storage facilities; develops operating budgets and monitors expenditures.

Recommendation, AO3

In the lower-division baccalaureate/associate degree category, 3 semester hours in weaponry maintenance, 1 in industrial corrosion control, and 1 in basic electricity (6/87).

Recommendation, AO2

In the lower-division baccalaureate/associate degree category, 3 semester hours in weaponry maintenance, 1 in industrial corrosion control, 1 in basic electricity, 1 in basic electricity troubleshooting, and 2 in industrial safety (6/87).

Recommendation, AO1

In the lower-division baccalaureate/associate degree category, 3 semester hours in weaponry maintenance, 1 in industrial corrosion control, 1 in basic electricity, 1 in basic electricity troubleshooting, 2 in industrial safety, 1 in technical report writing, and 2 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in industrial management (6/87).

Recommendation, AOC

In the lower-division baccalaureate/associate degree category, 3 semester hours in weaponry maintenance, 1 in industrial corrosion control, 1 in basic electricity, 1 in basic electricity troubleshooting, 2 in industrial safety, 3 in technical report writing, and 3 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in industrial management and 1 in shop management (6/87).

Recommendation, AOCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in weaponry maintenance, 1 in industrial corrosion control, 1 in basic electricity, 1 in basic electricity troubleshooting, 2 in industrial safety, 3 in technical report writing, 3 in personnel supervision, and 3 in industrial maintenance planning. In the upper-division baccalaureate category, 2 semester hours in industrial management, 2 in shop management, 3 in management planning, and 1 for field experience in management (6/87).

Recommendation, AOCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for AOCS. In the upper-division baccalaureate category, 2 semester hours in industrial management, 2 in shop management, 3 in management planning, 3 in industrial management and problem solving, and 2 for field experience in management (6/87).

NER-AQ-001

AVIATION FIRE CONTROL TECHNICIAN

AQ3
AQ2
AQ1
AQC
AQCS

Exhibit Dates: 6/71–12/85.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AQ3:* Aviation Fire Control Technician Third Class (E-4). *AQ2:* Aviation Fire Control Technician Second Class (E-5). *AQ1:* Aviation Fire Control Technician First Class (E-6). *AQC:* Chief Aviation Fire Control Technician (E-7). *AQCS:* Senior Chief Aviation Fire Control Technician (E-8). *AVCM:* Master Chief Avionics Technician (E-9).

Description

Summary: Maintains and repairs aircraft weapons control systems, including weapons control radar, computers, doppler computing sights, gyroscopes, and related equipment, and air-launched guided missile equipment. NOTE: Duty assignments are designated as either O-Level (troubleshooting and replacing modular system on aircraft) or I-Level (disassembling, repairing, and bench-testing modules); persons assigned the AQ rating receive equivalent training and must pass the same advancement examination, regardless of whether duty assignments have been O-Level or I-Level or both. *AQ3:* Assists in troubleshooting and repairing electrical and electronics weapons control systems (such as radar, infrared, optical, laser, and television systems; analog and digital computers; and gyro stabilizing systems and sensing elements) and related accessories and equipment; follows standard check-out procedures to locate and repair system malfunctions; reads schematics and block diagrams; uses volt-ohm-milliammeter; applies a working knowledge of hydraulic systems; completes maintenance forms and inventories parts and supplies; performs avionics corrosion control. *AQ2:* Able to perform the duties required for AQ3; performs troubleshooting and repair tasks not covered in standard services manuals; knows how to use oscilloscope, signal generators, and meggers; may have attended short training programs in troubleshooting and repairing specialized equipment; serves as crew leader, supervising from two to three persons on a job; maintains technical library; interprets technical directives. *AQ1:* Able to perform the duties required for AQ2; serves as shift supervisor, supervising from eight to nine persons; diagnoses nonroutine malfunctions and demonstrates repair techniques; conducts on-the-job training program; inspects and approves completed work assignments; prepares weekly schedules of preventive maintenance. *AQC:* Able to perform the duties required for AQ1; serves as shop supervisor, supervising 15-20 persons; plans and implements safety instruction and inspection programs; prepares maintenance duty schedules; prepares periodic or recurring reports; prepares quarterly schedules of preventive maintenance; supervises quality control programs; provides technical assistance in aircraft accident investigations. *AQCS:* Able to perform the duties required for for AQC; oversees three shops; serves as liaison with Navy units; administers quality control programs; prepares directives, instructions, and correspondence; advises on personnel, production, material, and training requirements; administers long-range planned maintenance program and training programs and evaluates their effectiveness; recommends changes in methods and techniques to promote safety and operational readiness.

Recommendation, AQ3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in beginning electrical/electronics laboratory and 2 in applied physics, and additional credit in aircraft electronics and hydraulics on the basis of institutional evaluation. Qualified to enter an industrial electronics technician, communications electronics technician, or industrial instrumentation technician apprentice training program, or an apprentice training program for any electrical trade (2/77).

Recommendation, AQ2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in beginning electrical/electronics laboratory, 2 in applied physics, and 3 in introduction to AC/DC theory, and additional credit in aircraft electronics and hydraulics on the basis of institutional evaluation. Advanced standing in an industrial electronics technician, communications electronics technician, or industrial instrumentation technician apprentice training program, or in an apprentice training program for any electrical trade, on the basis of employer or trade association performance evaluation (2/77).

Recommendation, AQ1

In the vocational certificate category, the recommendation is the same as that for AQ2. In the lower-division baccalaureate/associate degree category, 3 semester hours in beginning electrical/electronics laboratory, 2 in applied physics, 3 in introduction to AC/DC theory, 2 in personnel supervision, and 2 in maintenance management, and additional credit in aircraft electronics and hydraulics on the basis of institutional evaluation. In an industrial electronics technician aprentice training program, 4,000 clock hours of experience and 288 contact hours of related instruction. In a communications electronics technician or industrial instrumentation technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction (2/77).

Recommendation, AQC

In the vocational certificate category, the recommendation is the same as that for AQ2. In the lower-division baccalaureate/associate degree category, 3 semester hours in beginning electrical/electronics laboratory, 2 in applied physics, 3 in introduction to AC/DC theory, 3 in personnel supervision, 3 in maintenance management, and 3 in shop management, and additional credit in aircraft electronics and hydraulics on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for AQ1 because additional skills are administrative and supervisory in nature (2/77).

Recommendation, AQCS

In the vocational certificate category, the recommendation is the same as that for AQ2. In the lower-division baccalaureate/associate degree category, 3 semester hours in beginning electrical/electronics laboratory, 2 in applied physics, 3 in introduction to AC/DC theory, 3 in personnel supervision, 3 in maintenance management, 3 in shop management, 3 in management electives, 3 in safety management, and 2 in technical writing, and additional credit in aircraft electronics and hydraulics on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for a practicum in management and additional credit in human relations and quality control on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for AQ1 because additional skills are administrative and supervisory in nature (2/77).

In the upper-division baccalaureate category, 2 semester hours in industrial management, 2 in shop management, 3 in management planning, and 1 for field experience in management (10/87).

NER-AS-001

AVIATION SUPPORT EQUIPMENT TECHNICIAN

AS1
ASC
ASCS
ASCM

Exhibit Dates: 6/71–2/82.

Occupational Field: 6 (Aviation Ground Support).

Career Pattern

May progress from: ASE2, Aviation Support Equipment Technician, Electrical, Second Class (E-5); or ASH2, Aviation Support Equipment Technician Hydraulics and Structures, Second Class (E-5); or ASM2, Aviation support Equipment Technician, Mechanical, Second Class (E-5). *AS1:* Aviation Support Equipment Technician, First Class (E-6). *ASC:* Chief Aviation Support Equipment Technician (E-7). *ASCS:* Senior Chief Aviation Support Equipment Technician (E-8). *ASCM:* Master Chief Aviation Support Equipment Technician (E-9).

Description

AS1: Able to perform the duties required for ASE2, ASM2, or ASH2; analyzes and diagnoses malfunctions of the following systems: Hydraulics, pneumatic, electrical power generating, chassis and chassis electrical, internal combustion engines, air-conditioning, and gas-turbine compressors; determines corrective action; maintains shop files and technical publications; plans shop work schedule; supervises subordinates; performs quality control inspections; prepares schedules of preventive maintenance; requisitions and is responsible for materials and equipment. *ASC:* Able to perform the duties required for AS1; supervises training of personnel who operate, maintain, and repair aviation support equipment; coordinates administration, planning, and workload scheduling; organizes facilities for repair and maintenance of equipment and components; is responsible for ordering, storing, and inventorying materials and supplies for organizational unit. *ASCS:* Able to perform the duties required for ASC; is responsible for the administrative function of the organizational unit; organizes, schedules, and evaluates training; reviews, evaluates, and recommends inprovements to maintenance procedures; administers long-range maintenance program. *ASCM:* Able to perform the duties required for ASCS; responsible for the administration of assigned organizational unit, including planning, organizing and implementing activities in compliance with policy statements; reviews personnel, equipment and material requirements; establishes objectives and set priorities in area of responsibility; evaluates and monitors maintenance planning and quality control programs; develops operating budget and monitors expenditures; assists in formulating and implementing a safety program; provides technical information and assistance to subordinates; prepares maintenance, evaluation, and staff studies.

Recommendation, AS1

In the vocational certificate category, use the 19 semester hours for ASE2 (Aviation Support Equipment Technician, Electrical, Second Class) in exhibit NER-ASE-001, or the 18 semester hours for ASH2 (Aviation Support Equipment Technician, Hydraulics and Structures, Second Class) in exhibit NER-ASH-001, or the 21 semester hours for ASM2 (Aviation Support Equipment Technician, Mechanical, Second Class) in exhibit NER-ASM-001, as appropriate, and additional credit in basic electricity, automotive electricity, electrical control systems, power generator systems, hydraulics, hydraulic brakes, diesel engines, gas welding, electric welding, inert-gas welding, and power transmissions, on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 2 semester hours in personnel supervision, 1 in shop management, and 1 in record keeping, and additional credit in basic electricity, automotive electricity, electrical control systems, power generator systems, hydraulics, hydraulic brakes, diesel engines, gas welding, electric welding, inert-gas welding, and power transmissions on the basis of institutional evaluation; add the 19 semester hours for ASE2 in exhibit NER-ASE-001, or the 18 semester hours for ASH2 in exhibit NER-ASH-001, or the 21 semester hours for ASM2 in exhibit NER-ASM-001, as appropriate (2/77).

Recommendation, ASC

In the vocational certificate category, the recommendation is the same as that for AS1. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 2 in shop management, and 2 in record keeping, and additional credit in basis electricity, automotive electricity, electrical control systems, power generator systems, hydraulics, hydraulic brakes, diesel engine, gas welding, electric welding, inert-gas welding, and power transmissions on the basis of institutional evaluation; add the 19 semester hours for ASE2 (Aviation Support Equipment Technician, Electrical, Second Class) in exhibit NER-ASE-001, or the 18 semester hours for ASH2 (Aviation Support Equipment Technician, Hydraulics and Structures, Second Class) in exhibit NER-ASH-001, or the 21 semester hours for ASM2 (Aviation Support Equipment Technician, Mechanical, Second Class) in exhibit NER-ASM-001, as appropriate (2/77).

Recommendation, ASCS

In the vocational certificate category, the recommendation is the same as that for AS1. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in maintenance management, 2 in record keeping, and 2 in shop management, and additional credit in basic electricity, automotive electricity, electrical control systems, power generator systems, hydraulics, hydraulic brakes, diesel engines, gas welding, electric welding, inert-gas welding, and power transmissions on the basis of institutional evaluation; add the 19 semester hours for ASE2 (Aviation Support Equipment Technician, Electrical, Second Class) in exhibit NER-ASE-001, or the 18 semester hours for ASH2 (Aviation Support Equipment Technician, Hydraulics and Structures, Second Class) in exhibit NER-ASH-001, or the 21 semester hours for ASM2 (Aviation Support Equipment Technician, Mechanical, Second Class) in exhibit NER-ASM-001, as appropriate. In the upper-division baccalaureate category, 3 semester hours for field experience in management (2/77).

Recommendation, ASCM

In the vocational certificate category, the recommendation is the same as that for AS1. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in maintenance management, 3 in introduction to management, 2 in record keeping, and 2 in shop management, and additional credit in basic electricity, automotive electricity, electrical control systems, power generator systems, hydraulics, hydraulic brakes, diesel engines, gas welding, electric welding, inert-gas welding, and power transmissions on the basis of institutional evaluation; add the 19 semester hours for ASE2 (Aviation Support Equipment Technician, Electrical, Second Class) in exhibit NER-ASE-001, or the 18 semester hours for ASH2 (Aviation Support Equipment Technician, Hydraulics and Structures, Second Class) in exhibit NER-ASH-001, or the 21 semester hours for ASM2 (Aviation Support Equipment Technician, Mechanical, Second Class) in exhibit NER-ASM-001, as appropriate. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (2/77).

AN: Airman (E-3). *ASH3:* Aviation Support Equipment Technician, Hydraulics and Structures, Third Class (E-4). *ASH2:* Aviation Support Equipment Technician, Hydraulics and Structures, Second Class (E-5). *AS1:* Aviation Support Equipment Technician, First Class (E-6). *ASC:* Chief Aviation Support Equipment Technician (E-7). *ASCS:* Senior Chief Aviation Support Equipment Technician (E-8). *ASCM:* Master Chief Aviation Support Equipment Technician (E-9).

Description

Summary: Services, tests, maintains, and repairs hydraulic and pneumatic systems and structural components of aviation support equipment; maintains hydraulic test and service equipment, air compressors, jacks, work stands, and associated equipment; performs body and fender metal work and painting of aviation support equipment; welds, brazes, solders, cuts, shapes, and patches metal; adjusts and repairs brake systems. *ASH3:* Uses mechanical precision measuring equipment, electrical test equipment, hydraulic and pneumatic test equipment, gauges, meters, and hydraulic test stands; uses and maintains hand tools; replaces seals, packings, tubing, and flexible hoses in hydraulic systems; repairs, removes and installs hydraulic and pneumatic system components; bleeds and flushes hydraulic systems; performs structural repairs; welds with electrical and oxyacetylene equipment; brazes and solders; paints support equipment; uses maintenance publications; completes maintenance records; identifies types and designations of fuels, hydraulic fluids, coolants, and lubricants. *ASH2:* Able to perform the duties required for ASH3; diagnoses hydraulic test equipment malfunctions; adjusts valves and regulators in hydraulic and pneumatic systems; performs equipment modifications in hydraulic and pneumatic systems; analyzes hydraulic fluid for contamination; welds with inert-gas welding equipment.

Recommendation, ASH3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in gas and electric welding, 4 in hydraulics, 4 in basic shop practices, and 2 in care and use of tools (2/77).

Recommendation, ASH2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in gas and electric welding, 4 in hydraulics, 4 in basic shop practices, 2 in inert-gas welding, and 2 in care and use of tools (2/77).

NER-ASM-001

AVIATION SUPPORT EQUIPMENT
TECHNICIAN, MECHANICAL

ASM3
ASM2

Exhibit Dates: 6/71–2/82.

Occupational Field: 6 (Aviation Ground Support).

Career Pattern

AN: Airman (E-3). *ASM3:* Aviation Support Equipment Technician, Mechanical, Third Class (E-4). *ASM2:* Aviation Support Equipment Technician, Mechanical, Second Class (E-5). *AS1:* Aviation Support Equipment Technician, First Class (E-6). *ASC:* Chief Aviation Support Equipment Technician (E-7). *ASCS:* Senior Chief Aviation Support Equipment Technician (E-8). *ASCM:* Master Chief Aviation Support Equipment Technician (E-9).

Description

Summary: Services, tests, maintains, and repairs gasoline and diesel engines in mobile and self-propelled aviation support equipment and associated automotive systems, including fuel systems, automatic and power transmissions, differentials, and steering systems; maintains gas-turbine compressor units and air-conditioning systems used in servicing aircraft. *ASM3:* Uses mechanical precision measuring equipment, electrical test equipment, and internal-combustion-engine analyzers; uses and maintains hand tools; replaces seals, packings, tubing and flexible hoses in hydraulic systems; removes electromechanical and cooling system components; services, adjusts, and repairs hydraulic, pneumatic, and mechanical brakes; performs minor engine tune-up; welds with oxyacetylene equipment; uses maintenance publications; completes maintenance records. *ASM2:* Able to perform the duties required for ASM; uses gas-turbine analyzers; diagnoses malfunctions of internal-combustion engines; grinds valves and overhauls internal-combustion engines; performs major engine tune-ups; repairs and adjusts transmissions and differentials; performs steering and front-end alignment; adjusts and maintains air-conditioning systems; inspects compressors and turbines; makes adjustments on gas-turbine compressors.

Recommendation, ASM3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 4 semester hours in basic shop practices, 3 in diesel engines, 3 in hydraulic brakes, and 2 in care and use of tools (2/77).

Recommendation, ASM2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 6 semester hours in diesel engines, 4 in basic shop practices, 3 in hydraulic brakes, 3 in power transmissions, 3 in gas welding, and 2 in care and use of tools (2/77).

Technician, Mechanical

ASM3
ASM2

Exhibit Dates: 3/82–12/89. (Effective 1/90, the ASM rating was discontinued and its duties were incorporated into the Aviation Support Equipment Technician (AS) rating; see exhibit NER-AS-003.)

Occupational Field: 6 (Aviation Ground Support).

Career Pattern

AN: Airman (E-3). *ASM3:* Aviation Support Equipment Technician, Mechanical, Third Class (E-4). *ASM2:* Aviation Support Equipment Technician, Mechanical, Second Class (E-5). *AS1:* Aviation Support Equipment Technician First Class (E-6). *ASC:* Chief Aviation Support Equipment Technician (E-7). *ASCS:* Senior Chief Aviation Support Equipment Technician (E-8). *ASCM:* Master Chief Aviation Support Equipment Technician (E-9).

Description

Summary: Services, tests, maintains, and repairs gasoline engines and associated automotive systems, hydraulic systems, pnuematic systems, and structural components in mobile and self-propelled aviation support equipment, aviation armament handling equipment, including generating, starting, lighting, and ignition systems, electrical components and writing in auxiliary electrical power units used in servicing aircraft, electrical control systems in gas turbine compressor units and air conditioning systems, and electrical and electronic circuits and components in general aircraft servicing equipment. *ASM3:* Uses mechanical precision measuring equipment, hydraulic and pneumatic test equipment, electrical test equipment, engine maintenance and overhaul test equipment; repairs and adjusts automotive brake systems, steering systems, air-conditioning systems, cooling systems, and suspension systems; replaces seals and packing; fabricates and fits rigid tube and low pressure flexible hose assemblies; removes, repairs and services components associated with hydraulic and pneumatic systems; uses maintenance publications; completes maintenance records. *ASM2:* Able to perform the duties required for ASM3; isolates, repairs and adjusts problems relating to transmissions, differentials, steering systems, air conditioning systems, mechanical systems, and hydraulic systems; uses specialized test equipment to isolate malfunction in hydraulic equipment; performs scheduled maintenance inspections; performs dye penetrant and hydraulic contamination analysis.

Recommendation, ASM3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 4 semester hours in basic shop practices, 3 in diesel engines, 4 in hydraulics, and 2 in care and use of tools (5/83).

Recommendation, ASM2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 4 semester hours in basic shop practices, 6 in diesel engines, 4 in hydraulics, 3 in power transmissions, and 2 in use and care of tools (5/83).

NER-AT-001

Aviation Electronics Technician

AT3
AT2
AT1
ATC
ATCS

Exhibit Dates: 6/71–12/85.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AT3:* Aviation Electronics Technician Third Class (E-4). *AT2:* Aviation Electronics Technician Second Class (E-5). *AT1:* Aviation Electronics Technician First Class (E-6). *ATC:* Chief Aviation Electronics Technician (E-7). *ATCS:* Senior Chief Aviation Electronics Technician (E-8). *AVCM:* Master Chief Avionics Technician (E-9).

Description

Summary: Maintains and repairs electronic communications systems and in-flight navigation and detection systems on aircraft. NOTE: Duty assignments are designated as either O-Level (troubleshooting and replacing modular systems on aircraft) or I-Level (disassembling, repairing, and bench-testing modules); persons assigned the AT rating receive equivalent training and must pass the same advancement examinations, regardless of whether duty assignments have been O-Level or I-Level or both. *AT3:* Assists in troubleshooting and repairing radar systems, radar and tactical displays, IFF/SIF equipment, radar altimeters, doppler navigation equipment, radio navigation equipment, analog computing devices, communications systems, CIC and electronics countermeasures equipment, infrared devices, recorder systems, and aircraft digital data systems; follows standard check-out procedures to locate and repair malfunctions; reads schematics and block diagrams; uses volt-ohm-milliameter, frequency counters, and specialized system test equipment; completes maintenance forms and inventories parts and supplies; performs avionics corrosion control. *AT2:* Able to perform the duties required for AT3; performs troubleshooting and repair tasks not covered in standard service manuals; knows how to use oscilloscope, signal generators, and megger; may have attended short training programs in troubleshooting and repairing specialized equipment; serves as crew leader, supervising from two to three persons on a job; maintains technical library and inventory records; inspects, tests, and maintains aircraft transmission lines and antennas. *AT1:* Able to perform the duties required for AT2; serves as shift supervisor, supervising from eight to nine persons; diagnoses nonroutine malfunctions and demonstrates repair techniques; inspects and approves completed work assignments, including the installation of new parts and components; conducts on-the-job training program and maintains training records; prepares weekly schedules of preventive maintenance. *ATC:* Able to perform the duties required for AT1; serves as shop supervisor, supervising 15-20 persons; plans and implements safety instruction and inspection programs; prepares maintenance duty schedules; prepares periodic or recurring reports; prepares quarterly schedules of preventive maintenance; supervises quality control programs; provides technical assistance in aircraft accident investigations. *ATCS:* Able to perform the duties required for ATC; oversees three shops; serves as liaison with other Navy units; administers quality control programs; prepares directives, instructions, and correspondence; advises on personnel, production, material, and training requirements; administers long-range planned maintenance program and training programs and evaluates their effectiveness; recommends changes in methods and techniques to promote safety and operational readiness.

Recommendation, AT3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in beginning electrical/electronics laboratory, 1 in applied physics, and 12 in avionics technology, and additional credit in avionics technology on the basis of institutional evaluation. Qualified to enter an industrial or communications electronics technician apprentice training program (2/77).

Recommendation, AT2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in beginning electrical/electronics laboratory, 1 in applied physics, 3 in introduction to

AC/DC theory, and 12 in avionics technology, and additional credit in avionics technology on the basis of institutional evaluation. Advanced standing in a communications electronics technician apprentice training program on the basis of employer or trade association performance examination; qualified to enter an industrial electronics technician apprentice training program (2/77).

Recommendation, AT1

In the vocational certificate category, the recommendation is the same as that for AT2. In the lower-division baccalaureate/associate degree category, 3 semester hours in beginning electrical/electronics laboratory, 1 in applied physics, 3 in introduction to AC/DC theory, 12 in avionics technology, 2 in personnel supervision, and 2 in maintenance management, and additional credit in avionics technology on the basis of institutional evaluation. In a communications electronics technician apprentice training program, 4,000 clock hours of experience and 288 contact hours of related instruction. In an industrial electronics technician apprentice training program, 2,000 clock hours of experience and 144 contact hours of related instruction (2/77).

Recommendation, ATC

In the vocational certificate category, the recommendation is the same as that for AT2. In the lower-division baccalaureate/associate degree category, 3 semester hours in beginning electrical/electronics laboratory, 1 in applied physics, 3 in introduction to AC/DC theory, 12 in avionics technology, 3 in personnel supervision, 3 in maintenance management, and 3 in shop management, and additional credit in avionics technology on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for AT1 because additional skills are administrative and supervisory in nature (2/77).

Recommendation, ATCS

In the vocational certificate category, the recommendation is the same as that for AT2. In the lower-division baccalaureate/associate degree category, 3 semester hours in beginning electrical/electronics laboratory, 1 in applied physics, 3 in introduction to AC/DC theory, 12 in avionics technology, 3 in personnel supervision, 3 in maintenance management, 3 in shop management, 3 in management electives, 3 in safety management, and 2 in technical writing, and additional credit in avionics technology on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for a practicum in management and additional credit in human relations and quality control on the basis of institutional evaluation. The recommendation for advanced standing in an apprentice training program is the same as that for AT1 because additional skills are administrative and supervisory in nature (2/77).

Recommendation, ATCS

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communication systems troubleshooting, 3 in basic mathematics, 3 in electrical circuitry, 3 in schematic reading, 3 in instrumentation/ measurement, 3 in technical report writing, 3 in personnel supervision, and 3 in industrial maintenance planning. In the upper-division baccalaureate category, 2 semester hours in industrial management, 2 in shop management, 3 in management planning, and 1 for field experience in management (6/87).

Recommendation, ATCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for ATCS. In the upper-division baccalaureate category, 2 semester hours in industrial management, 3 in shop management, 3 in management planning, 3 for field experience in management, and 3 in management problems (6/87).

NER-AV-001

AVIONICS TECHNICIAN, MASTER CHIEF

AVCM

Exhibit Dates: 6/71–12/90. (Effective 1/91, AVCM was discontinued.)

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

May progress to AVCM, Master Chief Avionics Technician (E-9), from: AXCS, Senior Chief Aviation Antisubmarine Warfare Technician (E-8); *AECS:* Senior Chief Aviation Electrician's Mate (E-8); ATCS, Senior Chief Aviation Electronics Technician (E-8); or AQCS, Senior Chief Aviation Fire Control Technician (E-8).

Description

Able to perform the duties required for AXCS (Senior Chief Aviation Antisubmarine Warfare Technician), AECS (Senior Chief Aviation Electrician's Mate), ATCS (Senior Chief Aviation Electronics Technician), or AQCS (Senior Chief Aviation Fire Control Technician); plans, organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; forecasts future requirements; plans and initiates actions to satisfy requirements; establishes goals and priorities; reviews and evaluates personnel, equipment, and material requirements; prepares maintenance plans and staff studies for management review; exercises techniques of aircraft maintenance and personnel management; develops and implements preventive maintenance, corrosion control, and quality assurance programs; develops operating budget and monitors expenditures.

Recommendation

In the vocational certificate category, use the recommendation for AE1 (Aviation Electrician's Mate First Class) in exhibit NER-AE-001 or NER-AE-002, AT2 (Aviation Fire Control Technician Second Class) in exhibit NER-AT-001 or NER-AT-002, or AQ2 (Aviation Fire Control Technician Second Class) in exhibit NER-AQ-001 or NER-AQ-002, or AX1 (Aviation Antisubmarine Warfare Technician, First Class), in exhibit NER-AX-001 or NER-AX-002, as appropriate. In the lower-division baccalaureate/associate degree category, add 1 semester hour in technical writing to the recommendation for AECS (Senior Chief Aviation Electrician's Mate) in exhibit NER-AE-001 or NER-AE-002, or ATCS (Senior Chief Aviation Electronics Technician) in exhibit NER-AT-001 or NER-AT-002, or AQCS (Senior Chief Aviation Fire Control Technician) in exhibit NER-AQ-001 or NER-AQ-002, or AXC (Chief Aviation Antisubmarine Warfare Technician) in exhibit NER-AX-001 or NER-AX-002, as appropriate. In the upper-division baccalaureate category, 6 semester hours for a practicum in management, 3 in management problems, and 3 in human relations, and additional credit in quality control on the basis of institutional evaluation (2/77).

AWCS
AWCM

Exhibit Dates: 1/75–Present.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AW3:* Aviation Antisubmarine Warfare Technician, Third Class (E-4). *AW2:* Aviation Antisubmarine Warfare Technician, Second Class (E-5). *AW1:* Aviation Antisubmarine Warfare Technician, First Class (E-6). *AWC:* Chief Aviation Antisubmarine Warfare Technician (E-7). *AWCS:* Senior Chief Aviation Antisubmarine Warfare Technician (E-8). *AWCM:* Master Chief Aviation Antisubmarine Warfare Technician (E-9).

Description

NOTE: The AW rating is divided into three sections: Acoustic, Non-Acoustic, and Helicopter; the AW (Non-Acoustic) exhibit is NER-AW-002; the AW (Helicopter) exhibit is NER-AW-003. *Summary:* Performs general flight crew duties; operates antisubmarine warfare equipment. *AW3:* Operates various acoustic sensors in order to discover and track submarines; identifies and classifies targets; identifies sounds produced by surface ships, submarines, marine life, and other natural phenomena; determines acoustic energy propagation characteristics under various oceanographic conditions. *AW2:* Able to perform the duties required for AW3; identifies submarine evasion tactics; classifies targets in more detail than an AW3 and has a fuller understanding of the ocean environment on antisubmarine warfare data. *AW1:* Able to perform the duties required for AW2; may serve as an instructor; performs reconstruction of antisubmarine tactical exercises; navigates using airborne radar; has knowledge of non-acoustic antisubmarine warfare; analyzes in multi-target situations; supervises and instructs personnel in use of equipment. *AWC:* Able to perform the duties required for AW1; conducts airborne exercises which include the use of both acoustic and non-acoustic equipment; assists in establishing tactical procedures. *AWCS:* Able to perform the duties required for AWC; analyzes and evaluates operational efficiency for each aircrew; determines adequate areas of operation and training; performs the duties of squadron operations department manager; supervises an antisubmarine warfare division; prepares correspondence; organizes and schedules training programs. *AWCM:* Able to perform the duties required for AWCS; performs as antisubmarine warfare training coordinator; plans, organizes, implements, and controls activities in compliance with policy statements; reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, AW3

(Acoustic) In the lower-division baccalaureate/associate degree category, 3 semester hours in survey of oceanography (8/79).

Recommendation, AW2

(Acoustic) In the lower-division baccalaureate/associate degree category, 4 semester hours in survey of oceanography. In the upper-devision baccalaureate category, if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AW1

(Acoustic) In the lower-division baccalaureate/associate degree category, 5 semester hours in survey of oceanography, 2 in survey of meteorology, and 3 in personnel supervision. In the upper-division baccalaureate category, if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AWC

(Acoustic) In the lower-division baccalaureate/associate degree category, 5 semester hours in oceanography, 3 in meteorology, 3 in personnel supervision, and 3 in human relations. In the upper-division baccalaureate category, if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AWCS

(Acoustic) In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for AWC. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 for management problems; if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AWCM

(Acoustic) In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for AWC. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in personnel management, and 3 in management problems; if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Description

NOTE: The AW rating is divided into three sections: Acoustic, Non-Acoustic, and Helicopter; the AW (Acoustic) exhibit is NER-AW-001; the AW (Helicopter) exhibit is NER-AW-003. *Summary:* Performs general flight crew duties; operates antisubmarine warfare equipment. *AW3:* Operates equipment to detect submarines by electromagnetic or infrared means; operates airborne radar to detect, identify, and interpret targets, and to avoid hazardous weather; advises pilot of expected weather conditions. *AW2:* Able to perform the duties required for AW3; identifies submarine evasion tactics; interprets effects of deception devices. *AW1:* Able to perform the duties required for AW2; performs reconstruction of airborne antisubmarine warfare tactical exercises; navigates using airborne radar; instructs personnel in the tactical use of airborne antisubmarine warfare equipment; may serve as an instructor; supervises and instructs personnel in use of equipment. *AWC:* Able to perform the duties required for AW1; conducts airborne exercises which include the use of both acoustic and non-acoustic equipment; assists in establishing tactical procedures. *AWCS:* Able to perform the duties required for AWC; analyzes and evaluates operational efficiency for each aircrew; determines adequate areas of operation and training; performs the duties of squadron operations department manager; supervises an antisubmarine warfare division; prepares correspondence; organizes and schedules training programs. *AWCM:* Able to perform the duties required for AWCS; performs as antisubmarine warfare training coordinator; plans, organizes, implements, and controls activities in compliance with policy statements; reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, AW3

(Non-Acoustic) In the lower-division baccalaureate/associate degree category, 2 semester hours in survey of meteorology (8/79).

Recommendation, AW2

(Non-Acoustic) In the lower-division baccalaureate/associate degree category, 3 semester hours in survey of meteorology. In the upper-division baccalaureate category, if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AW1

(Non-Acoustic) In the lower-division baccalaureate/associate degree category, 4 semester hours in survey of meteorology, 3 in survey of oceanography, and 3 in personnel supervision. In the upper-division baccalaureate category, if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AWC

(Non-Acoustic) In the lower-division baccalaureate/associate degree category, 4 semester hours in survey of meteorology, 4 in survey of oceanography, 3 in personnel supervision, and 3 in human relations. In the upper-division baccalaureate category, if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AWCS

(Non-Acoustic) In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for AWC. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 in management problems; if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AWCM

(Non-Acoustic) In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for AWC. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in personnel management, and 3 in management problems; if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

NER-AW-003

AVIATION ANTISUBMARINE WARFARE
OPERATOR (HELICOPTER)

AW3
AW2
AW1
AWC
AWCS
AWCM

Exhibit Dates: 1/75–Present.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AW3:* Aviation Antisubmarine Warfare Technician, Third Class (E-4). *AW2:* Aviation Antisubmarine Warfare Technician Second Class (E-5). *AW1:* Aviation Antisubmarine Warfare Technician, First Class (E-6). *AWC:* Chief Aviation Antisubmarine Warfare Technician (E-7). *AWCS:* Senior Chief Aviation Antisubmarine Warfare Technician (E-8). *AWCM:* Master Chief Aviation Antisubmarine Warfare Technician (E-9).

Description

NOTE: The AW rating is divided into three sections: Acoustic, Non-Acoustic, and Helicopter; the AW (Acoustic) exhibit is NER-AW-001; the (Non-Acoustic) exhibit is NER-AW-002. *Summary:* Performs general flight crew duties; operates antisubmarine warfare equipment. *AW3:* Uses both acoustic and non-acoustic devices to detect and track submarines; serves as crewman on a helicopter; uses airborne radar to detect, identify, and intercept targets, and avoid hazardous weather; uses airborne sonar to detect, classify, and track; identifies sounds produced by surface ships submarines, evasion devices, marine life, and other natural phenomena. *AW2:* Able to perform the duties required for AW3; operates equipment and interprets results; identifies submarine evasion tactics; interprets effects of deception devices. *AW1:* Able to perform the duties required for AW2; may serve as an instructor; performs reconstruction of helicopter tactical, exercises; analyzes multitarget situations; supervises and instructs personnel in use of equipment. *AWC:* Able to perform the duties required for AW1; conducts airborne exercises which include the use of both acoustic and non-acoustic equipment; assists in establishing tactical procedures. *AWCS:* Able to perform the duties required for AWC; analyzes and evaluates operational efficiency for each aircrew; determines adequate areas of operation and training; performs the duties of squadron operations department manager; supervises an antisubmarine warfare division; prepares correspondence; organizes and schedules training programs. *AWCM:* Able to perform the duties required for AWCS; performs as antisubmarine warfare training coordinator; plans, organizes, implements, and controls activities in compliance with policy statements; reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, AW3

(Helicopter) In the lower-division baccalaureate/associate degree category, 3 semester hours in emergency medical techniques, 2 in survey of meteorology, and 3 in survey of oceanography (8/79).

Recommendation, AW2

(Helicopter) In the lower-division baccalaureate/associate degree category, 4 semester hours in emergency medical techniques, 2 in survey of meteorology,and 4 in survey of oceanography. In the upper-division baccalaureate category, IF served as instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AW1

(Helicopter) In the lower-division baccalaureate/associate degree category, 5 semester hours in emergency medical techniques, 2 in survey of meteorology, 5 in survey of oceanography,and 3 in personnel supervision. In the upper-division baccalaureate category, IF served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AWC

(Helicopter) In the lower-division baccalaureate/associate degree category, 5 semester hours in emergency medical techniques, 2 in survey of meteorology, 5 in survey of oceanography, 3 in personnel supervision, and 3 in human relations. In the upper-division baccalaureate category, IF served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AWCS

(Helicopter) In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for AWC. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 in management problems; IF served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AWCM

(Helicopter) In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for AWC. In the upper-division baccalaureate category, 6semester hours for field experience in management, 3 in personnel management, and 3 in management problems; IF served as an instructor, 3 semester hours for a practicum in teaching (8/79).

NER-AX-001

AVIATION ANTISUBMARINE WARFARE
TECHNICIAN

AX3
AX2
AX1
AXC
AXCS

Exhibit Dates: 1/75–12/85.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AX3:* Aviation Antisubmarine Warfare Technician, Third Class (E-4). *AX2:* Aviation Antisubmarine Warfare Technician, Second Class (E-5). *AX1:* Aviation Antisubmarine Warfare Technician, First Class (E-6). *AXC:* Chief Aviation Antisubmarine Warfare Technician (E-7). *AXCS:* Senior Chief Aviation Antisubmarine Warfare Technician (E-8). *AVCM:* Master Chief Avionics Technician (E-9).

Description

Summary: Inspects and performs maintenance and in-flight repair on aviation antisubmarine warfare sensor equipment and associated integrated systems, including those relating to Magnetic Anomaly Detection, underwater detection, acoustic analysis, electronic support measures, computer/data processing, electro-optics, data display, data link, and electro/mechanical recorders; operates and maintains associated test equipment. *AX3:* Performs routine maintenance and replaces defective parts; performs operational ground checks and assists in repair of avionics equipment; assists in maintaining technical library and instrument records. *AX2:* Able to perform the duties required for AX3; tests and repairs avionics equipment, including printed circuits and modules used in computer and radar devices; tests and repairs electronic countermeasures (ECM) equipment, underwater detection equipment and data link devices; performs collateral duty inspections and minimum performance checks; debriefs flight crews; interprets technical directives and monitors avionics corrosion control. *AX1:* Able to perform the duties required for AX2; inspects installation and evaluates performance of repaired or new avionics devices; analyzes operation of avionics units and isolates equipment malfunctions; supervises maintenance actions and performs qualitative tests; maintains training records and supervises maintenance of technical library; prepares weekly schedules of maintenance and inspects quality of work performed to determine effectiveness and take corrective action. *AXC:* Able to perform the duties required for AX1; prepares and completes periodic reports and evaluates performance of personnel; maintains custody of record and supervises facilities for repair of equipment; prepares maintenance schedules; supervises work center quality assurance programs and provides technical assistance in aircraft accident investigations. *AXCS:* Able to perform the duties required for AXC; prepares local directives and instructions for attaining organization objectives and improving operations; prepares correspondence; establishes and implements programs for interviewing, evaluating and assigning personnel to assure maximum utilization; advises supervisory personnel on production, personnel, material, and training program; organizes and schedules training programs, evaluates effectiveness and initiates improvements; administers long-range planned maintenance programs and monitors effectiveness of quality assurance programs.

Recommendation, AX3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 2 in troubleshooting techniques, and 2 in introduction to physics (8/79).

Recommendation, AX2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 3 in troubleshooting techniques, 2 in introduction to physics, and 2 in AC/DC circuit theory. In the upper-division baccalaureate category, if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AX1

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 4 in troubleshooting techniques, 2 in introduction to physics, 3 in AC/DC circuit theory and 3 in personnel supervision. In the upper-division baccalaureate category, if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AXC

In the vocational certificate category, the recommendation is the same as that for AX1. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics 4 in troubleshooting techniques, 2 in introduction to physics, 3 in AC/DC circuit theory, 3 in personnel supervision, and 3 in human relations. In the upper-division baccalaureate category, if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AXCS

In the vocational certificate category, the recommendation is the same as that for AX1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for AXC. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 in management problems; if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

NER-AX-002

AVIATION ANTISUBMARINE WARFARE
TECHNICIAN

AX3
AX2
AX1
AXC
AXCS

Exhibit Dates: 1/86–12/90. (Effective 1/91, the AX rating was discontinued and its duties were incorporated into the Avionics Maintenance Technician rating (see NER-AV-001).

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AX3:* Aviation Antisubmarine Warfare Technician, Third Class (E-4). *AX2:* Aviation Antisubmarine Warfare Technician, Second Class (E-5). *AX1:* Aviation Antisubmarine Warfare Technician, First Class (E-6). *AXC:* Chief Aviation Antisubmarine Warfare Technician (E-7). *AXCS:* Senior Chief Aviation Antisubmarine Warfare Technician (E-8). *AVCM:* Master Chief Avionics Technician (E-9).

Description

Summary: Maintains and repairs aviation antisubmarine warfare sensor equipment and associated integrated systems, including those relating to Magnetic Anomaly Detection, underwater detection, acoustic analysis, electronic support measure, computer/data processing, electro-optics, data display, data link, and electro-mechanical recorders; operates and maintains associated test equipment. NOTE: Duty assignments are designated either O-Level (troubleshooting and replacing modular systems) or I-Level (disassembling, repairing, and bench-testing modules); persons assigned the AX rating receive equivalent training and must pass the same advancement examinations regardless of whether duty assignments have been O-Level or I-Level or both. *AX3:* Troubleshoots and repairs radar systems, radar and tactical displays, digital data systems, infrared devices, data link equipment, analog computing devices and acoustic magnetic tape recorder systems; follows standard check-out procedures to locate and repair malfunctions; reads schematics and block diagrams; uses volt-ohm-milliameter, frequency counters, and specialized system test equipment; completes maintenance forms and inventories parts and supplies; performs avionics corrosion control. *AX2:* Able to perform the duties required for AX3; performs troubleshooting and repair tasks not covered in standard service manuals; knows how to use oscilloscope, signal generator, and megger; may have attended short training programs in troubleshooting and repairing specialized equipment; serves as crew leader, supervising from two to three persons on a job; maintains technical library and inventory records; inspects, tests, and maintains aircraft transmissions, lines and antennas; troubleshoots and repairs acoustic processing equipment, recorder systems, combat information center (CIC) and electronic countermeasure (ECM) equipment, electronics support measures (ESM) equipment and underwater detection equipment. *AX1:* Able to perform the duties required for AX2; serves as shift supervisor, supervising from eight to nine persons; diagnoses more routine malfunctions and demonstrates repair techniques; inspects and approves completed work assignments including the installation of new parts and components; conducts on-the-job training programs and maintains training records; prepares weekly schedules of preventive maintenance. *AXC:* Able to perform the duties required for AX1; serves as shop supervisor, supervising 15-20 persons; plans and implements safety instruction and inspection programs; prepares maintenance duty schedules; prepares periodic or recurring reports; prepares quarterly schedules of preventive maintenance; supervises quality control programs; provides technical assistance in aircraft accident investigations. *AXCS:* Able to perform the duties required for AXC; oversees three shops; serves as liaison with other Navy units; administers quality control programs; prepares directives, instructions, and correspondence; advises on personnel, production, material, and training requirements; administers long-range planned maintenance program and training programs and evaluates their effectiveness; recommends changes in methods and techniques to promote safety and operational readiness.

Recommendation, AX3

In the vocational certificate category, 3 semester hours in beginning electrical/ electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communication systems troubleshooting, and 3 in basic mathematics (10/87).

Recommendation, AX2

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communication systems troubleshooting, 3 in basic mathematics, 3 in electrical circuitry, 3 in schematic reading, and 3 in instrumentation/ measurement (10/87).

Recommendation, AX1

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communication systems troubleshooting, 3 in basic mathematics, 3 in electrical circuitry, 3 in schematic reading, 3 in instrumentation/ measurement, 1 in technical report writing, and 2 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in industrial management (10/87).

Recommendation, AXC

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communication systems troubleshooting, 3 in basic mathematics, 3 in electrical circuitry, 3 in schematic reading, 3 in instrumentation/ measurement, 3 in technical report writing, and 3 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in industrial management and 1 in shop management (10/87).

Recommendation, AXCS

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communication systems troubleshooting, 3 in basic mathematics, 3 in electrical circuitry, 3 in schematic reading, 3 in instrumentation/ measurement, 3 in technical report writing, 3 in personnel supervision, and 3 in industrial maintenance planning. In the upper-division baccalaureate category, 2 semester hours in industrial management, 2 in shop management, 3 in management planning, and 1 for field experience in management (10/87).

NER-AZ-001

AVIATION MAINTENANCE
ADMINISTRATIONMAN

AZ3
AZ2
AZ1
AZC
AZCS
AZCM

Exhibit Dates: 6/71–Present.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3) *AZ3:* Aviation Maintenance Administrationman Third Class (E-4). *AZ2:* Aviation Maintenance Administrationman Second Class (E-5). *AZ1:* Aviation Maintenance Administrationman First Class (E-6). *AZC:* Chief Aviation Maintenance Administrationman (E-7). *AZCS:* Senior Chief Aviation Maintenance Administrationman (E-8). *AZCM:* Master Chief Aviation Maintenance Administrationman (E-9).

Description

Summary: Performs or supervises clerical duties including typewriting, office machine operations, preparation of correspondence and reports, filing, and records administration for the Navy aviation maintenance program. *AZ3:* Types correspondence and reports (a straight-copy typing rate of at least 20 words per minute is required); uses duplicating or photocopy equipment; maintains files and a technical library. *AZ2:* Able to perform the duties required for AZ3; prepares, verifies, and maintains aircraft logs and records; prepares and processes work requests; determines the need for updating aeronautical technical libraries and distributes updates. *AZ1:* Able to perform the duties required for AZ2; supervises administrative procedures of the office; analyzes dates; prepares data in narrative, tabular, chart, or graphic form. *AZC:* Able to perform the duties required for *AZ1*;: schedules aircraft and equipment for maintenance; coordinates unscheduled maintenance actions; screens and interprets messages and instructions; analyzes reports; determines data requirements for aircraft maintenance activities. *AZCS:* Able to perform the duties required for AZC; determines personnel and material needs; prepares directives and instructions for improving operations; develops a program for interviewing, evaluating, and assigning personnel for maximum utilization; organizes, schedules, and evaluates training programs; develops objectives for preventive maintenance and quality assurance programs; coordinates the preparation and dissemination of safety instructions applicable to aviation maintenance; provides information and advice on utilization, capabilities, reliability, and operations. *AZCM:* Able to perform the duties required for AZCS; formulates guidelines for safety and assists in the analysis of aircraft accident reports; forecasts future requirements; plans and initiates action to satisfy requirements; establishes goals and priorities; reviews and evaluates space, personnel, equipment, and material requirements; recommends, prepares, and submits aviation maintenance staff studies; plans, organizes implements, and controls activities in compliance with policy statements, operation orders, and directives; plans and forecasts workload requirements; administers aircraft and component inventory, requisition, receipt, transfer, and survey; develops operating budgets and monitors expenditures.

Recommendation, AZ3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in office machines, 2 in filing, and 2 in clerical office procedures, and additional credit in typewriting on the basis of institutional evaluation (2/77).

Recommendation, AZ2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in office machines, 2 in filing, 3 in clerical office procedures, and 3 in record keeping, and additional credit in typewriting on the basis of institutional evaluation (2/77).

Recommendation, AZ1

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in office machines, 2 in filing, 3 in clerical office procedures, 3 in record keeping, and 3 in office management, and additional credit in typewriting on the basis of institutional evaluation (2/77).

Recommendation, AZC

In the vocational certificate category, 2 semester hours in office machines, 2 in filing, 3 in clerical office procedures, 3 in record keeping, 3 in office management, and 2 in business communications, and additional credit in typewriting on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 2 semester hours in office machines, 2 in filing, 3 in clerical office procedures, 3 in record keeping, 3 in office management, 2 in business communications, and 1 in personnel supervision, and additional credit in typewriting on the basis of institutional evaluation (2/77).

Recommendation, AZCS

In the vocational certificate category, the recommendation is the same as that for AZC. In the lower-division baccalaureate/associate degree category, 2 semester hours in office machines, 2 in filing, 3 in clerical office procedures, 3 in record keeping, 3 in office management, 2 in business communications, and 2 in personnel supervision, and additional credit in typewriting on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for field experience in management (2/77).

Recommendation, AZCM

In the vocational certificate category, 2 semester hours in office machines, 2 in filing, 3 in clerical office procedures, 3 in record keeping, 3 in office management, 2 in business communications, and 3 in technical writing, and additional credit in typewriting on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 2 semester hours in office machines, 2 in filing, 3 in clerical office procedures, 3 in record keeping, 3 in office management, 2 in business communications, 3 in personnel supervision, 3 in management electives, and 3 in technical writing, and additional credit in typewriting on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for field experience in management, and 3 in management problems, and additional credit in human relations and personnel management on the basis of institutional evaluation (2/77).

BOATSWAIN'S MATE

BM3
BM2
BM1
BMC
BMCS
BMCM

Exhibit Dates: 6/71–12/89.

Occupational Field: 1 (General Seamanship).

Career Pattern

SN: Seaman (E-3). *BM3:* Boatswain's Mate Third Class (E-4). *BM2:* Boatswain's Mate Second Class (E-5). *BM1:* Boatswain's Mate First Class (E-6). *BMC:* Chief Boatswain's Mate (E-7). *BMCS:* Senior Chief Boatswain's Mate (E-8). *BMCM:* Master Chief Boatswain's Mate (E-9).

Description

Summary: Knows shipboard operations, including stevedoring and maintenance; operates and maintains small boats and deck equipment and machinery; is knowledgeable of rigging, ship's security, deck seamanship, and navigation and piloting. *BM3:* Prepares metal and wood surfaces for primers and paints; prepares and applies primers and paints; rigs cargo-handling equipment to replenish ship at sea; handles cargo in port; knows signals for directing winch and crane operators; cares for and stows natural fiber, synthetic, and wire rope; makes fenders and eye splices; handles small boats as coxswain; uses navigational aids; understands limitations of small boats in rough weather, low visibility, and capacity; interprets Nautical Rules of the Road regarding crossing and overtaking situations and avoiding collisions; reads compasses; steers by compass; operates and maintains sewing machines for sewing canvas; stands watch as boatswain's-mate-of-the-watch at sea and in port; sends and receives communications by semaphore and flashing light; uses, maintains, repairs, and overhauls blocks, tackles, and shipboard rigging. *BM2:* Able to perform the duties required for BM3; supervises cargo handling; supervises rigging for fueling at sea, using the astern, constant-tension, spanwire, and close-in methods; maintains and overhauls anchors, chains, cables, connecting links and shackles; determines weather conditions from visual observations and instruments; rigs for towing and being towed; inspects and maintains lifeboats, life rafts, and survival equipment; launches and recovers lifeboats and ship's small craft; maintains hull records, painting records, and inventories of equipment, tools, and paint; obtains replacement equipment, tools and paint; prepares hull reports; supervises 6-40 persons performing work details, deck functions, general upkeep of ship, and maintenance and repair of deck equipment; maintains discipline; serves as master-at-arms and police petty officer. *BM1:* Able to perform the duties required for BM2; supervises repair parties during shipboard emergencies; determines ship's position by bearing, cross-bearing, and running fix; computes effects of wind and current; determines the appropriate rigging method to use; plans, organizes, and assigns work for 6-40 persons and trains and supervises them in all aspects of seamanship, equipment maintenance, and spare parts inventory; keeps records and logs. *BMC:* Able to perform the duties required for BM1; supervises the handling and storing of ammunition and flammables; supervises ship repair crews and the care, maintenance, and overhaul of ground tackle and rigging for mooring; operates and maneuvers service craft and other small craft in amphibious, docking and undocking, and rescue operations; uses tide and current tables and navigational aids; uses the three-minute rule to determine speed-distance-time; has a working knowledge of the inland and international Nautical Rules of the Road. *BMCS:* Able to perform the duties required for BMC; calculates the stability of the ship; coordinates shipboard activities during cargo operations and anchoring and mooring while underway and in port; supervises persons in all rates in a division of 20-30 persons; organizes and schedules training programs; prepares information directives and instructions for obtaining organizational objectives; prepares correspondence; establishes and implements a program for evaluating and assigning personnel; evaluates the division's effectiveness and initiates improvements. *BMCM:* Able to perform the duties required for BMCS; establishes objectives and priorities in area of responsibility; administers departmental long-range programs; coordinates salvage and rescue operations; develops operating budgets and monitors expenditures; plans;

organizes, and implements all deck departmental operations aboard ship in accordance with policies and procedures; reviews recommendations for individual advancement and career developments; reviews personnel, equipment, and material requirements and makes appropriate recommendations.

Recommendation, BM3

In the vocational certificate category, 3 semester hours in seamanship, 3 in rigging, and 1 in small crane signaling; if the duty assignment was boat coxswain, additional credit in small boat handling on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship; if the duty assignment was boat coxswain, additional credit in small boat handling on the basis of institutional evaluation (12/76).

Recommendation, BM2

In the vocational certificate category, 4 semester hours in seamanship, 4 in rigging, 2 in record keeping, 2 in small boat maintenance, 2 in police science (security), and 1 in small crane signaling; if the duty assignment was boat coxswain, additional credit in small boat handling on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 4 semester hours in seamanship, 2 in record keeping, and 2 in personnel supervision; if the duty assignment was boat coxswain, additional credit in small boat handling on the basis of institutional evaluation (12/76).

Recommendation, BM1

In the vocational certificate category, 5 semester hours in seamanship, 4 in rigging, 2 in record keeping, 2 in small boat maintenance, 2 in police science (security), and 1 in small crane signaling; if the duty assignment was boat coxswain, additional credit in small boat handling on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 5 semester hours in seamanship, 3 in personnel supervision, and 2 in record keeping; if the duty assignment was boat coxswain, additional credit in small boat handling on the basis of institutional evaluation (12/76).

Recommendation, BMC

In the vocational certificate category, 5 semester hours in seamanship, 4 in rigging, 2 in record keeping, 2 in small boat maintenance, 2 in police science (security), and 1 in small crane signaling; if the duty assignment was boat coxswain, additional credit in small boat handling on the basis of institutional evaluation; if the duty assignment was boat captain of a harbor service craft, 3 additional semester hours in coastline navigation and piloting. In the lower-division baccalaureate/associate degree category, 5 semester hours in seamanship, 3 in personnel supervision, 3 for field experience in management, and 2 in record keeping; if the duty assignment was boat coxswain, additional credit in small boat handling on the basis of institutional evaluation; if the duty assignment was boat captain of a harbor service craft, 3 additional semester hours in coastline navigation and piloting (12/76).

Recommendation, BMCS

In the vocational certificate category, 5 semester hours in seamanship, 4 in rigging, 3 in record keeping, 2 in small boat maintenance, 2 in police science (security), and 1 in small crane signaling; if the duty assignment was boat coxswain, additional credit in small boat handling on the basis of institutional evaluation; if the duty assignment was boat captain of a harbor service craft, 3 additional semester hours in coastline navigation and piloting. In the lower-division baccalaureate/associate degree category, 5 semester hours in seamanship, 3 in personnel supervision, 3 for field experience in management, 3 in record keeping, and 3 in management electives; if the duty assignment was boat coxswain, additional credit in small boat handling on the basis of institutional evaluation; if the duty assignment was boat captain of a harbor service craft, 3 additional semester hours in coastline navigation and piloting. In the upper-division baccalaureate category, 3 semester hours for a practicum in management, and additional credit in human relations on the basis of institutional evaluation (12/76).

Recommendation, BMCM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for BMCS. In the upper-division baccalaureate category, 6 semester hours for a practicum in management, 3 in personnel management, 3 in management problems, and additional credit in human relations on the basis of institutional evaluation (12/76).

Occupational Field: 1 (General Seamanship).

Career Pattern

SN: Seaman (E-3). *BM3:* Boatswain's Mate Third Class (E-4). *BM2:* Boatswain's Mate Second Class (E-5). *BM1:* Boatswain's Mate First Class (E-6). *BMC:* Chief Boatswain's Mate (E-7). *BMCS:* Senior Chief Boatswain's Mate (E-8). *BMCM:* Master Chief Boatswain's Mate (E-9).

Description

Summary: Knows shipboard operations including stevedoring and maintenance; operates and maintains small boats and deck equipment and machinery; is knowledgeable of rigging, ship's security, deck seamanship, and navigation and piloting. *BM3:* Prepares metal and wood surface for primers and paints; prepares and applies primers and paints; rigs cargo handling equipment to replenish ship at sea; handles cargo in port; knows signals for directing winch and crane operators; cares for and stows natural fiber, synthetic, and wire rope; makes fenders and eye splices; handles small boats as coxswain; uses navigational aids; understands limitations of small boats in rough weather, low visibility, and capacity; interprets Nautical Rules of the Road regarding crossing and overtaking situations and avoiding collisions; reads compasses; steers by compass; operates and maintains sewing machine for sewing canvas; stands watch as boatswain's-mate-of-watch at sea and in port; uses, maintains, repairs, and overhauls blocks, tackles, and shipboard rigging. *BM2:* Able to perform the duties required for BM3; supervises cargo handling; supervises rigging for fueling at sea, using the astern, constant-tension, span-wire, and close-in methods; maintains and overhauls anchors, chains, cables, connecting links, and shackles; performs damage control and basic firefighting procedures; rigs for towing and being towed; inspects and maintains lifeboats, life rafts, and survival equipment; launches and recovers lifeboats and ship's small craft; maintains hull records, painting records, and inventories of equipment, tools and paints; obtains replacement equipment, tools, and paint; prepares hull reports; supervises 6-40 persons performing work details, deck functions, general upkeep of ship, and maintenance and repair of deck equipment; maintains discipline; serves as master-at-arms and police petty officer. *BM1:* Able to perform the duties required for BM2; supervises repair parties during shipboard emergencies; determines ship's position by bearing, cross-bearing, and running fix; computes effects of wind and current; determines the appropriate rigging method to use; plans, organizes, and assigns work for 6-40 persons and trains and supervises them in all aspects of seamanship, equipment maintenance, and spare parts inventory; keeps records and logs. *BMC:* Able to perform the duties required for BM1; supervises the handling and sorting of ammunition and flammables; supervises ship repair crews and the care, maintenance, and overhaul of ground tackle and rigging for mooring; operates and maneuvers service craft and other small craft in amphibious docking and undocking, and rescue operations; uses tide and current tables and navigational aids; uses the three-minute rule to determine speed-distance-time; has a working knowledge of the inland and international Nautical Rules of the Road. *BMCS:* Able to perform the duties required for BMC; calculates the stability of the ship; coordinates shipboard activities during cargo operations and anchoring and mooring while underway and in port; supervises persons in all rates in a division of 20-30 persons; organizes and schedules training programs; prepares information directives and instructions for attaining organizational objectives; prepares correspondence; establishes and implements a program for evaluating and assigning personnel; evaluates the division's effectiveness and initiates improvements. *BMCM:* Able to perform the duties required for BMCS: establishes objectives and priorities in area of responsibility; administers departmental long-range programs; coordinates salvage and rescue operations; develops operating budgets and monitors expenditures; plans, organizes, and implements all deck departmental operations aboard ship in accordance with policies and procedures; reviews and evaluates personnel, equipment, and material requirements and makes appropriate recommendations.

Recommendation, BM3

In the vocational certificate category, 1 semester hour in small boat handling, 1 in basic firefighting, 2 in rigging, and 2 in boat maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship and 2 in record-keeping (12/89).

Recommendation, BM2

In the vocational certificate category, the recommendation is the same as that for BM3. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 1 in advanced seamanship, 3 in record keeping, and 2 in personnel supervision (12/89).

Recommendation, BM1

In the vocational certificate category, the recommendation is the same as that for BM3. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 1 in advanced seamanship, 3 in recordkeeping, 3 in personnel supervision, and 1 in supply management (12/89).

Recommendation, BMC

In the vocational certificate category, the recommendation is the same as that for BM3. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 1 in advanced seamanship, 3 in recordkeeping, 3 in personnel supervision, 2 in supply management, 3 in coastal navigation and piloting, and 1 in personnel administration (12/89).

Recommendation, BMCS

In the vocational certificate category, the recommendation is the same as that for BM3. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for BMC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/89).

Recommendation, BMCM

In the vocational certificate category, the recommendation is the same as that for BM3. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for BMC. In the upper-division baccalaureate category, 6 smester hours for field experience in management and 3 in management problems (12/89).

(12/89).

BT2
BT1
BTC
BTCS
BTCM

Exhibit Dates: 1/77–12/89. NOTE: The Boiler Technician rating has undergone several changes. In 6/71, there were two ratings: Boilermaker (BR) and Boilerman (BT). In 6/72, the title of Boilerman (BT) was changed to Boiler Technician (BT). In 1/77, the Boilermaker (BR) rating was discontinued and the duties were incorporated into the Boiler Technician (BT) rating. This evaluation covers the period from 1/77–12/89.

Occupational Field: 3 (Marine Engineering).

Career Pattern

FN: Fireman (E-3). *BT3:* Boiler Technician, Third Class (E-4). *BT2:* Boiler Technician, Second Class (E-5). *BT1:* Boiler Technician, First Class (E-6). *BTC:* Chief Boiler Technician (E-7). *BTCS:* Senior Chief Boiler Technician (E-8). *BTCM:* Master Chief Boiler Technician (E-9).

Description

Summary: Operates and performs maintenance on marine boilers, pumps, blowers, and heat exchangers. *BT3:* Performs tests on boiler water, fuel and lubricating oils; operates and performs preventive maintenance on boilers and boiler auxiliary equipment; operates distilling plants; tests and calibrates gauges; exercises environmental control procedures to prevent or minimize air pollution and oil spills; completes maintenance data forms. *BT2:* Able to perform the duties required for BT3; recognizes and corrects boiler operating malfunctions; may supervise a fireroom watch; completes maintenance reports; inventories installed equipment and orders repair parts and tools; computes and records daily fuel oil and water receipts and expenditures. *BT1:* Able to perform the duties required for BT2; inspects boilers and advises on replacement and repair actions; installs boiler furance brickwork and insulation; instructs fireroom personnel in maintenance procedures and equipment operation; reviews maintenance data forms; prepares weekly maintenance schedules. *BTC:* Able to perform the duties required for BT; supervises maintenance and repair work; prepares reports; conducts on-the-job training; monitors maintenance and handling of logs, records, accounts, and reports; prepares quarterly maintenance schedules. *BTCS:* Able to perform the duties required for BTC; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; prepares directives and instructions for attaining organization objectives; prepares correspondence; organizes and schedules training programs; administers a long-range planned maintenance program. *BTCM:* Able to perform the duties required for BTCS; reviews personnel, equipment, and material requirements, and forecasts future requirements; supervises inspections; develops operating budgets and monitors expenditures.

Recommendation, BT3

In the vocational certificate category, 6 semester hours in mechanical maintenance or engine maintenance, 1 in blueprint reading, and 3 in maintenance technology. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic marine engineering (steam generation), 3 in mechanical maintenance or engine maintenance, 1 in blueprint reading, and 3 in maintenance technology (12/78).

Recommendation, BT2

In the vocational certificate category, 10 semester hours in mechanical maintenance or engine maintenance, 1 in blueprint reading, 6 in maintenance technology, and 1 in record keeping. In the lower-division baccalaureate/associate degree category, 4 semester hours in basic marine engineering (steam generation), 4 in mechanical maintenance or engine maintenance, 1 in blueprint reading, 4 in maintenance technology, and 1 in record keeping (12/78).

Recommendation, BT1

In the vocational certificate category, the recommendation is the same as that for BT2. In the lower-division baccalaureate/associate degree category, 4 semester hours in basic marine engineering (steam generation), 4 in mechanical maintenance or engine maintenance, 1 in blueprint reading, 4 in maintenance technology, 1 in record keeping, 2 in personnel supervision, 2 in maintenance management, and 3 in human relations (12/78).

Recommendation, BTC

In the vocational certificate category, the recommendation is the same as that for BT2. In the lower-division baccalaureate/associate degree category, 4 semester hours in basic marine engineering (steam generation), 4 in mechanical maintenance or engine maintenance, 1 in blueprint reading, 4 in maintenance technology, 2 in record keeping, 3 in personnel supervision, 3 in maintenance management, and 3 in human relations (12/78).

Recommendation, BTCS

In the vocational certificate category, the recommendation is the same as that for BT2. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for BTC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/78).

Recommendation, BTCM

In the vocational certificate category, the recommendation is the same as that for BT2. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for BTC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (12/78).

BUILDER

BU3
BU2
BU1
BUC
BUCS

Exhibit Dates: 6/71–Present.

Occupational Field: 13 (Construction).

Career Pattern

CN: Constructionman (E-3). *BU3:* Builder Third Class (E-4). *BU2:* Builder Second Class (E-5). *BU1:* Builder First Class (E-6). *BUC:* Chief Builder (E-7). *BUCS:* Senior Chief Builder (E-8). *CUCM:* Master Chief Contructionman (E-9).

Description

Summary: Performs tasks required for construction, maintenance, and repair of wooden, concrete, and masonry structures, concrete pavement, and waterfront and underwater structures. *BU3:* Places reinforcing steel; erects form members and strip forms; installs asphalt and vinyl floor coverings, interior wall coverings, door and window trim, moldings and glass; mixes, places, and finishes concrete; contructs masonry, metal, light wood frame, and timber structures; operates and performs operator maintenance on assigned vehicles and on diesel and gas driven air compressors and portable generators; performs calculations for simple areas and volumes; identifies and interprets grade and site stakes. *BU2:* Able to perform the duties required for BU3; works from construction drawings and specifications; draws simple shop drawings and sketches; prepares standard requisitions; performs shoring of small excavations; performs layout for and directs crews in erecting and stripping concrete form; establishes lines and elevations and layout for concrete masonry unit and brick construction; performs layout plan, and directs crews in the construction of light wood frame and timber structures; erects pre-engineered buildings; directs crews in mixing, placing, finishing, and curing concrete; computes quantities of materials for various concrete mixes, mortar, and stucco; applies roofing materials; operates and maintains paint-spraying and concrete-pumping equipment; operates and performs operator maintenance on stud guns; computes volume of irregular shaped solids. *BU1:* Able to perform the duties required for BU2; prepares work progress reports; implements training for team and crew members; performs shoring of large excavations, buildings and structures; directs installation of all types of interior walls, tile, and suspended acoustic tile systems; directs pile-driving operations and teams in the construction of wood, masonry, and metal structures; directs crews in concrete construction; organizes daily work assignments; prepares equipment, manpower, and material estimates; uses principles of Critical Path Method (CPM) scheduling; performs construction and maintenance inspections; conducts slump tests on concrete and adjusts mixes; performs duties of carpenter shop supervisor, shop planner, and maintenance scheduler. *BUC:* Able to perform the duties required for BU1; drafts correspondence; prepares reports; supervises and coordinates all unit tasks; provides technical advice and assistance on plans and specifications and on construction and maintenance techniques; implements maintenance and cost control program; prepares and maintains progress charts. *BUCS:* Able to perform the duties required for BUC; provides information and advice on operations in own area of responsibility; prepares local directives and instructions for attaining organizational objectives and improving operations; establishes and implements a program to assure maximum utilization of personnel; determines requirements for advanced planning; coordinates equipment assignment; is capable of directing the operation and maintenance of all utilities and the repair, alteration and maintenance of all facilities under the congnizance of a public works department; directs transportation and equipment services to all activities and supervises maintenance of all equipment used for that purpose; establishes maintenance and cost control program; coordinates the preparation and submission of related reports.

Recommendation, BU3

In the vocational certificate category, 3 semester hours in introduction to construction, 3 in construction techniques, and 2 in equipment operation and maintenance. In the upper-division baccalaureate category, 1 semester hour in construction materials and 1 in construction techniques (1/77).

Recommendation, BU2

In the vocational certificate category, 6 semester hours in construction techniques, 3 in introduction to construction, 3 in construction materials, 2 in blueprint reading, and 2 in equipment operation and maintenance. In the lower-division baccalaureate/associate degree category, 2 semester hours in construction techniques, 2 in general plans and specifications, and 1 in construction materials (1/77).

Recommendation, BU1

In the vocational certificate category, 9 semester hours in construction techniques, 3 in introduction to construction, 3 in construction materials, 3 in estimating and scheduling, 3 in technical mathematics, 2 in blueprint reading, and 2 in equipment operation and maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in construction techniques, 2 in general plans and specifications, 2 in fundamentals of supervision, 1 in construction materials, 1 in construction estimating, 1 in construction management, and 1 in technical mathematics (1/77).

Recommendation, BUC

In the vocational certificate category, the recommendation is the same as that for BU1. In the lower-division baccalaureate/associate degree category, 3 semester hours in construction techniques, 3 in fundamentals of supervision, 3 for field experience in construction management, 3 in general plans and specifications, 2 in construction management, 2 in records and cost control, 2 in construction materials, 1 in construction estimating, and 1 in technical mathematics (1/77).

Recommendation, BUCS

In the vocational certificate category, the recommendation is the same as that for BU1. In the lower-division baccalaureate/associate degree category, 6 semester hours for field experience in construction management, 3 in construction techniques, 3 in fundamentals of supervision, 3 in general plans and specifications, 3 in records and cost control, 2 in construction management, 2 in construction materials, 2 in technical writing, and 1 in technical mathematics. In the upper-division baccalaureate category, 3 semester hours for a practicum in management and 3 in human relations (1/77).

CE1
CEC
CECS

Exhibit Dates: 6/72–Present.

Occupational Field: 13 (Construction).

Career Pattern

CN: Constructionman (E-3). *CE3:* Construction Electrician Third Class (E-4). *CE2:* Construction Electrician Second Class (E-5). *CE1:* Construction Electrician First Class (E-6). *CEC:* Chief Construction Electrician (E-7). *CECS:* Senior Chief Construction Electrician (E-8). *UTCM:* Master Chief Utilitiesman (E-9).

Description

Summary: Plans supervises, and performs tasks required to install, operate, service, and overhaul electric generating and distribution systems, wire communication systems, and associated equipment. *CE3:* Erects and climbs poles; installs storage and dry cell batteries; installs electrical appliances and equipment; operates vehicles and performs pre-start checks and operator maintenance; performs preventive maintenance and minor repairs on electrical power tools, appliances, and equipment, and on interior wiring systems, power distribution systems, and tactical field telephone systems. *CE2:* Able to perform the duties required for CE3; draws simple shop drawings and sketches; reads and works from construction drawings and specifications; prepares time cards and material requisitions; installs advanced-base type generators and distribution panels, public address equipment, electrical conduits, wiring systems, automatic controls for boilers and for air-conditioning and refrigeration equipment; operates and performs pre-start checks and operator maintenance on auger trucks and bucket trucks; maintains and repairs tactical field telephones, appliances, and equipment, wiring systems, automatic controls for boilers and for air-conditioning and refrigeration systems, distribution systems, and public address systems. *CE1:* Able to perform the duties required for CE2; prepares as-built drawings; prepares work progress and material usage reports; conducts personnel readiness program interviews; maintains standard forms used by the maintenance or utilities division of a public works activity; implements training for team or crew members; directs personnel in the installation and operation of advanced-base type generating equipment, security and air field lighting systems, and fire detection and alarm systems; organizes work assignments; prepares estimates from drawings and specifications; conducts inspections; troubleshoots systems; performs technical maintenance and repairs; calibrates automatic controls; computes load requirements. *CEC:* Able to perform the duties required for CE1; prepares letters, instructions, and reports; administers safety program; assigns personnel; supervises and coordinates all tasks assigned to a unit; provides technical advice and assistance; implements cost control program. *CECS:* Able to perform the duties required for CEC; prepares local directives and instructions for attaining organizational objectives; establishes and implements a program to assure maximum utilization of personnel and equipment; directs the operation and maintenance of all facilities and equipment used in the public works department; organizes, schedules, and evaluates training programs.

Recommendation, CE3

In the vocational certificate category, 3 semester hours in basic electricity and 3 in introduction to construction. In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity. Advanced standing in a construction electrician apprentice training program on the basis of employer or trade association performance examination (1/77).

Recommendation, CE2

In the vocational certificate category, 3 semester hours in basic electricity, 3 in intermediate electricity, 3 in introduction to construction, and 2 in blueprint reading. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 2 in blueprint reading, and 1 in electrical construction laboratory. Advanced standing in a construction electrician apprentice training program on the basis of employer or trade association performance examination (1/77).

Recommendation, CE1

In the vocational certificate category, 3 semester hours in basic electricity, 3 in intermediate electricity, 3 in advanced electricity, 3 in introduction to construction, and 2 in blueprint reading. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 2 in electrical construction laboratory, 2 in electrical problems (toubleshooting), 2 in blueprint reading, 1 in records administration, and 1 in personnel supervision. Advanced standing in a construction electrician apprentice training program on the basis of employer or trade association performance examination (1/77).

Recommendation, CEC

In the vocational certificate category, the recommendation is the same as that for CE1. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 2 in electrical construction laboratory, 2 in electrical problems (troubleshooting), 2 in blueprint reading, 2 in shop management, 2 in personnel supervision, 1 in records administration, and 1 in safety management. In the upper-division baccalaureate category, 3 semester hours in human relations. Advanced standing in a construction electrician apprentice training program on the basis of employer or trade association performance examination (1/77).

Recommendation, CECS

In the vocational certificate category, the recommendation is the same as that for CE1. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in personnel supervision, 2 in electrical construction laboratory, 2 in electrical problems (troubleshooting), 2 in blueprint reading, 2 in shop management, 2 in records administration, and 1 in safety management. In the upper-division baccalaureate category, 3 semester hours in human relations and 3 for a practicum in management. Advanced standing in a construction electrician apprentice training program on the basis of employer or trade association performance examination (1/77).

NER-CM-001

CM2
CM1
CMC
CMCS

Exhibit Dates: 6/71-Present.

Occupational Field: 13 (Construction).

Career Pattern

CN: Constructionman (E-3). *CM3:* Construction Mechanic Third Class (E-4). *CM2:* Construction Mechanic Second Class (E-5). *CM1:* Construction Mechanic First Class (E-6). *CMC:* Chief Construction Mechanic (E-7). *CMCS:* Senior Chief Construction Mechanic (E-8). *EQCM:* Master Chief Equipmentman (E-9).

Description

Summary: Maintains, repairs, and overhauls automotive, construction, and materials-handling equipment; keeps equipment maintenance records; prepares requisitions and reports; trains subordinates in maintenance procedures and techniques. *CM3:* Works from shop drawings, specifications, and repair and parts manuals; performs preventive maintenance; operates equipment during test procedures; repairs braking systems; tests electrical systems and makes minor repairs. *CM2:* Able to perform the duties required for CM3; prepares time sheets, material distribution records, equipment historical files, and parts and material requisitions; performs engine diagnosis and corrects problems through subassembly repair or replacement; repairs and adjusts steering system; performs minor body repairs and painting; performs gas welding, cutting, and brazing; operates construction, automotive, and material equipment during diagnosis and testing; rebuilds components. *CM1:* Able to perform the duties required for CM2; prepares work progress reports and provides material usage data; conducts personnel readiness capability program interviews; prepares vehicle and equipment inspection reports; implements training for crews and overhauls internal-combustion engines; diagnoses engine malfunctions; tests, diagnoses, overhauls, and adjusts diesel engine fuel systems; diagnoses malfunctions and repairs power train units (except torque convertor power shift and automatic transmission); troubleshoots hydraulic, air, and vacuum braking systems; supervises personnel repairing automotive, construction, and material-handling equipment; performs diagnosis and repair of standard and electronic ignition systems, using test equipment; organizes work assignments for team and crew leaders; prepares equipment, manpower, and material estimates from drawings and specifications; uses principles and techniques of Critical Path Method (CPM) scheduling; identifies fossil fuel and combustion polluting components and applies atmospheric pollution control measures. *CMC:* Able to perform the duties required for CM1; drafts letters, instructions, and notices; prepares reports; administers accident prevention program; coordinates the assignment of tasks to department and unit personnel; provides technical advice and assistance; implements maintenance and cost control program; organizes and controls the use of equipment and material. *CMCS:* Able to perform the duties required for CMC; organizes, schedules, and evaluates training programs; prepares directives and instructions for attaining organizational objectives; prepares correspondence; establishes and implements a program for interviewing and evaluating personnel; coordinates equipment assignment among various units, according to priorities; directs transportation and equipment services; establishes maintenance and cost control program; coordinates and evaluates labor reporting, material and equipment usage, and maintenance data; prepares and submits related reports.

Recommendation, CM3

In the vocational certificate category, 9 semester hours in diesel, truck, or automotive mechanics and 1 in care and use of tools. In the lower-division baccalaureate/associate degree category, 4 semester hours in automotive, diesel, or truck mechanics and 1 in care and use of tools. In an automotive, diesel, or truck mechanic apprentice training program, 1,500 clock hours of experience and 144 contact hours of related instruction (1/77).

Recommendation, CM2

In the vocational certificate category, 15 semester hours in diesel, truck, or automotive mechanics and 1 in care and use of tools. In the lower-division baccalaureate/associate degree category, 6 semester hours in automotive, diesel, or truck mechanics, 3 in shop practices, and 1 in care and use of tools. In an automotive, diesel, or truck mechanic apprentice training program, 3,000 clock hours of experience and 288 contact hours of related instruction (1/77).

Recommendation, CM1

In the vocational certificate category, 18 semester hours in diesel, truck, or automotive mechanics and 1 in care and use of tools. In the lower-division baccalaureate/associate degree category, 9 semester hours in diesel, truck, or automotive mechanics, 3 in shop practices, 2 in personnel supervision, 1 in records administration, and 1 in care and use of tools. In an automotive, diesel, or truck mechanic apprentice training program, 6,000 clock hours of experience and 432 contact hours of related instruction (1/77).

Recommendation, CMC

In the vocational certificate category, 18 semester hours in diesel, truck, or automotive mechanics and 1 in care and use of tools. In the lower-division baccalaureate/associate degree category, 9 semester hours in diesel, truck, or automotive mechanics, 3 in shop practices, 3 in personnel supervision, 2 in records administration, and 1 in care and use of tools. Journeyman status (defined as 8,000 clock hours of experience and 576 contact hours of related instruction) as an automotive, diesel, or truck mechanic (1/77).

Recommendation, CMCS

In the vocational certificate category, 18 semester hours in diesel, truck, or automotive mechanics, 3 in leadership, and 1 in care and use of tools. In the lower-division baccalaureate/associate degree category, 9 semester hours in diesel, truck, or automotive mechanics, 3 in shop practices, 3 in personnel supervision, 3 in records administration, 3 in introduction to management, and 1 in care and use of tools. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in human relations. Journeyman status (defined as 8,000 clock hours of experience and 576 contact hours of related instruction) as an automotive, diesel, or truck mechanic (1/77).

NER-CN-001

CONSTRUCTIONMAN

Exhibit Dates: 6/71–Present.

Career Pattern

Constructionman (CN) is a general rate (Naval apprenticeship) for persons at pay grades E-1 (recruit), E-2 (Constructionman apprentice), and E-3 (Constructionman). At pay grade E-4 (petty officer third class), the person may enter any one of the following ratings: Builder (BU), Construction Electrician (CE), Construction Mechanic (CM), Engineering Aid (EA), Equipment Operator (EO), Steelworker (SW), or Utilitiesman (UT).

Description

Is introduced to all phases of construction work, including construction equipment operation and equipment maintenance, surveying and drafting, site preparaton and earthwork, concrete and masonry, steelwork, carpentry and painting, utilities, and tools; understands the mission of the various operating units of the Naval construction force; reads simple sketches used in construction; has basic knowledge of map and compass techniques; knows hand signals for construction equipment operation; uses and maintains common measuring, cutting, line-clearing, manual excavating, and portable power tools; paints with brushes and rollers; knows safety requirements regarding construction equipment and tools, fuels, paints, and electricity; knows first-aid procedures for controlling bleeding, preparing and applying improvised splints, administering artificial respiration, treating heat exhaustion and heat stroke, and transporting injured persons; knows symptons of and immediate treatment for shock; can classify and administer first-aid treatment of burns.

Recommendation

In the vocational certificate category, 3 semester hours in introduction to construction procedures, 1 in map and compass reading and interpretation, and 1 in first aid. In the lower-division baccalaureate/associate degree category, 1 semester hour in map and compass reading and interpretation and 1 in first aid (1/77). NOTE: Credit for Constructionman (CN) should be granted only after pay grade E-3 has been achieved.

NER-CTA-001

ADMINISTRATIVE)

CTA3
CTA2
CTA1
CTAC
CTACS
CTACM

Exhibit Dates: 6/71–Present.

Occupational Field: 20 (Cryptology).

Career Pattern

SN: Seaman (E-3). *CTA3:* Cryptologic Technician, Administrative, Third Class (E-4). *CTA2::* Cryptologic Technician, Administrative, Second Class (E-5). *CTA1:* Cryptologic Technician, Administrative, First Class (E-6). *CTAC:* Chief Cryptologic Technician, Administrative (E-7). *CTACS:* Senior Chief Cryptologic Technician, Administrative (E-8). *CTACM:* Master Chief Cryptologic Technician, Administrative (E-9).

Description

Summary: Performs general office duties in an administrative office. NOTE: Many of the duties required for this rating involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledges associated with the rating were evaluated. *CTA3:* Types messages, correspondence, directives, and reports; operates office equipment; files correspondence and directives; types at 30 words per minute. *CTA2:* Able to perform the duties required for CTA3; types at 40 words per minute; drafts correspondence and messages; organizes and maintains files; estimates requirements and requisitions office supplies. *CTA1:* Able to perform the duties required for CTA2; types at 50 words per minute; requisitions, maintains, issues, and accounts for training and educational manuals and materials; advises personnel on educational and training matters. *CTAC:* Able to perform the duties required for CTA1; supervises the daily operation of an administration office; establishes work priorities and assigns work; ensures timely and accurate submission of reports; evaluates administrative reports and outgoing reports for adequacy and accuracy; interprets and analyzes manpower authorizations; coordinates preparation of manpower organization; coordinates submission of performance evaluations. *CTACS:* Able to perform the duties required for CTAC; manages the preparation, supervision, and evaluation of administrative functions; prepares recommended changes to administrative procedures; prepares local directives and instructions for attaining objectives; establishes and maintains a system for the control, updating, and maintenance of administrative files, instructions, and publications; interviews, evaluates, and assigns personnel; provides written evaluations of subordinate personnel; prepares correspondence and ensures its adequacy; and schedules local training programs. *CTACM:* Able to perform the duties required for CTACS; plans, organizes, implements, and controls administrative procedures that comply with policy statements; forecasts future requirements for personnel, equipment, and organization; establishes goals and objectives; reviews and evaluates personnel; performs organizational analysis, manpower analysis, and workloads; develops operating budget and monitors expenditures.

Recommendation, CTA3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in office practices and procedures and 2 in typewriting (2/81).

Recommendation, CTA2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 4 semester hours in office practices and procedures and 3 in typewriting (2/81).

Recommendation, CTA1

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 5 semester hours in office practices and procedures, 3 in typewriting, and 3 in written communications (2/81).

Recommendation, CTAC

In the vocational certificate category, the recommendation is the same as that for CTA1. In the lower-division baccalaureate/associate degree category, 5 semester hours in office practices and procedures, 3 in written communications, 3 in typewriting, and 2 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in introduction to management (2/81).

Recommendation, CTACS

In the vocational certificate category, the recommendation is the same as that for CTA1. In the lower-division baccalaureate/associate degree category, 5 semester hours in office practices and procedures, 3 in written communications, 3 in typewriting, 2 in personnel supervision, and 2 in administrative communications. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 2 in personnel management, and 3 for field experience in management (2/81).

Recommendation, CTACM

In the vocational certificate category, the recommendation is the same as that for CTA1. In the lower-division baccalaureate/associate degree category, 5 semester hours in office practices and procedures, 3 in written communications, 3 in typewriting, 2 in personnel supervision, 2 in administrative communications, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in personnel management, 3 for field experience in management, and 2 in management problems (2/81).

Description

Summary: Translates routine intercepted communications. NOTE: Many of the duties required for this rating involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledges associated with the rating were evaluated. *CTI3:* Possesses advanced abilities in at least one foreign language; translates routine intercepted communications; maintains logs, records, files, and publications; operates recording equipment; types 25 words per minute. *CTI2:* Able to perform the duties required for CTI3; identifies categories of significant intelligence alerts; plots bearings of intercepted signals; recognizes and reports unusual communication activity; prepares routine technical reports; identifies foreign languages likely to be encountered in the local signal environment. *CTI1:* Able to perform the duties required for CTI2; assists in the planning of support operations for designated missions; prepares technical reports; uses computers for word analysis of intercepted communications; writes personnel evaluation reports. *CTIC:* Able to perform the duties required for CTI1; supervises division-level foreign language processing activities; establishes and maintains a quality-control system for processing and reporting functions; prepares plans to assure coverage of intercepted messages; identifies procedures for handling sensitive and critical messages; prepares reports of activities. *CTICS:* Able to perform the duties required for CTIC; prepares, conducts and evaluates foreign language support activities; provides advice on utilization, reliability, capabilities, and operations; prepares directives and instructions for attaining unit objectives; prepares correspondence; interviews, evaluates and assigns personnel; writes evaluations of reports; establishes and maintains a system for control, corrrection and updating of publications file, instructions, and functional files; administers classified material control system and records disposal program; organizes and schedules local training programs. *CTICM:* Able to perform the duties required for CTICS; plans, organizes, implements, and controls activities that comply with policy statements; forecasts future requirements for personnel, material, and equipment; establishes goals, objectives, and priorities in own area of responsibility; reviews and evaluates personnel, including written evaluations; performs organizational analysis, manpower analysis, and workloads; develops operating budget and monitors expenditures.

Recommendation, CTI3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting, 1 in written communication skills, and 1 in oral communication skills. NOTE: Add credit for the specific foreign language in accordance with the recommendation in Volume 4 of the Guide to the Evaluation of Educational Experiences in the Armed Services (2/81).

Recommendation, CTI2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting, 2 in written communication skills, and 2 in oral communication skills. NOTE: Add credit for the specific foreign language in accordance with the recommendation in Volume 4 of the Guide to the Evaluation of Educational Experiences in the Armed Services (2/81).

Recommendation, CTI1

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting, 3 in written communication skills, and 3 in oral communication skills. NOTE: Add credit for the specific foreign language in accordance with the recommendation in Volume 4 of the Guide to the Evaluation of Educational Experiences in the Armed Services (2/81).

Recommendation, CTIC

In the vocational certificate category, the recommendation is the same as that for CTI1. In the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting, 3 in written communication skills, 3 in oral communication skills, and 2 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in introduction to management. NOTE: Add credit for the specific foreign language in accordance with the recommendation in Volume 4 of the Guide to the Evaluation of Educational Experiences in the Armed Services (2/81).

Recommendation, CTICS

In the vocational certificate category, the recommendation is the same as that for CTI1. In the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting, 3 in written communication skills, 3 in oral communication skills, 2 in personnel supervision, and 2 in administrative communications. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 for field experience in management and 2 in personnel management. NOTE: Add credit for the specific foreign language in accordance with the recommendation in Volume 4 of the Guide to the Evaluation of Educational Experiences in the Armed Services (2/81).

Recommendation, CTICM

In the vocational certificate category, the recommendation is the same as that for CTI1. In the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting, 3 in written communication skills, 3 in oral communication skills, 2 in personnel supervision, 2 in administrative communications, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 for field experience in management, 2 in management problems, and 3 in personnel management. NOTE: Add credit for the specific foreign language in accordance with the recommendation in Volume 4 of the Guide to the Evaluation of Educational Experiences in the Armed Services (2/81).

CRYPTOLOGIC TECHNICIAN, MAINTENANCE (COMMUNICATIONS TECHNICIAN, MAINTENANCE)

CTM3
CTM2
CTM1
CTMC
CTMCS
CTMCM

Exhibit Dates: 6/71–Present.

Occupational Field: 20 (Cryptology).

Career Pattern

SN: Seaman (E-3). *CTM3:* Cryptologic Technician, Maintenance, Third Class (E-4). *CTM2:* Cryptologic Technician, Maintenance, Second Class (E-5). *CTM1:* Cryptologic Technician, Maintenance, First Class (E-6). *CTMC:* Chief Cryptologic Technician, Maintenance (E-7). *CTMCS:* Senior Chief Cryptologic Technician, Maintenance (E-8). *CTMCM:* Master Chief Cryptologic Technician, Maintenance (E-9).

Description

Summary: Repairs and performs maintenance on electronic systems. NOTE: Many of the duties required for this rating involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledges associated with the rating were evaluated. *CTM3:* Repairs analog and digital electronic systems; reads schematic diagrams and identifies physical components; knows theory of operation and function of power supplies, amplifiers, oscillators, and fillers; uses meters, oscilloscopes, and signal generators to troubleshoot systems; knows the relationships between current, voltage, and power in AC and DC circuits containing resistors, capacitors, and inductors; uses Boolean Algebra truth tables to evaluate digital logic circuits; uses and maintains hand and power tools. *CTM2:* Able to perform the duties required for CTM3; performs maintenance on computers; knows theory of operation of digital computers including control units, memory, and input/output; knows techniques of analog-digital and digital-analog conversion; prepares maintenance schedules. *CTM1:* Able to perform the duties required for CTM2; aligns, adjusts, and calibrates electronic equipment; troubleshoots, diagnoses, and repairs complex malfunctions. *CTMC:* Able to perform the duties required for CTM1; provides maintenance support services; evaluates operational test results against engineering design standards on electronic systems; supervises and evaluates subordinate personnel; prepares written evaluation reports; establishes schedules of calibration, alignment and preventative maintenance; allocates and assigns personnel; manages safety program, determines safety of work areas, and corrects discrepancies; provides technical and supervisory liaison between assigned work centers. *CTMCS:* Able to perform the duties required for CTMC; prepares technical reports and evaluations on operational performance installed at assigned location; evaluates test and performance results against design standards, prepares directives for attaining unit objectives; evaluates and assigns personnel; prepares and implements local safety and security directives; administers long-range maintenance program; supervises and evaluates subordinate personnel. *CTMCM:* Able to perform the duties required for CTMCS; manages personnel and resources; plans, organizes, implements, and controls activities in maintenance of electronics equipment; coordinates overall maintenance effort with other departments; establishes goals, objectives, and priorities in own areas of responsibility; forecasts future requirements and initiates action to satisfy objectives and requirements; evaluates subordinate supervisors and other personnel; develops operating budget and monitors expenditures.

Recommendation, CTM3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in circuit analysis, 2 in solid-state circuitry, 3 in troubleshooting techniques, and 5 in digital electronics (2/81).

Recommendation, CTM2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in circuit analysis, 3 in solid-state circuitry, 5 in troubleshooting techniques, and 6 in digital electronics (2/81).

Recommendation, CTM1

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in circuit analysis, 4 in solid-state circuitry, 6 in troubleshooting techniques, and 7 in digital electronics (2/81).

Recommendation, CTMC

In the vocational certificate category, the recommendation is the same as that for CTM1. In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in circuit analysis, 4 in solid-state circuitry, 6 in troubleshooting techniques, 7 in digital electronics, and 2 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in introduction to management (2/81).

Recommendation, CTMCS

In the vocational certificate category, the recommendation is the same as that for CTM1. In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in circuit analysis, 4 in solid-state circuitry, 6 in troubleshooting techniques, 7 in digital electronics, 2 in personnel supervision, and 2in administrative communications. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 for field experience in management, and 2 in personnel management (2/81).

Recommendation, CTMCM

In the vocational certificate category, the recommendation is the same as that for CTM1. In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in circuit analysis, 4 in solid state circuitry, 6 in troubleshooting techniques, 7 in digital electronics, 2 in personnel supervision, 2 in administrative communications, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 for field experience in management, 2 in management problems, and 3 in personnel management (2/81).

Description

Summary: Operates on-line cryptographic devices and teletype equipment. NOTE: Many of the duties required for this rating involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledges associated with the rating were evaluated. *CTO3:* Sends and receives communications by automated communications processing systems; types at 35 words per minute; maintains logs, records, files, and publications; inspects, cleans, and makes operational adjustments to keyboard equipment. *CTO2:* Able to perform the duties required for CTO3; requisitions supplies and maintains stock level; prepares messages. *CTO1:* Able to perform the duties required for CTO2; types at 40 words per minute; prepares operations and technical reports; plans and conducts operations; identifies the purpose of the various special security communications systems and networks operated by Naval security. *CTOC:* Able to perform the duties required for CTO1; supervises and maintains communications center; supervises and evaluates subordinate personnel; prepares written evaluation reports; prepares requests for activation or deactivation of communications networks; allocates and tasks manpower assets to complete workload; manages safety program and maintenance program in work area. *CTOCS:* Able to perform the duties required for CTOC; prepares, supervises, and evaluates cryptographic operations; prepares changes to security regulations; advises on utilization, capabilities, reliability and operations in own area of responsibility; establishes and implements program for interviewing, evaluating, and assigning personnel; supervises classified material control systems; administers and evaluates security requirements; organizes and schedules local training programs. *CTOCM:* Able to perform the duties required for CTOCS; plans, organizes, implements, and controls activities that comply with policy statements; forecasts future requirements for own area of responsibility; establishes goals and objectives; reviews and evaluates personnel; performs organizational analysis, manpower analysis, and workloads; develops operating budget and monitors expenditures; may manage three or four Navy shops or shop crews.

Recommendation, CTO3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting (2/81).

Recommendation, CTO2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in typewriting (2/81).

Recommendation, CTO1

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting and 2 in introduction to computer operations (2/81).

Recommendation, CTOC

In the vocational certificate category, the recommendation is the same as that for CTO1. In the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting, 2 in introduction to computer operations, and 2 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in introduction to management (2/81).

Recommendation, CTOCS

In the vocational certificate category, the recommendation is the same as that for CTO1. In the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting, 2 in introduction to computer operations, 2 in personnel supervision, and 2 in administrative communications. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 2 in personnel management, and 3 for field experience in management (2/81).

Recommendation, CTOCM

In the vocational certificate category, the recommendation is the same as that for CTO1. In the lower-division baccalaureate/associate degree category, 3 semester hour hours in typewriting, 2 in introduction to computer operations, 2 in personnel supervision, 2 in administrative communications, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in personnel management, 3 for field experience in management, and 2 in management problems (2/81).

Description

Summary: Operates a computer system and monitors operational functions. NOTE: Many of the duties required for this rating involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledges associated with the rating were evaluated. *CTT3:* Able to identify and classify the general characteristics of electromagnetic energy, interference, and common emitters; operates a computer system; types at 20 words per minute; inspects, cleans, and makes necessary adjustments to keyboard equipment; performs minor repairs; maintains logs, records, files, and publications. *CTT2:* Able to perform the duties required for CTT3; prepares routine technical reports; uses analysis equipment including signal generators, graphic recorders, and spectrum analyzers. *CTT1:* Able to perform the duties required for CTT2; identifies and analyzes complex and sophisticated radio signals; performs system analysis to ensure effective data flow; prepares technical reports. *CTTC:* Able to perform the duties required for CTT1; supervises and maintains communications center; supervises and evaluates subordinate personnel; prepares written evaluation reports; prepares requests for activation or deactivation of communications networks; allocates and tasks manpower assets to complete workload; manages safety program and maintenance program in work area. *CTTCS:* Able to perform the duties required for CTTC; prepares, supervises, and evaluates crypotographic operations; prepares changes to security regulations; advises on utilization, capabilities, reliability, and operations in own area of responsibility; establishes and implements program for interviewing, evaluating, and assigning personnel; supervises classified material control systems; administers and evaluates security requirements; organizes and schedules local training programs. *CTTCM;:* Able to perform the duties required for CTTCS; plans, organizes, implements, and controls activities that comply with policy statements; forecasts future requirements for own area of responsibility; establishes goals and objectives; reviews and evaluates personnel; performs organizational analysis, manpower analysis, and workloads; develops operating budget and monitors expenditures; may manage 3 or 4 Navy shops or shop crews.

Recommendation, CTT3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting (2/81).

Recommendation, CTT2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting (2/81).

Recommendation, CTT1

In the vocational certificate category, 2 semester hours in typewriting and 3 in introduction to computer operations. In the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting, 3 in introduction to computer operations, and 1 in technical report writing (2/81).

Recommendation, CTTC

In the vocational certificate category, 2 semester hours in typewriting and 3 in introduction to computer operations. In the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting, 3 in introduction to computer operations, 1 in technical report writing, and 2 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in introduction to management (2/81).

Recommendation, CTTCS

In the vocational certificate category, 2 semester hours in typewriting and 3 in introduction to computer operations. In the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting, 3 in introduction to computer operations, 1 in technical report writing, 2 in personnel supervision, and 2 in administrative communications. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 for field experience in management, and 2 in personnel management (2/81).

Recommendation, CTTCM

In the vocational certificate category, 2 semester hours in typewriting and 3 in introduction to computer operations. In the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting, 3 in introduction to computer operations, 1 in technical report writing, 2 in personnel supervision, 2 in administrative communications, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 for field experience in management, 2 in management problems, and 3 in personnel management (2/81).

NER-CU-001

CONSTRUCTIONMAN, MASTER CHIEF

CUCM

Exhibit Dates: 6/71–Present.

Occupational Field: 13 (Construction).

Career Pattern

May progress to CUCM, Master Chief Constructionman (E-9), from BUCS, Senior Chief Builder (E-8), or EACS, Senior Chief Engineering Aid (E-8), or SWCS Senior Chief Steelworker (E-8).

Description

Able to perform the duties required for BUCS (Senior Chief Builder), OR EACS (Senior Chief Engineering Aid), OR SWCS (Senior Chief Steelworker); establishes goals and sets priorities in area of responsibility; uses the Critical Path Method; forecasts future personnel equipment, and material requirements and takes necessary action to satisfy them; develops procedures for work improvement and simplification through organizational analysis; prepares correspondence and reports; serves as a construction inspector; manages a contracts inspection branch; implements pollution control program and energy conservation program; assists in the management and operations of a public works department; develops operating budgets and monitors expenditures.

Recommendation

In the vocational certificate category, the recommendation is the same as that for BU1 (Builder First Class) in exhibit NER-BU-001 or EA1 (Engineering Aid First Class) in exhibit NER-EA-001 or NER-EA-002, or SW1 (Steelworker First Class), in exhibit NER-SW-001, as appropriate. In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of administration, 3 in construction contracts and agreements, and 3 in government budgeting procedures; add the 25 semester hours for BUCS (Senior Chief Builder) in exhibit NER-BU-001, or the 25 semester hours for EACS (Senior Chief Engineering Aid) in exhibit NER-EA-001, or the 26 semester hours in exhibit NER-EA-002, or the 21 semester hours for SWCS (Senior Chief Steelworker) in exhibit NER-SW-001. In the upper-division baccalaureate category, 3 semester hours for a practicum in management, 3 in forecasting, and 3 in management problems; add the 6 semester hours for BUCS in exhibit NER-BU-001, or the 6 semester hours for EACS in exhibit NER-EA-001 or NER-EA-002, or the 9 semester hours for SWCS in exhibit NER-SW-001, as appropriate (1/77).

NER-DC-001

DAMAGE CONTROLMAN

DC3
DC2
DC1
DCC
DCCS
DCCM

Exhibit Dates: 4/87–Present.

Occupational Field: 4 (Ship Maintenance).

Career Pattern

FN: Fireman (E-3). *DC3:* Damage Controlman, Third Class (E-4). *DC2:* Damage Controlman, Second Class (E-5). *DC1:* Damage Controlman, First Class (E-6). *DCC:* Chief Damage Controlman (E-7). *DCCS:* Senior Chief Damage Controlman (E-8). *DCCM:* Master Chief Damage Controlman (E-9).

Description

Summary: Performs organizational and intermediate level maintenance and repair of damage control equipment and systems; plans, supervises, and performs tasks necessary for damage control, ship stability, preservation of watertight integrity, firefighting, and chemical, biological, and radiological (CBR) warfare defense. *DC3:* Operates and maintains firefighting, fixed-flooding, washdown, ventilation, de-watering, and air test equipment, and damage control life support devices. *DC2:* Able to perform the duties required for DC3; performs radiological and chemical monitoring and surveying; serves as on-scene leader; organizes and directs fire party; inventories damage control equipment. *DC1:* Able to perform the duties required for DC2; instructs and coordinates damage control parties; instructs personnel in the techniques of damage control and CBR defense; supervises and performs tasks in procurement and issuance of supplies and repair parts; prepares records and reports. *DCC:* Able to perform the duties required for DC1; plans and conducts damage control exercises; maintains records and prepares progress reports; supervises training programs; estimates time, personnel, and material requirements; prepares quarterly maintenance schedules. *DCCS:* Able to perform the duties required for DCC; prepares directives and instructions for attaining organizational objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; prepares correspondence; organizes and evaluates training programs; administers a long-range planned maintenance program. *DCCM:* Able to perform the duties required for DCCS; reviews personnel, equipment, and material requirements and forecasts future requirements; plans, organizes, implements and controls activities; develops operating budgets and monitors expenditures.

Recommendation, DC3

In the lower-division baccalaureate/associate degree category, 1 semester hour in fire protection systems, 4 in portable and fixed extinguishing systems, 1 in firefighting strategy, and 1 in blueprint reading (3/90).

Recommendation, DC2

In the lower-division baccalaureate/associate degree category, 2 semester hours in fire protection systems, 5 in portable and fixed extinguishing systems, 2 in firefighting strategy, 1 in chemical radiation hazards, 2 in blueprint reading, 1 in recordkeeping, and 1 in principles of supervision (3/90).

Recommendation, DC1

In the lower-division baccalaureate/associate degree category, 3 semester hours in fire protection systems, 6 in portable and fixed extinguishing systems, 3 in firefighting strategy, 2 in chemical radiation hazards, 2 in blueprint reading, 1 in recordkeeping, and 2 in principles of supervision (3/90).

Recommendation, DCC

In the lower-division baccalaureate/associate degree category, 3 semester hours in fire protection systems, 6 in portable and fixed extinguishing systems, 4 in firefighting strategy, 3 in chemical radiation hazards, 2 in blueprint reading, 2 in recordkeeping, 3 in principles of supervision, and 2 in ship stability (3/90).

Recommendation, DCCS

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for DCC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/90).

Recommendation, DCCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for DCC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 6 in management problems (3/90).

DK2
DK1
DKC
DKCS
DKCM

Exhibit Dates: 6/71–12/87.

Occupational Field: 16 (Logistics).

Career Pattern

SN: Seaman (E-3). *DK3:* Disbursing Clerk, Third Class (E-4). *DK2:* Disbursing Clerk, Second Class (E-5). *DK1:* Disbursing Clerk, First Class (E-6). *DKC:* Chief Disbursing Clerk (E-7). *DKCS:* Senior Chief Disbursing Clerk (E-8). *DKCM:* Master Chief Disbursing Clerk (E-9).

Description

Summary: Maintains military personnel financial records, including payroll, travel allowances, and reimbursements; performs related computations; prepares related reports. *DK3:* Maintains files of manuals and documents; types at 20 wpm; types forms and memoranda; identifies appropriate Navy Codes for charging and crediting disbursements and receipts; applies Navy regulations in computation of pay, deductions, and reimbursements; applies Navy regulations in the preparation of leave records. *DK2:* Able to perform the duties required for DK3; processes more complex and difficult transactions; may train and supervise subordinate personnel. *DK1:* Able to perform the duties required for DK2; organizes the flow of work in the disbursing office; prepares correspondence and messages; prepares budgets; handles cash funds; audits entries on statements and documents; supervises subordinate personnel. *DKC:* Able to perform the duties required for DK1; supervises the operation of a disbursing office; interprets regulations and identifies disbursement procedures; audits reports, records, and vouchers. *DKCS:* Able to perform the duties required for DKC; supervises a large finance establishment; prepares and implements a program for interviewing, evaluating, and assigning personnel to obtain maximum utilization; evaluates local systems of internal control and submits recommendations concerning plans and procedures; prepares directives for the purpose of attaining organization goals and objectives; organizes and schedules training programs and evaluates results. *DKCM:* Able to perform the duties required for DKCS; plans, organizes, implements, and controls activities; reviews personnel, equipment, and material requirements, and forecasts future requirements; develops operating budgets and monitors expenditures; directs an inspection and audit of the financial transaction of a disbursing office.

Recommendation, DK3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in typing, 1 in office procedures, and 1 in business mathematics (3/79).

Recommendation, DK2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in typing, 1 in office procedures, 1 in business mathematics, 1 in office machines, 1 in office management, and 1 in record keeping (3/79).

Recommendation, DK1

In the vocational certificate category, 1 semester hour in typing, 1 in office procedures, 1 in business mathematics, 1 in office machines, 1 in record keeping, and 2 in office management. In the lower-division baccalaureate/associate degree category, 1 semester hour in typing, 1 in office procedures, 1 in business mathematics, 1 in office machines, 1 in record keeping, 2 in office management, 1 in personnel supervision, and 1 in human relations (3/79).

Recommendation, DKC

In the vocational certificate category, 1 semester hour in typing, 1 in office procedures, 1 in business mathematics, 1 in office machines, 1 in record keeping, and 3 in office management. In the lower-division baccalaureate/associate degree category, 1 semester hour in typing, 1 in office procedures, 1 in business mathematics, 1 in office machines, 1 in record keeping, 3 in office management, 2 in human relations, and 3 in personnel supervision. In the upper-division baccalaureate category, 1 semester hour for a practicum in management (3/79).

Recommendation, DKCS

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for DKC. In the upper-division baccalaureate category, 3 semester hours for a practicum in management and 3 in personnel management (3/79).

Recommendation, DKCM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for DKC. In the upper-division baccalaureate category, 3 semester hours for a practicum in management, 3 in management problems, and 3 in personnel management (3/79).

Exhibit Dates: 1/88–Present.

Occupational Field: 16 (Logistics).

Career Pattern

SN: Seaman (E-3). *DK3:* Disbursing Clerk, Third Class (E-4). *DK2:* Disbursing Clerk, Second Class (E-5). *DK1:* Disbursing Clerk, First Class (E-6). *DKC:* Chief Disbursing Clerk (E-7). *DKCS:* Senior Chief Disbursing Clerk (E-8). *DKCM:* Master Chief Disbursing Clerk (E-9).

Description

Summary: Maintains military personnel financial records, including payroll, travel allowances, and reimbursements; performs related computations; prepares related reports. *DK3:* Maintains files of manuals and documents; types at 20 wpm; types forms and memoranda; processes vouchers for receipt and expenditure of public monies; applies Navy regulations in computation of pay, deductions, and reimbursements; applies Navy regulations in the preparation of leave records; prepares payroll checks for all personnel. *DK2:* Able to perform the duties required for DK3; processess more complex and difficult transactions; may train and supervise subordinate personnel. *DK1:* Able to perform the duties required for DK2; organizes the flow of work in the disbursing office; insures accuracy of data base for personnel and pay records; prepares correspondence and messages; prepares budgets; handles cash funds; audits entries on statements and documents; supervises subordinate personnel. *DKC:* Able to perform the duties required for DK1; supervises the operation of a disbursing office; monitors source data system for security requirements; interprets regulations and identifies disbursement procedures; audits reports, records, and vouchers. *DCKS:* Able to perform the duties required for DKC; supervises a large finance establishment; establishes and administers training programs in pay procedures; evaluates local systems of internal control and submits recommendations concerning plans and procedures; prepares directives for the purpose of attaining organization goals and objectives; writes correspondence, directives, and instructions; prepares written staff studies. *DKCM:* Able to perform the duties required for DKCS; plans, organizes, implements, and controls activities; reviews personnel, equipment, and material requirements, and forecasts future requirements; develops operating budgets and monitors expenditures; directs an inspection and audit of the financial transaction of a disbursing office.

Recommendation, DK3

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 1 in office procedures, 2 in payroll accounting, 1 in automatic data processing (ADP) operations, 1 in recordkeeping, and 1 in interpersonal communications (3/90).

Recommendation, DK2

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 1 in office procedures, 2 in payroll accounting, 2 in automatic data processing (ADP) operations, 1 in recordkeeping, and 1 in interpersonal communications (3/90).

Recommendation, DK1

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 2 in office procedures, 3 in payroll accounting, 2 in automatic data processing (ADP) operations, 1 in office administration, 2 in recordkeeping, 2 in principles of supervision, 2 in interpersonal communications, and 1 in internal auditing procedures. In the upper-division baccalaureate category, 2 semester hours in management problems (3/90).

Recommendation, DKC

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 2 in office procedures, 3 in payroll accounting, 3 in automatic data processing (ADP) operations, 2 in office administration, 2 in recordkeeping, 3 in principles of supervision, 2 in interpersonal communications, and 2 in internal auditing procedures. In the upper-division baccalaureate category, 2 semester hours in management problems, 2 in human resource management, and 2 for field experience in management (3/90).

Recommendation, DKCS

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 3 in office procedures, 3 in payroll accounting, 3 in automatic data processing (ADP) operations, 2 in office administration, 2 in recordkeeping, 3 in principles of supervision, 3 in interpersonal communications, 2 in business communications, and 2 in internal auditing procedures. In the upper-division baccalaureate category, 2 semester hours for field experience in management, 3 in human resource management, and 3 in management problems (3/90).

Recommendation, DKCM

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 3 in office procedures, 3 in payroll accounting, 3 in automatic data processing (ADP) operations, 2 in office administration, 2 in recordkeeping, 3 in principles of supervision, 3 in interpersonal communications, 3 in business communications, and 2 in internal auditing procedures. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in human resource management, and 3 in management problems (3/90).

DM2
DM1
DMC
DMCS
DMCM

Exhibit Dates: 6/71–12/81.

Occupational Field: 17 (Media).

Career Pattern

SN: Seaman (E-3). *DM3:* Illustrator Draftsman, Third Class (E-4). *DM2:* Illustrator Draftsman, Second Class (E-5). *DM1:* Illustrator Draftsman, First Class (E-6). *DMC:* Chief Illustrator Draftsman (E-7). *DMCS:* Senior Chief Illustrator Draftsman (E-8). *DMCM:* Master Chief Illustrator Draftsman (E-9).

Description

Summary: Makes illustrations with pen and ink, water color, and other art media; makes orthographic and other mechanical drawings; operates and maintains graphic arts reproduction and audio-visual presentation equipment. *DM3:* Makes illustrations with pen and ink, water color, pencils, art markers, and other art media for posters, graphs, charts, training aids, books, and publications; mixes colors; designs and executes freehand drawings in realistic and/or cartoon style; makes orthographic and other mechanical drawings; prepares sketches and drawings for audio-visual presentations; mounts and retouches photographs; uses and performs operator maintenance on graphic arts reproduction and audio-visual presentation equipment. *DM2:* Able to perform the duties required for *DM3;:* uses horizontal and vertical copy camera; sets up and operates office duplicators (offset reproduction); constructs basic cartoon figures; draws overlays with acetate inks and cell paints; uses electronic mixers and pulse generators in sound-slide presentations; makes technical illustrations (isometric, phantom, and exploded views). *DM1:* Able to perform the duties required for DM2; schedules and assigns routine shop work; uses air brush for illustrations and for retouching photographs; uses and maintains silk-screen process equipment; constructs cartoon figures and backgrounds; determines and develops motion sequences for audio-visual presentations. *DMC:* Able to perform the duties required for DM1; organizes a training aids and graphics shop; assures compliance with copy and reproduction regulations; evaluates visual aids and maintains quality control; monitors control of produced classified material. *DMCS:* Able to perform the duties required for DMC; provides technical advice concerning illustration and drafting equipment; prepares directives and instructions for achieving organization objectives and improving operations; establishes and implements a program for interviewing, evaluating, and assigning personnel; organizes, schedules, and evaluates training programs; monitors quality control assurance requirements; prepares cost estimates for audio-visual presentations; determines audio-visual equipment requirements; *DMCM:* Able to perform the duties required for DMCS; plans, organizes, implements, and controls activities; reviews personnel equipment, and material requirements, and forecasts future requirements; develops operating budgets and monitors expenditures; evaluates and makes recommendations for new audio-visual equipment and innovations.

Recommendation, DM3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, and 3 in basic techniques of commercial art (3/79).

Recommendation, DM2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in basic photography, and 3 for field experience in graphics (3/79).

Recommendation, DM1

In the vocational certificate category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in basic photography, 3 for field experience in graphics, 3 in silk-screen printing, 3 in advertising illustration or airbrush, and 3 in audio-visual graphics. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in basic photography, 3 for field experience in graphics, 3 in silk-screen printing, 3 in advertising illustration or airbrush, 3 in audio-visual graphics, and 1 in graphics arts management. In the upper-division baccalaureate category, 2 semester hours in industrial arts education (graphics) (3/79).

Recommendation, DMC

In the vocational certificate category, the recommendation is the same as that for DM1. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in basic photography, 3 for field experience in graphics, 3 in silk-screen printing, 3 in advertising illustration or airbrush, 3 in audio-visual graphics, 3 in graphic arts management, and 2 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (graphics) (3/79).

Recommendation, DMCS

In the vocational certificate category, the recommendation is the same as that for DM1. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in basic photography, 3 for field experience in graphics, 3 in silk-screen printing, 3 in advertising illustration or airbrush, 3 in audio-visual graphics, 3 in graphic arts management, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (graphics), 3 for field experience in management, and 3 in management problems (3/79).

Recommendation, DMCM

In the vocational certificate category, the recommendation is the same as that for DM1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for DMCS. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (graphics), 6 for field experience in management, and 3 in management problems (3/79).

Description

Summary: Makes illustrations with pen and ink, water color, and other art media; makes orthographic and other mechanical drawings; operates and maintains graphic arts reproduction and audio-visual presentation equipment. *DM3:* Makes illustrations with pen and ink, water color, pencils, art makers, and other media for posters, graphs, charts, training aids, books, and publications; mixes colors; designs and executes freehand drawings in realistic and/or cartoon style; makes orthographic and other mechanical drawings; prepares sketches and drawings for visual presentations; mounts and retouches photographs; uses and performs operator maintenance on graphic arts reproduction and audio visual presentation equipment; sets up and operates office duplicators (offset reproduction). *DM2:* Able to perform the duties required for DM3; uses horizontal and vertical copy cameras; constructs basic cartoon figures; draws overlays with acetate inks and cell paints; uses electronic mixers and pulse generators in sound-slide presentations; makes technical illustrations (isometric, phantom, and exploded views); estimates time and materials needed for assigned jobs; maintains technical library. *DM1:* Able to perform the duties required for DM2; schedules and assigns routine shop work; prepares cost estimates for work requested; uses air brush for illustrations and for retouching photographs; and uses and maintains silk-screen process equipment. *DMC:* Able to perform the duties required for DM1; organizes a training aids and graphics shop; assures compliance with copy and reproduction regulations; evaluates visual aids and maintains quality control; monitors control of produced classified material. *DMCS:* Able to perform the duties required for DMC; provides technical advice concerning illustration and drafting equipment; prepares directives and instructions for achieving organization objectives and improving operations; establishes and implements a program for interviewing, evaluating, and assigning personnel; organizes, schedules, and evaluates training programs; monitors quality control assurance requirements. *DMCM:* Able to perform the duties required for DMCS; plans, organizes, implements, and controls activities; reviews personnel, equipment, and material requirements, and forecasts future requirements; develops operating budgets and monitors expenditures; evaluates and makes recommendations for new audio-visual equipment and innovations.

Recommendation, DM3

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, and 3 in basic techniques of commercial art (3/86).

Recommendation, DM2

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in visual graphics, and 3 for field experience in graphics (3/86).

Recommendation, DM1

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in visual graphics, 3 for field experience in graphics, 3 in silk-screen printing, and 2 in graphic arts management. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (graphics) (3/76).

Recommendation, DMC

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in visual graphics, 3 for field experience in graphics, 3 in silk-screen printing, 3 in graphic arts management, and 2 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (graphics) (3/86).

Recommendation, DMCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in visual graphics, 3 for field experience in graphics, 3 in silk-screen printing, 3 in graphic arts management, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (graphics), 3 for field experience in management, and 3 in management problems (3/86).

Recommendation, DMCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for DMCS. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (graphics), 6 for field experience in management, and 3 in management problems (3/86).

NER-DN-001

DENTALMAN

DN

Exhibit Dates: 6/71–Present.

Career Pattern

Dentalman is a general rate (Naval apprenticeship) for persons at pay grades E-1 (recruit), E-2 (Dentalman apprentice), and E-3 (Dentalman). At pay grade E-4 (petty officer third class), the person may enter any one of the following ratings: Dental Technician, General (DTG), Dental Technician, Repair (DTR), or Dental Technician, Prosthodontics (DTP).

Description

Assists dental officers in the treatment of patients; performs first aid; maintains, sterilizes, and arranges dental instruments; cares for dental equipment; maintains dental offices and dental records; uses medical terminology and standard abbreviations; identifies bones of head, neck, and oral structures; classifies and identifies teeth and supporting structures; instructs patients in oral health education.

Recommendation

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2-3 semester hours for a dental practicum, 3 in dental assisting, 1 in dental office procedures, 3 in dental anatomy, and 3 in dental radiography (12/81). NOTE: Credit for Dentalman (DN) should be granted only after pay grade E-3 has been achieved.

NER-DP-001

DATA PROCESSING TECHNICIAN

DP3
DP2
DP1
DPC
DPCS
DPCM

Exhibit Dates: 6/72–12/82.

Occupational Field: 12 (Data Systems).

Career Pattern

SN: Seaman (E-3). *DP3:* Data Processing Technician, Third Class (E-4). *DP2:* Data Processing Technician, Second Class (E-5). *DP1:* Data Processing Technician, First Class (E-6). *DPC:* Chief Data Processing Technician (E-7). *DPCS:* Senior Chief Data Processing Technician (E-8). *DPCM:* Master Chief Data Processing Technician (E-9).

Description

Summary: Operates data processing equipment to record source data; sets up and operates data processing equipment, including card, magnetic tape, disk, computers, and peripherals. *DP3:* Prepares program controls; handles and stores cards, magnetic tapes, and disk packs in compliance with environmental requirements; processes data and record operations; performs routine user maintenance on data processing equipment; uses maintenance and procedures manuals and operational flow charts; maintains data medium library records. *DP2:* Able to perform the duties required for DP3; supervises data medium library records and the preparation and operation of computer peripherals; constructs programming, data, and operational flow charts, decision tables, and internal and external subroutine programs, low-level and high-level programming languages; differentiates source and object programs, and the purposes of automatic and programmed checks. *DP1:* Able to perform the duties required for DP2; schedules electronic data processing (EDP) runs, ensuring accurate and timely processing; prepares and maintains flow charts for manual and machine operating procedures; prepares and maintains a program run book; writes, debugs, and documents COBOL and FORTRAN programs; performs systems analysis; identifies characteristics of open and closed subroutines; identifies functions of index registers; trains and evaluates personnel in local automatic data processing (ADP) and electronic data processing (EDP) procedures. *DPC:* Able to perform the duties required for DP1; analyzes ADP and EDP systems and subsystems; implements computer maintenance and diagnostic programs; designs input and output requirements for systems and subsystems; ensures quality assurance of ADP generated products; designs and documents specifications for COBOL or FORTRAN programs; implements data file management system; directs an ADP installation or office operation. *DPCS:* Able to perform the duties required for DPC; coordinates ADP methods and procedures, site preparation,installation and operation; coordinates between ADP installation units; analyzes proposed EDP changes; designs ADP software systems; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel; prepares local directives and instructions for attaining organization objectives and improving operations; organizes and schedules training programs, evaluates their effectiveness, and initiates improvements. *DPCM:* Able to perform the duties required for DPCS; establishes correspondence and report control system procedures; plans, organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; establishes goals, objectives, and priorities and forecasts future requirements; reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, DP3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing and 3 in computer operations (6/81).

Recommendation, DP2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in computer operations, 3 in systems design I, and 3 in computer programming concepts (6/81).

Recommendation, DP1

In the vocational certificate category, 3 semester hours in introduction to data processing, 3 in computer operations, 3 in systems design I, 3 in computer programming concepts, 3 in FORTRAN and 3 in COBOL I. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in computer operations, 3 in systems design I, 3 in computer programming concepts, 3 in FORTRAN, 3 in COBOL I, 2 in personnel supervision, and 3 in human relations (6/81).

Recommendation, DPC

In the vocational certificate category, the recommendation is the same as that for DP1. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in computer operations, 3 in systems design I, 3 in computer programming concepts, 3 in FORTRAN, 3 in COBOL I, 3 in personnel supervision, and 3 in human relations (6/81).

Recommendation, DPCS

In the vocational certificate category, the recommendation is the same as that for DP1. In the lower-division baccalaureate/associate degree category, DPC. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (6/81).

Recommendation, DPCM

In the vocational certificate category, the recommendation is the same as that for DP1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for DPC. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (6/81).

Description

Summary: Operates data processing equipment to record source data; sets up and operates data processing equipment, including card, magnetic tape, disk, computers, and peripherals. *DP3:* Prepares program controls; handles and stores cards, magnetic tapes, and disk packs in compliance with environmental requirements; processes data and record operations; performs routine user maintenance on data processing equipment; uses maintenance and procedures manuals and operational flow charts; maintains data medium library records. *DP2:* Able to perform the duties required for DP3; supervises data medium library records and the preparation and operation of computer peripherals; constructs programming, data and operational flow charts, decision tables, and internal and external subroutine programs; differentiates source and object programs, low-level and high-level programming languages, and the purposes of automatic and programmed checks. *DP1:* Able to perform the duties required for DP2; schedules electronic data processing (EDP) run, ensuring accurate and timely processing; prepares and maintains flow charts for manual and machine operating procedures; prepares and maintains a program run book; writes, debugs, and documents interactive and batch COBOL and FORTRAN program; performs systems analysis; identifies characteristic of open and closed subroutines; identifies functions of index registers; trains and evaluates personnel in local automatic (ADP) and electronic data processing procedures. *DPC:* Able to perform the duties required for DP1; analyzes ADP and EDP systems and subsystems; implements computer maintenance and diagnostic programs; designs input and output requirements for systems and subsystems; ensures quality assurance of ADP generated products; designs and documents specifications for COBOL or FORTRAN programs; implements data file and data base management systems; ensures data integrity; directs an ADP installation or office operation. *DPCS:* Able to perform the duties required for DPC; coordinates ADP methods and procedures, site preparation, installation and operation; activities between ADP installation units, including data communications; analyzes proposed EDP changes; designs ADP software systems; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel; prepares local directives and instructions for attaining organization objective, improving operations and achieving computer security; organizes and schedules training programs, evaluates their effectiveness, and initiates improvements. *DPCM:* Able to perform the duties required for DPCS; establishes correspondence and report control system procedures; plans, organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; establishes goals, objectives, and priorities and forecasts future requirements; reviews personnel, equipment, and material requirements; develops operating budget and monitors expenditures.

Recommendation, DP3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing and 3 in computer operations (11/83).

Recommendation, DP2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in computer operations, 3 in systems design I, and 3 in computer programming concepts (11/83).

Recommendation, DP1

In the vocational certificate category, 3 semester hours in introduction to data processing, 3 in computer operations, 3 in systems design I, 3 in computer programming concepts, 3 in FORTRAN, and 3 in COBOL I. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in computer operations, 3 in systems design I, 3 in computer programming concepts, 3 in FORTRAN, 3 in COBOL I, 2 in personnel supervision, and 3 in human relations (11/83).

Recommendation, DPC

In the vocational certificate category, the recommendation is the same as that for DP1. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in computer operations, 3 in systems design I, 3 in computer programming concepts, 3 in FORTRAN, 3 in COBOL I, 3 in data base concepts, 3 in personnel supervision, and 3 in human relations (11/83).

Recommendation, DPCS

In the vocational certificate category, the recommendation is the same as that for DP1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for DPC. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (11/83).

Recommendation, DPCM

In the vocational certificate category, the recommendation is the same as that for DP1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for DPC. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (11/83).

NER-DS-001

DATA SYSTEMS TECHNICIAN

DS3
DS2
DS1
DSC
DSCS
DSCM

Exhibit Dates: 6/71–Present.

Occupational Field: 12 (Data Systems).

Career Pattern

SN: Seaman (E-3). *DS3:* Data Systems Technician, Third Class (E-4). *DS2:* Data Systems Technician, Second Class (E-5). *DS1:* Data Systems Technician, First Class (E-6). *DSC:* Chief Data Systems Technician (E-7). *DSCS:* Senior Chief Data Systems Technician (E-8). *DSCM:* Master Chief Data Systems Technician (E-9).

Description

Summary: Performs general maintenance and repairs on electronic data systems and equipment, including computers, data storage devices, digital interface and display equipment, link terminals and related equipment. *DS3:* Inspects and tests equipment and components; solders connections, measures voltage and resistance, and analyzes circuits; traces defective parts; repairs electronic sub-assemblies; routinely uses electronics test equipment; diagnoses and repairs malfunctions in analog/digital computers; performs fundamental programming; performs preventive maintenance on analog/digital data equipment; evaluates performance of test equipment and signal generators; uses electrical and electronic schematics; uses and maintains common and special purpose hand tools. *DS2:* Able to perform the duties required for DS3; evaluates performance of test equipment and signal generators; aligns and calibrates digital and analog devices; troubleshoots and adjusts electro-mechanical devices in digital systems; applies minor changes to programmed maintenance routines; constructs program flow charts. *DS1:* Able to perform the duties required for DS2; applies methods of controlling electrical interference, prepares weekly schedules of preventive maintenance. *DSC:* Able to perform the duties required for DS1; supervises and inspects electronic data systems maintenance and repairs; constructs and operates computer operational and maintenance programs; identifies interface characteristic of digital data system and other related systems; compiles data for performance and maintenance reports; maintains records; analyzes digital data equipment failure trends; determines deficiencies and establishes corrective action; supervises inspection procedures. *DSCS:* Able to perform the duties required for DSC; analyzes operations where safety problems exist; corrects problems; uses programming language; writes directives and instructions; interviews and assigns personnel; prepares correspondence; administers a long-range planned maintenance program. *DSCM:* Able to perform the duties required for DSCS; establishes goals and priorities; forecasts requirements; evaluates personnel and equipment requirements; plans, organizes, and implements activities; develops operating budgets and monitors expenditures.

Recommendation, DS3

In the vocational certificate category, 3 semester hours in introduction to electronics, 3 in digital circuits, 3 in computer systems, 6 in computer maintenance, 2 in electronics laboratory, and 3 in vocational mathematics, and additional credit in these areas on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in digital circuits, 6 in computer systems analysis, 2 in industrial arts (electronics), and additional credit in these areas on the basis of institutional evaluation (10/87).

Recommendation, DS2

In the vocational certificate category, 3 semester hours in introduction to electronics, 3 in digital circuits, 3 in computer systems, 9 in computer maintenance, 6 in electronics laboratory, 3 in vocational mathematics, and additional credit in these areas on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in digital circuits, 9 in computer systems analysis, 3 in industrial arts (electronics), and additional credit in these areas on the basis of institutional evaluation (10/87).

Recommendation, DS1

In the vocational certificate category, 3 semester hours in introduction to electronics, 3 in digital circuits, 6 in computer systems, 9 in computer maintenance, 6 in electronics laboratory, 3 in vocational mathematics, and additional credit in these areas on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in digital circuits, 9 in computer systems analysis, 6 in industrial arts (electronics), 3 in personnel supervision, and additional credit in these areas on the basis of institutional evaluation (10/87).

Recommendation, DSC

In the vocational certificate category, the recommendation is the same as that for DS1. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in digital circuits, 9 in computer systems analysis, 6 in industrial arts (electronics), 6 in personnel supervision, and additional credit in these areas on the basis of institutional evaluation (10/87).

Recommendation, DSCS

In the vocational certificate category, the recommendation is the same as that for DS1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for DSC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in human relations (10/87).

Recommendation, DSCM

In the vocational certificate category, the recommendation is the same as that for DS1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for DSC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in human relations (10/87).

NER-DT-001

DENTAL TECHNICIAN, SENIOR CHIEF AND MASTER CHIEF

DTCS
DTCM

Exhibit Dates: 6/71–Present.

Occupational Field: 14 (Health Care).

Career Pattern

May progress from DTGC, Chief Dental Technician, General (E-7), or DTPC, Chief Dental Technician, Prosthodontics (E-7), or DTRC, Chief Dental Technician, Repair (E-7). *DTCS:* Senior Chief Dental Technician (E-8). *DTCM:* Master Chief Dental Technician (E-9).

Description

DTCS: Able to perform the duties required for DTGC (Chief Dental Technician, General), DTPC (Chief Dental Technician, Prosthodontics), or DTRC (Chief Dental Technician, Repair); prepares directives and instructions for attaining organization objectives and improving operations; establishes a program for interviewing, evaluating, and assigning personnel for maximum utilization; prepares correspondence; organizes and schedules training programs. *DTCM:* Able to perform the duties required for DTCS: plans, organizes, and implements activities; reviews personnel, equipment, and material requirements, and forecasts future requirements; establishes goals, objectives, and priorities; provides counseling on medical department training opportunities; develops operating budgets and monitors expenditures.

Recommendation, DTCS

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, use the recommendation for DTGC (Chief Dental Technician, General) in exhibit NER-DTG-001, or DTPC (Chief Dental Technician, Prosthodontics) in exhibit NER-DTP-001, or DTRC (Chief Dental Technician, Repair) in exhibit NER-DTR-001. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in business management, 3 in human relations, 3 for field experience in management, and 3 in dental care administration (12/81). NOTE: Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001.

Recommendation, DTCM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for DTCS. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in business management, 3 in human relations, 6 for field experience in management, 3 in dental care administration, and 3 in dental care planning (12/81). NOTE: Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001.

Occupational Field: 14 (Health Care).

Career Pattern

DN: Dentalman (E-3). *DTG3:* Dental Technician, General, Third Class (E-4); *DTG2:* Dental Technician, General, Second Class (E-5); *DTG1:* Dental Technician, General, First Class (E-6); *DTGC:* Chief Dental Technician, General (E-7); *DTCS:* Senior Chief Dental Technician (E-8); *DTCM:* Master Chief Dental Technician (E-9).

Description

Summary: Assists dental officers in the treatment of patients; performs clinical and administrative duties. *DTG3:* Assists dental officers in all phases of dentistry; performs routine scaling and polishing of teeth, performs cardiopulmonary resuscitation (CPR); prepares dental treatment records; maintains dental appointment system; performs routine maintenance on dental equipment. *DTG2:* Able to perform the duties required for DT3; prepares dental materials and setups for all phases of dentistry; prepares oral health education material for presentation to groups; coordinates the clinical duties and assignments of subordinate personnel. *DTG1:* Able to perform the duties required for DTG2; directs preventive dentistry programs; requisitions and maintains records of dental supplies and equipment; performs minor repairs and operational checks on dental equipment; ensures proper security of dental supplies and equipment. *DTGC:* Able to perform the duties required for DTG1; supervises and coordinates records management programs; supervises performance evaluation programs; maintains financial records; analyzes budgetary and programming requirements; analyses manpower authorizations for accuracy and adequacy; responsible for the inventory control of dental supplies and equipment.

Recommendation, DTG3

In the vocational certificate category, 1 semester hour in first aid and 1 in cardiopulmonary resuscitation (CPR). In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 1 in cardiopulmonary resuscitation (CPR), and 2 in dental office procedures (12/81). NOTE: Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001.

Recommendation, DTG2

In the vocational certificate category, the recommendation is the same as that for DTG3. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 1 in cardiopulmonary resuscitation (CPR), 2 in dental office procedures, 1 in personnel supervision, and 2 in dental records management (12/81). NOTE: Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001.

Recommendation, DTG1

In the vocational certificate category, the recommendation is the same as that for DTG3. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 1 in cardiopulmonary resuscitation (CPR), 2 in dental office procedures, 3 in personnel supervision, 2 in dental records management, and 3 in dental office management (12/81). NOTE: Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001.

Recommendation, DTGC

In the vocational certificate category, the recommendation is the same as that for DTG3. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 1 in cardiopulmonary resuscitation (CPR), 2 in dental office procedures, 3 in personnel supervision, 2 in dental records management, 3 in dental office management, 3 in business management, and 2 in communication techniques. In the upper-division baccalaureate category, 3 semester hours in personnel management (12/81). NOTE: Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001.

NER-DTP-001

DENTAL TECHNICIAN, PROSTHODONTICS

DTP3
DTP2
DTP1
DTPC

Exhibit Dates: 6/71–Present.

Occupational Field: 14 (Health Care).

Career Pattern

DN: Dentalman (E-3). *DTP3:* Dental Technician, Prosthodontics, Third Class (E-4). *DTP2:* Dental Technician, Prosthodontics, Second Class (E-5). *DTP1:* Dental Technician, Prosthodontics, First Class (E-6). *DTPC:* Chief Dental Technician, Prosthodontics (E-7). *DTCS:* Senior Chief Dental Technician, Prosthodontics (E-8). *DTCM:* Master Chief Dental Technician, Prosthodontics (E-9).

Description

Summary: Assists dental officer in all phases of prosthetic dentistry; constructs and repairs prosthetic dental devices. *DTP3:* Prepares set-ups and dental materials used in prosthetic procedures; performs routine scaling and polishing of teeth; constructs and repairs dental devices; performs routine maintenance on dental equipment. *DTP2:* Able to perform the duties required for DTP3; prepares and maintains dental laboratory records and precious-metal records. *DTP1:* Able to perform the duties required for DTP2; supervises a dental laboratory; requisitions dental supplies and equipment; maintains dental appointment system; performs minor repairs and operational checks on dental equipment; ensures proper security of dental supplies and equipment. *DTPC:* Able to perform the duties required for DTP1; supervises and coordinates dental laboratory records management programs; supervises the performance evaluation program; analyzes manpower authorizations for accuracy and adequacy.

Recommendation, DTP3

In the vocational certificate category, 1 semester hour in first aid. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid and 2 in dental laboratory procedures (12/81). NOTE: Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001.

Recommendation, DTP2

In the vocational certificate category, 1 semester hour in first aid. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 2 in dental laboratory procedures, 2 in dental laboratory records management (prosthetic), and 3 in prosthetic procedures (12/81). NOTE: Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001.

Recommendation, DTP1

In the vocational certificate category, 1 semester hour in first aid. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 2 in dental laboratory procedures, 2 in dental laboratory records management (prosthetic), 3 in prosthetic procedures, 3 in dental laboratory management, and 2 in personnel supervision (12/81). NOTE: Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001.

Recommendation, DTPC

In the vocational certificate category, 1 semester hour in first aid. In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 2 in dental laboratory procedures, 2 in dental laboratory records management (prosthetic), 3 in prosthetic procedures, 3 in dental laboratory management, 3 in personnel supervision, and 3 in business management. In the upper-division baccalaureate category, 3 semester hours in personnel management (12/81). NOTE: Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001.

NER-DTR-001

DENTAL TECHNICIAN, REPAIR

DTR2
DTR1
DTRC

Exhibit Dates: 6/71–Present.

Occupational Field: 14 (Health Care).

Career Pattern

DN: Dentalman (E-3). *DTG3:* Dental Technician, General, Third Class (E-4). *DTR2:* Dental Technician, Repair, Second Class (E-5). *DTR1:* Dental Technician, Repair, First Class (E-6). *DTRC:* Chief Dental Technician, Repair (E-7). *DTCS:* Senior Chief Dental Technician (E-8). *DTCM:* Master Chief Dental Technician (E-9).

Description

Summary: Performs or supervises maintenance and repair of dental equipment. *DTR2:* Able to perform the duties required for DTG3; performs preventive maintenance and repair on air and water control units, patient positioning chairs, intra-oral and panoramic x-ray machines, x-ray film processors, dental handpieces, and general dental support apparatus; supervises sterilization procedures; files directives and technical manuals pertaining to dental equipment and maintenance activities; prepares dental equipment reports. NOTE: Progressed to DTR2 from DTG3 (Dental Technician, General, Third Class). *DTR1:* Able to perform the duties required for DTR2; applies procedures for treatment and mass casualties; prepares correspondence; conducts in-service training for dental maintenance and repair activities; develops and maintains a repairman's preventive maintenance program for dental facilities; develops and maintains maintenance records; requisitions and maintains records for issue and disposal of dental equipment. *DTRC:* Able to perform the duties required for DTR1; analyzes manpower authorizations; supervises dental equipment repair records; supervises and evaluates performance of subordinate personnel; serves as dental equipment maintenance supervisor; analyzes and projects programming and budgetary requirements.

Recommendation, DTR2

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronic circuits, 2 in electrical troubleshooting techniques, and 2 in mechanical troubleshooting techniques (10/82). NOTE: Add the credit recommended for DTG3 in exhibit NER-DTG-001 and Dentalman (E-3) in exhibit NER-DN-001.

Recommendation, DTR1

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronic circuits, 2 in electrical troubleshooting techniques, 2 in mechanical troubleshooting techniques, 2 in dental equipment maintenance and repair, and 3 in personnel supervision (10/82). NOTE: Add the credit recommended for DTG3 in exhibit NER-DTG-001 and Dentalman (E-3) in exhibit NER-DN-001.

Recommendation, DTRC

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronic circuits, 2 in electrical troubleshooting techniques, 2 in mechanical troubleshooting techniques, 2 in dental equipment maintenance and repair, 3 in personnel supervision, and 2 in electrical and plumbing codes and standards. In the upper-division baccalaureate category, 3 semester hours in personnel management and 3 in human relations (10/82). NOTE: Add the credit recommended for DTG3 in exhibit NER-DTG-001 and Dentalman (E-3) in exhibit NER-DN-001.

NER-EA-001

ENGINEERING AID

EA3
EA2
EA1
EAC
EACS

Exhibit Dates: 6/71–Present.

Occupational Field: 13 (Construction).

Career Pattern

CN: Constructionman (E-3). *EA3:* Engineering Aid Third Class (E-4). *EA2:* Engineering Aid Second Class (E-5). *EA1:* Engineering Aid First Class (E-6). *EAC:* Chief Engineering Aid (E-7). *EACS:* Senior Chief Engineering Aid (E-8). *CUCM:* Master Chief Constructionman (E-9).

Description

Summary: Plans, supervises, and performs tasks required in construction surveying, drafting, planning and estimating, and quality control. *EA3:* Traces and revises drawings; prepares charts and sketches; places construction stakes and other references; uses standard surveying instruments; performs basic calculations of regular areas and volumes; and performs simple tests on soils and concrete materials. *EA2:* Able to perform the duties required for EA3; draws mechanical layouts of service and building utilities and of distribution and collection systems from existing plans, sketches, or specifications; prepares material requisitions; records survey field notes; inputs the placing of concrete, and tests its compressive and flexural strength; computes irregular areas; performs stadia and hydrographic surveying; tests for soil compaction field density, atterberg limits, and aggregate soundness. *EA1:* Able to perform the duties required for EA2; checks layouts and drawings for accuracy and conformance to standards; prepares progress reports; organizes work assignements; prepares equipment, manpower, and material estimates; performs maintenance and construction inspections; performs the test of Marshall stability; prepares concrete, flexible pavement, and soil stabilization design mixes; as party chief, establishes vertical and horizontal control and directs topographic, boundary, and engineering surveys. *EAC:* Able to perform the duties required for EA1; supervises and coordinates all construction tasks assigned to a unit; provides technical advice and assistance on plans and specifications and on construction and maintenance techniques; implements a program of maintenance and cost control. *EACS:* Able to perform the duties required for EAC; prepares local directives and instructions for attaining organizational objectives and improving operations; establishes and implements a program to assure maximum use of personnel; determines requirements for advance planning; coordinates equipment assignment among projects; is capable of directing the operation and maintenance of all utilities and the repair, alteration and maintenance of all facilities under the cognizance of the public works department; directs transportation and equipment services to all activities and maintains all equipment used for that purpose; establishes a maintenance and cost control program.

Recommendation, EA3

In the vocational certificate category, 3 semester hours in introduction to construction, 2 in drafting, 2 in surveying, and 2 in materials testing. In the lower-division baccalaureate/associate degree category, 1 semester hour in construction technology, 1 in drafting, and 1 in surveying (1/77).

Recommendation, EA2

In the vocational certificate category, 3 semester hours in introduction to construction, 3 in construction methods, 4 in materials testing, 4 in drafting, 3 in surveying, and 3 in technical mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in surveying, 3 in algebra, 2 in drafting, and 1 in construction technology (1/77).

Recommendation, EA1

In the vocational certificate category, 6 semester hours in materials testing, 4 in drafting, 3 in surveying, 3 in introduction to construction, 3 in construction methods, 3 in earthwork computation, and 3 in technical mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in surveying, 3 in pavement design, 3 in algebra, 2 in drafting, 2 in personnel supervision, and 1 in construction technology (1/77).

Recommendation, EAC

In the vocational certificate category, the recommendation is the same as that for EA1. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in construction management, 3 in surveying, 3 in pavement design, 3 in algebra, 3 in personnel supervision, 3 in construction technology, and 2 in drafting (1/77).

Recommendation, EACS

In the vocational certificate category, the recommendation is the same as that for EA1. In the lower-division baccalaureate/associate degree category, 6 semester hours for field experience in construction management, 3 in surveying, 3 in pavement design, 3 in algebra, 3 in personnel supervision, 3 in construction technology, 2 in drafting, and 2 in technical writing. In the upper-division baccalaureate category, 3 semester hours for a practicum in management and 3 in human relations (1/77).

EA1
EAC
EACS

Exhibit Dates: 1/82–Present.

Occupational Field: 13 (Construction).

Career Pattern

CN: Constructionman (E-3). *EA3:* Engineering Aid Third Class (E-4). *EA2:* Engineering Aid Second Class (E-5). *EA1:* Engineering Aid First Class (E-6). *EAC:* Chief Engineering Aid (E-7). *EACS:* Senior Chief Engineering Aid (E-8). *CUCM:* Master Chief Constructionman (E-9).

Description

Summary: Plans, supervises, and performs tasks required in construction surveying, drafting, planning and estimating, and quality control. *EA3:* Traces and revises drawings; prepares charts and sketches; places construction stakes and other references; uses standard surveying instruments; performs basic calculations of regular areas and volumes; and performs simple tests on soils and concrete materials. *EA2:* Able to perform the duties required for EA3; draws mechanical layouts of service and building utilities and of distribution and collection systems from existing plans, sketches, or specifications; prepares material requisitions; records survey field notes; inspects the placing of concrete, and tests its compressive and flexural strength; computes irregular areas; performs stadia and hydrographic surveying; tests for soil compaction field density, atterberg limits, and aggregate soundness. *EA1:* Able to perform the duties required for EA2; checks layouts and drawings for accuracy and conformance to standards; prepares progress reports; organizes work assignments; prepares equipment, manpower, and material estimates; performs maintenance and construction inspections; performs the test of Marshall stability; prepares concrete, flexible pavement, and soil stabilization design mixes; as party chief, establishes vertical and horizontal control and directs topographic, boundary, and engineering surveys. *EAC:* Able to perform the duties required for EA1; supervises and coordinates all construction tasks assigned to a unit; provides technical advice and assistance on plans and specifications and on construction and maintenance techniques; implements a program of maintenance and cost control. *EACS:* Able to perform the duties required for EAC; prepares local directives and instructions for attaining organizational objectives and improving operations; establishes and implements a program to assure maximum use of personnel; determines requirements for advance planning; coordinates equipment assignment among projects; is capable of directing the operation and maintenance of all utilities and the repair, alteration and maintenance of all facilities under the cognizance of the public works department; directs transportation and equipment services to all activities and maintains all equipment used for that purpose; establishes a maintenance and cost control program.

Recommendation, EA3

In the vocational certificate category, 3 semester hours in introduction to construction, 3 in drafting, 2 in surveying, and 2 in materials testing. In the lower-division baccalaureate/associate degree category, 1 semester hour in construction technology, 2 in drafting, and 1 in surveying (3/86).

Recommendation, EA2

In the vocational certificate category, 3 semester hours in introduction to construction, 3 in construction methods, 4 in materials testing, 4 in drafting, 3 in surveying, and 3 in technical mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in surveying, 3 in trigonometry, 3 in drafting, and 1 in construction technology (3/86).

Recommendation, EA1

In the vocational certificate category, 6 semester hours in materials testing, 4 in drafting, 3 in surveying, 3 in introduction to construction, 3 in construction methods, 3 in earthwork computation, and 3 in technical mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in surveying, 3 in pavement design, 3 in trigonometry, 3 in drafting, 2 in personnel supervision, and 1 in construction technology (3/86).

Recommendation, EAC

In the vocational certificate category, the recommendation is the same as that for EA1. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in construction management, 3 in surveying, 3 in pavement design, 3 in trigonometry, 3 in personnel supervision, 3 in construction technology, and 3 in drafting (3/86).

Recommendation, EACS

In the vocational certificate category, the recommendation is the same as that for EA1. In the lower-division baccalaureate/associate degree category, 6 semester hours for field experience in construction management, 3 in surveying, 3 in pavement design, 3 in trigonometry, 3 in personnel supervision, 3 in construction technology, 3 in drafting, and 2 in technical writing. In the upper-division baccalaureate category, 3 semester hours for a practicum in management and 3 in management problems (3/86).

NER-EM-001

ELECTRICIAN'S MATE

EM3
EM2
EM1
EMC
EMCS

Exhibit Dates: 6/73–12/89.

Occupational Field: 3 (Marine Engineering).

Career Pattern

FN: Fireman (E-3). *EM3:* Electrician's Mate Third Class (E-4). *EM2:* Electrician's Mate, Second Class (E-5). *EM1:* Electrician's Mate, First Class, (E-6). *EMC:* Chief Electrician's Mate (E-7). *EMCS:* Senior Chief Electrician's Mate (E-8). *EMCM:* Master Chief Electrician's Mate (E-9).

Description

Summary: Operates and maintains power and lighting circuits, electrical fixtures, film projectors, motors, generators, controllers, switchboards, voltage and frequency regulators, and other test equipment; tests for short circuits; rebuilds electrical equipment. *EM3:* Operates standard test and metering equipment, including multimeter, voltmeter, ammeter, ohmeter, oscilloscope, stroboscope, voltage tester, wattmeter, and vacuum tube voltmeter; makes standard wire splices; detects and locates grounds, open circuits, and short circuits in lighting and power circuits; solders electrical connections; examines motors and generators for conditions and needed maintenance; operates AC and DC generators; replaces bearings in generators and motors; repairs portable electrical tools; prepares, activates, and services storage batteries; troubleshoots and repairs small boat electrical systems; tests and maintains signal lights, search lights, and beacons; maintains electrical cooking equipment; computes resistance, current, voltage, phase angle, and impedance; prepares diesel generators for operation; reads and interprets schematic diagrams and electrical blueprints. *EM2:* Able to perform the duties required for EM3; operates and uses signal generator; operates instrument transformer; conducts bench tests on motor and generator windings; operates and maintains AC and DC ship propulsion equipment; installs new power and lighting circuits; connects shore power to main distribution board of ship; inspects and maintains battery chargers, cathode protective units, air-conditioning control circuits, air compressor control circuits, and hoist/winch systems; completes planned maintenance reports; inventories installed equipment and spare part support; may supervise up to four Third Class Electrician's Mates. *EM1:* Able to perform the duties required for EM2; conducts bench tests on electric governors; checks logic on solid state electro-hydraulic controllers; inspects ship's service and emergency switchboard equipment when power is connected; estimates extent of casualty damage to equipment; removes, tests, and replaces defective components in automatic degaussing control panels; determines type and value of acceptable substitute components; checks electrical operating logs and maintenance records; prepares weekly maintenance schedules; may supervise up to nine Electrician's Mates. *EMC:* Able to perform the duties required for EM1; tests, inspects, and directs repairs of power and lighting eqipment, static magnetic amplifier equipment, voltage and speed regulators, and static inverters; maintains files; directs operation and control of electrical distribution and interior communication system and circuits; plans, organizes, and directs the operation and maintenance of electrical systems; estimates time, materials, and labor required for repair of electrical systems and equipment. *EMCS:* Able to perform the duties required for EMC; advises on preparation for administrative, material, and readiness inspections, the opening and inspection of equipment, and preparation of work requests; provides information and advises on utilization, capabilities, reliability, and operations; prepares directives and instructions for attaining organizational objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel; administers a long-range planned maintenance program.

Recommendation, EM3

In the vocational certificate category, 5 semester hours in basic electricity/electronics, 3 in electrical wiring, and 3 in electrical motors, and credit in troubleshooting techniques on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics, 3 in electrical wiring, 3 in electrical motors, and 2 in electricity/electronics laboratory, and credit in troubleshooting techniques on the basis of institutional evaluation (12/78).

Recommendation, EM2

In the vocational certificate category, 5 semester hours in basic electricity/electronics, 3 in electrical wiring, 5 in electrical motors, and 2 in electrical and electronic circuits, and credit in troubleshooting techniques on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics, 3 in electrical wiring, 3 in electrical motors, and 2 in electricity/electronics laboratory, and credit in troubleshooting techniques and human relations on the basis of institutional evaluation; if assigned to gas turbine propulsion systems, credit in gas turbine technology on the basis of institutional evaluation (12/78).

Recommendation, EM1

In the vocational certificate category, 5 semester hours in basic electricity/electronics, 3 in electrical wiring, 7 in electrical motors, 4 in electrical and electronic circuits, and 1 in record keeping, and credit in troubleshooting techniques on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics, 3 in electrical wiring, 3 in electrical motors, 2 in electricity/electronics laboratory, 3 in human relations, 2 in personnel supervision, 2 in maintenance management, and 1 in record keeping, and credit in troubleshooting techniques on the basis of institutional evaluation; if assigned to gas turbine propulsion systems, credit in gas turbine technology on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in electrical circuits (12/78).

Recommendation, EMC

In the vocational certificate category, the recommendation is the same as that for EM1. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics, 3 in electrical wiring, 3 in electrical motors, 2 in electricity/electronics laboratory, 3 in human relations, 3 in personnel supervision, 3 in maintenance management, 1 in record keeping, and 1 in report writing, and credit in troubleshooting techniques on the basis of institutional evaluation; if assigned to gas turbine propulsion systems, credit in gas turbine technology on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in electrical circuits (12/78).

Recommendation, EMCS

In the vocational certificate category, the recommendation is the same as that for EM1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for EMC. In the upper-division baccalaureate category, 3 semester hours in electrical circuits, 3 for field experience in management, and 3 in management problems (12/78).

Description

Summary: Operates and maintains power and lighting circuits, electrical fixtures, film projectors, motors, generators, controllers, switchboards, voltage and frequency regulators, and other test equipment; tests for short circuits; rebuilds electrical equipment. *EM3:* Operates standard test and metering equipment, including multimeter, voltmeter, ammeter, ohmeter, oscilloscope, stroboscope, voltage tester, wattmeter, and vacuum tube voltmeter; makes standard wire splices; detects and locates ground, open circuits and short circuits in lighting and power circuits; solders electrical connections; examines motors and generators for conditions and needed maintenance; operates AC and DC generators; replaces bearings in generators and motors; repairs portable electrical tools; prepares, activates, and services storage batteries; troubleshoots and repairs small boat electrical systems; tests and maintains signal lights, search lights, and beacons; maintains electrical cooking equipment; computes resistance, current, voltage, phase angle, and impedance; prepares diesel generators for operation; reads and interprets schematic diagrams and electrical blueprints. *EM2:* Able to perform the duties required for EM3; operates and uses signal generator; operates instrument transformer; conducts bench tests on motor and generator windings; operates and maintains AC and DC ship propulsion equipment; installs new power and lighting circuits; connects shore power to main distribution board of ship; inspects and maintains battery charges, cathodic protective units, air-conditioning control circuits, air compressor control circuits, hoist/winch systems, ship's fueling continuity circuits, solid state logic components, and helicopter starting units; maintains equipment calibration schedules; completes planned maintenance reports; inventories installed equipment and spare parts support; may supervise up to four Third Class Electrician's Mates. *EM1:* Able to perform the duties required for EM2; conducts bench tests on electric governors; checks logic on solid state electro-hydraulic controllers; inspects ship's service and emergency switchboard equipment when power is connected; estimates extent of casualty damage to equipment; removes, tests, and replaces defective components in automatic degaussing control panels; determines type and value of acceptable substitute components; checks electrical operating logs and maintenance records; prepares weekly maintenance schedules; instructs personnel in operation, maintenance and casualty control; may supervise up to nine Electrician's Mates. *EMC:* Able to perform the duties required for EM1; tests, inspects, and directs repairs of power and lighting equipment, static magnetic amplifier equipment, voltage and speed regulators, and static inverters; maintains files; direct operation and control of electrical distribution and interior communication system and circuits; plans, organizes, and directs the operation and maintenance of electrical systems; estimates time, materials, and labor required for repair of electrical systems and equipment; verifies compliance with quality assurance procedures; performs casualty analysis; stands engineering watch; assigns personnel to watch stations; supervises training in operation, maintenance, and casualty control; reviews efficiency reports of subordinates, and prepares ship trial reports. *EMCS:* Able to perform the duties required for EMC; advises on preparation for administrative, material and readiness inspections, the opening and inspection of equipment, and preparation of work requests; provides information and advises on utilization, capabilities, reliability, and operations; prepares directives and instructions for attaining organizational objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel; administers a long-range planned maintenance program; reviews and submits reports, initiates correspondence and directives; evaluates operational deficiencies and test results; reviews ship trial data; organizes and schedules training programs and evaluates effectiveness of subordinates.

Recommendation, EM3

In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electronics laboratory, 3 in electrical systems troubleshooting and maintenance, 2 in AC/DC machines, and 1 in basic electronics (12/89).

Recommendation, EM2

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in electrical systems troubleshooting and maintenance, 3 in AC/DC machines, 2 in basic electronics, and 2 in personnel supervision (12/89).

Recommendation, EM1

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in electrical systems troubleshooting and maintenance, 4 in AC/DC machines, 2 in basic electronics, and 3 in personnel supervision (12/89).

Recommendation, EMC

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in electrical systems troubleshooting and maintenance, 4 in AC/DC machines, 2 in basic electronics, 3 in personnel supervision, and 3 in maintenance management (12/89).

Recommendation, EMCS

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for EMC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/89).

NER-EM-003

Electrician's Mate Master Chief

EMCM

Exhibit Dates: 6/73–12/89.

Occupational Field: 3 (Marine Engineering).

Career Pattern

May progress to EMCM, Master Chief Electrician's Mate (E-9), from EMCS, Senior Chief Electrician's Mate (E-8), or ICCS, Senior Chief Interior Communications Electrician (E-8).

Description

Able to perform the duties required for either EMCS (Senior Chief Electrician's Mate) or ICCS (Senior Chief Interior Communications Electrician); advises on new developements and technical information concerning capabilities, limitations, and employment of interior communications and electrical equipment; plans, organizes, and implements activities; plans and initiates actions to satisfy personnel, equipment, and material requirements and forecasts future requirements; schedules major maintenance and repair; develops procedures and supervises practices and techniques for correction of equipment and system malfunctions; supervises inspections and surveys of equipment; evaluates defective and worn electrical equipment items in terms of feasibility of repair or replacement; develops operating budgets and monitors expenditures.

Recommendation, EMCM

In the vocational certificate category, use either the 20 semester hours recommended for EM1 in exhibit NER-EM-001, or the 25 semester hours recommended for IC1 in exhibit NER-IC-001, as appropriate. In the lower-division baccalaureate/associate degree category, use either the 22 semester hours recommended for EMC in exhibit NER-EM-001, or the 28 semester hours recommended for ICC in exhibit NER-IC-001, as appropriate. In the upper-division baccalaureate category, 3 semester hours in electrical circuits, 6 for field experience in management, and 3 in management problems (12/78).

NER-EM-004

Electrician's Mate, Master Chief

EMCM

Exhibit Dates: 1/90–Present.

Occupational Field: 3 (Marine Engineering).

Career Pattern

May progress to EMCM, Master Chief Electrician's Mate (E-9), from EMCS, Senior Chief Electrician's Mate (E-8), or ICCS, Senior Chief Interior Communications Electrician (E-8).

Description

Able to perform the duties required for either EMCS (Senior Chief Electrician's Mate) or ICCS (Senior Chief Interior Communications Electrician); advises on new developments and new technical information concerning capabilities, limitations, and employment of interior communications and electrical equipment; plans, organizes, and implements activities; plans and initiates actions to satisfy personnel, equipment, and material requirements and forecasts future requirements; schedules major maintenance and repair; develops procedures and supervises practices and techniques for correction of equipment and system malfunctions; supervises inspections and surveys of equipment; evaluates defective and worn electrical equipment items in terms of feasibility of repair or replacement; develops operating budgets and monitors expenditures; prepares staff studies, establishes goals, objectives and priorities; reviews efficiency of subordinates and prepares policy statements and directives.

Recommendation, EMCM

In the lower-division baccalaureate/associate degree category, if progressed to EMCM from ICCS (Interior Communications Electrician, Senior Chief), use the recommendation for ICCS in exhibit NER-IC-001; if progressed from EMCS, use the recommendation for EMCS in exhibit NER-EM-003. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (12/89).

FN: Fireman (E-3). *EN3:* Engineman, Third Class (E-4). *EN2:* Engineman, Second Class (E-5). *EN1:* Engineman, First Class (E-6). *ENC:* Chief Engineman (E-7). *ENCS:* Senior Chief Engineman (E-8). *ENCM:* Master Chief Engineman (E-9).

Description

Summary: Operates, repairs, and performs maintenance on internal-combustion engines, main propulsion machinery, refrigeration, air-conditioning, gas-turbine engine, and shipboard auxiliary equipment; stands watch on auxiliary boilers. *EN3:* Uses firefighting equipment and radiac instruments; performs routine hydraulic maintenance; installs hydraulic seals, packings, and wipers; uses the following test equipment: stroboscopes, micrometers, dial indicators, hydrometers, viscosity gauges, and freon leak dectectors; operates electrical charging and regulating systems; uses and files blueprints, microfilm, aperture cards, and ship's drawings for maintaining and servicing equipment and for locating valves, piping systems, and machinery; conducts boiler water and feed water tests; operates steam-operated distilling plants; mechanically removes scale from evaporator tubes; operates and stands watch on refrigeration and air-conditioning systems; operates air compressors; overhauls manually-operated valves; tests electro-hydraulic steering system; inspects, lubricates, and tests galley and laundry equipment; recognizes symptoms in a diesel engine and takes appropriate action to avoid damage to the engine; completes maintenance data forms; exercises environmental control procedures to prevent or minimize air pollution and oil spills. *EN2:* Able to perform the duties required for EN3; tests and recharges refrigeration and air-conditioning systems; overhauls pumps; cleans, inspects, and test heat exchangers; removes, inspects, repairs, and reinstalls liners, pistons, cylinder heads, wrist pins, piston rings, and bearings; disassembles, cleans, repairs, assembles, and replaces fuel oil injectors; records equipment test results and training data; orders repair parts and tools; uses dial indicators, micrometers, bridge gauges and depth gauges to take clearances on journals, bearings, liners, and pistons. *EN1:* Able to perform the duties required for EN2; inspects, repairs, tests, and maintains auxiliary boilers; determines engine malfunctions and takes appropriate corrective action; checks main engine bearing and thrust clearances; interprets causes and prevention of damage to shafts and thrust bearings; disassembles, cleans, inspects, and repairs mechanical and hydraulic governors, overspeed trips, and load limiting governors; supervises a damage control party; maintains engine room records; reviews completed maintenance data forms; prepares weekly maintenance schedules. *ENC:* Able to perform the duties required for EN1; supervises repair of engineroom equipment and auxiliary equipment, refrigeration, and air-conditioning equipment; inspects propellers and shafts; checks main reduction gears; supervises an engineroom watch; prepares reports; estimates time and material requirements; prepares quarterly maintenance schedules; analyzes results of spectrographic, physical, and chemical oil analysis. *ENCS:* Able to perform the duties required for ENC; monitors environmental pollution control programs; analyzes daily operating records to determine system irregularities; prepares directives and instructions for attaining organization objectives; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; organizes and schedules training programs; administers a long-range planned maintenance program. *ENCM:* Able to perform the duties required for ENCS; develops and monitors safety programs; forecasts future requirements; establishes goals, objectives, and priorities; reviews personnel, equipment, and material requirements; reviews requirements for manuals, prints, and publications; develops operating budgets and monitors expenditures.

Recommendation, EN3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 10 semester hours in engine maintenance and repair, 3 in maintenance technology, and 1 in blueprint reading (12/78).

Recommendation, EN2

In the vocational certificate category, 12 semester hours in engine maintenance and repair, 3 in maintenance technology, 1 in blueprint reading, and 1 in record keeping. In the lower-division baccalaureate/associate degree category, 12 semester hours in engine maintenance and repair, 3 in maintenance technology, 1 in blueprint reading, and 1 in record keeping; if assigned to gas turbine propulsion systems, credit in gas turbine technology on the basis of institutional evaluation (12/78).

Recommendation, EN1

In the vocational certificate category, 15 semester hours in engine maintenance and repair, 3 in maintenance technology, 1 in blueprint reading, and 2 in record keeping. In the lower-division baccalaureate/associate degree category, 15 semester hours in engine maintenance and repair, 6 in maintenance technology, 1 in blueprint reading, 2 in record keeping, 2 in maintenance management, 2 in personnel supervision, and 3 in human relations; if assigned to gas turbine propulsion systems, credit in gas turbine technology on the basis of institutional evaluation (12/78).

Recommendation, ENC

In the vocational certificate category, the recommendation is the same as that for EN1. In the lower-division baccalaureate/associate degree category, 15 semester hours in engine maintenance and repair, 6 in maintenance technology, 1 in blueprint reading, 2 in record keeping, 3 in maintenance management, 3 in personnel supervision, and 3 in human relations; if assigned to gas turbine propulsion systems, credit in gas turbine technology on the basis of institutional evaluation (12/78).

Recommendation, ENCS

In the vocational certificate category, the recommendation is the same as that for EN1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for ENC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/78).

Recommendation, ENCM

In the vocational certificate category, the recommendation is the same as that for EN1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for ENC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (12/78).

ENCM

Exhibit Dates: 1/86–Present.

Occupational Field: 3 (Marine Engineering).

Career Pattern

FN: Fireman (E-3). *EN3:* Engineman Third Class (E-4). *EN2:* Engineman Second Class (E-5). *EN1:* Engineman First Class (E-6). *ENC:* Chief Engineman (E-7). *ENCS:* Senior Chief Engineman (E-8). *ENCM:* Master Chief Engineman (E-9).

Description

Summary: Operates, repairs, and performs maintenance on internal-combustion engines, main propulsion machinery, refrigeration and air conditioning equipment, gas-turbine engines, and shipboard auxiliary equipment; stands watch on auxiliary boilers. *EN3:* Aligns and operates drain systems, stripping systems, machinery cooling water systems, oil systems, and purifier systems; aligns steam systems; operates pumps; aligns, operates and secures internal combustion engines, steam distilling plants, compressed air systems, refrigeration and air conditioning systems; records pressure and temperature readings on operating equipment; conducts tests on lubricating oil and distillate fuels; operates and maintains auxiliary boilers; maintains tools; overhauls valves; performs preventive maintenance on auxiliary equipment, main propulsion equipment and on small craft clutches, transmissions, drive shafts and packing glands; tests electro-hydraulic steering systems; inspects for leaks on reduction gears and thrust bearings; installs or removes and replaces flange shields on piping systems; fabricates and fits tubing and flexible hose assemblies; monitors electrical charging and regulating systems; operates and maintains hydraulic equipment; controls or minimizes the effects of oil and fuel spillage; completes maintenance data system forms; uses blueprints, drawings and manuals; tests boiler water and feed water. *EN2:* Able to perform the duties required for EN3; operates lube oil service, fill and storage systems and steam reducing stations; performs pre-start inspections; tests evaporators and condensers for leaks; conducts feed tests and treatment on distilling plants; aligns pump driving units; overhauls air compressors, internal combustion engines, pumps, refrigeration and air conditioning compressors, small craft clutches, transmissions and drive shafts; repairs valves and packing glands; tests and recharges refrigeration and air conditioning systems; tests and repairs piping systems; tests, cleans, inspects, and repairs or replaces heat exchangers; troubleshoots and repairs auxiliary equipment, internal combustion engines and distilling plants; uses halide torch to test for leaks on refrigeration and air conditioning equipment; adjusts valves, injectors, control racks, governor and governor control linkages on diesel engines; checks oil clearance in bearings; disassembles, cleans, repairs, assembles, tests and replaces fuel nozzles; inspects and repairs lube oil and fuel oil purifiers; inspects metal surfaces for cracks or defects by the dye-penetrant and magnaflux methods; inspects, adjusts and test-runs diesel and gasoline engines; lubricates steering gear; operates and maintains vertical conveyors; operates and troubleshoots internal combustion engine blowers and turbo-chargers; operates an engine lathe; adjusts and repairs refrigeration automatic controls. *EN1:* Able to perform the duties required for EN2; analyzes malfunctions of main propulsion equipment and takes corrective action; repairs and maintains mechanical and hydraulic governors, overspeed trips and load limiting governors; checks main engine bearing readings; inspects and checks clearances on blowers and turbo-chargers; measures main propulsion shaft thrust clearance; conducts quality assurance inspections; supervises maintenance activities; prepares planned maintenance schedules. *ENC:* Able to perform the duties required for EN1; conducts diesel engine post-overhaul checkout; checks main reduction gears for backlash and alignment; measures crankshaft deflection; uses trend analysis data to determine changes in diesel engines; supervises personnel in the operation, maintenance, and repair of engineroom and auxiliary equipment; analyzes results of oil tests. *ENCS:* Able to perform the duties required for ENC; monitors environmental pollution control programs; administers long-range planned maintenance programs; plans and schedules workloads; writes correspondence, directives and instructions. *ENCM:* Able to perform the duties required for ENCS; reviews overhaul work package; monitors all ship-to-shop work and maintenance progress reports; establishes goals, objectives and priorities; prepares staff studies; develops operating budgets and monitors expenditures; forecasts future requirements.

Recommendation, EN3

In the lower-division baccalaureate/associate degree category, 10 semester hours in engine maintenance and repair, 3 in maintenance technology, and 1 in blueprint reading (10/87).

Recommendation, EN2

In the lower-division baccalaureate/associate degree category, 12 semester hours in engine maintenance and repair, 3 in maintenance technology, 1 in blueprint reading, and 1 in record keeping; if assigned to gas turbine propulsion systems, 1-3 semester hours in gas turbine technology on the basis of institutional evaluation (10/87).

Recommendation, EN1

In the lower-division baccalaureate/associate degree category, 15 semester hours in engine maintenance and repair, 6 in maintenance technology, 1 in blueprint reading, 2 in record keeping, 2 in maintenance management, and 2 in personnel supervision; if assigned to gas turbine propulsion systems, 1-3 semester hours in gas turbine technology on the basis of institutional evaluation (10/87).

Recommendation, ENC

In the lower-division baccalaureate/associate degree category, 15 semester hours in engine maintenance and repair, 6 in maintenance technology, 1 in blueprint reading, 2 in record keeping, 3 in maintenance management, and 3 in personnel supervision; if assigned to gas turbine propulsion systems; 1-3 semester hours in gas turbine technology on the basis of institutional evaluation (10/87).

Recommendation, ENCS

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for ENC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (10/87).

Recommendation, ENCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for ENC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (10/87).

NER-EO-001

Equipment Operator

EO3
EO2
EO1
EOC
EOCS

Exhibit Dates: 6/71–Present.

Occupational Field: 13 (Construction).

Career Pattern

CN: Constructionman (E-3). *EO3:* Equipment Operator Third Class (E-4). *EO2:* Equipment Operator Second Class (E-5). *EO1:* Equipment Operator First Class (E-6). *EOC:* Chief Equipment Operator (E-7). *EOCS:* Senior Chief Equipment Operator (E-8). *EQCM:* Master Chief Equipmentman (E-9).

Description

Summary: Operates automotive, material-handling, weight-lifting and construction equipment involved in earth moving, road building, quarrying, asphalt batching and paving, concrete paving, and construction work. *EO3:* Able to perform the duties required for CN (Constructionman); reads workship drawings and sketches; reads grade stake markings; computer working loads for lines and wire rope; uses slings, spreaders, cargo nets, and hooks; determines optimum working distances for construction equipment with the exception of scrapers; changes attachments and adapts cable/hydraulic assemblies on tractors (wheeled and crawler) with front and rear mounted and towed attachments; maintains, dismounts, repairs, and mounts tires; operates and performs operator maintenance on portable rotary rock drill, self-propelled compaction equipment, wheel and crawler tractors, wheel and crawler front-end loaders, warehouse and rough-terrain forklifts up to 6,000 pounds capacity, passenger-carrying vehicles, and trucks through 5-ton, including truck-tractor with semitrailer. *EO2:* Able to perform the duties required for EO3; works from construction drawings and specifications; draws simple shop drawings and sketches; maintains records and logs, including time sheets; prepares requisitions; changes attachments and adapts cable/hydraulic assemblies on multipurpose excavators and cranes (crawler), up to and including 3-cubic-yard for clamshell, dragline, shovel-front, backhoe, pile driver, and hooklock; operates and performs operator maintenance on scrapers, cranes, pile drivers, rock drills, asphalt pavers, soil stabilization mixers, and rough-terrain forklifts, up to and including those with 18,000-pound capacity; maintains asphalt surfaces. *EO1:* Able to perform the duties required for EO2; prepares as-built drawings, work progress reports, and material usage data; implements on-the-job training; directs crews in excavating, paving, grading, hauling, and materials-handling operations; makes work assignments; uses Critical Path Method (CPM) schedules; is a quarry operator and construction inspector; operates and performs operator maintenance on asphalt and concrete batch plants; computes volume of embankment sections; estimates manpower, material, and equipment needs from drawings and specifications; carries out procedures to limit or minimize the adverse effects of oil and fuel spillage and of fuel combustion on air quality. *EOC:* Able to perform the duties required for EO1; drafts letters, reports, and instructions; coordinates and supervises the work performed by unit personnel; provide technical advice on plans and specifications and on equipment operation, construction, and maintenance techniques; implements maintenance and cost control programs; prepares and maintains project progress charts; organizes and controls the site deployment of materials and equipment. *EOCS:* Able to perform the duties required for EOC; provides information and advice on the capabilities, utilization, and operations in own area of responsibility; prepares correspondence; prepares local directives and instructions for attaining organizational objectives and improving operations; establishes and implements a program for assigning and evaluating personnel; coordinates the assignment of equipment among various projects according to priorities; administers construction force tool inventory and inspection program; prepares and maintains visual status boards; directs the repair, alteration, and maintenance of all facilities under the cognizance of public works department; establishes a maintenance and cost control program; coordinates and evaluates labor reporting, material and equipment usage and maintenance data and prepares related reports; organizes, schedules, and evaluates training programs.

Recommendation, EO3

In the vocational certificate category, 10 semester hours in construction equipment operation, 3 in introduction to construction equipment, and 2 in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 2 semester hours in construction equipment operation and 1 in mechanical maintenance (1/77).

Recommendation, EO2

In the vocational certificate category, 20 semester hours in construction equipment operation, 3 in introduction to construction equipment, and 3 in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 4 semester hours in construction equipment operation and 2 in mechanical maintenance (1/77).

Recommendation, EO1

In the vocational certificate category, 30 semester hours in construction equipment operation, 3 in introduction to construction equipment, and 3 in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 6 semester hours in construction equipment operation, 2 in operations management, 2 in personnel supervision, and 2 in mechanical maintenance (1/77).

Recommendation, EOC

In the vocational certificate category, the recommendation is the same as that for EO1. In the lower-division baccalaureate/associate degree category, 6 semester hours in construction equipment operation, 3 in operations management, 3 in personnel supervision, and 2 in mechanical maintenance (1/77).

Recommendation, EOCS

In the vocational certificate category, the recommendation is the same as that for EO1. In the lower-division baccalaureate/associate degree category, 6 semester hours in construction equipment operation, 3 in operation planning, 3 in operations management, 3 for field experience in management, 3 in personnel supervision, and 2 in mechanical maintenance. In the upper-division baccalaureate category, 3 semester hours in operations/construction management and 3 in human relations (1/77).

NER-EQ-001

Equipmentman, Master Chief

EQCM

Exhibit Dates: 6/71–Present.

Occupational Field: 13 (Construction).

Career Pattern

May progress to EQCM, Master Chief Equipmentman (E-9), from either EOCS, Senior Chief Equipment Operator (E-8), or CMCS, Senior Chief Construction Mechanic (E-8). *EQCM:* Master Chief Equipmentman (E-9).

Description

Able to perform the duties required for Either EOCS (Senior Chief Equipment Operator) or CMCS (Senior Chief Construction Mechanic); forecasts future requirements and plans and initiates action to satisfy them; establishes goals and priorities; plans, organizes, implements, and controls work activities in compliance with policy statements and directives; reviews personnel, equipment, and material requirements; is responsible for the administration of a department or company; develops procedures for work improvement and simplification through organizational analysis; manages a contracts inspection branch; implements pollution control and energy conservation programs; develops operating budgets and monitors expenditures; assists in managing a public works department.

Recommendation

In the vocational certificate category, use the recommendation for either EO1 (Equipment Operator First Class) in exhibit NER-EO-001 or CMCS (Senior Chief Construction Mechanic) in exhibit NER-CM-001, as appropriate. In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of administration, 3 in construction contracts and agreements, and 3 in government budgeting procedures; add either the 20 semester hours for EOCS (Senior Chief Equipment Operator) in exhibit NER-EO-001, or the 22 semester hours for CMCS in exhibit NER-CM-001. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 in forecasting, and 3 for a practicum in management; add either the 6 semester hours for EOCS in exhibit NER-EO-001, or the 6 semester hours for CMCS in exhibit NER-CM-001, as appropriate (1/77).

NER-ET-001

Electronics Technician

ET1
ETC
ETCS
ETCM

Exhibit Dates: 6/71–6/78.

Occupational Field: 8 (Weapons Control).

Career Pattern

May progress from: ETN2, Electronics Technician, Communications, Second Class (E-5); or ETR2, Electronics Technician, Radar, Second Class (E-5). *ET1:* Electronics Technician, First Class (E-6). *ETC:* Chief Electronics Technician (E-7). *ETCS:* Senior Chief Electronics Technician (E-8). *ETCM:* Master Chief Electronics Technician (E-9).

Description

ET1: Able to perform the duties required for ETN2 or ETR2; diagnoses, isolates, aligns, adjusts, and calibrates electronic subsystems; monitors maintenance quality control; prepares weekly preventive maintenance schedules; maintains inventory of parts; reviews completed maintenance data forms; trains in the operation of tests on systems and subsystems. *ETC:* Able to perform the duties required for ET1; supervises the repair of electronic systems and subsystems; uses accounting procedures to maintain control of inventories, workflow, and work accomplished; estimates time and support required for repair of equipment; provides technical and supervisory liaison between work centers; implements and administers a maintenance and repair program; prepares quarterly preventive maintenance schedules. *ETCS:* Able to perform the duties required for ETC; evaluates operational test results against engineering design standards; reviews, prepares, and administers the electronic repair organization bill; prepares directives and instructions for attaining organization objectives; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; organizes and schedules training programs and evaluates their effectiveness; administers a long-range planned maintenance program. *ETCM:* Able to perform the duties required for ETCS; organizes, controls, directs and evaluates personnel and equipment utilization; forecasts future requirements and reviews personnel, equipment, and material requirements; coordinates activities with other departments; develops operating budgets and monitors expenditures.

Recommendation, ET1

In the vocational certificate category, use the 19 semester hours for ETN2 (Electronics Technician, Communications, Second Class) in exhibit NER-ETN-001, or the 19 semester hours for ETR2 (Electronics Technician, Radar, Second Class) in exhibit NER-ETR-001, and 2 additional semester hours in systems maintenance. In the lower-division baccalaureate/associate degree category, use the 16 semester hours for ETN2 (Electronics Technician, Communications, Second Class) in exhibit NER-ETN-001, or the 16 semester hours for ETR2 (Electronics Technician, Radar, Second Class) in exhibit NER-ETR-001, and additional credit as follows: 1 additional semester hour in systems maintenance, 3 in human relations, 2 in personnel supervision, and 2 in maintenance management. In the upper-division baccalaureate category, 6 semester hours in circuit analysis (12/78).

Recommendation, ETC

In the vocational certificate category, use the 21 semester hours for ET1 and 1 semester hour in record keeping. In the lower-division baccalaureate/associate degree category, use the 24 semester hours for ET1 and additional credit as follows: 1 additional semester hour in personnel supervision, 1 in maintenance management, 1 semester hour in record keeping, and 1 in report writing. In the upper-division baccalaureate category, 6 semester hours in circuit analysis (12/78).

Recommendation, ETCS

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for ETC. In the upper-division baccalaureate category, 6 semester hours in circuit analysis, 3 for field experience in management, and 3 in management problems (12/78).

Recommendation, ETCM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for ETC. In the upper-division baccalaureate category, 6 semester hours in circuit analysis, 6 for field experience in management, and 3 in management problems (12/78).

SN: Seaman (E-3). *ETN3:* Electronics Technician, Communications, Third Class (E-4). *ETN2:* Electronics Technician, Communications, Second Class (E-5). *ET1:* Electronics Technician, First Class (E-6). *ETC:* Chief Electronics Technician (E-7). *ETCS:* Senior Chief Electronics Technician (E-8). *ETCM:* Master Chief Electronics Technician (E-9).

Description

Summary: Performs maintenance on electronic equipment and components used for communications, cryptography, and navigation; possesses a general working knowledge of electricity and electronics. *ETN3:* Reads and interprets schematic and block diagrams; uses test equipment and handtools; repairs electrical/electronic cables and connectors; localizes malfunctions and repairs or replaces faulty parts or subassemblies; aligns, adjusts, calibrates, and performs preventive maintenance on equipment; inventories tools and portable test equipment; orders parts and tools; inspects, cleans, and lubricates equipment; completes maintenance data forms. *ETN2:* Able to perform the duties required for ETN3; maintains electrical/electronic navigational aids, and communications receiving and transmitting equipment; localizes malfunctions to systems, subsystems, circuits, and parts; inventories installed equipment; completes maintenance reports.

Recommendation, ETN3

In the vocational certificate category, 2 semester hours in applied mathematics, 3 in basic electronics, 5 in circuit theory, and 6 in systems maintenance, and credit in troubleshooting techniques on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 3 in basic electronics, 5 in circuit theory, 1 in digital electronics, and 2 in systems maintenance, and credit in troubleshooting techniques on the basis of institutional evaluation (12/78).

Recommendation, ETN2

In the vocational certificate category, 2 semester hours in applied mathematics, 3 in basic electronics, 6 in circuit theory, and 8 in systems maintenance, and credit in troubleshooting techniques on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 3 in basic electronics, 6 in circuit theory, 2 in digital electronics, and 3 in systems maintenance, and credit in troubleshooting techniques on the basis of institutional evaluation (12/78).

NER-ETR-001

ELECTRONICS TECHNICIAN, RADAR

ETR3
ETR2

Exhibit Dates: 6/71–6/78. (Effective 7/78, the ETR rating was discontinued.)

Occupational Field: 8 (Weapons Control).

Career Pattern

SN: Seaman (E-3). *ETR3:* Electronics Technician, Radar, Third Class (E-4). *ETR2:* Electronics Technician, Radar, Second Class (E-5). *ET1:* Electronics Technician, First Class (E-6). *ETC:* Chief Electronics Technician (E-7). *ETCS:* Senior Chief Electronics Technician (E-8). *ETCM:* Master Chief Electronics Technician (E-9).

Description

Summary: Performs maintenance on electronic surface and air tracking and detection equipment, electronic recognition and identification equipment, and aids to navigation; possesses a general working knowledge of electricity and electronics. *ETR3:* Reads and interprets schematics and block diagrams; uses test equipment and handtools; repairs electrical/electronic cables and connectors; localizes malfunctions and repairs or replaces faulty parts or subassemblies; aligns, adjusts, calibrates, and performs preventive maintenance on equipment; inventories tools and portable test equipment; orders parts and tools; inspects, cleans, and lubricates equipment; completes maintenance data forms. *ETR2:* Able to perform the duties required for ETR3; maintains radar transmitting equipment, radar receiving equipment, radar identification equipment, and air navigation equipment; localizes malfunctions to systems, subsystems, circuits, and parts; inventories installed equipment; completes maintenance reports.

Recommendation, ETR3

In the vocational certificate category, 2 semester hours in applied mathematics, 3 in basic electronics, 5 in circuit theory, and 6 in systems maintenance, and credit in troubleshooting techniques on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 3 in basic electronics, 5 in circuit theory, 1 in digital electronics, and 2 in systems maintenance, and credit in troubleshooting techniques on the basis of institutional evaluation (12/78).

Recommendation, ETR2

In the vocational certificate category, 2 semester hours in applied mathematics, 3 in basic electronics, 6 in circuit theory, and 8 in systems maintenance, and credit in troubleshooting techniques on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 3 in basic electronics, 6 in circuit theory, 2 in digital electronics, and 3 in systems maintenance, and credit in troubleshooting techniques on the basis of institutional evaluation (12/78).

NER-EW-001

ELECTRONICS WARFARE TECHNICIAN

EW3
EW2
EW1
EWC
EWCS
EWCM

Exhibit Dates: 6/71–Present.

Occupational Field: 10 (Sensor Operations).

Career Pattern

SN: Seaman (E-3). *EW3:* Electronics Warfare Technician, Third Class, (E-4). *EW2:* Electronics Warfare Technician, Second Class (E-5). *EW1:* Electronics Warfare Technician, First Class (E-6). *EWC:* Chief Electronics Warfare Technician (E-7). *EWCS:* Senior Chief Electronics Warfare Technician (E-8). *EWCM:* Master Chief Electronics Warfare Technician (E-9).

Description

Summary: Operates, repairs, and performs maintenance on electronic warfare equipment; analyzes and evaluates received signals. *EW3:* Operates electronic signal analyzing equipment; operates electronic direction-finding equipment; maintains radio frequency transmission systems; performs maintenance on electronic warfare equipment; reads and interprets electronic block diagrams. *EW2:* Able to perform the duties required for EW3; tests analog and digital circuits, servomechanisms, and digital logic and interconnecting circuits; operates general-purpose test equipment, including power meters, oscilloscopes, signal generators, counters, pulse generators, and time/frequency domain reflectometers; reads and interprets electrical/electronic schematics and blueprints for maintenance and modifications; inventories installed equipment and spare part support. *EW1:* Able to perform the duties required for EW2; analyzes electronic systems faults and initiates corrective action; analyzes test equipment defects and determines corrective action; trains electronics warfare operators in signal analysis and equipment operation; prepares weekly preventive maintenance schedules. *EWC:* Able to perform the duties required for EW1; tests and evaluates newly installed or repaired electronic warfare equipment; conducts electronic interference surveys and recommends corrective action; supervises an operational training program for electronic warfare personnel; supervises and trains personnel in maintenance procedures; coordinates test equipment calibration requirements and procedures; writes messages and prepares reports; prepares quarterly maintenance schedules. *EWCS:* Able to perform the duties required for EWC; administers a long-range planned maintenance program; coordinates the collection, preparation, and dissemination of technical information pertaining to test, maintenance, and repair of electronic warfare systems; prepares directives and instructions for attaining organization objectives and improving operations; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; organizes and schedules training programs. *EWCM:* Able to perform the duties required for EWCS; plans, organizes, and implements electronic warfare activities; forecasts future requirements; develops operating budgets and monitors expenditures.

Recommendation, EW3

In the vocational certificate category, 6 semester hours in systems maintenance, 3 in basic electronics, 5 in circuit theory, and 2 in applied mathematics, and credit in troubleshooting techniques on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 2 semester hours in systems maintenance, 3 in basic electronics, 5 in circuit theory, 2 in applied mathematics, and 1 in digital electronics, and credit in troubleshooting techniques on the basis of institutional evaluation (12/78).

Recommendation, EW2

In the vocational certificate category, 8 semester hours in systems maintenance, 3 in basic electronics, 5 in circuit theory, and 2 in applied mathematics, and credit in troubleshooting techniques on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in systems maintenance, 3 in basic electronics, 6 in circuit theory, 2 in applied mathematics, and 2 in digital electronics, and credit in troubleshooting techniques on the basis of institutional evaluation (12/78).

Recommendation, EW1

In the vocational certificate category, 10 semester hours in systems maintenance, 3 in basic electronics, 5 in circuit theory, and 2 in applied mathematics, and credit in troubleshooting techniques on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 4 semester hours in systems maintenance, 3 in basic electronics, 5 in circuit theory, 2 in applied mathematics, 2 in digital electronics, 3 in human relations, 2 in personnel supervision, and 2 in maintenance management, and credit in troubleshooting techniques on the basis of institutional evaluation. In the upper-division baccalaureate category, 6 semester hours in circuit theory (12/78).

Recommendation, EWC

In the vocational certificate category, 10 semester hours in systems maintenance, 3 in basic electronics, 5 in circuit theory, 2 in applied mathematics, and 1 in record keeping, and credit in troubleshooting techniques on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 4 semester hours in systems maintenance, 3 in basic electronics, 5 in circuit theory, 2 in applied mathematics, 2 in digital electronics, 3 in human relations, 3 in personnel supervision, 3 in maintenance management, 1 in record keeping, and 1 in report writing, and credit in troubleshooting techniques on the basis of institutional evaluation. In the upper-division baccalaureate category, 6 semester hours in circuit theory (12/78).

Recommendation, EWCS

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for EWC. In the upper-division baccalaureate category, 6 semester hours in circuit theory, 3 for field experience in management, and 3 in management problems (12/78).

Recommendation, EWCM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for EWC. In the upper-division baccalaureate category, 6 semester hours in circuit theory, 6 for field experience in management, and 3 in management problems (12/78).

NER-FC-001

FIRE CONTROLMAN

FC3
FC2
FC1
FCC
FCCS
FCCM

Exhibit Dates: 1/86–Present.

Occupational Field: 8 (Weapons Control).

Career Pattern

SN: Seaman (E-3). *FC3:* Fire Controlman Third Class (E-4). *FC2:* Fire Controlman Second Class (E-5). *FC1:* Fire Controlman First Class (E-6). *FCC:* Chief Fire Controlman (E-7). *FCCS:* Senior Chief Fire Controlman (E-8). *FCCM:* Master Chief Fire Controlman (E-9).

Description

Summary: Operates, repairs, and performs maintenance on shipboard gun fire control systems (including submarine weapon control systems and associated test equipment) and surface missile fire control systems (including weapon direction systems and search radar), telemetry equipment, missiles, and associated support equipment. *FC3:* Troubleshoots and repairs electrical and electronic gun fire control systems and surface missile fire control systems; performs preventive maintenance on weapons; follows standard checkout procedures to locate and repair system malfunctions; tests, aligns, and adjusts radar-indicating circuits and power supplies; uses test equipment, including voltmeters, oscilloscopes, and signal generators; performs operational tests and operator adjustments on weapon equipment; operates radar equipment, fire control systems, and weapons direction/designation systems in all modes; fabricates, maintains, and installs electrical/electronics cable assemblies; performs electro-mechanical maintenance on mechanical and electrical mechanical assemblies; completes maintenance forms; inventories parts and supplies. *FC2:* Able to perform the duties required for FC3; repairs, troubleshoots, and performs preventive maintenance on electrical and electronic gun fire control systems, specialized equipment, and circuits; reads schematics and block diagrams; completes maintenance reports; inventories installed equipment. *FC1:* Able to perform the duties required for FC2; analyzes fire control systems failures and directs corrective maintenance action; coordinates shop activities and serves as weapon systems test coordinator; diagnoses non-routine malfunctions and provides the expertise necessary to affect repairs; inspects completed work assignments; tests, analyzes, isolates faults, and adjusts digital computers; prepares weekly maintenance schedules. *FCC:* Able to perform the duties required for FC1; plans and implements inspection programs and safety inspections; prepares periodic reports; serves as shop supervisor; prepares quarterly maintenance schedules. *FCCS:* Able to perform the duties required for FCC; advises and provides information on reliability, utilization, capabilities, and operations of weapons department; prepares directives and instructions for attaining organization objectives; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; organizes and schedules training programs; administers a long-range planned maintenance program. *FCCM:* Able to perform the duties required for FCCS; provides technical information and advice concerning operational employment of weapons equipment; plans, organizes, implements, and controls activities; forecasts future requirements and reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, FC3

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics and 3 in applied mathematics (10/87).

Recommendation, FC2

In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, and 3 in basic blueprint reading.

Recommendation, FC1

In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, 3 in basic blueprint reading, 2 in personnel supervision, 2 in maintenance management, and 3 in human relations (10/87).

Recommendation, FCC

In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, 3 in basic blueprint reading, 3 in personnel supervision, 3 in maintenance management, and 3 in human relations (10/87).

Recommendation, FCCS

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for FCC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (10/87).

Recommendation, FCCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for FCC. In the upper-division baccalaureate category, 6 semester hours for field experience in managment and 3 in management problems (10/87).

NER-FN-001

FIREMAN

FN

Exhibit Dates: 6/71–12/89.

Career Pattern

Fireman is a general rate (Naval apprenticeship) for persons at paygrade E-1 (recruit), E-2 (Fireman apprentice), and E-3 (Fireman). At paygrade E-4 (petty officer third class), the person may enter any one of the following ratings: Boiler Technician (BT), Electrician's Mate (EM), Engineman (EN), Gas Turbine System Technician (GS), Interior Communications Electrician (IC), Machinist's Mate (MM), Hull Maintenance Technician, (HT), Machinery Repairman (MR), Molder (ML), or Patternmaker (PM).

Description

Performs all basic fireman apprenticeship functions in engineering areas aboard ship, involving cleanliness, operation, maintenance, and preservation of main propulsion, auxiliary steam or diesel machinery, steam or diesel generators, various pumps, motors, and associated equipment; identifies functions of refrigeration equipment, anchor windlasses, distilling plants, and compressors; uses and maintains handtools; stands security watches and fire watches; knows the purpose and limitations of first aid and the first aid treatment for electrical shock, simple and compound fractures, heat exhaustion, heat stroke, and burns; must be qualified as a Swimmer Fourth Class, requiring floating for a minimum of five minutes, preparing and using clothing and buoyant objects for staying afloat, and swimming through oil, flames, and debris; knows how to determine the classes of fire and how to extinguish them; knows how to couple, uncouple, and stow fire hoses and how to use carbon dioxide, dry chemical, and water-portable fire extinguishers; knows the function of the typical fire main system, fixed carbon dioxide system, water washdown system, and magazine sprinkling system; knows the difference between flooding and progressive flooding and the dangers involved.

Recommendation

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in marine engineering and credit in first aid and fire science on the basis of institutional evaluation; if the duty assignment was boat engineer, 3 semester hours in diesel engine technology; if qualified as a Swimmer First Class, 1 semester hour in swimming and additional credit in swimming on the basis of institutional evaluation (12/78). NOTE: Credit for Fireman (FN) should be granted only after paygrade E-3 has been achieved.

NER-FN-002

FIREMAN

FN

Exhibit Dates: 1/90–Present.

Career Pattern

Fireman is a general rate (Naval apprenticeship) for persons at paygrade E-1 (recruit), E-2 (Fireman apprentice), and E-3 (Fireman). At paygrade E-4 (petty officer third class), the person may enter any one of the following ratings: Boiler Technician (BT), Electrician's Mate (EM), Engineman (EN), Gas Turbine System Technician (GS), Interior Communications Electrician (IC), Machinist's Mate (MM), Damage Controlman (DC), Hull Maintenance Technician (HT), Machinery Repairman (MR), Molder (ML), or Patternmaker (PM).

Description

Performs all basic fireman apprenticeship functions in engineering areas aboard ship, involving cleanliness, operation, maintenance, and preservation of main propulsion, auxiliary steam or diesel machinery, steam or diesel generators, various pumps, motors, and associated equipment; identifies basic types and components of naval boilers, steam turbines, reduction gears, propellers and shafting, shipboard electric systems, and internal combustion engines; performs routine maintenance procedures.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to marine engineering and 1 in blueprint reading; if qualified as a Swimmer First Class, 1 semester hour in swimming and additional credit in swimming on the basis of institutional evaluation. NOTE: Credit for Fireman should be granted only after paygrade E-3 has been achieved (3/90).

NER-FT-001

FIRE CONTROL TECHNICIAN

FTCS
FTCM

Exhibit Dates: 6/73–12/89.

Occupational Field: 8 (Weapons Control)

Career Pattern

May progress from: FTBC, Chief Fire Control Technician, Ballistic Missile Fire Control (E-7); FTGC, Chief Fire Control Technician, Gun Fire Control (E-7), FTMC, Chief Fire Control Technician, Surface Missile Fire Control (E-7); or MTC, Chief Missile Technician (E-7). *FTCS:* Senior Chief Fire Control Technician (E-8). *FTCM:* Master Chief Fire Control Technician (E-9)

Description

FTCS: Able to perform the duties required for FTBC (Chief Fire Control Technician, Ballistic Missile Fire Control), FTGC (Chief Fire Control Technician, Gun Fire Control), FTMC (Chief Fire Control Technician, Surface Missile Fire Control), or MTC (Chief Missile Technician); advises and provides information on reliability, utilization, capabilities, and operations of weapons department, prepares directives and instructions for attaining organization objectives; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; organizes and schedules training programs; administers a long-range planned maintenance program. *FTCM:* Able to perform the duties required for FTCS: provides technical information and advice concerning operational employment of weapons equipment; plans, organizes, implements, and controls activities; forecasts future requirements and reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, FTCS

In the vocational certificate category, use the recommendation for FTG2 (Fire Control Technician, Gun Fire Control, Second Class) in exhibit NER-FTG-001, or FTB2 (Fire Control Technician, Ballistic Missile Fire Control, Second Class) in exhibit NER-FTB-001, or FTM2 (Fire Control Technician, Surface Missile Fire Control, Second Class) in exhibit NER-FTM-001, or MT2 (Missile Technician, Second Class) in exhibit NER-MT-001, as appropriate. In the lower-division baccalaureate/associate degree category, use the recommendation for FTGC (Chief Fire Control Technician, Gun Fire Control) in exhibit NER-FTG-001, or FTBC (Chief Fire Control Technician, Ballistic Missile Fire Control) in exhibit NER-FTB-001, or FTMC (Chief Fire Control Technician, Surface Missile Fire Control) in exhibit NER-FTM-001, or MTC (Chief Missile Technician) in exhibit NER-MT-001, as appropriate. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/78).

Recommendation, FTCM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for FTCS. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (12/78).

NER-FT-002

FIRE CONTROL TECHNICIAN

FTCS
FTCM

Exhibit Dates: 1/90–Present.

Occupational Field: 8 (Weapons Control).

Career Pattern

May progress from: FTBC, Chief Fire Control Technician, Ballistic Missile Fire Control (E-7); FTGC, Chief Fire Control Technician, Gun Fire Control (E-7); or MTC, Chief Missile Technician (E-7). *FTCS:* Senior Chief Fire Control Technician (E-8). *FTCM:* Master Chief Fire Control Technician (E-9).

Description

FTSC: Able to perform the duties required for FTBC (Chief Fire Control Technician, Ballistic Missile Fire Control), FTGC (Chief Fire Control Technician, Gun Fire Control), or MTC (Chief Missile Technician); advises and provides information on reliability, utilization, capabilities, and operations of weapons department; reviews directives and instructions for attaining organization objectives; prepares correspondence; organizes and schedules training programs; administers a long-range planned maintenance program. *FTCM:* Able to perform the duties required for FTCS; provides technical information and advice concerning operational employment of weapons equipment; plans, organizes, implements, and controls activities; forecasts future requirements and reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures; prepares staff studies.

Recommendation, FTCS

In the lower-division baccalaureate/associate degree category, use the recommendation for FTCG (Chief Fire Control Technician, Gun Fire Control) in exhibit NER-FTG-002, or FTBC (Chief Fire Control Technician, Ballistic Missile Fire Control) in exhibit NER-FTB-002, or MTC (Chief Missile Technician) in exhibit NER-MT-001, as appropriate. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/89).

Recommendation, FTCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for FTCS. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (12/89).

NER-FTB-001

FIRE CONTROL TECHNICIAN, BALLISTIC MISSILE FIRE CONTROL

FTB3
FTB2
FTB1
FTBC

Exhibit Dates: 6/73–12/89.

Occupational Field: 8 (Weapons Control).

Career Pattern

SN: Seaman (E-3). *FTB3:* Fire Control Technician, Ballistic Missile Fire Control, Third Class (E-4). *FTB2:* Fire Control Technician, Ballistic Missile Fire Control, Second Class (E-5). *FTB1:* Fire Control Technician, Ballistic Missile Fire Control, First Class (E-6). *FTBC:* Chief Fire Control Technician, Ballistic Missile Fire Control (E-7). *FTCS:* Senior Chief Fire Control Technician (E-8). *FTCM:* Master Chief Fire Control Technician (E-9).

Description

Summary: Operates, repairs, and performs maintenance on ballistic missile fire control systems, equipment, and associated test equipment. *FTB3:* Adjusts, aligns, and calibrates basic electronic circuits; under supervision, performs troubleshooting, calibration, adjustments, and tests on missile fire control and guidance systems and support subsystems; isolates and replaces faulty parts and components; identifies electrical components and parts from drawings and schematic diagrams; identifies basic digital circuits; orders repair parts; completes maintenance data forms. *FTB2:* Able to perform the duties required for FTB3; isolates and replaces defective circuit components; performs troubleshooting, calibration, adjustments, and tests on missile fire control and guidance systems and support subsystems; operates analog/digital computer; maintains logs and records; completes maintenance reports; inventories installed equipment. *FTB1:* Able to perform the duties required for FTB2; inspects maintenance and repair work of weapon systems and auxiliary equipment; reviews completed maintenance data forms; prepares weekly maintenance schedules; administers nuclear weapon security procedures. *FTBC:* Able to perform the duties required for FTB1; serves as shop supervisor; coordinates and directs maintenance on fire control, guidance, missile, test, and readiness equipment and support subsystems; assures compliance with nuclear weapons safety rules; prepares reports; prepares quarterly maintenance schedules.

Recommendation, FTB3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics and 3 in applied mathematics (12/78).

Recommendation, FTB2

In the vocational certificate category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, 3 in basic blueprint reading, and 2 in applied physics. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, and 3 in basic blueprint reading (12/78).

Recommendation, FTB1

In the vocational certificate category, the recommendation is the same as that for FTB2. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, 3 in basic blueprint reading, 2 in personnel supervision, 2 in maintenance management, and 3 in human relations (12/78).

Recommendation, FTBC

In the vocational certificate category, the recommendation is the same as that for FTB2. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, 3 in basic blueprint reading, 3 in personnel supervision, 3 in maintenance management, 3 in human relations, and 1 in record keeping (12/78).

Description

Summary: Operates, tests, repairs, and performs maintenance on shipboard gun fire control systems including submarine weapons control systems and associated test equipment. *FTG3:* Assists in troubleshooing and repairing electrical and electronic gun fire control systems; performs preventive maintenance on weapons; follows standard checkout procedures to locate and repair system malfunctions; operates target bearing transmitters and digital data storage devices; loads computer programs; complies with nuclear weapons safety standards; uses test equipment, including voltmeters, oscilloscopes, and signal generators; performs operational test and operator adjustments on weapon equipment; operates fire control systems and weapons direction/designation systems in all modes; fabricates, maintains, and installs electrical/electronics cable assemblies; completes maintenance forms; inventories parts and supplies; performs mathematical computations as necessary in plotting targets. *FTG2:* Able to perform the duties required for FTG3; writes and installs machine-coded maintenance procedures; repairs, troubleshoots, and performs preventive maintenance on electrical and electronic gun fire control systems and circuits; prepares computer for all modes of operations; reads schematics and block diagrams; evaluates performance of digital data systems; completes maintenance reports; inventories installed equipment. *FTG1:* Able to perform the duties required for FTG2; analyzes fire control systems failures and directs corrective maintenance action; supervises work of subordinates; coordinates shop activities and serves as weapon systems test coordinator; analyzes digital data equipment trends and determines corrective action; inspects completed work assignments; supervises fire control plots; tests, analyzes, isolates faults, and adjusts digital computers; prepares planned maintenance schedules. *FTGC:* Able to perform the duties required for FTG1; plans and implements inspection programs and safety inspections; prepares periodic reports; serves as shop supervisor; supervises torpedo/missile fire control system maintenance; prepares quarterly maintenance schedules; trains fire control plotting teams.

Recommendation, FTG3

In the lower-division baccalaureate/associate degree category, 3 semester hours in digital electronics, 2 in computer organization, 3 in basic electronics laboratory, 3 in computer systems troubleshooting and maintenance, and 1 in technical mathematics (12/89).

Recommendation, FTG2

In the lower-division baccalaureate/associate degree category, 4 semester hours in digital electronics, 3 in computer organization, 3 in basic electronics laboratory, 3 in computer systems troubleshooting and maintenance, 1 in solid state electronics, 2 in technical mathematics, and 2 in personnel supervision (12/89).

Recommendation, FTG1

In the lower-division baccalaureate/associate degree category, 4 semester hours in digital electronics, 3 in computer organization, 3 in basic electronics laboratory, 3 in computer systems troubleshooting and maintenance, 1 in solid state electronics, 2 in technical mathematics, and 3 in personnel supervision (12/89).

Recommendation, FTGC

In the lower-division baccalaureate/associate degree category, 4 semester hours in digital electronics, 3 in computer organization, 3 in basic electronics laboratory, 3 in computer systems troubleshooting and maintenance, 1 in solid state electronics, 2 in technical mathematics, 3 in personnel supervision, and 3 in maintenance management (12/89).

NER-FTM-001

FIRE CONTROL TECHNICIAN, SURFACE MISSILE FIRE CONTROL

FTM3
FTM2
FTM1
FTMC

Exhibit Dates: 6/73–Present.

Occupational Field: 8 (Weapons Control).

Career Pattern

SN: Seaman (E-3). *FTM3:* Fire Control Technician, Surface Missile Fire Control, Third Class (E-4). *FTM2:* Fire Control Technician, Surface Missile Fire Control, Second Class (E-5). *FTM1:* Fire Control Technician, Surface Missile Fire Control, First Class (E-6). *FTMC:* Chief Fire Control Technician, Surface Missile Fire Control (E-7). *FTCS:* Senior Chief Fire Control Technician (E-8). *FTCM:* Master Chief Fire Control Technician (E-9).

Description

Summary: Operates, repairs, and performs maintenance on surface missile fire control systems (including weapon direction systems and search radar), telemetry equipment, missiles, and associated support equipment. *FTM3:* Assists in troubleshooting and repairing electrical and electronics surface missile fire control systems; performs preventive maintenance on weapons; follow standard checkout procedures to locate and repair system malfunctions; tests, aligns, and adjusts radar-indicating circuits and power supplies; use test equipment, including voltmeters, oscilloscopes, and signal generators; performs operational tests and operator adjustments on weapon equipment; operates radar equipment, fire control systems, and weapons direction/designation systems in all modes; fabricates, maintains, and installs electrical/electronics cable assemblies; performs electro-mechanical maintenance on mechanical and electrical mechanical assemblies; completes maintenance forms; inventories parts and supplies. *FTM2:* Able to perform the duties required for FTM3; repairs, troubleshoots, and performs preventive maintenance on electrical and electronics surface missile fire control systems, specialized equipment, and circuits; reads schematics and block diagrams; completes maintenance reports; inventories installed equipment. *FTM1:* Able to perform the duties required for FTM2; analyzes fire control system failures and directs corrective maintenance action; coordinates shop activities and serves as weapon systems test coordinator; diagnoses non-routine malfunctions and provides the expertise necessary to effect repairs; inspects completed work assignments; tests, analyzes, isolates faults, and adjusts digital computers; prepares weekly maintenance schedules. *FTMC:* Able to perform the duties required for FTM1; plans and implements inspection programs and safety inspections; prepares periodic reports; serves as shop supervisor; prepares quartely maintenance schedules.

Recommendation, FTM3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics, and 3 in applied mathematics (12/78).

Recommendation, FTM2

In the vocational certificate category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, 3 in basic blueprint reading, and 2 in applied physics. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, and 3 in basic blueprint reading (12/78).

Recommendation, FTM1

In the vocational certificate category, the recommendation is the same as that for FTM2. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, 3 in basic blueprint reading, 2 in personnel supervision, 2 in maintenance management, and 3 in human relations (12/78).

Recommendation, FTMC

In the vocational certificate category, the recommendation is the same as that for FTM2. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, 3 in basic blueprint reading, 3 in personnel supervision, 3 in maintenance management, 3 in human relations, and 1 in record keeping (12/78).

NER-GM-001

GUNNER'S MATE, SENIOR CHIEF AND MASTER CHIEF

GMCS
GMCM

Exhibit Dates: 6/71–12/89.

Occupational Field: 9 (Ordnance Systems).

Career Pattern

May progress from either GMGC, Chief Gunner's Mate, Guns (E-7), or GMMC, Chief Gunner's Mate, Missiles (E-7). *GMCS:* Senior Chief Gunner's Mate (E-8). *GMCM:* Master Chief Gunner's Mate (E-9).

Description

GMCS: Able to perform the duties required for GMGC (Chief Gunner's Mate Guns), or GMMC (Chief Gunner's Mate, Missiles); plans, organizes, implements, and controls work activities in the alignments, maintenance, repair, and operation of guns and missiles and associated equipment; organizes, schedules and evaluates effectiveness of training; administers a long-range planned maintenance program; controls expenditure of materials; prepares performance, inventory, and inspection reports on guns and missiles and associated equipment; administers a program for interviewing, evaluating, and assigning personnel. *GMCM:* Able to perform the duties required for GMCS; coordinates and manages departmental ordance safety operating budget and monitors expenditures; prepares periodic reports concerning equipment performance and maintenance.

Recommendation, GMCS

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, use either GMGC (Chief Gunner's Mate, Guns) in exhibit NER-GMG-001, or GMMC (Chief Gunner's Mate, Missiles) in exhibit NER-GMM-001 as appropriate. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in human relations (8/80).

Recommendation, GMCM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for GMCS. In the upper-division baccalaureate category, 6 semester hours for field experience in management, and 3 in human relations (8/80).

NER-GM-002

GUNNER'S MATE, CHIEF, SENIOR CHIEF, AND MASTER CHIEF

GMC
GMCS
GMCM

Exhibit Dates: 1/90–Present.

Occupational Field: 9 (Ordnance Systems).

Career Pattern

May progress from either GMG1, Gunner's Mate, Guns, First Class (E-6), or GMM1, Gunner's Mate, Missiles, First Class (E-6). *GMC:* Chief Gunner's Mate (E-7). *GMCS:* Senior Chief Gunner's Mate (E-8). *GMCM:* Master Chief Gunner's Mate (E-9).

Description

GMC: Able to perform the duties required for GMG1 (Gunner's Mate, Guns, First Class) or GMM1 (Gunner's Mate, Missiles, First Class); supervises maintenance of ordnance electrical and eletronic systems; supervises the handling and storage of explosive ordnance components; supervises training programs; analyzes discrepancy trends and determines corrective action; prepares quarterly maintenance schedules; conducts inventories; supervises the shipboard environmental pollution cotrol programs. *GMCS:* Able to perform the duties required for GMC; plans, organizes, implements, and controls work activities in the alignments, maintenance, repair and operation of guns and missiles and associated equipment; organizes, schedules and evaluates effectiveness of training; administers a long-range planned maintenance program; controls expenditure of materials; prepares performance, inventory and inspection reports on guns and missiles and associated equipment; administers a program for interviewing, evaluating and assigning personnel; writes directives and correspondence. *GMCM:* Able to perform the duties required for GMCS; coordinates and manages departmental ordnance safety program and the overhaul and repair of shipboard weapons systems; prepares operating budget and monitors expenditures; prepares periodic reports concerning equipment performance and maintenance; forecasts future requirements; plans, organizes, implements and controls activities.

Recommendation, GMC

In the lower-division baccalaureate/associate degree category, use the recommendation for either GMG1 (Gunner's Mate, Guns, First Class) in exhibit NER-GMG-003, or GMM1 (Gunner's Mate, Missiles, First Class) in exhibit NER-GMM-003, plus 3 semester hours in maintenance management (12/89).

Recommendation, GMCS

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for GMC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/89).

Recommendation, GMCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for GMC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/89).

GUNNER'S MATE, GUNS

GMG3
GMG2
GMG1
GMGC

Exhibit Dates: 6/71–12/84.

Occupational Field: 9 (Ordnance Systems).

Career Pattern

SN: Seaman (E-3). *GMG3:* Gunner's Mate, Guns, Third Class (E-4). *GMG2:* Gunner's Mate, Guns, Second Class (E-5). *GMG1:* Gunner's Mate, Guns, First Class (E-6). *GMGC:* Chief Gunner's Mate, Guns (E-7). *GMCS:* Senior Chief Gunner's Mate (E-8). *GMCM:* Master Chief Gunner's Mate (E-9).

Description

Summary: Operates and performs maintenance on shipboard guns, gun mounts, ammunition handling equipment and small arms weapons; inspects and repairs electric, electronic, hydraulic and mechanical systems and servo-systems in shipboard guns, gun mounts, rocket launchers and ammunition handling equipment; tests and inspects gun and rocket ammunition. *GMG3:* Tests and replaces printed circuit boards; inspects and services hydraulic equipment; handles and stows ordnance, pyrotechnics, and small arms; disassembles, inspects and assembles pistols, rifles, machine guns and other small arms; operates mechanical and electrical test equipment; tests for short circuits and grounds in electrical cables and wiring; uses technical drawings; traces circuits on schematics and drawings; completes maintenance records and forms. *GMG2:* Able to perform the duties required for GMG3; analyzes electronic and electrical systems malfunctions; installs and maintains components on the hydraulic systems; uses demolition charges for emergency destruction; interprets data from alignment and indicating equipment and makes adjustments; operates gun mount dynamic test equipment; instructs personnel in the transferring, handling, and storage of ammunition; maintains maintenance records. *GMG1:* Able to perform the duties required for GMG2; supervises crews in transferring, handling, and storage of ammunition; diagnoses electronic and electrical malfunctions; operates an oscilloscope and interprets results; prepares technical drawings; repairs and adjusts gun mount mechanical, hydraulic, and pneumatic systems; prepares periodic equipment performance and maintenance reports and environmental pollution control reports; prepares weekly maintenance schedules. *GMGC:* Able to perform the duties required for GMG1; supervises maintenance of ordnance electrical and electronic systems; supervises the handling and storage of explosive ordnance components; prepares quarterly maintenance schedules; conducts inventories; supervises the shipboard environmental pollution control programs.

Recommendation, GMG2

In the vocational certificate category, 5 semester hours in introduction to electronics, 4 in electronics systems maintenance, and 4 in hydraulics systems maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 2 in electronics systems maintenance, and 3 in hydraulics systems maintenance (8/80).

Recommendation, GMG2

In the vocational certificate category, 5 semester hours in introduction to electronics, 6 in electronics systems maintenance, and 5 in hydraulics systems maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in electronics systems maintenance, and 4 in hydraulics systems maintenance (8/80).

Recommendation, GMG1

In the vocational certificate category, 5 semester hours in introduction to electronics, 6 in electronics systems maintenance, and 6 in hydraulics systems maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in electronics systems maintenance, 5 in hydraulics systems maintenance, and 3 in personnel supervision (8/80).

Recommendation, GMGC

In the vocational certificate category, the recommendation is the same as that for GMG1. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics, 3 in electronics systems maintenance, 5 in hydraulics systems maintenance, and 6 in personnel supervision (8/80).
